OK, understood. I'll let the 'real' LIDS out there read your Morse at the end.

Message-id: <20020530104023.17867.00001147@mb-mt.news.cs.com>

Dimmy proclaimed his innocence, loudly and pitifully, for all to hopefully hear last night. Dimmy says he's innocent and will prevail. Yeah Right. Like he was innocent of selling drugs when he went to Burris correctional institute. LOL He'll prevail by plea bargaining 5 tears instead of the 10 years he deserves. Dimmy says everyone is trying to make him look like Herby. That would be Mission Impossible, as he has NEVER looked that good. Dimmy puts on more spins than Nancy Kerrigan at an ice skating show. I wish the drug dealer, stalker bad luck. LOL

>>

Screw him, he made his bed, now let Big Bubba lay in it with him for a few years.

I'm sure Dimmy can develop a fondness for "stick pussy".

Hi, Steve...

Ham radio is such a large, diverse group that ANYONE can find things that are repulsive to him or her. In other walks of life, we just avoid folks whose behavior we object to, but on ham radio, that's hard to do. In my case, the list of things that drive me up walls isn't too long, but --for example-- my top three are...

1. The "personal" here is Bill.
2. Please help... I **NEED** modifications for my new radio... ANY modifications!
3. If you don't know code (preferably 20wpm) you're not a real ham.

Refering to one's name as a "personal" is repulsive to me. I guess it migrated from CB... dunno. Then I think about the term "handle," which was common during my first 30 years. I used it too, though I haven't in years. "Handle" conjures up interesting pictures and certainly is no less ridiculous than "personal," so I just keep my mouth shut and move on.

Hams who spend good money on new radios and then simply cannot LIVE without modifying them makes me wonder why they bought 'em in the first place. Most of the mods won't ever be used and probably void the warranty. Dumb, dumb, dumb!

The worst behavior on the ham bands in frequently the Extra/Advanced class portions. I know many no-code techs I much prefer as friends rather than some of the higher-class bigoted jerks in our hobby. I am Extra class but I consider this elitist attitude to be the epitome of ignorance. They probably think the same of me.

Anyway... until this message, I have never mentioned any of these pet peeves on the internet, and probably won't again. The point is, there are lots of different kinds of people in this world. Though it sometmes takes effort, I just accept those differences and move on. I tell myself it's verbal "people-watching."

73 & Good luck... Ed Juge, W5EJ

I think someone:
a) Had their cellular capable scanner confiscated
b) Did not pass the Morse code test
c) Transmits illegally on CB with a linear
d) Forgot their Prozac today.

:)

Don't take life too seriously; you'll hurt yourself.

Well maybe I'm missing something, but if you never listened in the 869-900 mhz regions - how do you know if its worthwhile or not ? Personally I've heard drunk drivers get in wrecks (twice) whilst talking on cell phones (probably a bit more entertaining than monitoring taco bells or trains),have had quite a few hearty laughs listening to people engaged in cell phone sex,and have got some useful numeric info which I shall not go into here.
It boils down to the fact that people are inherently nosey - and if your not well that makes you a pretty unique individual.
Your right though as the point is pretty much mute now with most areas going digital.
I think you hit the head on the nail when you said people just want something with no gaps,and will pay more for it. I certainly fall into that category and don't see anything wrong with it at all. As analog cellular dies in that band it is likely be replaced by something else - and if that something else is of interest to you you might just be wishing you had a no gap scanner.

I have it set the same as my work machine. I wonder if it has somthing to do with the particular news server I'm using. My work QTH went through a different news server than the one I use at home. Since my work place upgraded to a full T1 Internet connection I can't use the company's old ISP's news server because our current Internet ISP is a different company.

I see your point. There are rule busters on both sides of the fence, I feel there are far fewer of them on the Ham side however.

I'm not concerned about those issues. As far as gadgets, I already
have too many as it is. I can barely walk around in this room and have
two walk in closets full to the ceilings with more even more gadgets.
I have so many gadgets, I have to do an inventory every few years to
refresh my memory on what I have. I have gadgets that I've long since
forgotten about. I've got other gadgets that I've never even tried or
plugged in yet, but I feel should be kept anyway just to further
clutter up this room. You can never have too many gadgets. Trust me on
this. But it best to keep them all a secret or else all your radio
buddys and buddettes will be over trying to scuzz all your gadgets out
from under you.

>

Dunno... Did you try asking them?

Most areas are using some form of digital service, and not even in
> the 800 band anymore. What is so interesting about listening to cellphones?

Dunno..
> Ive had radios that are capable of it, and never even listened to that
> portion.

Thats mighty "tech" of you.

I think you just want something that has no gaps, and are willing
> to pay more for something that most wont listen to.

Right on. Capitalism at it's greatest.

If its so good how come
> i never see monitoring posts about how Mary got her nails done?

She keeps it a secret.

> Unless you are in the FBI and are trying to foil the next terrorist action,
> dont be bothered with cellular capable scanners

I never let scanners bother me. They know I can smash them in a single
throw.

>
> Morse Code-- have you looked at new licenses lately, looks like our ranks
> are dropping.

I don't think the ranks are dropping. The stream of newcomers may be
slowing down though. I would think that is fairly normal considering
the "rush" of new no-code techs, etc that jumped on the bandwagon in
the past few years is slowing. The "boom" of entry level tickets
issued in the past few years was "no-code" test induced for the most
part. Most in the past that wanted tickets, but didn't want code, have
already grabbed them up.

Ive been a Tech(No-Code) for three years and would like to use
> HF but could care less about morse code. Its an antiquated mode, which had
> its time, although still usefull sometimes,

Most of the present modes are old hat. This includes CW, AM, FM, SSB.
They were all old hat modes when I got a ticket 25 years ago. So
what?
They are still fairly useful aren't they? Or do you propose we dump
all old modes? I think we should be fair about this. If you are going
to dump one old mode, might as well dump em all.

if we keep saying we need Morse
> code, us amateurs will be way behind times(which we still are).

Who is saying this? The only reason we have code tests today is
because international treaty requires it.

Lots of
> people say, when a repeater ID's or i am tuning around the morse sub bands,
> "Is that Morse Code, someone still uses that?" I say yes, its part of
> amateur radio. The person whom im talking to usually says "ill just go to
> Walmart and get those radios for $50 and dont worry about the code"

Well, maybe that would be for the best.

Amateurs
> now adays need to concentrate about leading edge technology, like we once
> did, and stop hanging on to the past. PSk31, APRS, IRLP, and satellite is

> the future, so we should stop saying amateur radio is only HF and Morse.

No that is incorrect. PSK31, APRS, IRLP, and satellites are the
present. In fact, satellites are fairly old hat. Been in orbit since
the 50's. I guess we better dump em cuz they are old hat , huh? Being
so old, it couldn't be possible for them to be very useful anymore.
Right?

> The military does not use MOrse anymore, they use ALE type signals, which is
> faster, and almost error free .

So? I'll alert the media...

Those of you that have been around for a
> while should get off your "Extra or Advanced" horses and get some new blood
> into amateur radio.

New blood? What are you talking about? None of my rf devices use
blood. Is this a new amplifier cooling technique?

Also a Tech (no code) IS still an amateur, so we should
> be treated like one.

Well, I've never kicked or slapped a no code tech yet. Where's the
beef?

I hear it all the time, Im speaking to someone about
> some technical topic, and they happen to be at QRZ.com and look up my call.
> Then they say how come your only a tech? didnt you pass the code test? i say
> no and dont want to be bothered. "well its been good talking to you, 73" is

> digital mode. NO, gee i guess that morse code is really good!

What? If the no code tech works new fangled modes, will he forget all
this if he upgrades? What will happen to you if you upgrade some day?
Will you turn into a veggie overnight, or will this be a gradual
transition to a state of mental blankness? I work all these new
fangled modes, but still prefer cw if I'm just getting on the radio to
have a few relaxing qso's. Its more fun. Most new fangled modes are
actually pretty boring once the "new" wears off. Myself, I think you
are worrying too much about what others think. Who cares what they
think?

And many don't. So?

If a "general" is confronted by one of these CB'ers
> they say "well your so smart do you know Morse code" CB'er replies "NO!!".

Why is the cb'er confronting the ham? Dunno, he sounds kind of
hyperactive to me...

> That amateur will either leave or will find what channel they are on and
> throw a carrier or send code with his friends. This is not the way!!! "cant
> we all just get along"

Well, which is it? If the ham leaves, wouldn't he then be a non issue?
If he gets on the cb band and causes interference, he's a bad boy.
Riley will deal with him someday. If he sends code to his friends, he
would then be a non issue again. Crap....You've got me confused....

>

I guess that I have to chuck in my 2 cents for what it is worth.
1) I do enjoy listing to phones. It use to be fun when Dial a Drug was in full swing and you could listen to your neighbors phoning for a 8 ball of coke or a few points of heroin. Now they have all gone digital and it is just a bunch of old ladies talking about what they are going to cook for supper. The police and fire here are also in the 800 MHz band crypted digital.
2) I was on CB back in the 70s and 80s and also ran out-law with a self converted Kenwood TS-520. I do remember the fights and vandalism, (cutting coax and pulling antennas down) that was going on back then by the CBers. I liked the camaraderie of the local hams so I got my ticket to get away from the bs on 11 meters. Now I noticed that some bands like 2 meters are starting to go like CB went in the late 70s dead keys and echo machines on the repeaters and I wonder if this is because we have removed the CW filter allowing the problem children from CB into the ham ranks.
3) From the latest statistics I have heard is that Ham is having a 1 % per year growth and I think that is good but most of the new hams that I have run into give it up in the first year or two because of the interference on 2 meters and the, "this is my repeter so get off" come backs. This is what will kill us for sure.
4) CB was put in the wrong place on 11 meters and the governments are now finely rectifying that with FRS and the like on UHF. I would like to see FRS get more power, 5 watts or so and the use of repeaters but it is questionable if that will happen.
I guess that I have said my piece and now to watch the TROLLS and FLAMES come out.

John Shitball <johnkimb@hotmail.com>, lying hypocrite, blubbers out of the
other side of his ass how he's never posted information in
<abbcn6$4k8$6@paradoxa.ogoense.net>:
"But not by LJB, Campbell, or me for that matter. Yet you've posted
lists of Chasons, Campbells, and Kimballs complete with phone numbers.
What's even worse is that you constantly point out where Chason works in
some
pathetic weaselish attempt to get him fired, you fucking pussy."

Yet Shitball posts Pussy Paris' Parole Oficer's name, e-mail, phone and
other assorted info in Message-ID: <t9irsre4g2g77e@news.supernews.com> just
one example of many.

John Shitball confesses his dick is so small even a magnifying glass
couldn't detect it in <5necfucqsirppr5f2i9aosd3gqa15uceqn@4ax.com>:
"I doubt I'd need a magnifying glass"

>
> I take back [SSSSSSSSSLLLLLLURRRRRPPPPPP!!!!]

Slurp slurp slurp, Krapout. It's doubtful that it will cut it with Shitball,
er Kibble any more than it cuts it with me, you convicted pedophile.

Or did you forget this exchange in <962lfjeim1@nnrp1.deja.com> with poor hapless Joanie:

"Oh. I get it now. I'm beginning to tune into where you're coming from. It took me a while to sift through all the static, and bring my comprehension down to your 6 year old level, but I see it now. You're the kid everyone always knew growing up who would quit playing and leave the field as soon as he began to lose. You wouldn't completely leave, however. You would just drag your sorry assed game over to the next court, where you would pretend to yourself that nothing had happened. You would then start the same cycle over with hopes that someday, when hell finally freezed over, that you would come out victorious. Alas, your dreams of conquest are still unfullfilled, and you now bring the same tired, dull, witless approach to the usenet arena.

That's what you remind me of. Poor Little Johnny Kimball, last picked in kickball.. err.. *never* picked in kickball because the last team picking would rather play one person short than have you bumbling around, fucking up their game.

I'm sorry for calling you out again, little johnny. If I would have realized what you truly were, I would have let you leave. Please move on now, the kiddie group is a few blocks down."

--
Dimmy Krapout the child raper has another fag tantrum in <pbVl8.8814$Ff3.1518134@news20.bellglobal.com>:
"Shitball suits you. Wiseman apparently has proven that he can be put to better use more than you ever can. He's on to something. On the other hand calling me Krapout plagiarizes FJ lames - someone even more useless than you and Wiseman combined. Fair enough? :)"

I hate to take Wogie's side, but you seem to be obsessed with him.......

Every time he posts you are waiting to pounce.

That alone doesn't say much for your life..........

>The Atlanta ham fest, like all other modern ham fests, was a complete
>waste of time.
>
Granted that the ham population has changed, aged, etc. But Atlanta ham fest has been disssss-proportionately bad for *many* years.

Dayton is "down some" according to some long term Hamvention-goers, but still a mighty fine event.

Atlanta, on the other hand, is bad beyond description. The 2 or 3 years it was at Cumberland-Galleria, it was worse than bad. Crime against humanity seems more accurate.

I guess the "good old days" are gone for Atlanta Ham-Festival. Thankfully, I was there to see it when W4DOC staged an event to be proud of. But that was in the mid to late 1970's when the hobby was in a sharp growth mode, so the manufacturers had a reason to show up, and flea market merchandise hadn't aged beyond being repairable.

Some of the big exhibitors at Ham-Festival back then: Long's Electronics. Den-Tron. Drake. Atlas. Swan. As well as YaeComWood. And the crowd was big enough to fill up all the motels and restaurants within a 2 or 3 block radius of the "old" Marriott. And the flea market filled up all 7 stories of the parking garage.

Anyone remember the time that the grand prize was a "complete 2 meter mobile rig" ? Car included ? Yep, a *new* Rambler Gremlin with a KDK FM-144 inside and a Larson 5/8 wave mounted on the roof.

>And yet I'll go back. I keep on hoping ...
>
I share the hope that it'll get good again. But I won't go till I hear from reliable sources that it's worth the trip. And I ain't ready to start holding my breath for it just yet.

32. Is it safe?

Charles, there is a group of bozos who carried their feud up here from 20
and 75 to keep from being Rileyed (again). Most of it is on another group
but they seem to be legends in their own minds and move it up here now and
again as if we are supposed to care.

The posting immediately above mine is more than likely a forgery but who
cares.

Roger Wiseman, always the most literate of posters castigates another for improper spelling. Let us revisit some of Roger's more glaring gaffes...

WOGER SPELLING DICTIONARY

"Basios"...word Woger uses when he gets neeeerrrrvous.
"Behing"...a cross between being and behind?
"Feamle"...I think he meant female.
"Losser"...only loser Roger can do it better.
"Ignroant"...typical, considering the source.
"Sluprs"...only Rogie knows what this means.
"Travelled"...a Rogerism, replete with ignorance.
"Postss"...pssst...Roger..that should be Posts.

"Defgenerate"...well, it's Roger's word...
"Faity"...he meant to say Fairy, but you know Roger.
"Distribiution"...Roger likes using phonics.
"Biotch"...he meant Bitch, but his phonics took over again.
"Methjadone"...a West Virginia substitute for Heroin.
"Anoinymous"...a cross between anonymous and annoying?
"Sumbliminal"...one of Roger's favorites.
"Recepticle"...either of Roger's moist cavaties.
"Cociane"...a West Virginia drug of choice?
"Tiome"...Roger meant to say Time...but his fingers were numb.
"Beraking"...no definition. Could mean 'beraking' the leaves,
"Amny"...he meant 'any',
"Nlay"...a town in Maylaysia? Vermont?
"Al;ong"...only Wussman knows what this means.
"Becasu"...well, becasu Roger is not the brightest bulb on the tree.
"Seperation". Why? Because Roger cannot "seperate" from his mommie!
"Sisnce"
gnetically
provce (prove?)
Piuzza (West Virginia Pizza)
Schol (school?)
strill (still?)

You get the idea. Roger should not throw stones at those with "weak minds".
Seems he has one of his own.

So sorry, old man. Your "message" failed to impress because of the poor
spelling within the first two paragraphs. I have already "bulid" an antenna
and it works just fine.
I did not read the rest.

Do a killfile on AB8MQ and all will be well. You have by now seen that 95%
of the filth posted on these news groups emanates from Roger Wiseman's
perverted mind. Getting rid of his posts cleans up the news groups
considerably.

Follow your own advice, Polly. Or I'll slap those dumbo ears sore again.

> this ng isn't what you think it is.

Yeah, what is it, stupid? It'd be allright if you'd take this to
alt.radio.scanner.flame_fest where it belongs.

COLLIERVILLE, TN: The FCC on February 7, 2001, sent a Warning Notice to
George A. Ashley, W4FQF,
citing information before the Commission alleging that the licensee has
engaged in deliberate interference on the
75-meter band (3.901 MHz) at various times since October 2000. The FCC says
that some of the interference included the playing of recordings and that
the licensee was warned about such activities on 20 meters in
January 1999. "This constitutes a second warning that any further incidents
of such operation will result in enforcement action being taken against you,
including license revocation, monetary forfeiture, or both," FCC
Special Counsel for Amateur Radio Enforcement Riley Hollingsworth wrote.
Hollingsworth requested that
within 20 days Ashley describe his transmitting equipment at his licensed
location and at any other address in Tennessee.

It looks like pious Polly Parrot was popped BEFORE, in January, 1999..but it
didn't show up in the enforcement log. So much for his hot air about being
such a good operator.
Poor Polly HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA!!!!!

> W4FQF "Polly"
> Master Mule Masturbater

Says Polly, who caused his daughter from his first marriage to commit suicide.

Spurned convicted FELON Eugene Paskell Paris' homosexual advances but can
still point and laugh at Geno's English fuckups, looks like he needs some
remedial English classes that the prison GED didn't help him when he
scribbled:

Eugene Paris proves what a functional illiterate fuck he is when he babbled
the following ironic slobber after injecting heroin
in <kF6j8.7722$E_3.821617@news2.east.cox.net>:

"He should go back to aol at least three he fit in with all the other morons."

Geno proves his lack of comphrension and English skills by getting "poast" confused with "post," even the latter is what Geno's I.Q. matches in <3C77F9FA.2020501@NO_FUCKING_SPAMcox.net>:
"Poast is a cereal, dumbfuck. You Asstralian or just really fucking stupid?"

Geno slobbers in Okie fucked-up English another IKYABWAI in <3C76E2D5.8020900@NO_FUCKING_SPAMcox.net>:
"I'm not sure, your the only prison bitch I know."

Geno gets all excited about the thought of slurping his girlfriend the bulldyke Melinda Brock's used tampons and finding new places to stick them slobbered the following in
<3C64109B.3070402@cox.net>
"You're using tampons now Melinda? Sticking them in your assI suppose"

Weeno the English major who needs to follow his own advice
slobbered in message
<3C4184B8.3010500@NOFUCKINGSPAMhome.com>
"...be quite woman, before I tell everyone that you paid me *NOT* to include you on the list..."

Geno the toilet tick fucks up as usual in his lame in
<3C5598B2.4040203@NO_FUCKING_SPAMcox.net> :

"She Woger as a prime example of Glen Dale "manhood".

Pussy Paris the frog fuckwit shows his grasp of English and homosexual desire in Message-ID: <3C42FDE2.2090900@NOFUCKINGSPAMhome.com>

"You want that I make a group for you all your own?
How does: alt.spanked.cocksucking-morons, grab you? It works for me."

Degenerate who downloads kiddie porn Geno Paris IKYABWAI's and fails to post in English when he slobbered in a drunken stupor
in 3C442EFF.1050608@NOFUCKINGSPAMhome.com:

"It wasn't be dumbass, you've just made a ass out of yourself again. Not that this is any news to anyone."

Homosexual HIV positive Geno Paris fucks up when trying to typo lame as usual in <3C4C35D6.3000709@cox.net>:

"Most proof and all the "deatails" grammar boy."

CONVICTED FELON and kiddie porn downloading degenerate
"Rhesus Slut Fucker: Usenet Assholelicker" <pparis7@NOFUCKINGSPAMhome.com> posted the following IKYABWAI while snorting cocaine in
message <3C45E722.8090708@NOFUCKINGSPAMhome.com>:

" ...and so shook up he no longer takes any sense... not that he ever made much sense to begin with..."

Frog Okie fuckwit and convicted prison bitch slobbered out in
<3C6D3CB0.5080303@NO_FUCKING_SPAMcox.net>:
"What you "know" won't hurt you none, dumbass."

Eugene the English-impaired retard slobbers out another one of his
what else can be expected of him fuckups in
<3C5516C0.4030304@NO_FUCKING_SPAMcox.net>:
"By letting him kick your ass your are making American's in general look
bad."

Pussy Paris the slobbering frog fuckwit babbles in
3C555E59.5060109@NO_FUCKING_SPAMcox.net:

"To think I'd live with your under your drag name .."

Weeno the frog Paris blathered the following irony in
3C442E62.2010806@NOFUCKINGSPAMhome.com:

"See your sig. I realize you are Asstralian therefore prone to lying out
your ass, however you really shouldn't do it when proof is so closely at
hand."

Pedophile and convicted drug-using felon Rhesus Butt Fucker
slobbered the following Ebonics:
"Woger could never finger out how to work AOL"
in <3C217A42.6040209@home.com>.

Geno slobbers out another drunken delusion and proof of his ignorance in
<3C3C44E4.5010201@NOFUCKINGSPAMhome.com>:
"The best part of the Desert Storm was when we got to kill inept British
units through "friendly fire"! The funny thing was you though us Yanks
were doing it on accident."

Geno shows he's visibly upset at the prospect of some one calling his Parole
Officer
in <3C3C5725.3050203@NOFUCKINGSPAMhome.com>:
"Since you contiue to backpedalled and were never are able to call Mr.
Hudson..."

"Please note: Your message is stamped with your IP address and the time
of sending."
- The ICQ WWPager small print "Jesus Slut Fucker" forgot to read

Dumbass drug addicted CONVICT Geno fails to recognize the irony in his
slobbering
in <3C3E0FDF.5000307@NOFUCKINGSPAMhome.com>:
"You should ask yourself, who is the sillier, the man who is illiterate
or the moron who writes an illiterate a message. FYI it's a moot question,
dumbass."

"? Close but no cigar."
- "Jesus Slut Fucker" claims 24.179.113.44 is NOT his IP in email
sent from IP 24.179.113.44

Weeno shows by posting forgeries, IKYABWAIing and slobbering the following Ebonics that he cannot grasp IRONY in <3C55B8DD.1040707@NO_FUCKING_SPAMcox.net>:

"Post proof, faggit"

CONVICTED FELON FUCKWIT
"Rhesus Butt Fucker" <pparis7@NOFUCKINGSPAM!cox.net> slobbered his professional "medical diagnosis" in message news:xJsI8.84282$eD2.2941489@news2.east.cox.net...
"Take the heart pills and breath into the paper bag."

Rhesus Butt Fucker <pparis7@NOFUCKINGSPAM!cox.net> drooled his bastardization and mangling of
a simple phrase and blatant IKYABWAI in <i1uI8.84898$eD2.2970260@news2.east.cox.net>:
"Via Con Dios Henne and may god have mercy on your worthless homo soul."

Geno the Homosexual:

Geno the HIV-positive homosexual prison bitch admits he spanked off another man in
<3C770B03.8020008@NO_FUCKING_SPAMcox.net>:
"Too bad, Woger. I spanked off your latest lover Gott-boy."

Geno the frog fuckwit admits he spanks somebody else's monkey, but loses count easily in 3C559950.3080108@NO_FUCKING_SPAMcox.net:
"How many times have I spanked you off"

"Send me pictures of your bumcrack and I can instruct you."
Rhesus Butt Felcher offers instruction for budding other Big Dumb Gay Things in Msg ID <3B8F35A2.1AD141D8@home.com>

I really don't see much whining about those issues in the newsgroups I read. And even if there were, isn't that what usenet is for? If you don't like those posts, don't read them.

> instead of whining about these issues, why dont you find something else
> constructive to do with your time. bulid an antenna, make a reciever or
some
> other gadget. Then you let others know what you are doing and someone
> improves on your idea.

I built all but one of the antennas I'm currently using. I have a couple more homebrew antennas in storage that I built for the fun of it but don't have a use for. I'm also currently in the middle of building a 10 MHZ WWV receiver. I also have plans to build a QRP transceiver in the near future. Have you built anything lately?

> Cellular Scanners-- Why do people want a 800Mhz full coverage reciever
> today. Most areas are using some form of digital service, and not even in
> the 800 band anymore. What is so interesting about listening to
cellphones?

Maybe it's just something else to listen to? Or maybe some scanner listeners just don't like the idea of the government telling them what frequencies they can and can't listen to at the behest of the cellular telephone lobby? Or maybe they'd like to have a scanner without any gaps so they'll be able to listen to new services that take over the 800 MHZ band once it's vacated by analog cellular phones in the future.

> Morse Code-- have you looked at new licenses lately, looks like our ranks
> are dropping. Ive been a Tech(No-Code) for three years and would like to
use
> HF but could care less about morse code. Its an antiquated mode, which had
> its time, although still usefull sometimes, if we keep saying we need
Morse
> code, us amateurs will be way behind times(which we still are).

AM is also antiquated, second only to CW. Yet there are many hams who enjoy using AM. It's also the primary broadcast mode in the MF and HF bands.

Should we scrap the use of AM? CW is fun to those of us who enjoy it. I'm not going to tell you not to use FM in the VHF/UHF bands.

> Amateur ops always complain about how 11m was stolen and CB'ers dont
> know anything.

Frankly I've never heard an amateur op complain about the 11 meter band being stolen from them. CB has been around for around 50 years now, so I think there are few hams who really have a hangup about losing the 11 meter band. As far as CB'ers not knowing anything, I guess you never heard one saying "QRT and standing by." Yes, there are a few who are really technically savvy, but the most aren't. I could tell you many funny stories of technically-challenged CBer's, but frankly I don't give a rat's behind what goes on on the CB band.

> If a "general" is confronted by one of these CB'ers
> they say "well your so smart do you know Morse code" CB'er replies "NO!!".
> That amateur will either leave or will find what channel they are on and
> throw a carrier or send code with his friends. This is not the way!!!
"cant
> we all just get along"

This has me confused. If a CBer is talking to an amateur on an amateur frequency, he is operating illegally. If an amateur is using amateur equipment on the CB band, he is operating illegally. I've never heard CBers & amateurs talking to each other on the radio though.

> Steve Bossert , KC2GOG (tech and proud of it)

Tom Sevart, N2UHC (Extra and just proud to be a ham)

> and i dont need to hide behind an alias like some others out there!!!

Neither do I.

I have had this radio for years, just pulled it out and i want to
put it back on the air. i have no manual for it (but i'm looking if
anyone knows where i can download one.) i don't want to order and pay
for one, because im not sure the radio even works. i also would like to
do the tx/rcv mod to it, but the only ones i see say to press the "reset"
button, and i don't see one! if anyone has any advice please email me.
i'd really 'preciate it. thanks...73....rick

Microsoft and Compaq have been in bed so long they could file joint tax
returns in 17 states so it looks like a distinction without a difference
from this seat.

And besides, your original brainfart had me fiddling with things a lot
more gee-whizzy than the alt key which I have seen 8 year-olds do.

And while we are picking the flyspecks from the pepper it is also readily apparent that you know little less or nothing about CW. Every op to some extent uses what might be called non-standard Morse. The classics are the dit di-di-dit which is & in American (Railroad) Morse, the use of BT as an almost universal punctuation sign, and the special Canadian di-di-dit-dah-dit for their callsigns. English happens to be free of tildes, umlauts, accent marks, etc but a number of languages using the Latin alphabet are not. So if I wanted to promote you to &#65533;berkellner in Morse it's di-di-dah-dah just as it is alt219 here. Then there are 'cut' numbers, etc.

Turn your hat around, take a shave, and knock off the silly body language,
Stud. Your ship has been holed and by your own hand at that. Glub, Glub.

Bzzzzt! Wrong. The high-bit "graphics" characters started with the original IBM pc, well before Compaq ever went into business, and at a time when DOS was an OS that Billgates had purchased from another company. Those IBM graphics characters aren't standard, aren't any kind of unicode or ascii, and there is absolutely no guarantee that any other news reader on any other computer will be able to interpret them. The alt - numeric keypad keyin is handled entirely in the BIOS, and has even been omitted from more recent BIOS code. There *is* a slashed zero in the alphabetic standards, but I'll leave it for you to find out how to use it (yeah, right).

The first is "es", and is a standard part of International Morse abbreviations, as are BT, SK, and MIM to name several others. They were adopted by the US military decades ago, and are widely understood by all of the operators involved, thereby making them a standard. However, when you go your own way with a computer alphabet, you are running counter to the very reason that internationally agreed upon alphabets have been promulgated.

Not only that, but the use if 8 bit characters is still not supported by all Usenet and by all mail servers. That's why 7 bit encodings such as UUENCODE were first invented. Even the modern MIME standard uses base 64 encoding (a 7 bit code) for Usenet and email binary files.

Yep I am braging about a guy on this NG that gave me a great deal and was a
pleasure to do buisness with.He is Steve WZ1U out of Lakeville, Mass.
I was able to meet him and pick up a nice mint condition Yaesu FT-50RD ht
from him at a really nice price.I can say that his equipment is really in
pristeen condition.So if you see him put something up for sale,don't
hesitate if you want it,as I won't.
Keep up the good deals Steve and I hope to deal with you again.

Hello James,
I had the same trouble here with the internal modem on my Dell desktop computer but only on 10m and 40m bands and then only QRO. I solved it entirely by adding a radio Shack in-line telephone filter right at the modem jack on the back of the computer tower. It is an inline filter and just plugs right in. I have verified through K-Comm that they make them for Radio Shack That solved it 100% even with QRO / SSB. Now with cable modem there has been no trouble on nay band or any power level.

At the time I bought the filter it was $19.95 and the was the part #
1. Radio Shack p/n 43-150 - Telephone RFI filter

It's probably getting in via the crappy cord that comes with a modem to connect
it to the wall jack. Most of these are NOT shielded.

Give him some shielded stuff or anything to prevent the interference.

Some of the RFI to my external modem was coming in on the AC adapter cord.
A few turns of the AC cord on a ferrite toroid fixed the problem.

Obtain a ferrite ring. Wind a dozen or 15 turns of 20 gauge twin speaker
cable on it and connect it in series with his phone line near the computer.

If that doen't work try connecting a three-wire choke in series with the
computer 60Hz power lead.

Well, time will tell. While I don't expect kilowatt stations to take over GMRS, there will most likely be a vast increase in the "noise level" on once quiet frequencies.

The whole CB "phenomenon", is mainly made up of a bunch of different people, looking for different things. GMRS lacks the DX potential, so those type of people will not be attracted to GMRS. But people looking to broaden their radio horizons (without having to take the "cursed" ham test) may be attracted to this alternative.

The people who will be attracted to GMRS will be the same people that became interested in FRS, namely those who want clear quiet communications, or who want to yack it up with the locals. The range on FRS is a bit dismal, so the allure of higher power GMRS radios (not all of which are handheld), may be enticing.

Since most legal GMRS users belong to a community repeater system to get the best coverage from their handheld radios, illegal GMRS users, will have to "Go it alone" on simplex. The only alternative to a repeater system, is to run higher power. With UHF, terrain makes a big difference, and high power doesn't always guarantee a huge jump in range, but that won't stop some people from trying. Higher power is a bit more expensive at UHF frequencies, but I wouldn't be surprised to see people running power in the 100 to 300 watt range.

But like I said before, time will tell..

Dave

James,
Have your neighbor put filters on his telephone line. That's the simplest answer. If you really want to do it right, use shielded cable from the phone-box on the outside of the house, along with an AT&T '1611A' filter at the box. Maybe something like the old 'K-Com' filter at the modem. If that doesn't 'cure' it, nothing will.
'Doc

75. Sending error in morse code

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-03 14:37:41 UTC
From: Shaharudin Ali <shali@pd.jaring.my>
Message-ID: <adfut0$3sg$1@news4.jaring.my>
Source record: 76718

I'm writing to get some clarification regarding the operating procedures adopted worldwide (in morse exams as well as in real CW qso)when an operator/candidate makes an error whilst sending a morse code message.

Which one is correct:

1. SENDING THE ERROR CODE (HH - 8 DITS)IMMEDIATELY AFTER A MISTAKE, AND CONTINUE WITH THE REST OF THE DIGIT/LETTER AFTER THE ERRED LETTER, OR

2. TO SEND THE WHOLE WORD AGAIN, IF THE ERROR OCCURS IN THE MIDDLE OF SUCH WORD - EXAMPLE - IF THE WORD 'RADIO' WAS INTENDED BUT THE OPERATOR SENDS 'RABIO' INSTEAD, DOES HE NEED TO START WITH THE WORD RADIO FROM 'R' AND NOT TO SIMPLY CONTINUE AFTER THE ERROR LETTER 'B'.

I look forward to hearing from you guys soon.

imagine.

I sorta wish Roger would get back on 75 Meters more often.

With Big Al in Hickory not getting on as
much as he used to (..is it true Al's now
in a rest home and QRT for good?) there is
indeed a power vaccuum at the top of the 75 meter
radio-rambo-frootloops food chain, and the kooks on the
Liberty Net are not helping things. Their utterly
boring and redundant, just as gassy flatulance packed
as some of the programming on WWCR and that's bad folks!

C'mon folks! Who's gonna step up to the plate choke
and revive nightime radio fun on 75 Meters LSB again..?
Yes, I know that ole James on 3853 is back
on again late at night, but without the former
regulars on there who've left even his
"late show" has peetered out...

Is there ANY funny shit left on ham radio SSB or are we
stuck with Alex Jones and the Pocket Calculator Show..??
If we are, I'm sellin all this radio shit and takin up
N-gauge model trains, I know there's alot of screwballs
who can provide amusement in model railroading! Ever been
to a train show swap meet..? Just as bad as a hamfest.

I am a tech plus as of 2000 when I passed the 5wpm code test. I am planning on upgrading from Tech plus to General soon and would like to know what form of proof I need to bring to the test. After I upgraded from tech to tech plus a new liscense was issued but it is virtually identical to my previous liscense and says nothing on it that I can see indicating I have passed the code test, so will I need to bring the CSCE from 2000 showing proof I passed the code? I don't know how easy it will be to find that CSCE.

Thanks.

Jim, you've got some good ideas in other posts, so leave mine until last as I doubt this will be the problem. I did have a problem with my new PC (finally got DSL - LOVE it) - the darn thing puts a TON of noise into my tv in the kitchen. I'm on DirecTv with the svideo and audio cables connected directly to the big tv in the front room. Then, I take the rf output of the satellite box and feed it to the kitchen and also upstairs. For whatever reason, the problem was confined to the tv in kitchen. I went and bought a filtered ac power strip from Rat Shack. I was not particularly pleased the the 15 dB filtering spec (the stuff at work has 30, 40, and 50 dB filtered outlets), but it greatly reduced the noise in the picture. Although still visible, it is BARELY visible and no one is complaining. A filtered (not just surge filtering, rf filtering) power outlet on the computer and modem (there are six outlets on the box I bought) may well assist your neighbor with the problem.

For upgrade purposes, your CSCE has EXPIRED. It is only good for 365 days with respect to upgrades. You don't have anything to show and will have to pass the element again.

For purposes of operating on the "novice HF bands," it remains valid to show that you have passed the code element and may operate there - if not shown on your license (by the "Tech Plus" class designator).

I assume that you passed your code element after April 14, 2000. Otherwise, you would have a license that says "Tech Plus" in hand and wouldn't need to ask the question.....

Hi everyone.

I've been playing around with AGWPE on my desktop and laptop for the last couple of days with quite a bit of success. I have been having problems, however, with AGWPE detecting incoming packets from my radio. Here's the situation that I've been experiencing with both my laptop and my desktop. When using AGWPE, it appears as though the program is detecting about half of the incoming packets and ignoring the other half. When I hear an incoming packet over the computer speakers, there's about a 50/50 chance that AGWPE will detect the packet. Interestingly, I can't hear any difference between packets that AGWPE will detect and those that it won't. The packets that aren't detected by AGWPE are received at the same volume and signal strength as those that are detected, so I can't quite figure out what's going on. By the way, to judge whether AGWPE is detecting a packet, I'm looking not only at the green indicator on the TNC symbol in the menu bar, but also AGWTerminal which I'm running to verify that those packets that are being detected are being displayed properly.

Thanks in advance to anyone who may have some suggestions!

Dick -

You said that right. I bought some gear from Steve a while back; I can't remember if I made good comments about him in the newsgroups after the fact, but if I didn't, I do now. His item was exactly as described, he was a gentleman throughout, and he went out of his way to send many, many pictures via email. I agree with you 100 percent, I would deal with him again without question!

Thanks all who replied to my message. After reading this and checking with some other sources I realize now I will have to retake the code test. I don't really want to but if that's what I have to do I'll do it.

I don't really understand the logic behind this, but rules are rules. I was still going by the old way of thinking, that once your a tech plus your always a tech plus, but effective April 2000 you can really only call yourself a tech plus for a year after the test. And I realize that "Tech Plus" no longer an official designation anyway. Its my fault for not checking on this sooner.

If i were you, I'll get a mobile or a small portable enough 40 meter rig.
If u do CW, then get the handy talkie like Qrp HF rig, with built in cw mode
and even electronic keyer, from Japan.
Then u can have local qso like 2 in 2 meter FM!

You may not have to. Letter of the law was that a CSCE was only
good for 1 year from date. However, since the CSCE granted a new
operating privilege, and THAT doesn't expire, then the CSCE as a
CSCE does expire but the privileges do not. You can (successfully
I believe) argue that the PRIVILEGES granted by the CSCE show
you have 5wpm, as opposed to the CSCE showing that you have
taken the test.

One of those issues that I don't think was properly addressed...

This is a sticky issue, and may need a formal ruling. But, at worst case,
the WORST possible ruling is that you would have to take the test over.

I'm returning to ham radio after a 20 year absence and need to learn my code
all over again.
Can anyone give me the name of a decent downloadable code practice program
which plays out of my computer speakers? I would like it to send random
letters from a list of letters and send a text file (for sample qso's) .

I had a great one called Morsecat that was perfect but it uses soundblaster
but I changed my computer and the new one doesn't have a soundblaster card.
The sound processing is integrated into the motherboard.
tnx

Using WinPack and APRS with AGWPE ,I don't seem
to have that problem. However, from time to time I have
to re unzip and reinstall as some other strange things will
happen. I am of course using a sound-card program.
Luck :-)

I believe that is correct. The CSCE from 1984 (beginning of VE program) to 1991 (first no-code licenses) is a different beast from the one since 1991 on the very point you make.

In the first seven years it was an interim certificate good for one year. Since 1991, while it retained that one year life for element credit, it was also the sole conveyer of operator priveleges for those advancing from No Code Tech to Tech Plus. Nothing in the 2000 scheme changed that in my recollection.

As I said, the FCC interpretation is that a CSCE showing element 1 credit issued after April 14, 2000, is good for only 365 days for upgrade purposes, but is good forever for operating purposes. This means that to upgrade after 365 days from issue, one has to re-take the element, just like any other expired element credit not locked in by a license grant. The quirk is that should the re-test be failed (unless administered by the FCC itself), the person can still operate on the "novice HF" bands.

101. WANTED: Motorola HT-600's, Maxtrac, MCX-100 radios

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-04 20:57:51 UTC
From: jhensley@neocomm.net
Message-ID: <3cfd2bc7.110428783@news-server.triad.rr.com>
Source record: 76645

Hello,
I'am contacting the news list on behalf of a non-profit search adn recue organization that is in need of radios. The radio they are looking for ar VHF Motorola 6 ch HT-600's (10-12 units), Maxtrac min 6 ch (2-3 units), or MCX-100 min 6 ch (2-3 units), also chargers for the ht-600's. We are a federally recognized charity. You can visit our website at http://www.neocomm.net/~jhensley/mtvcap.htm and email me at jhensley@sitestar.net let me know.

Thanks,
Capt. Jerry B. Hensley

If your new one is not Soundblaster compatible, I'll be very surprised.
MorseCat should work although you might not have "standard" IRQ and I/O
address values.

I've been having the same problem, so I rushed out and got the Radio
Shack filter. Problem solved, and the price of the filter has been
reduced to $10.95.

Tnx for your reply
Morsecat runs but the volume is very low because the sound is coming from
the PC speaker.

The integrated sound card may be soundblaster compatable but I don't know
what to do to make Morsecat work with it.
The morsecat website says it may not work with PCI soundcards. This
motherboard has only PCI slots. That's why I don't use my old ISA
soudblaster card.
Maybe there are just a few lines in the config.sys file that are needed but
I don't know what they might be, do you?
Wayne

Hello I got MUCH, MUCH, MUCH more stuff 4 Sale.....

Yaesu Landliner LL-301 phone patch......$29.00

AEA PK-88 TNC with manual $40.00

Swan 350 with Electro-voice 727 desk microphone, and matching Swan
117-C power supply and power supply with manual
works Great.....$139.00

Gonset GSB-201 desk amplifier runs 4 - 811's with manual wired
untested (pick up only Los Angeles) for 110 volts, output is 500 watts on
110 volts.
.....$240.00

Eico 625 Tube Tester with tube chart.....$75.00

Heath-Kit "THE TWOER" in EXCELLENT a COLLECTOR item for sure with the
AC/DC cable, and original heath-kit microphone $99.00

Heath-Kit HW-22 SSB Transceiver with original Heath-Kit microphone,
mounting bracket and matching Heath-Kit power supply.....$125.00

Heath-Kit AM-2 wattmeter.....$20.00

Micro-Match (vintage) # 262 RF Power/VSWR meter...$75.00

Autek Research Message Memory CMOS Keyer MK-1.....$75.00

Palomar R-X Noise Bridge.....$35.00

Palomar Tuner/Tuner PT-340.....$55.00

B & W # 595 6 position antenna switch......$30.00

Courier Port-A-Lab 500 wattmeter/VSWR/Modulation/Relative Field Strength
Meter.....$39.00

Maxon (TWO) CS-0510 4 channel handhelds with swivel cases (can't test do not
have a charger)
Both for $55.00

Yosan HJ-502 "NEW IN THE BOX, NEVER USED" WITH INSTRUCTIONS, AND ORGINAL
BOX
Power/VSWR/Modulation/ AND a frequency counter.....$85.00

Astron RS-20A needs new Positive +, Negative - posts put on ...$45.00

Kenwood SMC-25 speaker/microphone for the TR-2500, TR-2600...$20.00

Kenwood YK-88CN 270HZ C.W. filter on 8830.7 KHZ.
This filter will fits these models:
Kenwood TS-130S,130SE,430S,440S,530S,530SP,830S,670S,660,and
the R-5000. .....$60.00 shipped in the U.S.

Kenwood TU-4C (new in the box) is the Tone Encoder for the Kenwood
TW-4000A 144/440 MHZ dual band mobile radio $45.00
shipped in the U.S.

KENWOOD CK-18 WARC BAND COIL PARTS KIT FOR THE TS-180S (New In
The Box),(UNUSED) This will add 12, 17, 30 meters to your Kenwood
TS-180S, instruction manual included.....$65.00 shipped in the
U.S. ONLY

Kenwood IC-10 (set of two chips) these are required for computer
control when using a Kenwood TS-440S, and R-5000
.....$49.00 shipped in the U.S.

Please view my web
page.....

Greetings all -

Whenever I come across a cool site, I like to sure these with folks.
The site has a cool online antenna plotting tool with a catalog of
over 3300 antennas patterns from various manufacturers. The site also
claims that they will upload any antenna patterns mailed to them that are not
in their catalog (might be worth looking into). Anyhow, here's the
link : www.antennapatterns.com

hope you find this helpful...
Stephen

I have a problem with my thd7a.
Somtimes when charging the radio is resetting.
This causes a problem with receiving in the lowest frq. area (others
is ok)
Sending is ok.

After som (meaningless) menu - jumping the radio is back to normal.
Is this a hw. failure or is it somthing in the sw. of the radio that
causes this problem.

Thanks
Olav_H

Spurned convicted FELON Eugene Paskell Paris' homosexual advances but can still point and laugh at Geno's English fuckups, looks like he needs some remedial English classes that the prison GED didn't help him when he scribbled:

Eugene Paris proves what a functional illiterate fuck he is when he babbled the following ironic slobber after injecting heroin
in <kF6j8.7722$E_3.821617@news2.east.cox.net>:

"He should go back to aol at least three he fit in with all the other morons."

Geno proves his lack of comphrension and English skills by getting "poast" confused with "post," even the latter is what Geno's I.Q. matches in
<3C77F9FA.2020501@NO_FUCKING_SPAMcox.net>:
"Poast is a cereal, dumbfuck. You Asstralian or just really fucking stupid?"

Geno slobbers in Okie fucked-up English another IKYABWAI in
<3C76E2D5.8020900@NO_FUCKING_SPAMcox.net>:
"I'm not sure, your the only prison bitch I know."

Geno gets all excited about the thought of slurping his girlfriend the bulldyke Melinda Brock's used tampons and finding new places to stick them slobbered the following in
<3C64109B.3070402@cox.net>
"You're using tampons now Melinda? Sticking them in your assI suppose"

Weeno the English major who needs to follow his own advice
slobbered in message
<3C4184B8.3010500@NOFUCKINGSPAMhome.com>
"...be quite woman, before I tell everyone that you paid me *NOT* to include you on the list..."

Geno the toilet tick fucks up as usual in his lame in
<3C5598B2.4040203@NO_FUCKING_SPAMcox.net> :

"She Woger as a prime example of Glen Dale "manhood".

Pussy Paris the frog fuckwit shows his grasp of English and homosexual desire in Message-ID: <3C42FDE2.2090900@NOFUCKINGSPAMhome.com>

"You want that I make a group for you all your own?
How does: alt.spanked.cocksucking-morons, grab you? It works for me."

Degenerate who downloads kiddie porn Geno Paris IKYABWAI's and fails to post in English when he slobbered in a drunken stupor
in 3C442EFF.1050608@NOFUCKINGSPAMhome.com:

"It wasn't be dumbass, you've just made a ass out of yourself again. Not that this is any news to anyone."

Homosexual HIV positive Geno Paris fucks up when trying to typo lame as usual in <3C4C35D6.3000709@cox.net>:

"Most proof and all the "deatails" grammar boy."

CONVICTED FELON and kiddie porn downloading degenerate "Rhesus Slut Fucker: Usenet Assholelicker" <pparis7@NOFUCKINGSPAMhome.com> posted the following IKYABWAI while snorting cocaine in message <3C45E722.8090708@NOFUCKINGSPAMhome.com>:

" ...and so shook up he no longer takes any sense... not that he ever made much sense to begin with..."

Frog Okie fuckwit and convicted prison bitch slobbered out in <3C6D3CB0.5080303@NO_FUCKING_SPAMcox.net>:
"What you "know" won't hurt you none, dumbass."

Eugene the English-impaired retard slobbers out another one of his what else can be expected of him fuckups in <3C5516C0.4030304@NO_FUCKING_SPAMcox.net>:
"By letting him kick your ass your are making American's in general look bad."

Pussy Paris the slobbering frog fuckwit babbles in 3C555E59.5060109@NO_FUCKING_SPAMcox.net:

"To think I'd live with your under your drag name .."

Weeno the frog Paris blathered the following irony in 3C442E62.2010806@NOFUCKINGSPAMhome.com:

"See your sig. I realize you are Asstralian therefore prone to lying out your ass, however you really shouldn't do it when proof is so closely at hand."

Pedophile and convicted drug-using felon Rhesus Butt Fucker slobbered the following Ebonics:
"Woger could never finger out how to work AOL"
in <3C217A42.6040209@home.com>.

Geno slobbers out another drunken delusion and proof of his ignorance in <3C3C44E4.5010201@NOFUCKINGSPAMhome.com>:
"The best part of the Desert Storm was when we got to kill inept British units through "friendly fire"! The funny thing was you though us Yanks were doing it on accident."

Geno shows he's visibly upset at the prospect of some one calling his Parole Officer
in <3C3C5725.3050203@NOFUCKINGSPAMhome.com>:
"Since you contiue to backpedalled and were never are able to call Mr. Hudson..."

"Please note: Your message is stamped with your IP address and the time
of sending."
- The ICQ WWPager small print "Jesus Slut Fucker" forgot to read

Dumbass drug addicted CONVICT Geno fails to recognize the irony in his
slobbering
in <3C3E0FDF.5000307@NOFUCKINGSPAMhome.com>:
"You should ask yourself, who is the sillier, the man who is illiterate
or the moron who writes an illiterate a message. FYI it's a moot question,
dumbass."

"? Close but no cigar."

Say it ain't so! My son got his Tech Plus ten years ago (at age 10),
and really struggled with the code. He just renewed his license, and
the Tech Plus was "converted" to plain Technician under the new
licensing scheme. Of course he doesn't lose any privileges as long as
he can prove he passed Element 1A.

But consider this: Since his original license clearly indicates
"Technician Plus," he ought to be able to use that (rather than the
CSCE) for upgrading purposes? After all, when the new licensing system
went into effect, old 1950's era Techs were getting upgraded to
General if they could produce an old license.

No! I think you're OK. See the ARRL website:

http://www.arrl.org/news/restructuring/faq.html#upgrades

The part that's applicable to you is:

"Technician Plus or Technician with 5 WPM or higher Morse code credit
desiring to upgrade to General: With no further code testing, you must
pass Element 3B before April 15, then take this credit to a VE session
on/after April 15. Or, you must pass Element 3 on/after April 15.
Grandfather credit is also acceptable, per above."

The "April 15" they're referring to was in the year 2000.

As I read it, all you have to do to upgrade to General is pass Element
3. That makes sense and is only fair.

What part of "After April 14, 2000" did you miss? Ten years ago was 1992.

>But consider this: Since his original license clearly indicates

No. What he uses is his former Tech Plus license to show that he has the code
element locked in by a license.

He is wrong on this. The thing that expires 365 days after passing the code element is the element credit for upgrading purposes. The operating privilege is permanent. This is one of the complaints to restructuring that was raised - in that the database will NOT reflect this. Technicians who passed code after April 2000 (and haven't yet actually upgraded to General) will be indistinguishable from those who haven't - and after 2010, as former Tech Plus's who got the "downgrade" (in name only) start their second renewal cycle, so will they be indistinguishable as well (the "license class adjusted per 97.21a3" message won't be appearing in that renewal cycle).

That brings up an interesting point. What if someone passed Element 1 on
April 14, 2000? Would they have actually been issued a Tech Plus license?
By the time the license was issued, it would have been after April 15th,
and would not have been issuing Tech Plus tickets. Talk about a Catch 22!

I believe that it was the test session date which controlled this, not the
FCC's processing date. However, for this question, you need an expert. If you
are an ARRL member, ask Bart (the ARRL's VEC).

May 20, 2002

Mr. Michael E. Guernsey
2026 Travis Road
Parchment, MI 49004

RE: Warning Notice--Amateur License ND8V

Dear Mr. Guernsey:

On October 1, 2002, we sent copies of complaints to you that had been filed concerning the operation of your Amateur station ND8V requested a response. That inquiry was pursuant to Section 308(b) of the Communications Act of 1934, as amended, which gives the Commission the authority to obtain information from licensees regarding the operation of their station.

You responded by letter dated December 18, 2001, but your response was unsigned. On March 6, 2002, we returned your response for signature. In a telephone conversation on April 22, 2002, you were reminded to sign and return the letter. We have not received the letter.

Please be advised that all licensees are required to answer Commission correspondence. If no answer is received to our October 1, 2001 inquiry by June 15, 2002, we will initiate enforcement action against your station and operator licenses. This action will range from a monetary forfeiture to station license revocation and operator license suspension.

This is the last warning you will receive about this matter.

>What are the penalties for unlicensed operation of a radio?

Adminostrative monetary penalties (forfeitures) are specified
in Section 503 of the Communications Act (47 U.S.C. s. 503).

Criminal penalties (fines and imprisonment) are specified in
Section 501 of the Communicationms Act (47 U.S.C. s. 501). The fine
limit specified in thatn section had been eoncreased ten times by
certain other provisions of the U S Criminal Code (Title 18, U.S.C.).

Seizure and forfeiture of equipment used for unlicenes operation is
provided for in Section 510 of the Communicationms Act (47 U.S.C.
s. 510).
>
>Where can I find the text of the law that lists the penalties
>of operating a radio with a license?

Administrative monetary penalties (forfeitures) are specified
in Section 503 of the Communications Act (47 U.S.C. s. 503).

Criminal penalties (fines) are specified in Section 502 of the
Communications Act (47 U.S.C. s. 502).

Seizure and forfeiture of equipment used for certain violations is
provided for in Section 510 of the Communicationms Act (47 U.S.C.
s. 510).

Suspension, revocation. and non-renewal of licenses are provided
in Sections 303, 308, and 312 of the Communications Act (47 U.S.C.
ss. 303. 308, 312)
>
>Is the FCC rules, of the Communications act of 1934?
>or is it the United States Code?

Title 47 of the U.S. Code is the codification of the Communications
Act as amended.

FCC Rules Part 1 (Rules of Practice and Procedure - 47 C.F.R. Part 1)
specify what actions the FCC will go through to implement the
administrative authority granted by the Comm Act.

It took two wives before I found one that doesn't bitch about the
radios. Keep looking.

I am blessed. My lovely wife bought me a new rig this past Christmas. I had merely looked and commented on the rig she bought me, it was a complete surprise. She actually encourages me to enjoy my hobby.

139. The Roger Wiseman West Vagina Dictionary

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-06 08:10:36 UTC
From: Oedipus Rex <MissMyMomma@Wiseman.com>
Message-ID: <adn5bl$lg1$0@pita.alt.net>
Source record: 76682
Cross-posted to: alt.radio.scanner.flame_fest,rec.radio.amateur.misc,alt.flame,alt.cocksucker.roger-wiseman

Roger continues to show that he is inept when it comes time to construct sentences...he most often cannot spell the very words he uses to castigate others.
Below is a listing of the Roger Wiseman Dictionary.

WOGER SPELLING DICKSHUNARY

"Basios"...word Woger uses when he gets neeeerrrrvous.
"Behing"...a cross between being and behind?
"Feamle"...I think he meant female.
"Losser"...only loser Roger can do it better.
"Ignroant"...typical, considering the source.
"Sluprs"...only Rogie knows what this means.
"Travelled"...a Rogerism, replete with ignorance.
"Postss"...pssst...Roger..that should be Posts.
"Defgenerate"...well, it's Roger's word...
"Faity"...he meant to say Fairy, but you know Roger.
"Distribiution"...Roger likes using phonics.
"Biotch"...he meant Bitch, but his phonics took over again.
"Methjadone"...a West Virginia substitute for Heroin.
"Anoinymous"...a cross between anonymous and annoying?
"Sumbliminal"...one of Roger's favorites.
"Recepticle"...either of Roger's moist cavaties.
"Cociane"...a West Virginia drug of choice?
"Tiome"...Roger meant to say Time...but his fingers were numb.
"Beraking"...no definition. Could mean 'beraking' the leaves,
"Amny"...he meant 'any',
"Nlay"...a town in Maylaysia? Vermont?
"Al;ong"...only Wussman knows what this means.
"Becasu"...well, becasu Roger is not the brightest bulb on the tree.
"Seperation". Why? Because Roger cannot "seperate" from his mommie!
"Sisnce" He meant Since, but his pudgy little fingers slipped off the keys.
"gnetically" What?
"provce" (prove?)
"Piuzza" (West Virginia Pizza)
"Schol" (school?)
"strill" (still?)
"shoitgun" 12 ga or 20 ga?
"Snoip" (How they spell "snip" in Glen Dale)
"Maturbater". Wiseman does it all the time, he just can't spell it.(leaves a sticky residue on his right hand)
"Coskscuking". It's a Roger thing, as in Lavender Lads.
"Waddleing". Only in Glen Dale, eh?

"Spaeaking". Curtain Boy did this after his second retest.

The original poster stated: "I am a tech plus as of 2000 when I passed the 5wpm code test." That implies he passed the 5 WPM before April 15, 2000 (since no Tech Plus licenses were issued after that). If that's the case he SHOULD have a license that says "Technician Plus" and will not be required to retake the code test.

The real question is whether folks who passed the Tech Plus in the weeks immediately before 4/15/00 were actually issued Tech Plus licenses. By rights, they should have been. But if the license just says Technician, and the CSCE is now expired, they're screwed.

OH Eugene of the halfway house? Maybe you should ask him that very
same question when he shows up at your door step. First though I'd
be thinking about how you are going to explain all those calls you
made to his PO.

WOGER SPELLING DICTIONARY

"Basios"...word Woger uses when he gets neeeerrrrvous.
"Behing"...a cross between being and behind?
"Feamle"...I think he meant female.
"Losser"...only loser Roger can do it better.
"Ignroant"...typical, considering the source.
"Sluprs"...only Rogie knows what this means.
"Travelled"...a Rogerism, replete with ignorance.
"Postss"...pssst...Roger..that should be Posts.
"Defgenerate"...well, it's Roger's word...
"Faity"...he meant to say Fairy, but you know Roger.
"Distribiution"...Roger likes using phonics.
"Biotch"...he meant Bitch, but his phonics took over again.
"Methjadone"...a West Virginia substitute for Heroin.
"Anoinymous"...a cross between anonymous and annoying?
"Sumbliminal"...one of Roger's favorites.
"Recepticle"...either of Roger's moist cavaties.
"Cociane"...a West Virginia drug of choice?
"Tiome"...Roger meant to say Time...but his fingers were numb.
"Beraking"...no definition. Could mean 'beraking' the leaves,
"Amny"...he meant 'any',
"Nlay"...a town in Maylaysia? Vermont?
"Al;ong"...only Wussman knows what this means.
"Becasu"...well, becasu Roger is not the brightest bulb on the tree.
"Seperation". Why? Because Roger cannot "seperate" from his mommie!

Sorry about the confusion in not mentioning the date of my test. I took the test AFTER April 15, so I definitely fall into the post-April 15 category. I never really was a Tech Plus in the traditional sense and my new license has the same class on it - "Technician" - with just a new issue date and a different color paper.

The thing I don't really agree with is the rule that says I can retain operating privilages granted by passing element 1 but then when I go to the test site I can't get credit for it. The way I see it I should either get credit for it or not.

I think there is a valid argument to be made on both sides of this issue but the bottom line is if you read the rules there is no accomodation for element 1 credit at upgrade one way or the other after the 365 days for folks in my category. I'll start re-learning the code soon. Maybe I have kept some of it in my head.

Emergency Situation Report e-mail list for Pennsylvanians

PA-SitRep is a free, 100% non-commercial,
nonprofit, e-mail list and web site.

The PA-SitRep emergency traffic e-mail list is a
tool that will enable you to monitor and report on
major emergency situations throughout the State
of Pennsylvania including weather emergencies,
natural disasters, environmental disasters, civil
disturbances and threats of terrorism, major fires,
and manhunts.

Subscribers are encouraged to utilize their home,
work and cell phone e-mail addresses for receiving
messages from the PA-SitRep e-mail list.

Because messages posted to the list are limitted to
situation reports of MAJOR emergency situations
within the State of PA, message volume on
PA-SitRep is EXTREMELY low.

PA-SitRep is also building a list of PA-SitRep
Contacts, most of whom are Amateur Radio
Operators (http://www.pa-sitrep.com/contact.htm).

PA-SitRep Contacts monitor our higher volume
SitRep/Discussion mail list and post situation
reports ot the discussion list and to the main list.
PA-SitRep Contacts also submit their contact info
for our site and may be contacted for a first
hand situation report should an emergency
situation arise in their area.

Please visit the site to learn more:

http://www.pa-sitrep.com/pasitrep.htm

Thanks. We'll look forward to your participation.

Hey Bill,
My wife did the exact same thing and for our anniversary 2
weeks ago she bought me a new ICOM V8000 because I was searching around to
get the finals replaced in my dead TM201A..... Of course this is my SECOND
wife. The first hated the hobby big time.....

Ok actually I had that problem my self..

What ever I did was hopeless.

Until I talked to my wife seriously about my hobby... AND THEN GAVE HER THE
DELIMA

a)rigs , ps ,antennas OR

b)me looking at other women(just looking nothing else)

After 2 minutes I solved my problem... Its worth a try..

Same here ... of course my XYL is an 'Extra' and uses the new rig more
than I do but it IS mine ... I think :o).

This really is screwed up. I didn't realize a Tech could get HF privileges by passing the 5 wpm AFTER 4/15/00. But I checked and you're correct. Can Techs still get HF privileges by passing the 5 wpm today? How about brand new hams?

I agree with you completely. If you passed 5 WPM, why should you have to retake it. That just creates more work for everybody (applicant, VE, and FCC). And that's what "restructuring" was supposed to eliminate!

Actually, it's the getting un-married part.

My wife reminds me of that often.

Wes

When you are playing with your radio, you are not:

sitting in a bar, drinking away the rent money,

carousing arond with other women,

or a hundred other things that she would have a REAL reason to complain about.

I have been amazed at how many XYL's have so many problems with this hobby.

When my wife threatened to lower the boom on my HF activities due to
her dislike of ANY antenna, I reminded her of all the above points. Now
we have a deal, She doesn't complain as long as I keep the antennas
discrete. So I don't have a big vertical, but do have a nice long dipole
that I hid in the trees.

Actually she is pretty supportive otherwise, and has even bought me new
ham toys!

Breaker 1 nine: I think we've got us a convoy. Thats a big 10-4 rubber duck..... Very educational conversatioin here.. The conversations I have heard on amateur radio are usually searches for parts for their radios. I bought a crystal police scanner for $5. Put a new electrolytic in it and turned it on for some anit-crime action. Dead as a rock.. They've all gone to digital trunk systems. Makes a good weather radio if you can stand listening to a computer try to talk english. Marko

Talk her into getting her license too.
That way it will be like purchasing a washer and dryer.

What we need Darlin is this, etc.. etc..

163. Antenna long wire... in trouble

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-06 20:27:13 UTC
From: ONL5183 in LX <lombry@excite.com>
Message-ID: <e9f0fa29c1781ac61eba7a75d4189f64.91932@mygate.mailgate.org>
Source record: 76605

Hi,

A few questions about antenna for SWL activities in HF bands.

Here is the summary :
Old config : At brussels, 4 stairs building, HW-101 + 5m on the external wall up the roof + 2x 20 m coax in V horizontal installed on the roof (i used only the central cu, not ground connected).
I heard all the world including islands. So worked fine.
see qsl at http://www.astrosurf.com/lombry/qsl.htm

New config : suburban Luxembourg (campaign), 3 stairs building, TS-570D + 20 m coax (central wire only used) wandering in the appartement + 5m along the external wall + 2 x 15m parallel (separation 50 cm) in the garden.
I heard only europe up Scotland, Cyprus, Russie Occ., Tunesia and only one W8 today and many noises (QRM). I do never heard PY, VK, K, W and other Africa DXCC.
So I'm not really happy of my config.

Difference before, after : type of RTX and wire used.

Where is the problem now ? It doesn't seem to be a problem of WX even if these days there are much QRM.
The cable inside the house is useless i think so, thin electric cable or coax, i choose the coax to reduce parasits.

How resolve those problems of low reception (excepting countries near which arrive S59+). I think to :

- Use only coax (as before) using only the central cu wire attached to the PL of RTX (ground not uses). I should use the coax for the antenna too (solution the less expensive).
- More expensive. Keep the coax inside the house and buy a 1.4L marconi + 4 radian at 45 deg (overlal length ar. 2m heigh) or a 1/2L dipole alimented in the middle (overall length ar. 5 m) isolated both side and attached to wood sticks. Botth models should be installed in the middle of the garden (garden is around 15m x 10m)

IS the heigh of the wire or the antenna over the ground (grass of garden) important ? How much minimum and why. What can influence the quality of the signal if the long wire (even coax) is place on the ground ? On the other side a 1/4L vertical + radian is also putr on the ground and seem builded to work this way ? So wehre is the difference (or a wrong and the 1/4L vertical cannot be put on the ground neither) ?

PS. The other solution (I will test) in to move the RTX in Wepion (Namur) on the top of "hills" where I can use a garden over 100 m long. There I think I will heard something if I "threw" a long coax 20 or 50m long 1m above the soil... isn't it ?

Thanks in advance for your technical comments.

Thierry

You will find that a CSCE for the code element issued before April 14, 2000 doesn't expire.... Remember that from 1991-1994, the FCC wasn't issuing Tech Plus licenses - and the only proof those licenseholders may have of actually being Tech Plus is their otherwise expired CSCE's which ARE VALID for element credit. Remember also that for some reason, only an expired novice or tech plus (including techs before 1991) get code element credit even if not currently licensed (and beyond the grace period) but the higher classes do not.

He said that his license didn't say "Tech Plus" which implies to me that he passed the code element AFTER April 14, 2000. Many technicians who have code element credit still refer to themselves at "Tech Plus" even if the license doesn't say so.

That's what the FCC said. This part of restructuring was challenged, but the
FCC declined to hear the issue. So, you have the operating privilege, but the
element credit for upgrade purposes has expired. Sorry - end of story.

>I think there is a valid argument to be made on both sides of this issue but

There is, but it was rejected anyway. Someone probably should have appealed
this under the Administrative Procedures Act (5 USC 701-706) to a U.S. District
Court, but to date, none of the prior petitioners who raised this issue have.

Yes. However, for post-04/15/2000 candidates, there's no way to determine who
has and who has not from the FCC database until they upgrade to general class.

Your problem is you don't have ENOUGH stuff yet. Go find a tail gate session and buy every box of junk and get as many clunker radios as possible. Don't matter if they work or not.

Now come back and pile them into your shack. Everywhere. Make a mess of it. You'll know you hit paydirt when instead of complaining to her mother "he's on that radio again" she now says "he's fooling around with those $&%^# radios again". Once it becomes plural, you have it made.

Now you can sneak in as many new radios as you want, and she'll never notice. If she does catch you sneaking in with one, you can always explain the great trade you made by swapping your old Binford 4305 with quadraflex tuning and heat seeking frequency sensors for it. Don't matter what you say, just jabber on she'll tune you out real quick once you start talking wattages and model numbers and other specs.

Works for me. I also smoke pipes. So far I've acquired four pipes, two radios, an antenna and various pices parts without her noticing.

And the ever famous "it's not mine, I'm holding it for a friend". I always
dread the "that's not the same radio you had is it?"
I don't know how I've managed to talk myself out of a jam so often.

But I look at it this way, as mentioned above....I'm not out in a bar
drinking away the rent money, or out bowling with the guys. All she has to
do is look in the basement and there I sit..happy, but not yet content.
Between the computers and the radios, I'm surprised she puts up with as much
as she does. But when she needs money for some new clothes, or wants to go
away for a weekend I alway pay. Gets me back in her good books!

I cut a deal with my YF, also a ham. It was this 3 nights out with the boys thing.

I got all the radios I wanted.

She cut it down to two nights out.

Seemed fair to me. {;-)

All this hooey over something nonconsequential, at least in my world.

I'm a lead VE in three VEC groups. We've mostly all got the same hit on it.
Come in to us with SOME sort of proof that you've passed a code test at 5.
Tech, Tech plus, novice, certificate...we could give a rat's ass less.

Come in, convince us with reasonable documentation that you've passed the code,
take an exam to upgrade, and GO FOR IT.

If the FCC wants to flame my pants for a reasonable interpretation of the rules,
you've got my address. Come with the judge's all-a-writin' if you wish.

Jesus, you flyspeck pickers out of the pepper need to get a life.

This is just a reminder that this comming weekend many stations from
Balearic Islands (EA6) will be active for the Balearic Islands contest
on the HF bands, both in CW and SSB.

You can have a look to the rules of the contest at
http://www.vhfdx.net/basecib.htm

See you on the bands !

Perhaps a nice, expensive, linear amplifier under the bed might help.
Those things have been known to generate a little heat. If nothing else,
it will (generate a little heat) once your wife finds out how much you
paid for it - many people warm up when they're yelling at someone else.

Same here. My wife bought my first radio years ago after she realised I wanted one and has never complained once about anything I've purchased since. In fact, I have the perfect wife - she likes fishing, boating, country music, SUVs, cooking steaks on the grill, wearing tight pants, and practical jokes. In fact, she even points out the girls with short skirts I might have missed. What more could you ask for in a woman?

Hi All. I'm thinking of buying a shortened G5RV for use on 40 - 10 meters.
I'm aware that you need a tuner to operate this type of antenna and wonder
if the built in tuner in my Kenwood TS440 will be adequate for that purpose.
Welcome your thoughts and suggestions.

Ken

185. Need help installing isolation transformer in S-38C

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-07 14:48:51 UTC
From: msenecal@logicon.com
Message-ID: <50ecc828.0206070648.7a0c034f@posting.google.com>
Source record: 76627
Cross-posted to: rec.radio.amateur.boatanchors,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.antiques.radio+phono

I recently purchased a Hallicrafters S-38C for my brother. I understand from looking at it that the chassis carries a potential. After making some inquiries I have learned that to remove the shock hazard I need to install an isolation transformer.

While I'm still somewhat ignorant of electronics, I'm fairly handy (I recently restored an old SX-99 to working condition). But I feel that working with transformers is a bit out of my league. I would appreciate some help from someone who has done this before. Basically what I'd like to know is what kind of transformer to buy (be specific), and how/where to install it. Any help would be appreciated!

Thanks!

186. All-American Osamas - Unfortunately, a ham...

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-07 16:08:56 UTC
From: richardh@gilat.com
Message-ID: <f73eb761.0206070808.29c212f0@posting.google.com>
Source record: 76628

In today's NY Times, (June 7, 2002) NICHOLAS D. KRISTOF wrote an Op-Ed entitled "All-American Osamas" concerning domestic militia plots.

See the complete article here:
http://www.nytimes.com/2002/06/07/opinion/07KRIS.html

The part that concerns us as hams is this...

"It would be a mistake to put one's faith in the militias' eternal incompetence. Jessica Stern of Harvard has written about an anti-government activist named James Dalton Bell, who earned a degree in chemistry from M.I.T. and is unquestionably brilliant. By age 14, he says, "I was studying the isomerization of benzyl thiocyanate to the isocyanate."
Weren't we all? But Mr. Bell, who is now in jail, is also believed by the authorities to have manufactured sarin, a nerve gas, in his basement. He led a chemical attack against an I.R.S. office and wrote an Internet book called "Assassination Politics," which outlines a very clever scheme to pay for contract killings of federal officials with digital cash in a way that preserves anonymity at both ends. There is also evidence that Mr. Bell talked "hypothetically" of poisoning a city's water supply."

Unfortunately, James Dalton Bell happens to be a ham - N7IJS.
http://www.qrz.com/detail/N7IJS

His email address listed on QRZ confirms his past and his postings.

He is not the first (and probably won't be the last) bad apple amongst us.
Robert Hanson (convicted of spying while working for the FBI) was also a ham. His call was on QRZ but has been wiped from the databases.

It is best NOT to change the internal ckt in the ac/dc set. Instead use
a external isolation xfmr or use two back to back filiment xfmr's. Then
the S-38 is isolated and you can ground and use in a safe mannor.
Otherwise use a polorized plug. I grew up with ac/dc sets in the 50's
Good luck 73 Sparks W4EAS

Hi

Well i experienced the same problem myself....long time
ago.
But after a while I dicovered that I was using the wrong
tactic on her.

I startet to treat her the way I treat my equippment.
Gently in the beginning; First very smooth..trying out what
band she`s on? Then I check out what mode she`s in?
If she is in the "sleepy" CW-corner....save the poppers boys!
But...if she is on the SSB-plane....I slowly pump up the
volume....Pop a Champagne etc.....watch for the background-noise (bubbles)
appearing in her lower part
of the eyeballs? Now`s the time to put the processor
into play...not too heavy in the beginning...better easy
uppwards with levels of bubbles?
Wait untill the band really opens up...then u give her all
that u`ve got,inncluding the afterburner...forget leagal
limits and go for it !!! (USB or LSB ??? it`s her choice.)

Never had a complaint since I changed my tactics??
Hi hi hi !!

>Are unlicensed operations issued a NAL?

Most certainly - the best examples of which are the unlicensed FM "pirate" broadcast stations. "Plug'n'Play" land mobile ("business") radio stations which go inro service without valid licenses, and "CB" operators using uncertified/modified equipment, overpower, or unauthorized channels.

Very often on first offense, the surrender of the equipment in question is part of a "plea bargain" to avois issuance of an NAL, but if that or the BAL procedure does not serve to acheive compliance, asset seizure and criminal action are next.

If I were doing it, I'd install the isolation transformer external to the radio; even though S-38's aren't exactly rare, I wouldn't want to be trying to adding something that would change it from the original. I'd look for a small (100VA? 150VA?) isolation transformer in a case with a cord you can plug into the wall, and a socket into which you can plug the radio. Sorry, I'm not going to get more specific than that...but you might have a look on, say, the MCM Electronics web site for such a beast.

However, the chassis should not be "hot" except through a couple of capacitors, one to each side of the line. The audio output is transformer-isolated, and the antenna input is link-coupled and therefore isolated. It _would_ be a good idea to be sure the caps from the AC line to the chassis are in good condition, and that nobody has done anything to compromise the isolation otherwise. Admittedly, the rules for line isolation are now rather more strict than they were in 1950 or whenever it was built, so an isolation transformer could serve as an added measure of insurance. But you should be able to _ground_ the chassis, also, to provide protection. (Expect the caps would trip a GFCI...)

Cheers,
Tom

What you are describing is an isolation transformer. You plug
the transformer into the wall receptacle - and you plug the radio
into the receptacle on the transformer.
Specs: input 120 VAC, output 120VAC. Current - that depends
on how much current the SX99 needs. The isolation transformer
needs to supply at least as much current as the SX99 is rated
for. Bring money - it won't be a 5 dollar item.
Be sure it is an *isolation* transformer. I saw one advertised
somewhere that was an autotransformer, not an isolation
transformer. You do not want an autotransformer.

There is another way to provide the safety you want, and
it is a lot cheaper. You can install a 3 wire cord and
plug, and use the SX99 only with properly grounded
receptacles. The green ground wire in the 3 wire cable
connects to the chassis. The white wire in the cord
is also electrically connected to the chassis through
existing circuitry. You will need to have someone
who knows how tell you which wire (white and black)
connects where.

Take out an ad:

Addicted to ragchewing, thinking of dropping another $5K on equipment? I have the solution - proven results, you won't buy another thing as long as you have this. One left, hurry before she's gone. Will consider trades for existing new/used equipment or other offers.

...or you could just be blatantly honest...

Take my wife in exchange for your used amateur radio equipment. She won't let me further my hobby so if you're getting out, she'll make sure you stay that way. All trades completely final.

If nobody bites, you can always dangle a high ticket item in front of her that she really really wants and wait for her to start chomping at the bit about getting it, then spring the compromise on her. This could get nasty though when either A) she figures out what you're up to or B) she agrees and that becomes the norm for all of your future purchases.

However you proceed, please - keep us posted so those of us luck...errr..unfortunate enough to not be married yet will know how to handle ourselves should we ever get into the same situation.

One little piece of information.

You may encounter some three-conductor
power cords
with the following colored conductors: Brown, Blue, Green/Yellow

This is the new color coding that was adopted a couple of years ago by ISO
or some international standards body like that. Europe has used it for
years and some imported power cords are actually coded like this. The
USA hasn't quite adopted it yet, so it's not likely you'll find it in a
hardware store (yet).

Anyway here's the break down:

Live (Hot): Black or Brown (goes to the narrow pin on a polarized plug)

Netrual: White or Blue (goes to the wide pin on a polarized plug)

Ground (Earth): Green or Green/Yellow

Most, if not all, of the 'G5RV' antennas sold now use a balun and a piece of coax to the transmitter. This arrangement will work within the range of a internal tuner such as you describe.

If you run into difficulties, try adding pieces of transmission line to make the tuner happier.

Greetings,

Give her lots of help, especially when she works in
the kitchen. Try to get each item just before she
needs it. Pick up anything she sets down and clean
it and put it away. After a while, she will ask you
to do something else. Then you can go to the radios,
but break off if she asks you to do anything and help
her. You do not want her to think of the radios as
her competition. Check with her before you buy anything.
Ask her lots of questions about what you should do.
Get her to think of the purchase as one of her buying
decisions. Agonize over every choice and share
the experience until she asks you to just buy it
and leave her alone.

Also:
- Fix things for her so she has a reason to
keep you around.
- Remember you have the last words, "Yes dear."
(If you do not believe me, ask anyone happily
married for 50 years.)
- Also, she is always the best. No one cooks
better, looks better, drives better, etc. .
Let others provide the reality checks. You
just provide the always ready support.
- Use humor (not same as ridicule).
- Acknowledge the fact, "You are wrong and
she is right."
- Listen to her but do not try to suggest
solutions to her problems. She wants
acknowledgment she has had an experience.
Read "Men from Mars, Women from Venus."
- Acknowledge and praise every thing she
does for you.
- She puts her life at risk to have your
babies. When someone puts their life at
risk for you, you need to take care of them.

Sincerely,
Bill Thomas

OK, I had no idea of that non-aspect of amateur radio. I thought that the unlicensed were merely rounded up without the formalities of licensed stations.

I wouldn't do that! Those capacitors can carry quite a bit of current. My first receiver was an S-38D, which I once grounded. When I turned on the power, an arc formed at the power switch, and it continued until I raced downstairs and frantically threw all the house's circuit breakers. (The arc was between me and the plug.) This made a big impression on my parents, who never forgot it. I didn't either. And I'm sure you won't, either, if it happens to you.

Use that isolation transformer!

Until the consolidation of most of the FCC's enforcement functions
into the newly-minted Enforcement Bureau about a year or two ago,
sanctions (penalties) against licensed stations for violations were
the province of the several Bureaus which formulated the rules and
issued the licenses for the particular service. Unlicensed stations
and operator violations were more-or-less "homeless" and by default
came under the authority of the Field Operation Bureau (or whatever
it was called at the time - it's had four names in the last 40 years).

Thusly. the Field Operations Bureau, which found the violators,
could deal with the unlicensed violator itself. This came to a head
in the 1970s when the CB boom hit the fan and the particular Bureau
which controlled CB licensing insisted that it had jurisdiction
over all operations in or near the CB band, licensed or otherwise.
Their method of handling it was to do nothing after the case against
the violator was referred to them. The mess got even messier with
the advent of non-licensed CB and other services.

Because the licensing bureaus didn't want to handle the loads of
cases coming from the field, the decline of enforcement in eventually
all services in the name of "scarcity of resources" was the result.
The institution of the field-issued monetary forfeiture in the 1980s
helped restore a lot of the morale but budget and personnel cuts
took their toll and with the formation of the Enforcement Bureau the
issuance of forfeitures became a headquarters function again.

AC/DC's are no problem. I don't understand why you would bother. Granted, it was a cheap way to do things back then. They are not, however, particularly unsafe with normal precautions. The S-38 was not a serious communications receiver anyway (more geared to SWL'ing). Used for causual listening - I would think it would be fine the way it is. As someone else stated - many of us grew up with AC/DC sets and they hardly ever caused any problems.

The S-38 I had, I forget which model, had the chassis isolated from the
metal cabinet via rubber mountings. So it wasn't an automatic killer
<G>.
If the rig in question also has them, restoring those mounts should be
the first order of business.

No, a much better approach to that is to say you're buying radio equipment so the two of you can talk as she is riding around town in the car. This works especially well if the two of you don't communicate much around the house in the first place - some talk deprived wives will do almost anything to talk more (especially if she watches talk shows aimed at women - these shows insist "communications" is the holy grail of marriage).

If she isn't fully convinced, explain how a $1500 base radio, a $500 mobile, and several thousand dollars worth of accessories (power supplies, meters, antennas, and so forth), is much cheaper than a cellular phone when you include the monthly charges for the cellular. Okay, perhaps you shouldn't mention the prices unless she is really dumb.

By the way, don't worry about actually having to talk once you get the equipment. If you purchase a radio with enough knobs and buttons, she will never figure out how to use it. Especially if you're a little vague when explaining it to her, and you slightly change the instructions each time (insist she must turn the frequency knob this direction the first time you explain it and the other direction the next time).

Don't forget to scare her a little as you explain how to use the radio. For example, "never touch this (something almost impossible not to touch) when you're using the radio or you'll break it." Mention how expensive the radio is and how much it will cost to repair if she breaks it.

If you're good at all this, she will never figure out how to use the radio, and will too afraid to try. At that point, you can blame the lack of ability to talk on her and she will actually believe it.

After about a month, explain (as sincerely as you can) how much of a mistake it was to get a radio for her car ("it's just too complicated for you to use in a car"). Offer to get her a cellular phone instead - much easier to use. You can then move her radio into your vehicle and have a nice mobile to use.

One last thing, if you really do get a cellular phone for her, don't forget to take the phone off the hook at home whenever she is driving around - you'll be far too busy talking on the radio to actually talk to her. :-)

>I don't know how I've managed to talk myself out of a jam so often.
>

Your technique is good, just not fine tuned quite yet.
Try this, it's low risk:

Bring a rig from your car through the kitchen. When she asks, tell
her you are going to fix it for a guy at work. After it is "fixed"
take it back right through the kitchen, make sure she sees it. Make
sure she sees equipment LEAVING the house, this is crucial, it's the
patented part of my procedure. Keep this up, doesn't matter what the
crap is (old test equipment, HTs, old power supplies, new transceivers
in nice clean boxes). When she is trained well you will know it, she
won't even look up, or else she will say, "Please get those Yaesu
boxes into the basement and out of my kitchen.!"
"Yes, Dear"

Good grief, Roffus. After reading that, even I would agree that you've
been spending way, way, too much time with your radio equipment. :-)

>> AC/DC's are no problem. I don't understand why you would bother.

When I was a kid in the 50's, we had a 78 rpm record player with a
metal arm on it. We'd use it on the back porch which had a concrete
floor, and we kids were always barefoot.
Sometimes we would grab that arm and get the s___ shocked out of us.
We figured out (we didn't know why) but if you put the plug in the
wall the other way it wouldn't shock us.
Geniuses we were.

To sweeten the pot, you could put the ad in the "business opportunities" section - a woman like that would probably be thrilled to help other wives with their husbands' radio addictions. When the wife gets tired of screaming at the husband, the "hired gun" could continue nagging for her. Of course, doing this probably won't make you too popular with the other radio operators in town, but at least she'll be out of your hair if someone takes you up on the deal - that is until your new wife hires her down the road. :-)

220. Hallicrafters SX-88 Bezels FS

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-08 13:21:46 UTC
From: Gary Harmon <gharmon@idworld.net>
Message-ID: <KxnM8.14291$ks6.1688444108@newssvr11.news.prodigy.com>
Source record: 76562

New replacement bezels for the rarest of the rare Hallicrafters SX-88 receiver are now available. Perhaps twenty percent of the known SX-88s have the warped bezel syndrome. There is no way to repair a bad bezel and this newly manufactured bezel solves the problem. They are machined out a solid piece of aircraft aluminum on a CNC machine. All the threaded holes, retaining tabs, openings, tapered faces, and openings are true to the original. They are finished in a wrinkled black satin powdered finish. NOTE: I am not making the bezels. I'm just acting as a facilitator. Bezel will be securely packed and shipped from California. A certain number of bezels must be sold before the second run of 20 can be authorized. Money orders and Pay Pal will get priority shipping when the bezels are available. Personal checks will clear before shipping. If a sufficient number is not ordered then payments will be returned. For questions or pictures contact me directly at gharmon@idworld.net. Seller will pay CONUS shipping. Out of country buyers will pay the difference.

Thanks and 73,
==========

More than any other [basically nonproductive] hobby I have ever
pursued, my wife just doesn't get ham radio and thinks it is
ridiculous. Every time the UPS man dropped off another box, I took
grief. Yet she likes and participates in off-roading, fishing,
camping, kayaking, etc.

I had to buy peace by agreeing to $3,000 more in new car frills.

Amateur Radio Newsline™ Report 1294 - May 31 2002

Amateur Radio Newsline report number 1294 with a release date of Friday, May 31st 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. An airline pilot playing pirate radio operator finally gets caught and a tank you from the FCC to those who solved an R-F-I case. These stories are first on Amateur Radio Newsline report number 1294 coming your way right now.

(Billboard Cart Here)

**

ENFORCEMENT: AIRBORNE UNLICENSED STATION BUSTED

Hams down-under have busted an unlicensed operator who was not only on the air, but also in the air. Rick Wornett, P29KFS, reports from Port Morsby:

--

For many years a non-qualified person has used the callsign P29VS from locations all over Australia. When you find this unlicensed operation extending to aeronautical mobile mode and being used all over Australia, even the most un-informed amateur must start to ask questions.

But no. For years this pirate operation has gone un-reported by VK amateurs, many of whom talked daily with P29VS at either a fixed location in Victoria or aeromobile from various jet routes across Australia. None of these licensed amateurs, supposedly aware of the terms of their license and the limitations of operating with a foreign call, ever queried the use of a P29 call in Australia.

In view of his long and un-challenged operating history, it is only fitting that the pirate should be closed down by P29 amateurs monitoring, providing evidence and insisting that something be done by your ACA.

First heard some years ago while mobile over Western Australia, the callsign was monitored recently and consistently on Tony's net on 14mHz. The P29 radio society queried PNG's administration and was informed that the call had never been issued. In fact this had been determined long ago when an attempt was made to have a PNG license issued. Further work including recordings of callsigns and place names identified the operation as being within Australia. Action taken by the ACA in Victoria has now terminated the operation.

For Amateur Radio Newsline, I'm P29KFS Rick Warnett, IARU chairman P29.
--

The airline that the unlicensed operator works for was not revealed. (Q-News)

**

ENFORCEMENT: A BIG THANK YOU FROM THE FCC

Back on this side of the Pacific, FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth is saying thanks to some ham radio operators, some corporations and the ARRL. He says that they all worked together to solve a long standing interference issue in the Cincinnati Ohio area:

--
AUDIO REPORT ONLY: Hear it by downmloadingf the MP3 version at www.arnewsline.org.
--

Hollingsworth says that this was a very complex case and that everyone worked very diligently to resolve it.

**

RADIO RULES: FCC WILL HEAR PETITION FOR REVIEW ON CC&R”S

Lee McVey, W6EM, tells Amateur Radio Newsline that the FCC has decided to consider his Petition for Review of the Dismissal of the ARRL Application for Review of RM-8763 which he filed in January. The Bradenton, Florida ham says that this will offer the Commission to take another look at the CC&R issue now that preemption has also been extended to two-way Internet services. This, because many such services cannot function effectively without an outside antenna.

McVey says that although the regulations only permit opposition comments on his Petition, he would appreciate receiving any and all replies to opposition comments. Send them by e-mail to lee.mcvey@prodigy.net. More information is at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-222345A1.doc

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the KC2DAA repeater serving Mt. Beacon New York.

(5 sec pause here)

**

RESCUE RADIO: HAMS ON THE FIRE LINES IN NEW MEXICO

Ham radio has been aiding with communications as a wildfire -- dubbed the Borrego fire -- races across the New Mexico highlands. According to Amateur Radio Newsline’s Jay Miller, WA5WHN, in Albuquerque, the 145.19 repeater atop Pajarito Mountain played a key role during evacuations of the towns of Cordova and Truchas. This is the very same repeater used during the fire in Los Alamos.

Jay reports that at one time over 40 members of New Mexico Search & Rescue has been placed on standby for this fire. Almost all are hams with equipped with mobile High Frequency, VHF and UHF voice as well as A-P-R-S capabilities.

Bill Kauffman, W5YEJ, was is the New Mexico Emergency Coordinator. He has been on the 145.19 MHz repeater assisting in communications and logistics. Meantime, Lonnie Scott, AH2AZ, from Santa Fe coordinated efforts at the Emergency Operations Center that was opened in the town of Espanola with Dave Clark, KJ5KG, and Terry Morton, N5XDF, at the Chimayo Elementary School. The evacuation order for Truchas was finally lifted on Thursday May 23rd. (WA5WHN)

**

RESCUE RADIO: ARRL ATLANTIC DIVISION NAMES AWARD WINNERS

Hams from three ARRL Divisions will be honored for their volunteerism following the September 11th 2001 terrorist attacks in New York City and Washington D.C.

According to the ARRL Letter the 2002 Atlantic Division Amateur of the Year Award will be jointly presented to the amateurs of the Maryland-District of Columbia Section, the Western Pennsylvania Section and the ARRL Hudson Division. All three activated their emergency communications systems immediately following the attacks. The Pennsylvania group handled communications where a jet that was highjacked crashed when passengers decided to act against the terrorists.

The Atlantic Division awards committee has also named Bob Arnold, N2JEU, to be recipient of it’s Technical Achievement Award. As previously reported here on Amateur Radio Newsline, Bob Arnold operates the "N2JEU's Web Controlled Shortwave Receivers" from its home in cyberspace at www.ralabs.com/webradio. (ARRL Letter)

**

RADIO RULES: VEC’S TO MEET – YOUR INPUT WANTED

John Creel WB3GXW tells Amateur Radio Newsline that the annual conference of the nations Volunteer Examination Coordinators is scheduled for July 26th in Gettysburg Pennsylvania. This is the annual gathering where the majority of the VEC’ meet with the FCC to discuss the all volunteer testing system and the way it can be improved. (WB3GXW)

**

CONVENTIONS: DAYTON AND THE APRS GANG

APRS was a big hit at the recent Dayton Hamvention and the man who made the mode happen was there to talk about it. A-P-R-S developer Bob Bruninga, WB4APR, talked with Amateur News Weekly’s Jack Parker, W8ISH:

--

The APRS booths at the Dayton Hamvention were always crowded with amateurs seeking new information on the fast growing automatic position reporting system. Bob Bruninga-WB4APR has been refining the technology for more than a

decade. With public service in mind Bruninga says DTMF tones can be used to further expand the APRS system.

Bruninga: “What we are introducing this year is APRs using touch tones. So you can do that with any walkie talkie. So show up at your event and want to report that you are at mile 13 in the marathon you enter a couple of digits and 13 and that tells everybody. The computer will receive and convert that to an APRS position report showing you at mile marker 13.”

At special events, voice nets often become busy. APRS can relieve congestion.

Bruninga: “We hope by having the touch tone capability that everyone out there can enter data. And that keeps traffic off the voice net which could be handled with a couple of key presses.”

Bruninga has the DOS version ready to go. He’s now looking for help on other versions.

Bruninga: “I am writing it in DOS to show people what it can do and am encouraging anybody to write it for a soundcard software because then it’s totally software.”

Newly developed software and the growing popularity of APRS style radios are helping to expand the automatic position reporting system. Bruninga says the marriage of aprs digipeaters and the Internet make it a global communications and information system.

Bruninga: “So, really what aprs is these days is a world wide packet distribution system for real time communications.”

Reporting from the 2002 Dayton Hamvention, this is Jack Parker, W8ISH.

--

More on Hamvention 2002 in future Amateur Radio Newsline reports. (ANW)

**

HANDI HAMS: NEW PROMOTIONAL TAPE AVAILABLE

The Courage Hamdi Ham System says that it now has a ham radio tape available to blind members who want to promote amateur radio in the blind community. The presentation covers the basics of what ham radio is and why it is a fun and useful activity. The tape is free to Handi Ham members for the asking. For more information contact Handi Ham director Pat Tice by e-mail to wa0tda@arrl.net. To get on the text-only Handi Ham Newsletter distribution list send and e-mail to handiham-request@cs.vassar.edu. In the subject line simply put the word “subscribe.” (Handi Hams)

**

RADIO RULES: PART 15 AMENDED TO PROMOTE THE DEVELOPMENT OF HIGH SPEED WIRELESS DEVICES

Turning to regulatory matters, the FCC has amended its rules to promote new digital transmission technologies for high-speed wireless communications. Specifically, the Commission has modified Part 15 of its rules to permit new digital transmission technologies to operate in the 902 to 928 MHz, 2400 to 2483.5 MHz and 5725 to 5850 MHz bands.

(DO NOT READ: The complete document is on the FCC website at fcc.gov/edocs_public/attachmatch/DOC-222567A1.doc (Tnx CGC Communicator))

**

RADIO RULES: TV "CARS BAND" TO BE SHARED

The FCC has also adopted a Report and Order that has expanded the eligibility for licenses in the Cable Television Relay or CARS service to all Multichannel Video Programming Distributors. Now, Private Cable Operators, Direct Broadcast Satellite Operators, Open Video Systems, and others who provide multiple channels of video programming can join Cable Television Systems and Wireless Cable Systems in using CARS microwave frequencies to support their video programming distribution needs. This one can be found at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-222569A1.doc (CGC Communicator)

**

BREAK 2

From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

SCIENCE NEWS: PERIODIC EARTHQUAKES DETECTED BY RADIO GPS

Turning to the radio science page. Were you aware that once every 14 months or so, portions of coastal British Columbia and northwestern Washington State experience an ultra-slow ground motion? Or, that if released all at once, this motion would generate an earthquake measuring more than 6 on the Richter scale?

Well that's what data from a network of G-P-S equipment spanning the region show, say scientists who presented their findings in the April meeting of the Seismological Society of America, held in Victoria, British Columbia.
Thankfully, these "silent earthquakes" are so slow that no one notices them, and no structural damage occurs.
More information is on the web at http://www.sciencenews.org/20020427/fob4ref.asp (CGC Communicator)

**

SPACE AND SCIENCE: AQUASAT LAUNCHED

NASA's Aqua spacecraft, which will orbit the Earth for six years and use a JPL-managed package to collect water cycle data has been launched from Vanderberg Air Force Base in California. The 6,248-pound spacecraft was lifted into space on board a Boeing Delta II rocket. The satellite is equipped with

JPL's Atmospheric Infrared Sounder instrument and will provide scientists with information on changes in ocean circulation, global precipitation and how clouds and surface water processes affect the Earth's climate. (ANS)

**

INTERNATIONAL-UK: HAM RADIO WILL HELP CELEBRATE QUEEN ELIZABETH’S GOLDEN JUBILEE

United Kingdom Amateur Radio operators will help to celebrate Queen Elizabeth's golden jubilee. Jeramy Boot, G4NJH, has more:

--
Commencing next Saturday the 1st of June, the Scarborough Special Events Group will be on the air for 30 days as GQ0OOO to commemorate the Queen's Golden Jubilee. Activity will be on all HF bands, two metres and 70 centimetres, using SSB, CW and PSK31. A special full-colour souvenir QSL will be issued to mark the occasion. Cards may be sent via the bureau or direct to club call G0OOO. Jeramy Boot, G4NJH

--

But that’s not all. According to the R-S-G-B, all U-K amateurs will be permitted to use the G-Q prefix " during the month of June to commemorate the Queen Elizabeth's accession to the royal throne. (GB2RS)

**

SPECIAL EVENT STATIONS: AM ON THE AIR FROM HAMCOM

If you are one of those hams who still gets a thrill when you hear full carrier A-M transmissions, listen up. This one is for you.

Bob Peters, K1J, reports that Chapter 207 of the Quarter Century Wireless Association is sponsoring an A-M special event station. This, at the HAMCOM convention in Arlington, Texas on June 7 and 8.

Peters says that station W-5-A will be located in the commercial exhibits area and will operate on 3.880 MHz and 7.290 daily from early morning until about 5 P-M both days. He says that anyone attending HAMCOM is welcome to drop by and operate. If you can’t but do make contact on the air, a joint Q-C-W-A and HAMCOM QSL will be available for an S-A-S-E. Follow the Q-S-L directions given on the air.

Again that’s station W-5-A on A-M from the Arlington Convention Center June 7 and 8. (QCWA)

**

ON THE AIR: VHF/UHF REPEATER QSO PARTY

Bob McHugh, N4BM, says that the Wichita Amateur Radio Club in Kansas is trying something new. At least new to the United States. It is an operating event in the form of a VHF and UHF Repeater QSO Party which has already met with great success down-under.

According to McHugh, the rationale behind the repeater QSO Party is to get newer hams and more experienced hams on the air at the same time and in the same place. This, to exchange ideas and operation techniques.

McHugh sent along a copy of the rules for the event. We have no way to list them here but if this idea interests you, contact him by e-mail to n4bm@arrl.net (N4BM)

**

DX

In D-X, VK8HA says that the war in Afghanistan may have removed an irritant from the air. According to Henry, when the first bunkerbuster bombs were dropped near Kabul, a rather strong signal on 14.180 appears to have been blown off the air. And V-U-2-U-R adds that that a broadcast station on 7.085 MHz also went off the air at the same time. This leads to speculation that the two transmitters were at the same location.

A lot higher in frequency, there is a new 432.300 Mhz CW beacon now in operation near Sausalito, California. It signs the call K-6-E-R and runs 2 watts into a horizontally polarized antenna. The K-6-E-R Beacon is located in grid square C-M 87 at 1125 feet above sea level.

Lastly, word that G-4-H-C-L who was due to travel to Yemen, on Wednesday the 22nd of May, has postponed his trip. This, due to illness in his family. G-B-2-R-S reports that he was slated to operate from Yemen as 7-O-1-C-L. (From various DX sources)

**

THAT FINAL ITEM: HAM RADIO LICENSING IN ZL

And finally this week, we take another look at the new simplified path to becoming a ham radio operator in New Zealand. We take another look through the eyes of Q-News Graham Kemp, V-K-4-B-B:

--

In ZL from October 2001 there were only two grades of amateur radio licence, Limited and General. In the early 1990's, the New Zealand administration devolved the examining and testing for the Amateur Radio Examination to NZART, the New Zealand Association of Radio Transmitters (Inc.)

The examination paper has 60 multiple-choice questions taken from a 600-question public-domain question-bank. Seventy of the 600 questions are devoted to the Radio Regulations, twenty to the Frequency bands and ten to the Q-code. The remaining five hundred are about electronics, radio communications and operating. The results are given before the candidate leaves the examination site.

--

Kind of sounds a bit like the way we in the United States have been testing candidates since the introduction of the all volunteer testing scheme, well over a decade ago. (Q-News)

225. "PING" in APRS

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-08 21:01:49 UTC
From: indy465@yahoo.com
Message-ID: <877dc28c.0206081301.5af1a333@posting.google.com>

rec.radio.amateur,rec.radio.amateur.misc,rec.radio.amateur.digital.misc,alt.ham-radio.packet,alt.ham-radio.vhf-uhf

I'm still relatively new to packet and APRS, so I'm not familiar with all of the commands that exist in the APRS protocol. Hopefully someone can help me out with a few questions that I've come up with over the last couple of days.

First, can someone explain how to "ping" another APRS station or an APRS digipeater? What I mean by "ping" is that I'd just like to know whether or not my signal is being picked up by a specific station or digipeater. Also, if I'm operating my mobile APRS station from a location where I'm not sure of the digipeater layout, is there some type of general "ping" message that I could send out to see if there are any other APRS digipeaters in the area?

Also, in looking at APRS messages that have come across my station, I've noticed two words that are occasionally used in APRS address lines, "BEACON" and "TCPIP". Could someone please explain these and how/why they are used in an address?

Thanks!

If my understanding is correct......

If TRACE is included in a station's UNPROTO path, the command ?PING? can be sent in a message to that station, and the return path will be sent back as a reply.

I am sure someone else can give a better description.....

We have a set of two-way radios (motorola talkabout type) and some of my kids friends also have them. Is there any fun games that 8-14 year old could play that use the radios and get them to run around the neiborhood or park. I hope this group might have some insite.

Amateur Radio Newsline™ Report 1295 - June 7 2002

==========

A NOTE TO THOSE WHO ONLY “READ” AMATEUR RADIO NEWSLINE(tm)

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would like to invite you to listen to the audio version. This Amateur Radio Newsline (tm) script is actually written for the “spoken word.” It is recorded each by professional broadcasters and is available for private listening or rebroadcast over your repeater. Two methods of delivery are available: FTP MP3 or dial-in telephone.

Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to audio servers providing our voice newscast. Free FTP Downloads are available at our site by clicking on the newscast number at the top of the page.

The Newsline Production Team

==========

Amateur Radio Newsline report number 1295 with a release date of Friday, June 7th 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Kids Day is coming and a legend leaves Top Band. These stories are first on Amateur Radio Newsline report number 1295 coming your way right now.

(Billboard Cart Here)

**

ON THE AIR: KIDS DAY COMING JUNE 15TH

It’s possibly one of the two mot important ham radio days of the year, and its only a week away. We are talking about the second of two Kids Day operating events held every year. Amateur Radio Newsline’s Bruce Tennant, K6PZW, has the story of the event and the man who made it happen:

--

The next Kids Day is June 15 from 1800 to 2400 UTC. Thats Saturday here in the United States. Most of the activity is on 20, 15 and 10 meters, but you can also put kids on the air on your local repeater if you wish.

Kids Day is not a contest. In fact, it is a non structured event where all you have to do is to call C-Q Kids Day, and then put the youngsters visiting you on

the air to talk with other kids visiting other hams. Once the children are talking,the suggested contact exchange might include the youngsters names, their ages, their location and -- for the younger ones -- favorite color. Best of all you can work the same station over and over again if the operator continues to change.

If this all sounds like a great way to spend a day, you might be interested in learning ewhere Kids Day came from. In reality is the story of vision by one man. A man who long before most relized a problem even existed.

It was Larry “Tree” Tyree, N6TR, who recognized that ham radio had no future without a steady influx of new, young hams. Kid hams filled with the wonderment of childhood. That thirst we are all born with to “learn.” To “experiment.” To find out how this or that “really works.”

But Tree Tyree did not just sit there and say let somebody do something. Working woith Oregon’s Boaring Amateur Radio Club, he went out and did it himself. And in creating Kids Day, N-6-T-R, probably established the most important “ham radio holiday” that we have.

“Kids Day.” Just think what it really means. It two days every year where we “grown-up” hams open our hearts, minds and stations to the young. We invite them in. We put them before a mic or key. We put them on the air to experience first hand the “magic” of radio. Then we silently pray they some of them will knock on the door again and say: “...can we talk on the radio again?” When that happens, we know that ham radio’s survival is insured for yet another generation.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, in Los Angeles.

--

The first Kid's Day event was held on December 2, 1994 but it was, N6TR, who took “Kids Day” from a dream to a twice yearly reality now sponsored by the A-R-R-L. And in doing so Larry “Tree” Tyree N6TR figuratively “paid the premium” on the life insurance policy that is Amateur Radio. (ARRL, ARNewsline™, W6AQ)

**

RESCUE RADIO: NEW MEXICO WILDFIRE EMERGENCY FOLLOW-UP

More this week on the role that Amateur Radio operators in New Mexico played as a wildfires raged in that state. As reported last week, hams were called out as soon as the fire emergency was declared. Now, the ARRL Letter provides some in depth follow-up.

The Letter says that on May 23rd, an incident command post was set up in the town of Espanola in response to a so-called "sleeper fire.” This is a lightning-caused fire that smolders before bursting into flame.

This one erupted near the village of Truchas in north-central New Mexico. Over the Memorial Day weekend, more than 250 residents were evacuated from their homes in Truchas and the nearby village of Cordoba.

Rio Arriba County Emergency Communications Manager Lonie Scott, AH2AZ, activated amateur communications support. Amateurs were dispatched to Red Cross shelters set up at two elementary schools in Chimayo, and The Los Alamos Amateur Radio Club's W5PDO system provided support.

By late on May 24, the wind had shifted. The fire was burning away from Truchas. Residents were able to return home starting at 9 AM the next day. New Mexico Section Emergency Coordinator Bill Kauffman, W5YEJ said the incident command post and the shelters closed later that day after all evacuees had returned home.

As of May 29th the fire was still burning in the Pecos Wilderness area of the Santa Fe National Forest, but was not considered a threat to any homes or structures. But as tinder-dry conditions persist across the South-West, amateurs remain on alert in case more wildfires break out. (ARRL)

**

ENFORCEMENT: PIRATE BROADCASTER BUSTED IN PUERTO RICO

Turning to the regulatory arena, the Federal Communications Commission has announced that an investigation by the it’s Enforcement Bureau has led to the seizure of unlicensed broadcast radio equipment allegedly operated by Amil Lugo-González.

The station had been operating on 99.5 MHz from Jayuya, Puerto Rico. The FCC San Juan Office, working in conjunction with the United States Marshals Service and the Office of the United States Attorney for the District of Puerto Rico, seized the equipment on May 21st. The FCC says that on more than one occasion it had issued notices to Lugo-González directing him to cease operation of the unlicensed station. (FCC)

**

ENFORCEMENT: SHORT TERM RENEWALS GRANTED

Meanwhile, two radio amateurs have been given short term renewals of their Amateur Radio licenses. The FCC’s Riley Hollingsworth tells us who they are and the reason each is getting a shortened license term:

--
Hollingsworth: : “A short term of an upgrade to Extra class was given by the Wireless Bureau to Sam Jacobs, K3SAM. The grant was short term due to previous problems involving the filing of a club call sign application.

And, a short term renewal was given to Peter Figuroa, N6IWH, of Berkeley California. Figuroa had been on the Amateur Bands after theexpiration of his license but there were some extenuating circumstances.”

--

In both instances, two year license renewals were granted. If there are no other enforcement issues with either Jacobs or Figuroa over the next two years, each can apply for a full 10 year license renewal in 2004. (FCC, RAIN)

**

CHANGING OF THE GUARD: THE 160 METER GATEWAY NET GOES QRT

A longtime fixture on Top Band has gone silent. This as Vern Jackson, WA0RCR, announces that he has terminated operation of his famed 160 meter Gateway Net. Here is the announcement as Jackson himself made it:

--
AUDIO ONLY REPORT: HEAR IT AT WWW.ARNEWSLINE.ORG
--

Over the almost quarter of a century that it existed, Jackson's net presented some of the top news and information sources in ham radio. This includes Hap Holly's Radio Amateur Information Network and Amateur Radio Newsline, all in high fidelity A-M. (WA0RCR)

**

THE VEC SYSTEM: NEW TECHNICIAN SYLLABUS RELEASED

The Question Pool Committee of the National Conference of Volunteer Examination Coordinators has released the revised Technician Class Element 2 Syllabus into the public domain. This syllabus will be used to develop the new question pool for Technician Examinations going into service on July 1st, 2003. All amateurs are encouraged to submit candidate questions to the Question Pool Committee by this coming September 15th.

Now before you sit down to dream up new questions there are some strict guidelines that must be followed. All proposed questions must be no more than 210 characters in length. This includes all spaces and punctuation. All answers and distracters no more than 140 characters including spaces and punctuation and you must identify both the syllabus area and the correct answer. Also, if the question is rule based, identify the exact reference in the Part 97 Amateur Service rules.

Candidate questions should be sent via e-mail to QPC@arrl.org. The complete syllabus will be posted to the ARRL website within the next few days. (W4WW, NCVEC)

**

REGULATORY: JOINT U.S.- MEXICO COMMISSION MEETING CONCLUDED

Call it radio regulation on an international level. This with an announcement that the FCC's Enforcement Bureau recently took part in the 26th formal meeting of a regulatory body known as the Joint United States and Mexican Commission.

The Joint Commission, formerly known as the Mixed Commission is made up of representatives from the United States and Mexico.
The latest meeting took place in Mexico City during the week of April 22nd. During the gathering the group reviewed 115 cases of harmful radio interference in the United States and Mexican border zone. Of these, 47 were officially closed. A report is at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-02-1063A1.doc (CGC Communicator)

**

REGULATORY NEWS: FDA WEB AGE ON RADIO FREQUENCY HAZARD FROM CELL PHONES

The Food and Drug Administration and the Federal Communications Commission have established a joint web page called "Cell Phone Facts." This, in an effort to provide reasoned answers to the public's never ending health and safety questions concerning the radio frequency power produced by portable cellular and PCS phones, and their base stations. The site is in cyberspace at www.fda.gov/cellphones (FDA, FCC)

**

CONFERENCES: ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE

Technical papers are solicited for presentation at the 21st Annual ARRL and TAPR Digital Communications Conference. The event will be held September 13th to the 15th in Denver, Colorado.

The annual conference proceedings are published by the ARRL. Presentation at the conference is not required for publication. Submission of papers is due by August 5th. Conference registration details and updates, along with more information are in cyberspace available at www.tapr.org/dcc (TAPR, ARRL, ANS)

**

HONORS: CQ MAGAZINE ADDS TO HALLS OF FAME

Forty-four new members have been added to the CQ Amateur Radio Hall of Fame, while the CQ Contest Hall of Fame and the CQ DX Hall of Fame each grew by one member. This, with OZ1LO being honored by his fellow contesters and W0AR being recognized for his accomplishments in DX’ing. The announcements were made at the recent Dayton Hamvention. A complete list of winners is in cyberspace at www.cq-amateur-radio.com in the “announcements” area. (CQ)

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

EMERGING TECHNOLOGY: THE NEW E-MAC

Apple Computer has unveiled a new line of computers exclusively for educators and students. Apple says the new e-Mac will feature 17-inch monitors and high speed G4 processors. The e Mac is slightly smaller than the iMac and includes stereo speakers and a CD-recordable drive. The price for the new e-Mac machines will begin at 999 dollars. (Appple press release)

**

HAM RADIO IN SPACE: BOY BAND MEMBER MAY NOT MAKE IT TO SPACE

Possible problems for a boy-band member who wants to fly in space. The latest news reports quote the Russian Space Agency as saying it has no contract in hand to carry 'N Sync's Lance Bass to the International Space Station.

As previously reported here on Amateur Radio Newsline, Bass has made public his wish to visit the I-S-S. He has already made a trip to Russia to undergo medical tests in preparation for a seat on an upcoming flight.

As of airtime, its not known if Bass has been approached regarding his getting an Amateur Radio license and taking to the ham radio airwaves if he does get to make the trip. (Published reports)

**

INTERNATIONAL – CANADA: NEW RAC CANADA DAY CONTEST MANAGER

Radio Amateurs of Canada Contest Manager Joe Mac Pherson, VE1CH, has announced that the Moncton Seniors Amateur Radio Club has taken over responsibility for the management of the R-A-C Canada Day contest. This, effective immediately. Mac Pherson says that all inquiries or electronic logs related to the R-A-C Canada Day Contest should be directed to ve9qed@rac.ca. Non-electronic logs, for the RAC Canada Day contest should be mailed to the Moncton Seniors Amateur Radio Club at Post Office Box 73, Moncton, New Brunswick, Canada. The postal code is E1C 8R9.

**

INTERNATIONAL - GIBRALTER: RESTRUCTURING AND A NRE LICENSE CLASS

License restructuring is coming to Gibralter. Peter Naish, VK2BPN in Australia has been advised by Wilfred Guerrero that Gibraltar will be introducing the New Foundation Licence by mid-June. Guerrero, who is the Secretary of Gibralter Amateur Radio Society says that the new llicense will be similar to the highly successful Foundation License recently put in place in the United Kingdom. The prefix to be used will be ZB3. (Q-News)

**

DX

The 6 meter D-X season seems to be here. Jay Kesterson, K0GU in Colorado reports over the VHF Reflector on some very early season E skip openings to Europe. Jay notes that on June 4th at 15:14 UTC he heard the EN19 beacon. He then checked for European video signals and was surprised to hear many of them on and near 49.750 MHz. Jay says that some were S 9 plus 20 d-b. He then worked SM3UZS at 15:50 U-T-C followed by OH7PI at 16:45. (VHF Reflector)

Still with 6 meter D-X news, word that St. Paul Island should be on the air late June 29th through July 9th. According to Herb Spoonts, W3IWU, the operation will feature a full time, dedicated six meter station operated by W7XU, N0QJM, W0SD and W0OE. Herb says that the six meter station will only transmit on 50.157 MHz listening up 5 kHz and more when needed. Liaison will be on 28.885 MHz and updates will be provided to the appropriate Six Meter Internet sites and reflectors. St. Paul Island holds the prefix CY and is located in Grid Square will be FN97. QSL via W7XU. (Via E-Mail)

On the High Frequency bands, GB2RS reports that JH0IEW/JD1 and JE0EHE/JD1 will be active from Ogasawara Island through the 16th of June. They will be operating on 80 through six meters, including the WARC bands on SSB and CW. QSL to home calls or via the bureau. (GB2RS)

Also, keep an ear open for W5AA slash TI8 from Costa Rica until the 17th of June. He will operate on all bands with an emphasis on 30, 12 and 17 meters. QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: ATOMIC COFFEE MAKER

And finally this week, if you are a ham who has trouble waking up to keep those wee hours D-X schedules, the answer may be as close as the local appliance store. How about an atomic time coffee maker?

No, we aren’t kidding. We discovered this one last week in an appliance store in the Ft. Lauderdale Florida area. It’s called the Perfect Time Coffeemaker, and according to its manufacturer Melitta Salton Inc, it’s the first such device using radio frequency reception of atomic clock signals to keep it in sync with the National Bureau of Standards time keeping system.

Melitta Salton claims that the internal clock provides accurate time right out of the box by monitoring the WWVB broadcasts from Boulder Colorado. All the user need do is to select his or her time zone and the coffeemaker does the rest. It even automatically adjusts to Daylight Savings Time and its internal back-up batteries keep it going during short duration power losses. Salton also says that it also brews good coffee. And what more could any D-X hound ever ask for. (ARNewsline/4)

Have you considered a computer uninterruptible power supply? There are usually a lot of them on ebay as IT departments upgrade their equipment. Battery condition wouldn't be an issue as isolation is your only need.

Another source of transformers is automotive battery chargers and Malibu light power supplies. I see a lot of these at garage sales. Hooking two reasonably matched transformers back to back as previously mentioned would get you an inexpensive isolation solution for your bench.

I once converted an S-38E (bought without tubes) using the power transformer from a junk audio generator. I used a silicon diode to replace the rectifier tube and rewired the other sockets for 6 volt filament tubes. It worked fine. Just make sure the 6.3 volt winding will power the remaining 4 tubes.

Regards,

Ron Banks

I really wish that YOU WOULD!

Really !! I'm serious.

Ever since R.H. cleaned up 14.313
all we have on there is MXL talking
golf or doing his usual words of
wisdom that can lull even the
most stalward QRM'er to sleep.

BLB has dissappeared from 14.313
and so has KJI. Are they each SK
and committed to the nut house
respectivly..?

We NEED a good ole dose of the old 14.313
of Year's past. Back when there were more
people listening to 14.313 than to the average
20m DX pileup or 3.898 in "it's" heydays
of the 80's & early 90's.

Ham radio HF is now DOWNRIGHT BORNING !!
I think the BARF can re-juvenile-ate
it in a week or two - max.

Those garbage characters are probably italics/bold/underline control characters from the editor they are using. They are trying to place some emphasis on "READ" above.

The original message bears this header:

>> > Content-Type: text/plain; charset=utf-8

The junk characters are Unicode encoded as UTF-8, which makes the first
128 characters come out as ASCII, so those of us with non-Unicode-
enabled clients can at least read that much. RFC 2279 describes
UTF-8.

The trigraphs are hex E2 80 9C before "READ" and E2 80 9D after. These
decode as follows:

E2 = 1110 0010 Three byte sequence, first four bits = 0010
80 = 10 000000 Continuation byte, next six bits = 000000
9C = 10 011100 Continuation byte, next six bits = 011100
Decoded character: 0010 0000 0001 1100 == 201C

E2 = 1110 0010 Three byte sequence, first four bits = 0010
80 = 10 000000 Continuation byte, next six bits = 000000
9D = 10 011101 Continuation byte, next six bits = 011101
Decoded character: 0010 0000 0001 1100 == 201D

The appropriate code chart at www.unicode.org lists these as opening and
closing double quotes, indicating that the original message (1) used
M*cr*s*ft's so-called smart quotes and (2) used double quotes for
emphasis, a quite annoying practice.

Source record: 76486

http://members.tripod.com/~jwilkers/murspage.html
Multi-Use Radio Service (MURS) Information Page

The Multi Use Radio Service is a new VHF Citizens Band Radio service that
has a frequency allocation of five channels. These are:
151.820
151.880
151.940
154.570
154.600
These frequencies are available for public use on a "License Free" basis.

Being a new service, equipment is not plentiful, standardized, or
inexpensive. This is expected to change. Original FRS units were in the
$120-$150 range at first. Now, equipment is available for close to $20.
MURS will undoubtedly follow this trend.

>
> Thanks!

I had exactly the same problem with an S-53.
After checking around with some people with experience I removed the 2
wire power cord and the two capacitors from line to chasis.
I then installed a three wire cord and connected the ground wire (green)
to the chasis. I did not install any capacitors from line to ground.

Works like a charm! And it is safe!

This fix works just fine and involves an absolute minimum of work and
cost. However, for the purists, it does involve modifying the radio;
even though it is a minor mod and easily reversed if you prefer to live
dangerously.

Still wonder about the guy I bought it from since he had it sitting on a
metal radiator (one of those old hot water things which I assume would
be grounded). Maybe that's why I got such a good price.

Good luck
Dave VE3HLU

245. What is the best frequency to use for this application?

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-09 13:40:15 UTC
From: Brian Jarvis <tucats@bigpond.com.au>
Message-ID: <9MIM8.8691$Hj3.27324@newsfeeds.bigpond.com>
Source record: 76488

I have an application where I need to build a small transceiver to transmit over LINE-OF-SIGHT for a distance of 2-3km.

The transmitter will be sending some FSK or similar data at about 15kb/s.

My question is: are there any advantages on choosing a low frequency (low VHF) compared to say 800-900MHz or even 2.4GHz?

I realise antenna size will be larger at lower frequencies.
Also antennae must be omnidirectional.

I want to be able to use as low a power as possible to conserve battery power. The 2-3 km range is critical however.

any advice appreciated

Brian, VK5XS

How do I activate the PMS feature with my new Yaesu VX-7R? I go through the process shown in the manual but on that last step where you hold down the WRITE/MT/V/M button for a half second the display changes to MT instead of PMS.

(PMS here stands for Programmable Memory Scanning and MT for Memory Tuning)

Thanks,

Mike
KI6V

248. VX-7R "My Menu" -- Help!

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-09 15:40:45 UTC

Page 82 of the manual tells how to change the function of the TX/PO/LK key. They call this the "My Menu" Short-Cut Key Setup.

The first step is to hold down that same key while powering up the radio. I do that and get some different beeps while the radio comes up but the display is normal when the radio powers up.

The next step is to choose the Menu Item you would like to assign to this key, then hold down this same key for a half second and the new function will be assigned.

When I do this and hold the key down for a half second nothing happens. If I continue to hold this key down longer the keyboard lock function engages.

Has anyone else figured out how to use this "My Menu" thing?

Thanks,
Mike KI6V

First a good schematic for your specific model helps (their were 5? versions
of the S-38 model)

S-38 Schematic

http://www.nostalgiaair.org/Riders/showinfo.asp?PATH=HAL&IMG=_HAL_15-59.gif&
INF=S38

This was discussed at some length in December 2001 on the boatanchors forum

[earlier post]

Some useful links for further research (and ideas):

http://antiqueradio.org/halli08.htm

Here is an excellent web site for S-38 restoration notes. He even
demonstrates how he "recast" the knobs and notes that the rubber isolators
are absolutely necessary for a SAFE chassis (AC/DC) with the S-38.

http://www.concentric.net/~Stwradio/hals38.htm

http://www.concentric.net/~Stwradio/hals38.htm#Hallicrafters%20S-38%20Restor
ation

and more S-38 links !!
http://www.concentric.net/~Stwradio/hals38.htm#S-38%20Links

add an S-meter
http://antiqueradio.org/art/smeter03.jpg

http://antiqueradio.org/smeter.htm

The Hallicrafters Collectors' Web Site:
http://www.w9wze.org/

Here were my notes on the internal isolation "torroid transformer"
discussion for the S-38:

The UK audio designers gave me an idea to look at a toroidal transformer, as
a possible isolation transformer under the S-38 chassis, instead of the
traditional external isolation transformer Stancor P6410 (50 VA rating).

I received and e-mail for Brian Gladstone, Director of Engineering at
Plitron Corporation in Canada
http://www.plitron.com

BTW S-38 draws 30 watts at 110 Volt according to specs

Plitron makes Toroidal transformers, and by my measurements one of their 50 VA units will slip right in under the S-38 chassis. You can mount it with one screw (use the hole for the old multi-section electrolytic).
You can select from a couple of secondary voltage (110, 117 vac) models.

Presto, same $ 35.00 USD price (thanks to CDN / USD exchange rates) as a separate Stancor P6410 (50 VA rating), without hauling around an external unit.

The AC power cord (on this particular unit under discussion) must be changed to a polarized plug &
fused as well as the rubber isolation mounts repaired/replaced. Then you will again have a SAFE chassis around children. A power switch, if desired, could be mounted on the back chassis (or rework the receive/standby switch on front panel).

I e-mailed to Bob Eslinger, KR1U and he would be interested in hearing from S-38 restorers who are using this approach Torroid transformers, due to their low profile, might be a solution for some of his antique radio restoration clients wishing to maintain appearance, without the external isolation transformer.

[end of earlier post]

```

Then it's obvious that they don't know what they're doing because then they would post this SPAM with the appropriate character set headers.

...But since it's SPAM here anyway (it would be appropriate only to newsgroup "rec.radio.info" which isn't one of the groups they're posting to), WTF cares.

Sir:

Who died and left you as the sole arbiter of who should post what where and when?

I do not subscribe to every amateur radio newsgroup and I'm glad these guys post the Newsline to several groups. I often do not hear Newsline on the air and enjoy reading it on Usenet. A few oddball characters don't bother me. But, then, I am an adult.

This morning I figured out what I was doing wrong! I was trying to use the MAIN band instead of the SUB-BAND to start the PMS feature.

The book doesn't tell us we have to be on the SUB-BAND for this feature to work.

Thanks to those of you who have responded to my question.

Mike

Hey, I saw your GF's movie ("... Ya Ya Sisterhood") this weekend. It's in the #2 spot behind "Sum of all Fears" according to CNN. I won't ask any personal questions, although I was wondering if you've even been able to see her since the movie came out. She probably had to travel a lot.

I didn't really enjoy the movie, but the XYL insisted that we go.

Back to the subject, does Greece honor the IRL?

Hello Gentlemen...

I have made myself a FWD/REF power meter - the usual stuff (ferrite toroid, diodes etc), but I am using a digital display driven by a PIC chip with an ADC. It 's all working, but of course it's not scaled.

Doe anyone know if there is an algorithm or maths equation that always equates, roughly, to the scaling/swing of a needle meter, that I could add to the PIC firmware?

Thanks in advance.

They're not going to let somebody who caused their own daughter 's suicide
like you, Polly to sit in. You just have a grandfathered CONDITIONAL license
to General, Polly, you couldn't pass the General or the code today.
And didn't Riley get you, Polly? Did you list ALL your radio equipment like
you were supposed to?

>

Free Space path loss increases by 6 dB every time you double
frequency. But the good news is that at higher freqs, it's easier to
get antenna gain.

Assuming isotropic radiators (0 dBi gain) at each end of the ciicuit:

Free Space Path Loss (in dB) = 36.6 + 20 Log F + 20 Log D

Where F is Freq in MHz, and D is distance in miles.

So at 146 MHz and 1 mile distance, path loss would be 79.9 dB. At 440
MHz it would be 89.5 dB (about 10 dB more loss). This does not take
into account any losses from earth curvature, hills, trees, or other
obstructions.

The path loss is decreased (improved) by the added gain (dBi) of both
the XMIT and RCV antennas. And omnidirectional antennas can have gain.

If you know your receiver's MDS (minimum discernable signal) and your
transmit power, you can make some calculations to see if your system
will work.

For example, If your receiver's MDS is -100 dBm and your transmitter
is radiating 1 watt (+30 dBm), you could tolerate nearly 130 dB of
path loss with 0 dBi gain antennas. It's best to build in some margin
though!

Maybe. But the tuner may run out of range on some bands, or at some
band edges.

I think a better choice would be a simple dipole of around 50 to 70
feet fed with ladder line and a good tuner.

> Use that isolation transformer!

Wow, that sounds like a product liability issue for Hallicrafters.
Guess that wasn't such a big issue back when we were growing up.
Perhaps it's a good thing you DID have the chassis grounded, so it
wasn't YOU that ended up completing the circuit back to earth. I'm
truly thankful for the contributions you've made to the ham community
since then, Roy. :-)

Fortunately, I never had such a problem with mine like that. Of
course, an isolation transformer won't necessarily protect against
such arcs, and it's also a good idea to have an appropriately rated
fuse (an amp or so?) in the circuit. So, for the OP...get an
isolation transformer that also has a fuse. The schematic I looked at
didn't show a fuse in the radio. I wonder what one of our product
safety engineers would say if he looked at an S-38 or similar radio
today!

Cheers,
Tom

Hi everybody

The original TH-D7 charger is marked 13,5 V @ 70 mA and the problem is that when you insert the charger the battery is disconnected as power supply to the radio.

In other words you have 70 mA awailable for driving receiver(s) TNC and charging and that seems to give problems due to short power surges probable from the microprocessor and TNC together.

I also have a TH-D7 and have seen the same problem - i have switched to an old Nokia 2110 cellphone charger where the hole for the center conductor is made a little larger, it gives me 12 V @ 800 mA which is suficcient for running both receivers and the transmitter at "L" power level.

After spending approximately 30 minutes of my time reading the posts on these two groups (and some of the archived posts), I have come to the educated conclusion that there seems to be a two-sided ongoing battle of wits that is never ending.
On the ladder of intellect, ten being the highest and one being the lowest, I would have to vote for ARS AB8MQ as being, perhaps, the lowest of the group with a one. His limited vocabulary and immaturity places him well below the norm of the posters. On the top end of my scale I would have to vote for Eduardo H. as being nearest the top with his implacable, calm posts. He has shown remarkable restraint and appears to be virtually unflappable. I would also give that Stagger Lee entity an eight on the scale since he/she seems to have the knack of being able to infuriate AB8MQ with but a few well-placed words. This Roger fella seems to have some sort of anger problem and I will return often just for the entertainment value.
I ran AB8MQ's call and noted that his age is not posted. He sounds as if he is still wrestling with puberty and has a lot of growing up ahead of him.

Only a cold blooded sorry son of a bitch would say something like
that. If my child did kill him/herself and you said that I would be
on my way to visit you. If you can't confine your comments to the
person instead of their family, then you are just a losing sick idiot.

>>

Except when it is the truth. If you don't know the true story, butt out.

Zitchey, is just one of many, many aliases that Polly w4fqf child molester,
qrm'er, jammer, liar, thief and all around asshole that not only molested his
own daughter, his first wife knew it and died an early death. Present wife, one
tooth Ruth condones his perversions such as mule mounting. he is 1/2 of the
memphis morons duo.

Hi!

I need help. I have clutter data in planet format as well as height data. I need to update the data and view it. However, I only have GIS softwares available. Is there I way I can convert them to standard formats (USGS, GRASS, etc) using freeware or something?

Help me please!Very urgent!

Benjie

289. Re: What is the best frequency to use for this application?

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-11 05:44:22 UTC
From: "rick@rickfrazier.com" <rick@rickfrazier.com>
Message-ID: <3D058E36.533181AA@rickfrazier.com>
Source record: 76529

Brian:

Generally, the lower the frequency (of the ones you have mentioned) the better coverage you will get for a given output level. Also, while all VHF and above are line of sight, unless you are talking about over water or really barren land, your application isn't really line-of-sight. Think of it this way. If you cannot actually SEE the transmitter from everywhere in the radius you describe, you are not truly dealing with line of sight, and you will need higher power output to accommodate additional loss from obstructions such as trees, bushes and so on. (Envision a bright light at the transmitting antenna and you looking for it with binoculars in the dark.) Also, consider that moisture in the air (rain or even fog) can attenuate signals, and the higher frequencies are attenuated more than lower ones. It wasn't all that many years ago that 1GHz was considered microwave....

Whatever you do, don't believe the range ratings of any equipment you plan to purchase, unless you are literally transmitting between two fixed points over water on clear dry days. Otherwise you may be disappointed in the error rate or loss of signal over your planned path. As a general rule of thumb, I tend to apply a factor of two to four as a divisor for the stated ranges, and up the number considerably if there are obstructions or inclement weather to deal with.

In a nutshell, the advantages of lower frequency are greater range for a given power output. The biggest disadvantage is that the size of a decent gain antenna at lower frequencies is considerably larger. If you are using fixed locations, a couple of yagi's will work great. If you need mobile operation, a really good "base" antenna and a decent quarter wave whip may do the trick. Better would be a gain antenna at each end. However, given that you are concerned about conserving batteries, I'd guess at least one end is mobile in some manner. The mobile end may want to use a smaller antenna, for portability sake. Generally, you can compensate for the smaller antenna and lower power output of the mobile by increasing receiver sensitivity, transmitter power and antenna gain at the fixed end of the link. If "critical" means anything related to life support, you should be looking at getting maximum antenna gain at both ends of the link and beefing up the batteries as much as practical, with a really large over design factor to help increase transmission reliability.

If this is an occasional thing, you may want to look into what you can do using conventional ham equipment, as in most countries digital modes are acceptable under some circumstances. (As an example, in most places in the USA, hams can use certain ham bands for some radio control applications). I don't have the slightest notion of what's legal in Australia, nor of the application you have in mind, so can't evaluate whether the ham bands would work.

Three klicks is not a big deal at any frequency but is probably easier at 400-900 MHz. Might I suggest that using yagis at the receivers would be good insurance for the range and would reduce the battery drain at the transmitter which seems to be your real problem. For that reason I would tend to use UHF simply because good junque is readily available and the antennas react sanely.

There are a lot of remote flood sensors and pollution monitoring gear in this part of the US that run off batteries and solar panels and the occasional wind generator that do a lot more than 3 km and are universally in the UHF range . You know South Australia better than I do.

Best night is Wednesday Eve from 900: to 10:00 PM
Eastern time on WBCQ 7.415 mHz. This is the "Table
of Truth" Broadcast with ONE FULL HOUR of the BEST
Bro Stair bashing you will hear. (last week's show
was great it had all the alleged bizzare sexual stuff
that Profit Stair was allegedly indulging into...and yes
there was some talk of GAY SEX)

The cornballs who do this Wed
nite show have a homepage
with a whole load of links
at this location---> www.thenetteam.net

It's almost as good as the "Hostile Televangelist"
stuff we all saw with great amusement when Jim Bakker
went down the proverbial tubes with his xian themepark
"Heritage USA" a few years back and Fall-well tried
to buy out from under him for pennies on the dollar
to make a "GOP/Conservative Faux Six Flags" (no doubt
complete with the midway game where you "squirt" a stream
of water into Jeses' mouth, watch an angel rise up
on a track, pop a baloon, and you then receive a stuffed
animal toy and a indulgence for yer next visit to
the confession booth.....ooops!!...sorry...got my church's
fried chickens mixed up there folks!!!)

Hello. I need to ID a SMD part on my IC-2000H. It is on the front panel PCB, front side close to the power button 1/2" directly above the DS3 lamp. It is also slightly under the edge of the LCD panel. There are two sets of SMD pads one with a 1K (102) resistor on the left side and the other with the pads of the missing part. It is the same size as the 1K resistor and could be either a chip resistor or cap. Anyone have the service manual, schematic or have one they could look at and get me the info as to what part goes there? The radio received an impact and the little part fell off and is long gone. Also there is no part ID on the board at all. (i.e. R101, C201 etc.) I also need the pin out of the mic. connector.

Thank you,
Randy KB8ASO

The Frederick Amateur Radio Club will be holding the annual Father's Day Hamfest on Sunday, June 16th, rain or shine, at the Frederick County Fairgrounds on East Patrick Street in Frederick, Maryland.

This Hamfest features a large amateur radio, electronics and computer flea market, new and used radio and electronics equipment, antique radios, computers, tools, cables and other technical and hobbyist items. Good food and refreshments are available.

Flea market setup access starts at 6:00 AM. General admission starts at 8:00 AM. Free test sessions for FCC Amateur Radio licenses will be conducted, starting promptly at 9:00 AM.

General admission is a $5.00 donation to the club. Flea market spaces are available for $5.00 each plus one general admission. For more information, visit the Father's Day Hamfest web site at http://www.qsl.net/k3erm/ .

Hi Ken,
The G5RV is a great antenna. I have the shortened G5RV and your auto
tuner on your 440 should work fine. Make sure you keep the ladder line
at least 3 feet from any metal object, if you don't you will have
problems with the antenna.
I have found it to work best as a flat top. Just follow the
instructions that came with your G5RV and you will find it to be a
very nice antenna.
Good Luck and Good DX.

Voldemort:

[Loved the Harry Potter series...]

Unfortunately, your assessment is both on target and so far off it's almost silly.

First, it's on target about there being an ongoing battle of wits among a few of the people that want to monopolize the group.

Second, it's way off target in giving any of the combatants anything above a one on any intellectual scale I can think of, despite the appearance of calmness of a couple of the individuals. Nearly all of them suffer from severe immaturity, or there wouldn't still be a feud going on, no matter what the initial topic that started it off. Of course, to have a battle of wits means they have to have some sort of wit to begin with, and I'm not so sure any of them could score in the two digit range on a standardized intelligence test. Ok, maybe they do make low two digits, because they've figured out how to type, but these days, it's not exactly an indication of high intelligence...

Of course, there's also the significant possibility that it's all a scam (from at least several of the apparent combatants, which might even be pseudonyms of a single individual) and done just to see who they can rope into the fray. Trolling in this manner is not unheard of in many of the news groups...

Overall, the best thing to do is ignore the posts made by these individuals that appear to be suffering from significant intellectual deficiency.

Hi there

A fellow amateur is looking for the pin configuration for the microphone socket on the Icom IC-V200T. The original mic has gone faulty and he would like to replace it with a DTMF mic.

He would also like to know how to assign an alphanumeric tag to the channels so that the tag displays on the LCD.

Thanks in advance!

Regards.

Anonymous coward and all-around fuckwit "Stagger Lee"
<SLee@houston-hunks.com> revealed what a hypocrite he is and ironically
admits he has no credibility by his own definition in message
<3C36FDCC.76EC185D@houston-hunks.com> :

"Therefore, I find your story difficult to believe. Your own anonymous
status makes the story even less credible."

SPANKARD Faggot Lee admits he's crossposted in order to help his pathetic,
syphlitic ass win a flame war, if you can read his chicken scratching
EBONICS
in <3AA5A686.E2ACE517@some.net>:

"I *have* seen to it that some of JBO's irrational posts show up in
alt.2600, because the owner of cotse practically lives there (tell you
something?), and I wanted the owner of cotse to ?>xperience JBO's posts
first hand. Cotse is doing a service to no one when
t confuses freedom with license -- the typical error of the neophyte
do->ooder -- and Roger's posts are a prime example of the typical
esults that error."

From: Stephen K. Gielda <steve@cotseNOSPAM.com>
<MPG.14f8c0c6d9215288989a3b@news.supernews.com>:
"Cotse does not care about flamewars, unless they violate our policies.
You are involved in a flamewar and you want to win it by terminating

your opponents account."

Yet your preffered option instead of subpoena logs, is to whine in the newsgroup about it. But you and the ham from Cameron likes to censor other's free speech, but it's allright for you to say anything, huh, wife beater? Yep, ol' Faggot Lee regularly beats up his wife.

> And there are many others he has similarly harassed.

Translation: "Whaaaaaaaaaaaaaaaaaaaaaahhhhhhh, I'm too stupid to know how to use a killfile."

> The police chief of his home town is well aware of his activities

The police chief is under some heavy fire at the local city council meeting. According to the June 11, 2002 Wheeling newspaper. Looks like he may be sued and the city of Glen Dale, according to Donald Dimitrio.

>according to \ /

Yep, he's been stalking me here in Marshall County. Poor thing's going to have a restraining order against himself if he keeps it up.

Perpetual Moron

You have shown your ignorance, your inability to rationalize a situation, your inability to show even the smallest amount of intelligence.

You speak as a Cyber Cop... Is that what you look at yourself as being? As self-imposed-marshal-of-usenet? Is that your little mission in life? You seek to impose your views on everyone else and to hell with the accepted norms.

Idiot.

Fuck Head.

Loser.

Are you an ignorant fucking WebTV user? You act like it.

First there was AOL'ers, now there is WebTV. It's nice for AOL'ers to finally have someone to pick-on.

You get your No-Code first? Cant do Morse? I bet you dont know the difference between a Zener Diode and a Transistor.

I bet you keep goats in the house for companionship... Or maybe it's just the smell eminating from your boyfriend's ass that smells like a goat.

I bet you suck the jack-bumps off your boyfriend's balls don't you?

You are a sick, sick person. You need help. You need to seek a professional psycho-therapist to help you in your time of need."

This coming Sunday....

!! ** More Buyers PARKING available ** for details see
http://web.mit.edu/w1gsl/Public/flyer

*** !!!! In our Traditional GARAGE and lot !!!! ****
so come rain or shine or super heat the Flea is on !!!

********* $1 buyers discount with hardcopy of this notice ********

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday June 16th 2002
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $5 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $20 for the first and
$15 for each additional at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,
will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23- (PL 88.5) W1BOS/R and
W1XM/R-449.725/444.725 (PL 114.8/2A).

Sponsors: MIT Electronics Research Society
MIT UHF Repeater Association (W1XM)
MIT Radio Society (W1MX)
Harvard Wireless Club (W1AF)

For more info / advanced reservations 617 253 3776

********** $1 buyers discount with hard copy of this notice ************

<<<<<<<<<<<<<<<<<<<<<<< cut here >>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>>

Mail the coupon below by the 5th of the month to be a Prepaid Vendor.

FLEA at MIT 2002 Rates

SELLERS

This year each vendor must have a Cambridge Vendor License.
We will do all the paperwork to get the one day Cambridge licenses.
To keep the spaces affordable we are discounting your first space.
To use your spaces the named vendor MUST be present.
Rates include one admission per space.

Season Pass $99 First Space - includes $70 for Cambridge Vendor Licenses
$70 additional spaces

Advance $17 First space - includes $10 Cambridge Vendor License
$12 Additional Spaces
Must be received by the 5th of the month.

Gate Admission $20 First Space - includes $10 Cambridge Vendor License
$15 Additional Spaces
Admission is after the prepaid vendors

Early Bird Buyer -Admission after the prepaid vendor line is admitted. ~ 7:15AM
** You may not sell. **
$15 per person at the gate.

Many ISP's, Giganews, Supernews,e.t.c. have dropped this group due to complaints about Roger. Keep in mind that allthough this is a forum with a "flame" name, it is public and as such your behavior could become the focus of local law enforcement officials whith time on their hands and nothing else to do but watch the local loony bin. Why these people behave in such a manner is beyond me. Tie their comments from 75 and 20 meters to the comments here and their real identity becomes immediately apparent. These teenage girl bitch fights don't read well here anyway, they were much funnier (and pathetic) on the ham radio. It would make a good thesis for a psychology student. "Elderly white men still suck thier thumbs" type thing.

Ok, here goes

Please keep in mind I am not a radio amateur and anything more than gain, and SWR leave me floundering.

I am getting interested in launching weather balloons to a high altitude and taking photographs. Part of the task is sending telemetry data back to a base station so I can track the unit. I am using a Basic Stamp 2sx so generate DTMF tones of the telemetry data at a rate of 5 tones per second.

I want to a cheaply as possible be able to transmit this data line of site (straight down) around 30KM (20 miles). I have a set of Motorola t5100 2 way radios, which transmit 500mw of power in the 467Mhz range. What I would like to know is if it is possible to get this range out of one of these transmitters?

I will be using an Icom IC-R2 scanning receiver to receive the signal, and intend on building a 12 element or so Yagi to use with it. I will need to use some sort of directional antenna for transmitting as there is no point transmitting away from earth.

What sort of transmitter antenna/receiver antenna combination is suitable, o am I asking farr too much out of a 500mW signal.

As an extra note, the motorola T5100 talkabout 2 way radios transmit a modest 2.0- 2.5km line of sight (over water) - they will transmit further, but the quality does weaken dramatically. Using a 2 way radio transmitting and a rubber ducky antenna on my icom IC-r2 scanner, this range increases to about 4km easily, pushing 4.5-5.0km. I assume the standard T5100 antenna to be fairly lossy, and the rubber ducky antenna on my scanner is shown as being a 3.5DB gain at this frequency.

I hope this helps

-John

Half a watts probably OK, But Not FM with a low gain aerial
a lower frequency will give you a lower path loss

How about a cheap modded SSB CB ? Take the board out of one
(Balloon Radiosondes have worked for years on 27MHz)
Take it up to 28MHz so you don't have Good Buddy skip to contend with
and you could remove the RX section to lighten it some more
It's crude, but feeding tones into the SSB mic input will give you FSK
(and you'll have maybe 10 watts PEP to play with)
>

Again you need a narrow band RX with SSB / CW to go with a TX
with a Narrow band mode
Use another modded SSB CB to RX it

The guy said he's not a radio ham, and the
radios he is proposing to use don't operate on
any ham-band (I'm assuming 467MHz is some sort
of New Zealand equivalent to our PMR446 shortrange
walkie-talkies)

If you have an understanding of SWR, then you are doing a lot better
than 95% of all radio amateurs (and 100% of M3's)!

There are so many illegal "Freebanders" on the bottom of 28MHz
Who would notice someone sending telemetry ??

Maybe he could ask a local Amateur to "lend" his presence and callsign to the
project ?

I'm not sure of the legal situation in NZ but any of the suggestions made
thus far would NOT be legal in the UK.

As letting of balloons to a high altitude is not exactly inconspicious I
suggest caution. In the UK there are legal i.e. exempt telemetry
transmitters you can use- around 175MHz as I recall- I suggest you try and
find out if there is a similar allocation in NZ.

Also, what is the situation re balloons- in the UK there are rules regarding
this.

I'm not trying to be a kill joy but where does NZ send its convicts these
days? (Australia- you would have to drink Fosters, that must be cruel and
un-natural punishment)

Just got this radio secondhanded a few days ago. This radio requires a 13.5V power supply, but I've just been using it as a receiver for now, hooked up to my Astron RS12A supply, and worked fine for about 3 days and have been receiving many QSO's from all over. But have never transmitted at all on this radio, don't even have the mic plugged in.

Today when I powered it up, the blue LCD freq display on the front failed to come on. The radio was obviously getting power, and the meter lamp came on, along with speaker output, but no front display. Checked voltage on power supply - putting out 13.71V. Tried the tuning knob but could not tell if the receiver was cycling through freqs or not. Just a fairly steady low hiss of no signal, so I can't tell if the tuner is working or not anymore.

What did I do wrong? Why the sudden loss of the LCD screen? I could not check Amp output on the PS but it is rated at 9A continuous and radio was working fine until today. Has anyone had similar problems with this unit? What can I do to fix it?

Thanks,

C.N. Brown

333. Audio Transmitter for car

Due to the intense situation on rec.radio.shortwave and the Hal Turner message board, I as chief of Communications for the Better Amateur Radio Federation have called a full alert of all active and inactive members.

Hal Turner webpage:
http://www.halturnershow.com/

As a Amateur radio club, the B.A.R.F. will NOT be intimidated by the antics of those who would destroy us. We will not stoop to the criminal level that some people have in the attacks of Mr. Turner. We stand by those people that we see a freedom-loving people. We stood by Herb, KV4FZ and will stand by Hal Turner too.

In the next few weeks, I intend on re-activating the B.A.R.F. to its full glory. Membership will be FREE to SWL's and Ham's that want to be a part in helping to bring back this nation to a proud White heritage.

In Jesus Christ (Yahweh) we trust.

Lloyd Davies,
Chief of Communications
Better Amatuer Radio Federation.

Thanks Steve, Everything has been taken in and well thought over. The reason i was looking in the frequency range I was, was because a chappy in california used a 5 watt 440Mhz system and said it was overkill.

The reason I am using DTMF is that it is cheap! Once I have the rest of the equipment sorted out such as GPS balloon and Helium (not cheap), I can't afford spending money on packet radio modems - especially for the first flight, New Zealand is a very narrow country, so a lot of the difficult work isn't getting the balloon up, but controlling the fall back to earth so that the package heads back towards its starting point. Also, a rate of 6 tones per second, 24bps is more than enough when you only need to send around 30 bytes per transmission - it will take 10 seconds to send the data packet, but who cares?? I will transmit continuously updated data by this method.

I am not sure of where to start looking for a 27mhz balloon radiosonde, but I will have a ring around. Someone must know someone who knows someone who knows someons who has a spare one going cheap!

Regards

John Burns

Anyone who has a 1967 or 1968 callbook. I would appreciate a call lookup from that year.
WN1IRH. Should be for a Rod Spinney. Looking for the correct name and address (Pond St Billerica) Was an old buddy. Would like to get his name right in an effort to see if I can find him again.

Thanks
Dennis WA1HOG

Woger claims to be 46 years old. I have no reason to doubt it (other
than the simple fact that he's a shameless liar, but that's another
post). As for Woger growing up, that's probably a hopeless cause.

: Thanks Steve, Everything has been taken in and well thought over. The reason
: i was looking in the frequency range I was, was because a chappy in
: california used a 5 watt 440Mhz system and said it was overkill.

And it probably was.

hi John. Let me shed some light on this subject for you.

You see, the propagation on V/UHF Frequencies (say 50Mhz and up) is Line of
Sight. In other words, if you can see it, at UHF, you can talk to it. 500mW
from a talkie can hit a repeater on a Mountain top 40 miles away, why can't your
two talkies talk to each other 20 miles, if the only thing between the ground
talkie
and the airborn talkie is Space?

: I am not sure of where to start looking for a 27mhz balloon radiosonde, but
: I will have a ring around. Someone must know someone who knows someone who
: knows someons who has a spare one going cheap!

I wouldn't worry about it, John. Stick with UHF. You'll do more than fine.

While I'm at it, let me take issue with a few more comments of Steve's...

: > Half a watts probably OK, But Not FM with a low gain aerial
: > a lower frequency will give you a lower path loss

Not necesarily true. And, since Steve was talking about using 28MHz he's not
taking into consideration the fact that you'll be out of communication in around
5 or 6 miles, due to propagation. You're balloon will be 4 times that.

: > How about a cheap modded SSB CB ? Take the board out of one
: > (Balloon Radiosondes have worked for years on 27MHz)
: > Take it up to 28MHz so you don't have Good Buddy skip to contend with

More work than what you need, and besides you already said that anything more
than turning a rig on/off and gain leaves you floundering (grinz)
It is nice to note that Mr. Terry acknowledges the fact that interference is a
possibility, due to the frequency selected. A bad idea, all together.

Let's see what else Mr Terry has to say...

:(and you'll have maybe 10 watts PEP to play with)

See my explanation earlier about line-of-site propagation. More power means
more battery, means more wieght, etc... This is a Balloon launch, for heavens
sake - not a luxury cruise :-)

: > > I will be using an Icom IC-R2 scanning receiver to receive the signal,
: and intend on building a 12 element or so Yagi to use with it. I will need
: to use some sort of directional antenna for transmitting as there is no
: point transmitting away from earth.

I don't think so. Not at that elevation. a good vertical sticking out the bottom of
the balloon will cover well. you can track it with a beam if you wanted, but I don't
really think you'll need to. If you've got a pair of these talkies, then using one to
TX with, and one to RX with makes the most sense.

If you -really- want to increase the transmit range on the balloon talkie, make a
better antenna for UHF, OR add some ground radials to the existing talkie.
Cut the right length, a couple of radials, or a (approx) 5" aluminum dish around
the connector of the duck-antenna, connected to the sheild (ground) and below
the radiating part of the antenna, will give a ground plane for the antenna to
work off of. Use the Ground plane to have the antenna focus the signal back to
earth, if you're worried about enough signal from 20 miles up (which I don't think
you'll have a problem with)

You're best bet, would be to get some good antennas to put on those talkies, and go
with that, John.

Best of Luck!

Eduardo,

What is the term of license for the International Amateur Radio
License (IRL)? And does it cost anything to renew?

I heard that people who pass the two-day test with a perfect
score are issued a serial number beginning with the digit four and
are given a lifetime exemption from retesting. I see your license
serial number starts with a four, so you must have had a perfect
test score.

Zitchey

Now you would think that someone who allegedly had this license, that
you can't find a thing about on the web and particularly the UN page,
would know how long it's supposedly good for.

Of course the whole thread is a joke, because the referenced part above about the benefits of this alleged "license" is by the same person who started the thread by inquiring as to how to obtain one.

Alternate suggestion: Some of the genealogy web sites have integrated into
their search engines an automatic lookup into the Internet telephone books.
For certain searches, surname wildcards may be used. The search part of the
death indices may also indicate whether or not your friend is still alive (by
implication of no matching death record).

You DID go to the UN search area and use the search engine to find
"license", didn't you?

It was just plain poorly done. Too much hemming, hawing, heavy breathing, poor audio, etc. It would be one thing as something recorded at home for your own use, but as an "internet radio show" it is substandard.

The comments above refer only to the technical quality. Since you heavily emphasize your right to say what you want, how you want, I also reserve that right. You are one sick, sorry, individual. I feel sorry for you, your friends, and most of all, your family

Complete information & applications forms for the International
Amateur Radio License can be found at www.un.org
Knowledge of such a license is deliberately kept from the
general public, as it preempts the licenses of individual member
nations.

Duh, gee, no...er, uh, I didn't think of THAT, yuck, yuck, yuck.

Post a URL that references it. If it really existed, you would have
done that in the first place, not just listed a general UN site with
instructions to search.

On the off chance that you really can provide such a URL, I'll be
happy to admit that my skepticism was unfounded, but until then it's
just a figment of some fertile imaginations.

Post an actual URL that relates to the existance of the alleged
license, and I'll acknowledge and retract my skepticism. Until then,
it's fantasy, just like on-line credit repair.

> Knowledge of such a license is deliberately kept from the
> general public...

Uh, huh. Kind of like the black helicopters and the secret detainment
camps awaiting the signal from the Trilateral Commission.

And of course it's kept in a secure location like a website accessible
from anywhere in the world by anyone with a computer, and it's known
only to a few newsgroup users.

> as it preempts the licenses of individual member nations.

And this is different from a CEPT permit how?

I came across this very useful and well done web page for free radio manual downloads for Icom, Kenwood, and Yaesu radios and accessories both current stuff and older rigs as well.

Schematic diagrams are included with most. It includes complete service mnauals also for a few of the products. A great find!

those 757 's had a bad habit of that a bad power switch was the prob ,
unplug the p.s. and unscrew the side screws as if you were splitting the
radio open
and just lift the lid slightly and put back in place and reapply power to
the radio and it should be ok

A hot Summer's day in Alabama... in a rickety tree-house with a crudely hand-painted sign reading "NO GURLS ALOUD" a lonely fat kid is nailing wooden laths into a mighty sword... he folds a colored Sunday newspaper page into a jaunty hat...

Donning the newspaper hat and with the wooden sword tucked beneath his protruding belly, he makes a clumsy descent from the treehouse.. the lonely fat kid waddles over to a red Huffy bike with its basket full of rotten fruit...

Leading a powerful but imaginary army of Nutsakkkian soldiers, the lonely fat kid slowly pedals the cheap overloaded bike near the home of the town's Jewish tailor... the lonely fat kid splatters a rotten tomato against the aluminum siding, and in a high-pitched voice, squeaks "Take that, Christ-killer"!

The lonely fat kid pedals away as fast as he can... a tell-tale Brown Stain is visible on the seat of the red Huffy bicyle...

<johnburns007@NOhotmailSPAM.com> wrote:

>I want to a cheaply as possible be able to transmit this data line of site
>(straight down) around 30KM (20 miles).

True observation sondes have a light payload compared to the balloon
and thus, it will reach high altitudes very quickly before exploding.
Thus, it will remain within the visual line of sight path from a well
located ground station all the time.

However, with a heavier payload, the ascent rate is much slower and
the balloon might drift out of sight from a specific ground station.
Thus you may have use a mobile tracking station. When mobile, you most
probably do not have a line of sight path.

Using two or more balloons would increase the ascent rate, but then
again, hopefully they explode at the same time.

> I have a set of Motorola t5100 2
>way radios, which transmit 500mw of power in the 467Mhz range. What I would
>like to know is if it is possible to get this range out of one of these
>transmitters?

You can calculate the line-of-sight path loss from

L = 32 + 20log(f) + 20log(d)

in which L is the path loss in dB, f is the frequency in MHz and did
the distance in km. At 30 km and 467 MHz, the path loss is 115 dB.

You can not use high antenna gains at the wobbling free flying
balloon, maybe just aim in the general direction downwards, thus, the
maximum Tx antenna gain would be 3 dB. With 500 mW of transmitter
power (+27 dBm), the ERP downwards would be +30 dBm. After suffering
the 115 dB path loss, the signal in an omnidirectional antenna would
deliver on the ground would be -85 dBm.

>I will be using an Icom IC-R2 scanning receiver to receive the signal,

A typical NBFM receiver will have a usable sensitivity around -120 dBm
and for reliable DTMF detection maybe -100 dBm should be sufficient,
thus, there is more than enough signal if you are directly below the
balloon with line of sight.

>and
>intend on building a 12 element or so Yagi to use with it.

A long directional antenna is more or less impossible to operate while mobile, so you would have to stop on at a good point to get line of sight path. However, such an antenna would be a nice thing to have on a fixed tracking station, provided that the horizon is very low in all direction. In order to be able to track the balloon close to the horizon, the transmitter antenna should radiate sufficiently even to the horizon, thus the 3 dB transmitter antenna gain may be too much.

However, the UHF signal is more or less useless, once the payload has reached the ground (hopefully hanging on a parachute :-), since now you don't have a line of sight path and the signal would be heard maybe only 1-2 km. A rescue beacon at much lower frequencies would be good idea. Direction finding with a NBFM receiver is not easy, so a SSB/AM receiver with variable antenna attenuator would help in locating the payload.

If you have the GPS receiver on board, it might be a good idea to transmit the location while descending at a high repetition rate (only sending the last digits) over the telemetry transmitter and also send the whole coordinates over the rescue beacon or the last coordinates the GPS receiver had, before loosing the contact with the satellites.

Typical 'real amateur' G4 with no idea.

500mW ERP is +27dBm output
FREESPACE Path Loss over 30km at 467MHz - around 115dB
Signal received should be in the order of S9+ (if you're aware of
the -93dBm standard for S9) allowing even a few dB of extra losses.

Think of it this way - over a 1km line-of-sight path you'd expect FRS or 446
radios to give each other S9+++ signals, I hope (otherwise you *REALLY* haven't
got a clue). Now extend the distance 30 times and you obviously get 900 times
less signal - which is just under 30dB or 5 S-points.

A horizontal crossed dipole up there, giving circular polarization, should
do nicely to avoid fades during spinning - only another 3dB loss to the R2.

But what do I know, I'm 'only' a Class B CBer
MegHz

Yes, there is abundant information; some 124 hits. However, not a
single one relates to an "international radio license."

As I said:

Post an actual URL that relates to the existance of the alleged
license, and I'll acknowledge and retract my skepticism. Until then,
it's fantasy, just like on-line credit repair.

Another thought; you claim there is "abundant information" yet in your
previous post you said:

> Knowledge of such a license is deliberately kept from the
> general public, as it preempts the licenses of individual member
> nations.

Seems contradictory. You say they want to keep it hidden, yet you also
claim the information is plentiful. Which is it?

Well, as soon as you prove its existance by posting a URL pointing
directly to information about it, we'll be able to clear it up. Until
then, I'll keep looking for Yeti sightings; they're more believable.

All the ephemeral references to the main UN page with instructions to
search are just hooey, and not "proof" of anything, except that there
is a UN page.

I just had my basement finished off. The light dimmers that were installed have a lot of RF noise. DOes anyone out there know of any dimmers that suppress RFI?

Thanks
Zack

Amateur Radio Newsline™ Report 1296 - June 14 2002

Amateur Radio Newsline report number 1296 with a release date of Friday, June 14th 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Venezuela says no to W-R-C 2003 and the international conference is looking for a new home. This story is first on Amateur Radio Newsline report number 1296 coming your way right now.

(Billboard Cart Here)

**
RADIO LAW: WRC-03 LOOKING FOR A NEW HOME

The venue of the next World Radiocommunications Conference has become uncertain. This, after Venezuela withdraws an invitation to the International Telecommunications Union to host the conference. Amateur Radio Newsline's Bill Pasternak, WA6ITF, tells us the impact this decision may have on Amateur Radio:
--
According to an ARRL Bulletin, the conference had been scheduled to be held in Caracas next June and July. Whether it can be held on the scheduled dates in some other location is not yet known. This is because the planning for a conference of this size and scope generally takes two or three years.

There are a number of issues of importance to hams are on the agenda. These include reaching agreement on separate allocations for Amateur Radio and broadcasting in the the 7 MHz band along with the possible revision of Article S-25 of the International Radio Regulations. Also to be taken under advisement is the issue of whether to retain the treaty requirement to demonstrate Morse code proficiency for access to amateur bands below 30 MHz.

But all of this may have to wait if the I-T-U cannot find a new host and find one quickly. And that could be a rather problematic at best.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.
--

The International Telecommunications Union did have an option on conference space in Geneva, but that expired before Venezuela decided to cancel. The Venezuelan National Commission of Telecommunications cited ongoing economic concerns for its decision to walk away from hosting the meeting. (Adapted from ARRL Bulletin)

**

RESCUE RADIO: THE COLORADO HAYMAN FIRE AND HAM RADIO

A 90,000 acre wildfire called Hayman -- the largest wildfire in Colorado's history -- is blazing just outside Denver. Firefighters, supported by many volunteers including ham radio communicators moved into position ahead of the flames Wednesday June 12th. They are setting backfires to try to block the fire's path toward the city's southwestern suburbs.

According to news reports, the Hayman fire was sparked by a campfire in the Pike National Forest southwest of Denver. It has been growing in intensity and slowly moving to the north-east. The blaze now covers close to 145 square miles. So far it has destroyed 21 homes and immediately threatens another 2,500.

Earlier, evacuations had been ordered in the town of Sedelia and in the Tarryall area in Park County. Tarryall is on the fire's northwestern edge. Colorado has also put out a call for additional fire-fighting crews from across the nation to be sent to the area. About 540 firefighters were working on the fires, and 800 more were requested.

Amateur Radio is playing a vital role in the overall fire control effort. According to Jay Miller, W-A-5-W-H-N in Albuquerque, quite a bit of support communications is taking place over the Mega Link repeater that interties the entire region. And health and welfare nets are operational on both 40 and 75 meter SSB in addition to VHF F-M. It is a very fluid situation and net frequencies vary with location and time of day. (WA5WHN, ARNewsline™)

**

RESCUE RADIO: THE COLORADO IRON MOUNTAIN FIRE FIRE AND HAM RADIO

The Hayman fire comes on the heels of last weeks Iron Mountain Fire. more than 1000 residents were evacuated near Canon City. At least 200 structures were destroyed. According to the ARRL, members of Fremont County ARES staffed a Red Cross shelter set up to serve the evacuated residents in nearby Cotopaxi. They also helped to staff the incident command post and the Deer Mountain Fire Station. Also, hams from Pikes Peak ARES staffed the Red Cross headquarters in Colorado
Springs. More on this story as news is made available. (Adapted from ARRL Bulletin)

**

ENFORCEMENT: TWO MORE PIRATE BUST

Two unlicensed broadcasters are are off the air and feeling the FCC's sting. Amateur Radio Newsline's Henry Feinberg, K2SSQ, has the details from New York:

--
In the first case the agency has issued a monetary forfeiture -- better known as a fine -- a forfeiture in the amount of $10,000 to Thomas A. Brothers of Detroit Michigan. Brothers was cited for willfully and repeatedly violating Section 301 of the Communications Act of 1934 involving operating an FM station on 88.3 MHz without a Commission license.

Also being ordered to pay $10,000 for operating an unlicensed broadcast station is the Revrend Doctor Phillius Nicholas of Brooklyn New York. Dr.

Nicholas is also acused of operating a station in the FM broadcast band without a license to do so. He too was found to have violated the same section of the Communications Act.

For the Amateur Radio Newsline, I'm Henry Feinberg, K2SSQ.

--

Neither Brothers or Nicholas responded to initial Notices of Violation. Both have been given thirty days to pay the fines imposed by the FCC. (FCC)

**

THE WORLD: MISSIONARY KILLED IN THE PHILIPPINES WAS A HAM

Some sad news to report. A ham radio operator and missionary taken captive by Muslim extremists in the Philippines died during a rescue attempt on Friday June 7th.

Martin Burnham, KC0DNB, and his wife Gracia were among three Americans abducted by the Abu Sayyaf guerrillas in May of 2001 from a resort off Palawan island in the southwest Philippines. Martin Burnham was killed during the fire-fight to rescue them. Gracia Burnham suffered a would to her leg but was otherwise unharmed. A Filipino nurse held hostage by the same rebels was also killed during the rescue attempt.

The Abu Sayyaf rebels have been linked to Osama bin Laden's al-Qaeda terrorist network by United States intelligence sources. Four rebels were killed while Philippine troops suffered seven wounded. U.S. military advisors training Filipino troops in jungle warfare were not involved in the rescue attempt.

The Burnhams, from Rose Hills Kansas, were married for 19 years and had lived in the Philippines since 1986. Martin Burnham, KC0DNB, was a pilot for New Tribes Missions, flying other missionaries and supplies throughout the region.

(CQ, ARNewsline™)

**

ENFORCEMENT: FCC TELLS UTILITY TO CLEAN UP INTERFERENCE TO HAM RADIO

Yet another utility company has been told by the FCC to solve an interference problem to a local ham. This as the agency's Consumer Information and Government Affairs Bureau issues a letter to Reliant Energy Corporation of Houston Texas requesting that it work with a local amateur operator named Ed Gerber, W5GCX, to resolve an ongoing powerline interference problem. (FCC)

**

ENFORCEMENT: EX-HAM BACK IN JAIL FOR PAROLE VIOLATION

A former ham is back in jail. This with word that Jack Gerritson, the ex-KG6IRO of Los Angeles will be spending the next three years in prison for violating parole on an earlier conviction involving malicious interference to emergency service communications.

As previously reported, Gerritson was arrested and convicted in 1999 for radio interference to the Los Angeles Police Department. On November 14, 2001, Gerritson's ham radio license and KG6IRO call sign were set aside by the FCC.

Gerritson was freed from prison on probation after serving one year of a five year term. After his release, the FCC says that he continued operating and causing deliberate interference to numerous Amateur radio repeaters in the Los Angeles area. So this past January 29th, Los Angeles FCC agents participated in a pre-dawn arrest of Gerritson. His arrest came in direct response to complaints of death threats allegedly made by Gerritson on a 2-Meter Amateur Service frequency. (FCC)

**

RADIO LAW: FCC DISMISSES DISH ANTENNA CHALLENGES

The FCC has dismissed several petitions for reconsideration of it's 1996 direct broadcast satellite antenna Report and Order. In the order, the Commission had preempted local regulations that imposed restrictions affecting the installation, use and maintenance of satellite earth station antennas one meter or less in any area or two meters or less in commercial or industrial areas.
Nine petitions for reconsideration of the 1996 Report and Order were filed. Then, in October of 2001, the FCC's International Bureau released a public notice asking parties to refresh the record regarding petitions for reconsideration of the Antenna Report and Order.
In the public notice, the Bureau noted that, since the release of the order, many of the issues raised in the petitions for reconsideration may have become moot or irrelevant in light of intervening events. No petitioner filed in response to this public notice. The FCC has now dismissed those petitions on the grounds none have not indicated an intent to pursue their respective appeal. (FCC)
**

RADIO REGULATIONS: MICROWAVE RADOMES PROPOSED FOR LOCAL FOREST SERVICE SITES

The CGC Communicator reports that the Forest Service is proposing to require radome covers on all microwave dishes that are installed on Forest Service land in the state of California. The service says that this action is necessary to protect the California Condor from perching on the horizontal feed horns of the dishes and becoming microwave baked. The decision comes in the wake of an environmental lawsuit brought by conservationists. (CGC Communicator)

**

CONTESTS: CQ WW VHF WEEKEND

Changing gears, word this year's CQ World Wide VHF Contest will be held the third weekend in July. Operations commence at 1800 U-T-C on July 20 and ending at 2100 U-T-C on July 21, 2002.

Please note that this date is one week later than in past years. The change comes in response to numerous requests by the participants and potential participants. The old date was in direct conflict with the I-A-R-U contest and the World Radiosports Team Championship games. It also occurred only one week after the European Field Day. Complete rules can be found in .pdf format at
http://www.cq-amateur-radio.com/VHFRUl02.pdf (W3ZZ)

**

AWARDS: KB2YAA NAMED BY PIONEER RADIO OPERATOR SOCIETY

And congratulations go out to Gary Tillinghast, KB2YAA, of Springville New York. This, on his being named as the Pioneer Radio Operator Society Amateur of the Year. KB2YAA is an active member of the Handi Ham System which made public the news that he had received this prestigious honor. (Handi Hams)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

REGULATORY: ARE YOU ELECTROSENSITIVE?

Are you ectrosensitive? That is, are you one of those people who is unusually sensitive to radio frequency fields?

Well a group called the Cellular Phone Taskforce thinks that some people are. It also believes that the FCC should not allow certain RF telemetry equipment in health care facilities. The Taskforce's holds the opinion that these R-F fields will have what it calls the "unwanted, illegal and unconstitutional effect of depriving electrically sensitive persons of access to health care.

Well, it turns out that the electrosensitivity issue was considered by the FCC some time ago in E-T Docket 95 dash 177. After giving it consideration, it was dismissed. More information can be found at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-02-135A1.doc (FCC)

**

EMERGING TECHNOLOGY: FLYING THE INTERNET

Three airlines -- American, Delta and United say they will offer high-speed Internet connections on some long-distance U.S. flights beginning this summer.

The connections will cost around $20 an hour and offer e-mail, access to the Web, and live television broadcasts. The airlines say that they hoped to eventually expand the service to most of their domestic and international flights. Passengers would have to bring their own laptop computers. (Computer Daily)

**

SPACE AND SCIENCE: HAMS SET NEW SPACE ENDURANCE RECORD

Two American ham radio operators have broken NASA's space endurance record of 188 days and four hours. But astronaut Dan Bursch, KD5PNU, declined a playful suggestion from Mission Control that he might want to go for the 438-day world record.

Bursch's fellow space-traveler, Carl Walz, KC5TIE, was with him in the space station and the shuttle and shares the endurance record. The two astronauts broke the record while in bed, ready for some shut-eye. The old U.S. record was set by Shannon Lucid in 1996 aboard Russia's now de-orbited Mir station. (NASA)

**

SPACE TECHNOLOGY: JPL TAKES COMMAND OF FRENCH SATELLITE

The Jet Propulsion Laboratory in Pasadena California is now handling command sequences for a weather satellite the French launched in December. Over the next six months, data from Jason I will be dissected by JPL's team of scientists, who will study interactions of the world's oceans and atmosphere and observe events like El Nino.

Until now, Jason I has been under the guidance of the French Centre National d'Etudes Spatiales. With the handover, JPL will be responsible for sending command sequences to the spacecraft. The French agency will continue to perform navigation and engineering tasks. (NASA)

**

INTERNATIONAL - U.K.: HAM RADIO HELPS CELEBRATE QUEEN ELIZABETH'S GOLDEN JUBILEE

On the international scene, Amateur Radio was front and center with a commemorative station near Windsor Castle when Britain's Queen Elizabeth celebrated her recent Golden Jubileee. Jeramy Boot, G4NJH, reports from Nottingham in the U.K.:

--
As of 1530UTC on Tuesday the 4th, GB50 had made in excess of 14,000 contacts, putting them within reach of meeting their own target of 20,000 QSOs during the operation. More importantly, over 2000 members of the public had visited the station and 'Amateur Radio Experience' exhibition by Tuesday afternoon, the majority learning about amateur radio and the Foundation Licence scheme for the first time.

Also on Tuesday, no fewer than 41 members of the public were able to send greetings messages from the GB50 station, giving them a real 'hands-on' experience of amateur radio.

Jeramy Boot, G4NJH
--

The GB50 station closed down operations at 21:00 UTC on Sunday, June 9th. (RSGB)

**

INTERNATIONAL - SOUTH AFRICA: A LICENSING RECORD

South Africa has set a new licensing record. This as the results of that nations May 2002 Radio Amateur Examinations or R-A-E are announced. Q-News Graham Kemp, VK4BB, reports:

--
Results of the May 2002 Radio Amateur Examinations are published in record time. The results of the RAE, held in South Africa, written 23 May, were announced on 30 May. Each candidate who passed the examination and had completed a license application form has also been issued with a callsign.

95 of the 113 candidates who wrote the examination were successful. The highest marks were achieved by Dr G A Keen of Cape Town, 100% in both the papers.

The youngest candidate to pass the class A examination is 15 year old Q D Du Preez of Durban who now boasts with the callsign ZR5QD. The oldest to pass, 72 year old C H Stevens of George who now boasts ZR1AWG.

From Q-News Australia, I'm Graham Kemp, VK4BB, for the Amateur Radio Newsline.

--

The South African licensing program is considered to be one of the most progressive to be found anywhere in the world. (Q-News, SARL)

**

DX

In DX, G0TQJ, is currently in Afghanistan and operating portable Y-A. He reports he has openings to Europe on 10 meters around 13:00 UTC. Chris is using a Yaesu FT-890 transceiver running 100 watts to an 80 to 10 meter Windom antenna 50 feet high. He is active on SSB and RTTY. QSL to his home call. (GB2RS)

And OZ7SM will be active from Bornholm through June 16th. Most of the operation will be on SSB on all bands including 6 meters. Bornholm counts as EU-030 for the Islands on the Air awards program. (GB2RS)

**

THAT FINAL ITEM: ITS AN ENIGMA NO MORE

And finally this week, we have reported before on Germany's World War Two top-secret Enigma spy machine. This was the message encoding device that gave Germany the ability to keep its military movements secret during much of the conflict. Now, it appears as if a British woman actually cracked a major component of the Enigma before World War Two began, but her supervisors dismissed her theory as too simple. Bruce Tennant, K6PZW, picks up the story:

--
British newspapers have printed excerpts from the new publication titled "Action This Day." The book claims that discoveries made by a female codebreaker known only as "Mrs. BB" that could have opened the secrets of the encoding machine much earlier and shortened the war.

In the late 1930's the Enigma was dubbed the key to Germany's military communications system. Codebreakers including Alan Turing, the father of the modern computer, were trying in the late 1930s to break the Enigma cipher, but they could not work out how the keys of the Enigma machine were wired.

The book's editors, Michael Smith and Ralph Erskine, say that "Mrs BB" suggested the Germans wired the A key to the A rotor, B to B and so on through the alphabet. This theory dismissed as too simplistic, but was later proven to be correct.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles
--

The full Enigma code was finally cracked by a team of thousands of men and women, including chess masters, civil servants and mathematics geniuses. (Published news reports)

You've obviously never held a job in broadcasting. You would also have a rather difficult time convincing my father of your point. He is a WWII veteran. Where were you during WWII? You'll have to wait another 20 years before there won't be many folks left that remember - and there is one heck of a lot of documentation that is hard to dismiss. As to your beliefs, I guess you're entitled to 'em. Keep repeating them. You may actually begin to believe it.

Somebody is laughing at Roger? Gee...so what else is new? The guy is a
laughingstock and he refuses to see the reality of it.
It must be lonely being Roger Wiseman.....

Oh, NO! Sounds like yet another of Arafat's juveniles-in-training.
Arafat should be drawn and quartered and spread about the area like the
manure he is.

The "Great Liberty Net" is nothing more than an enclave for conspiracy
theorists to gather and commiserate about our government. Note that not a
one of these conspiracy nuts is happy with our system...and maybe rightfully
so. The trouble is that they have no answers...all they do is whine, week
after week after week....
I wonder how many of them are members of the John Birch Society? Talk about
another bunch of nuts...the Birchers have it.
In closing...if you disapprove of our posts, do the sensible thing. Go away.
How hard must that be? Ta-Ta for now good buddy.

406. FA Spy Set QRP rig

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-16 12:56:47 UTC
From: Apostolos Bourousis <mak@compulink.gr>
Message-ID: <aei1vu$1tkn$1@ulysses.noc.ntua.gr>
Source record: 76299

http://cgi.ebay.co.uk/ws/eBayISAPI.dll?ViewItem&item=1360490426&ssPageName=ADME:B:LC:UK:1

Transmitter RT-3. Tunes 3-22 MC, crystal controlled, accepts crystals with 3/4" pin-spacing (i.e. FT-243), or 1" pin-spacing. Requires 450 volts DC, and 6.3 volts AC or DC power.

The RT-3 could be considered the 'flagship' of cold-war U.S. clandestine transmitters. It's development started in 1948; and it was used by the Agency for 12-15 years, and by the Army for several additional years. The RT-3 was valued long afterward for being functional and reliable.

Weight 9 lbs

Dimensions 8-5/8" X 5-1/2" X 5-7/16"

Tubes 6AC7 oscillator 2E26 final

Frequency Bands 3-5.5, 6-9, 10-16,17-22 MC
Pwr Out 3-15 Mhz 12-15 W 15-22 Mhz 10-12 W

I have this Transmitter in my collection but i don't have a way to test it . The unit require 450 VDC and 6,3 VDC. Inside is like Brand New and seems never used.

I found this unit in a local surplus store and i think this is the ultimate QRP Transmitter or a must for any Spy items Collector.

Please Visit http://www.qsl.net/sv1edy/rt/rt.htm
for more info about this radio and more photos and also please contact me direct on my email mak@compulink.gr

I will send this transmitter in any country and i be glad to reply in any questions about it .

I accept payment via PAYPAL or cash inside registered letter .
Both ways are OK for me and i be glad to sell this radio to any friend who may need it .
As i say i don't have a way to test it but looks new.
Please see photos and if you wish ask me for any more info.

I think for an experienced QRP constructor the power supply for 450 V and 6,3 Volt is something that need about 1 hour of work and then will have the ultimate rig !.

I have a 100% positive feedback and i am also Radio Amateur . My call is SV1EDY and my home page is http://www.qsl.net/sv1edy/

Please Visit for more infos .

Also please Note that inside the box of transmitter is the Schematic so all will be easy !.

I leave in Athens Greece and i post in Ebay UK because i have here my account from the Early Ebay days.

The Greek post offices have very good and reliable services and if your country accept Valeur Letters i can send it also Valeur packet and so super extra safe !

Best 73s
Apostolos

Actually, it is impossible for a bidder to bid on his OWN
item, UNLESS he has MULTIPLE E-Bay user ID's, and logs into
E-Bay on a different computer from a different location
with an alternate log-on, then it could be done. This would not
be smart 2-do however, as he would STILL HAVE TO PAY the listing
fees and a percentage of his final sale price to E-Bay when the auction
closes.

The more conventional technique is to get ANOTHER person
(almost always known to the seller) to BID UP the price
of the Item, then split the profits later...

This is known as "Shill Bidding" and is VERY MUCH FROWNED UPON by E-Bay.

While I will not say that this is what happened
in *this* case, it does appears that general speaking
in Ham Radio related Equipment Categories, that the
practice of "shill bidding" is somewhat more prevalent
than on the rest of E-Bay. A sad commentary on the
few unscruplous private ham radio dealers who have

apparently abandoned hamfests, and now "sell" and
network between themselves to manipulate UP prices on E-Bay.
Most likely these are the same "gypsies" we all used to see
selling high-ticket items at each and every hamfest
we used to visit in the past. I certanly never would buy
anything from them in the past, and will not now on e-bay either.

Web page which has much more on this topic and how to spot a shill:

Livonia's Amateur Radio Club together with the Tin Lizzy Club will participate in a Field Day event June 22-23. The fun begins at 2 PM.
The amateur radio stations will be located behind the Livonia Fire Station on Plymouth west of Newburgh Rds.
Non-hams may also get on the air. For further info call Bruno (734)464-8928.

Livonia Amateur Radio Club Repeater for info
K8UNS 145.35 -600 +100pl

Hope to see everyone there.
James

One day Roger's little daughter said, "Daddy, I wish I had a little sister."

Trying to be funny, Roger says "Honey, you do have a sister. You just don't see her because when you are coming in the front door, she is always leaving through the back door."

Roger's daughter thought about this and remarked, "You mean like my other Daddy does?"

Well, none of the three r.r.a.m. posters who claimed knowledge of the ephemeral international radio license have met the challenge of posting a URL that relates to it.

They remain strangely silent. That tells you all you need to know about it. Doesn't exist.

No. What it tells you is how easily manipulated and
gullible you were to respond to something obviously not true.
Others chose to simply ignore the thread, while you took the
bait hook, line, & sinker. Of course, you'll have some wild excuse
to conceal your blatant stupidity. And this really tells us all we
need to know about it.

Have a nice day!

> anything from them in the past, and will not now on e-bay either.

I once was looking at buying an HTX-202 on E-bay, and was amazed at
the shenanigans that were going on... you can basically figure out who
the shillers are by going back thru the seller's old auctions, and
cross-referencing the buyers to other auctions... if too many
coincidences start popping up - you know the seller is playing games.

You would think that shilling would be counterproductive to the seller
at some point - but if the seller only shilled on the first
auction(the 2nd relisted auction is basically free, right?), it could
work out... or, if it was obvious that he wasn't going to sell an
item, he could just have some "bum" outbid everyone and not pay...
what does E-bay do in those cases? Just allow the seller to re-list
for free?

Hello everyone-

I am an apartment dweller, with roof access, to a flat, concrete roof.
I am looking to purchase an HF antenna for both SWL and Amateur
radio, primarily the 30-meter to 10-meter bands.

I am looking for recommendations for a good antenna, also one that
does not require me to be a millionaire to purchase.

Thanks!

billpritjr@REMOVEyahoo.com

Screwdriver antenna. It's just not for mobile operations. Plus it's fairly steathy.

Certainly is a nice FT-101E station but it is not complete. Your missing
the 6M transverter aren't you? FTV-650

Even still the price is very good! Someone should grab this station.
10year sown the road it will probably be worth 10 times as much as the
FT-101 become more scare in this condition.

So, Roger. Which scent(s) do you prefer? The lightly-scented hint of Lilac
or the one with just a soft touch of Magnolia blossoms? I had always assumed
that you were rather partial to "creme' de-la boys", but I may be misguided.
Maybe the Lavender Lads have helped you metamorphose into a full-blown,
out-of-the-closet type of dude after all!

Roger went out with the Lavender Lads to search for a four head,
digital, surround-sound stereo system. He ended up on his knees in the
middle of the room, surrounded by the Four Lads who showed him what a four
"head" system consisted of.
Roger was absolutely deeeeelighted!

Next week he might even look for a music system.

Roger has no "better days". He has no love life, no friends, nothing going
for him. All he has is his mommy's house, Usenet, a mundane job and nothing
else.
To synopsize, Roger is almost a nonentity. Were it not for Usenet he'd be a
nobody..a nondescript loser with little going for him.
Come to think of it, he already is all of the above!

458. Roger at the Garage Sale

Newsgroup: rec.radio.amateur.misc

Driving down Main Street in Glendale, Roger spots a sign reading, "Garage Sale." Roger stops, gets out of his car and walks up the driveway of the house displaying the garage sale sign. Carefully stepping over merchandise marked with prices and weaving his way around boxes full of items, Roger proceeds directly to the garage. Roger takes out his tape measure and starts measuring the garage, whereupon the owner asks Roger to explain why Roger is measuring the garage. Roger looks stupidly at the owner and says, "Hey, you got a sign out front that says Garage Sale. I'm measuring your garage, so I know how much to offer you for it."

:
: Yes, it's true. I am not ashamed. I have never felt better. Hear me
: out. I'm telling you, this stuff works great! No wonder you girls are
: so soft and pretty.
:
: I was a little uncomfortable when first faced with the array of
: feminine cleaning and beauty products before me. But I thought "What
: the hell!", and just dove right in.
:
: First, I washed my hair with Green Tea Ultra-Hydrating Shampoo. It had
: a rich, foamy lather and a pleasant scent, like a girl. It left my
: hair especially clean and fresh feeling. I followed this with Clairol
: Herbal Essences Conditioner - very smooth and soft! My hair never felt
: better. I'm not sure if conditioner works on someone with short hair,
: but it sure feels good! I am rubbing it right now.
:
: Then I washed my face, torso, armpits, and crotch with a bar of pink
: Dove Moisturizing Soap. I normally use Ivory, or Irish Spring which
: leaves my skin harsh and dry. The pink Dove works wonders. Then I used
: something called Healing Garden Lavender Therapy Shower Gel. What is
: that? I rubbed it all over me, like soap. I assumed it was supposed to
: work like soap. Is it? I opted to use the squishy-spongy thing on the
: string on my penis. Rubbing Mr. Tiny with it for good five minutes was
: the highlight of the day!
:
: I feel very smooth and soft, like a girl. But it doesn't stop there.
: I found some stuff called Glycerine Oat Facial Lather. It's for your
: face, it removes dirt and oils. My face is clean and oil-free! I
: stayed in the shower for a good twenty minutes-to-a-half-an-hour using
: these great products. Then I shaved with a lady Gillette razor, the
: one with moisturizing strips and the big awkward handle. Thank you
: girls.
:
: I feel great! And I owe it all to using feminine beauty products! I
: hope this doesn't change my macho image for any of you. I can still
: be macho with smooth, clean skin and healthy, soft hair - can't I?

Keep on truckin'!! LOL!!!

> does not require me to be a millionaire to purchase.

I would recommend a dipole, center fed with 450-ohm ladder line. Length of the dipole is not critical, but for the range you're interested in, something around 50 feet total would be ideal. You would need an inexpensive antenna tuner (MFJ sells them).

Total cost would be much less than a multi-band vertical. The ladder line is VERY low in loss. The antenna system would work well over the 7 to 30 MHz range.

I'm using a 135 foot dipole fed with ladder line and a homebrew tuner. It works all bands 160 - 10 meters, an does a great job on the SW bands as well.

Roger has a way with words where he proceeds to prove
exactly what the original poster was saying about him. Sad to hear
his mother passed away. He lived in her home for a number of years,
after his ex-wife booted his ass out. Part of Roger's frustration comes
from his working long hours at a low end service job.

For Sale:

1 each ICOM IC-T81A 50/144/430/1200 MHz handheld FM transceiver and 1 each additional BP200 battery. Package contains original accessories i.e. factory rubber ducky, operators manual, wall charger and total of two BP200s, both with belt clips. The radio is only a few months old and excess to my needs. It is in like-new (9.9 out of 10) condition and works perfectly.
Material is located in St. Mary's County, Maryland.

Yours for only $255.00, pickup or shipped to your door (CONUS address) via Priority U.S. Mail.

Regards -

BOB CARTER W5BTC

Let's get back to talking about how we can help the convicted felon, W4AMP, James V. O'Brien. He's been real scarce since spending 5 weeks in the Cobb County jail, accused of FELONY STALKING. Maybe the 5 weeks taught him a important lesson. I hope he uses the 2 years he plea bargains for on the stalking charge to better himself. Not just to get away from Donna and spend time with BUBBA. LOL

492. SALE: Operators & Service Manuals Icom IC-R7100 ICR7100 7100

Operators Manual and Service Manual for the Icom IC-R7100 receiver for sale. The manuals contain instructions, information and diagrams, in particular regarding the internal service, adjustments, options and jumper blocks. Information in these manuals is exclusive and not found from any other source. The lower margin of the Operators Manual is cut short but the manual is complete.

Roger, in his haste to comment while drooling uncontrollably from the side of his atrophied mouth, introduced yet two more West Virginia words to the world.

�Fahter's� He meant Father�s Day.
�poists�. Roger meant �posts�.

It appears that Roger's dementia is progressing far quicker than we suspected. It is too bad that his daddy did not practice "coitus interruptus" 48 years ago.

One more thing...what the heck is "regualr "? Is that some sort of a
Hispanic menu item? A West Virginia anti-depressant? What?
Maybe it is akin to taking a dump in the old outhouse...as in being
"regualr"?

I see it now. Roger spells 'regular' as "regualr". This is the West Virginia
version of Ebonics, right?
```

Of course Roger is no stranger when it comes to having his oral cavity full
of "snads". He has been known to wrap his lips around same on many
occasions.
His butties ask, "Whatcha eating, Rog?"
Reply. "Oh, just some snads."
His butties, "What are Snads?".
Roger. "Oh, just a mouthfull of gonad snacks...you know, Snads?"
His butties. "Oh, those. We thought you gave that up a long time ago."
Roger, wiping his chin, "Naahh...I still like snads. I eat em' whole.".

430's have a "known failure mode" for the final output transistors. This is a combination of a circuit board that is a little to light duty and riveted transistor connections. I have fixed 2 of these, and one acted very much like yours with a pll / vfo "unlock".

yes, the Better Amateur Radio Federation (BARF) is for real. The club call
is KF4AGM.

I've been busy surfing the Internet allllll day long! I am looking for a job. I prefer something that requires no manual labor, takes little thought, and which lets me come to work whenever I feel like it.
My wife has a job so I am not in any hurry. Please respond via this news group.
Thank you for your consideration.

Signed: Jobless in Atlanta

By LIBBY ROERIG
Associate Editor
The Press and Standard

Tarnished cross: Former followers accuse 'prophet' of wrongdoing.

Protected by a ï¿½Keep Out, No Trespassingï¿½ sign and the word of God, Ralph Gordon Stairï¿½s religious community, The Overcomer Ministry, has been a mystery to Colletonians for decades, that is until his arrest Thursday.

A self-proclaimed profit of God, who broadcasts daily his message to thousands over AM and short wave radio, Stair was charged with two counts of criminal sexual conduct in the second degree and two counts of breach of trust, according to an arrest warrant. The arrest of Stair, 69, of Canadys was a result of an ongoing investigation by the State Law Enforcement Division. Backing up these charges are former community members who allege sexual misconduct, financial irregularities
and disregard for building regulations.

Prior to his arrest, The Pressï¿½ attempts to contact Stair were unsuccessful. On one occasion, a message requesting an interview was left on an answering service. On three other occasions, a woman named Margaret said she would give \Stair the message. ï¿½If heï¿½s interested (in an interview), heï¿½ll call you back,ï¿½ she said on the first two occasions. Margaret hung up on the third call.

The preacher ï¿½ or as he prefers to be called, ï¿½prophetï¿½ ï¿½ sermonizes on numerous AM radio stations across the country, and his Internet-based and shortwave radio ministry crosses international lines. Stairï¿½s community members sell all of their worldly possessions, turn over the proceeds to him and move to Colleton County to live a life of farming and prayer.

But once these followers have severed all their ties to the outside world, some say things change. Two girls say Stair had sex with them over 70 times against their will. Stairï¿½s wife Teresa says he admits having sex with several women at the community, but it was completely consensual.

Aside from the girlsï¿½ claims, other residents say the entire camp was subject to constant degradation. On a regular basis, they say Stair would chastise any member of the community for a variety

of things ranging from potatoes with too much seasoning to someone having inappropriate expression on their face. Grown men say they cowered from the prophet while in his presence.

Radio time is the communityï¿½s most expensive expenditure ï¿½ and its lifeline, these former followers say. As a result, Stair relies on his followers to finance his broadcasts. Many of these people have turned over anywhere from $5,000 to $500,000. If they decide to leave, followers say little, if any, of the money is returned.

Living conditions, also, are less than adequate and possibly in violation of S.C. Department of Health and Environmental Control laws and building codes, say former residents. Primitive plumbing in the form of buckets as toilets and haphazardly constructed live electrical cables are all over the farm, they say, and mobile homes and other structures are not up to building codes.

The ï¿½Stair Wayï¿½ to Heaven

For years, Stairï¿½s non-denominational community has drawn national media attention, many times comparing his organization to a cult. Stair, who has been head of the community for more than 20 years denies such claims. ï¿½One day, I looked up the word ï¿½cult,ï¿½ï¿½ he said in a 1988 interview. ï¿½It means, ï¿½A group of people that have a strong leader who demands obedience and enthusiasm from his followers.ï¿½ Well, I said, ï¿½Then thatï¿½s Christianity.ï¿½ Youï¿½ve got a strong leader. His name is Jesus Christ, and he demands, or asks, us to obey him. And we should be excited about it.ï¿½

Seems most of Stairï¿½s followers are excited about his preaching. Because he tells them to get out of the cities, they sell all of their possessions ï¿½ cars, houses and other belongings ï¿½ to get back to nature and live the simple life. Alcohol, tobacco and profanity are not allowed in Stairï¿½s community.

All the while loud speakers blare his preaching, women prepare big, shared meals each day, do all the household chores and raise the children. The men who do not have jobs off of the farm raise vegetables, care for the livestock and do maintenance.

Though these standards seem moderate, Stair is anything but that, according to former follower Josh Bennett, who left in 1997. Free will is a distant dream, he says, as people give up everything once they enter the farm. ï¿½No one has a dime except chiefmen. Everyone is forced to work and attend tabernacle even if they are very ill. Doctors are permissible, but if used, the patient must leave and not return,ï¿½ Bennett wrote in an April 2000 testimonial after he had moved to Alabama. ï¿½No jewelry ï¿½ all attire must be plain and simple, hiding any natural beauty. No sugar, no TV ï¿½ all entertainment is provided by the prophet and that consists of popcorn and ginger ale on Wednesday night and dessert on Friday night.

ï¿½Fraternization is strictly forbidden between (the) opposite sexes. (There is a) communal kitchen, communal bathroom, no food in (the) living quarters, limited and sometimes no hot water, sometimes no heat in winter. (There is) no air-conditioning, except for prophetï¿½s family. Anyone who communicates with friends or family outside are enemies of the commune and (are) eventually black-balled, even though he encourages it on the air. Laughter is not permitted and is associated with Exodus 32:6.

ï¿½Sex between married couples is discouraged, unless approved by prophet. (The act) is then discussed in open forum with the rest of the community, as well as the children, concerning the couple, which is to engage in the act. In the event that a child is conceived without prophetï¿½s blessing, then conception occurred as a result of lust. Therefore, the child is born with a spirit of anti-Christ. "No one has need of traveling outside the grounds except prophet. Prophet has authority to separate man and wife and give the wife to another man,ï¿½ Bennett wrote.

Though Stair asserts his followers are free to leave whenever they choose, their departure ensures damnation, according to Kathleen Duval, a former follower who moved with her husband and two sons to Bamberg County. Many who have left say it took many months to get their spiritual life back in order, she said. ï¿½Iï¿½m almost to the point of having a nervous breakdown, because now I can think,ï¿½ said Duval. ï¿½I can think. What happened there is tearing me apart. ï¿½My husband and I ï¿½ still have huge fights. (Whenever) he tells me to turn down the radio or something, I tell him Iï¿½m not in a cult anymore. Itï¿½s really a cult. We all know itï¿½s a cult now. I canï¿½t keep this in. I canï¿½t keep this in. ï¿½When we came today (to the interview on Jan. 12), we got lost, and I almost fell apart. I was always very self-assured and itï¿½s going to take me a long time, a long time.ï¿½

For months after leaving, Kathleen still believed what Stair preached ï¿½ that if you left the farm, you were going to hell. ï¿½When (other former Stair followers) called us and said, ï¿½Youï¿½re not going to hell.ï¿½ Because I kept thinking I was, because we were told to leave. I looked in the Bible, and I couldnï¿½t see His mercy and His forgiveness. I know what went wrong. I put a man before my savior, Jesus Christ. I believed him (Stair) before God.ï¿½

Complete control is Stairï¿½s goal, according those close to the prophet. The fact that his church is non-denominational results from his not wanting supervision, like many other churches, which have some sort of church-wide hierarchy. ï¿½He doesnï¿½t like being part of a denomination, because he has people over him,ï¿½ said Brenda Hart, Stairï¿½s daughter. ï¿½He wants to be in control, but he doesnï¿½t mind having people under him.ï¿½

Stairï¿½s need for control has taken a sinister turn though, according to Stacey Belford and Laquiela Horn, who both

say the prophet had sex with them against their will on numerous occasions. Now, the two have escaped to Victory Community, a religious organization in Jefferson, S.C.

Belford, whose parents moved the family to the farm in 2000 had been there over a year before Stair assaulted her she said. One day he invited her to go for a walk with him. After learning she was 18 years old, Stair, who was 68 at the time, reportedly told Belford he would be her boyfriend.

ï¿½He hugged me and kissed me on the forehead,ï¿½ she said. ï¿½I thought he was kidding.ï¿½ Several days later, Stair assigned her to a new chore, washing dishes. This particular job had to be at a certain time each day, she said.

ï¿½He knew when I was doing those dishes,ï¿½ Belford said. ï¿½On several occasions, he would come in the dishwashing area to check on her and to get a hug, she said. One Sunday, Stair came in to get more than an embrace. ï¿½He asked if I wanted another hug,ï¿½ she said. ï¿½I just shrugged my shoulders. I couldnï¿½t answer him. I knew what was fixing to happen, but I was afraid of what would happen if I didnï¿½t.ï¿½ Stair then grabbed her, she said, saying ï¿½Iï¿½m not going to hurt you. I just want to do something for you. You know I love you.ï¿½

He started hugging her and then pulled her clothes off. ï¿½ï¿½Can you handle this? Do you want me to make love to you?ï¿½ï¿½ said Belford, remembering her version of Stairï¿½s words. ï¿½ï¿½You may not like it now, but youï¿½ll like it eventually.ï¿½

ï¿½I just stood there. I wouldnï¿½t talk to him,ï¿½ Belford said. ï¿½When he first tried, I pushed him, but he put all his weight on me. I put my hands over my face and waited for it to be over with.ï¿½

Belford, who said she was a virgin before Stair assaulted her said he kept coming back for more. So much in fact, she kept a calendar recording each event. In a span of seven months, Stair had sex with her 56 times, she said.

ï¿½Sometimes I would be on my period,ï¿½ she said. ï¿½He would make me perform oral sex on him. He always wanted to try filthy stuff.ï¿½

Stair would catch Horn alone too, usually when she was cleaning the house on Fridays when the boys were in school, she said. Like Belford, on several occasions, he would come in to visit her and to get a hug. ï¿½He got me up against the wall. I thought, this hug is going a little too far,ï¿½ she said. ï¿½I just froze.ï¿½ Horn was brought to the farm by her father after their parents divorced.

No female was safe, according to Latrice Jackson, who is the wife of one Stairï¿½s assistant ministers and most trusted elders, David Jackson. The couple and their daughter moved to Colleton County in 1995, and after about a year, Stair reportedly approached Latrice Jackson for sexual favors.

ï¿½He would find me alone and ask if I missed him. He asked me for hugs. I began to feel pressured ï¿½ I sensed him following me around,ï¿½ she said. ï¿½It didnï¿½t take me long to realize he was after more than that. I believe he was trying to get me to go to him willingly.ï¿½

Latrice Jackson, who was 30 at the time, believes her maturity saved her from being assaulted herself. ï¿½It was a very difficult position to be in. This is the man you trust to show you the way, and he does things that you know are absolutely wrong,ï¿½ she said. ï¿½It just got to be too much for me.ï¿½

Though she was afraid he wouldnï¿½t believe her, Latrice told David Jackson what had been happening. After much prayer, her husband confronted Stair, who said he was sorry, but he had been ï¿½taken by the spirit.ï¿½ ï¿½He just made the fatal mistake of choosing me as one of his elders. I wasnï¿½t going to let it get swept under the rug,ï¿½ said David Jackson, who also lives at the Victory Community in Jefferson.

Both Horn and Belford agree they knew what he was doing was not right, but Stair told them God wanted them to do it. ï¿½I know stuff like that is wrong,ï¿½ Belford said. ï¿½I asked him, ï¿½Is God okay with this?ï¿½ He said, ï¿½God can always forgive. He is faithful, and He can always forgive.ï¿½ - ï¿½He had some sort of control over you,ï¿½ she added. ï¿½He would make you think you were part of it and not a victim.ï¿½

But Belfordï¿½s turmoil would get much worse before it got any better.

ï¿½In August (2001), I was waiting to get my period, but it didnï¿½t come,ï¿½ she said. After over a week of waiting, Belford told Stair she thought she was pregnant. ï¿½Oh, youï¿½re just nervous,ï¿½ he told her. ï¿½Iï¿½ve been too cruel to you.ï¿½ Stair then gave Belford specific instructions for her to fill a bathtub with the hottest water she could stand, pour Epsom salt in it and sit in the mixture for 30 minutes.

ï¿½He said, ï¿½Make sure the water gets inside,ï¿½ï¿½ she said. If the water started cooling off, Belford was to add more hot water. The first time she tried it, Belford says she could only tolerate sitting in the water for 10 minutes. After reporting this to Stair, he told her to do it again -

this time making sure she stayed in there for the full
30 minutes, she said. ï¿½I did it and went for a walk
afterwards,ï¿½ she said. ï¿½When I came back, I was bleeding.
I went to bed about 11 p.m. and started having intense pains.
Every time, I would black out or throw up. I just threw up
until I was dry heaving. I just laid there for a while.
But then I thought, Iï¿½m dying, and I didnï¿½t want to die by myself.ï¿½

Belford woke up her brother, who sat with her on the couch
the rest of the night. Because Belfordï¿½s pregnancy was never
confirmed by a doctor, itï¿½s hard to say whether or not she
was actually pregnant, according to Dr. Karen Evans of
Womenï¿½s Health Specialists in Walterboro. Though the procedure
Belford described wouldnï¿½t abort the pregnancy, it certainly
wouldnï¿½t benefit a developing fetus. ï¿½If (the water) burns
her, thatï¿½s not good,ï¿½ she said. ï¿½Increased heat can cause
neural tube defects in early pregnancies.ï¿½

Some experts believe about half of conceived fetuses do
not make it to full term, she said. ï¿½Itï¿½s thought
about 50 percent of all pregnancies end in
miscarriage, anyway,ï¿½ said Evans.

Once we arrived People who come to Stairï¿½s community
are searching for something else, but theyï¿½re not
sure exactly what, according to his family members.
No matter what they are looking for, they find something
totally different once they arrive at The Overcomer Ministry.
ï¿½Iï¿½ll be honest with you, he wants to be worshipped as God.
If youï¿½re not going to do that, then he doesnï¿½t want you there,ï¿½
said Tim Butler, a former follower who now lives with his
wife, Pearl, in Orangeburg County. ï¿½Thatï¿½s why so many
people left, because they werenï¿½t going to worship him as God.ï¿½

Not only was he not willing to worship him, Butler feels Stairï¿½s
purpose is less than spiritual. ï¿½He would say many times, ï¿½Damn
you. Damn you.ï¿½ You know the Bible says, ï¿½What is in the
heart of a man proceedth out of the mouth.ï¿½ He didnï¿½t want
to see us saved. He wanted to see us damned,ï¿½ he said.

Most of the followers say they couldnï¿½t wait to get to the
farm. It was almost as if just being there ensured their
salvation, they say. But once they arrived, it was a
different story. Stair, who his former followers
describe as being a micro-manager, criticized every action.
ï¿½He would get on to us for how our faces were ï¿½ we werenï¿½t
happy and receiving everything he said with oh such joy,ï¿½
Butler said. ï¿½If we didnï¿½t have the right face on, he would
get so angry at us. Even on the air, international short-wave.ï¿½

Many of his sermons were contradictory, they say. On one
hand, he would criticize them for not thinking on their own.

ï¿½He used to call us peanut-brains,ï¿½ Butler said.
On the other, he would chastise their exerting free will.
ï¿½He would constantly throw up inequity on us. What inequity
is, is self-will,ï¿½ he said. ï¿½Anytime you did something
that you were just led to do, he would say, ï¿½You did it out
of your own self-will. You were full of inequity. You
are sinning. You are going to hell.ï¿½ï¿½

On one occasion, Pearl Butler was preparing potato wedges
for breakfast. Because seasonings are one of the things
not allowed, she had to make do with some shrimp and
crab flavoring she found in the kitchen.
ï¿½Somewhere between baking them and getting them out
of the table, they were hot. Because we donï¿½t get
hot food, spicy food, everyone likes spicy food for
the most part, the potatoes were gone.ï¿½

To make matters worse, Stair and his family did not
care for Pearlï¿½s potatoes, so after breakfast ï¿½he got
on me for making those hot, spicy potatoes,ï¿½ she said.
ï¿½Too many spices in the food. Too much honey in our
drinks. Too much of anything ï¿½ we all got yelled at.
You couldnï¿½t do anything right to please him, unless
you were one of the women he was wanting or had.ï¿½

Tim Butler agreed, saying most everyone was fair game
for criticism, but there were a select few who were
free from fault. ï¿½Heï¿½s an equal-opportunity basher.
It all depends. If he has designs on a woman, he will
just flatter the daylights out of her,ï¿½ Tim Butler said.
ï¿½If you were one of the girls who spurned him, he would
be telling you, ï¿½Thereï¿½s someone here mocking me.
(Thereï¿½s) somebody here despising me.ï¿½ He would preach
it in the dining hall, and the girls knew who he was preaching at.ï¿½

In most cases, Stair would be warm and inviting over
the telephone, but once they were living in the community
they just became worker bees. ï¿½Stair has a pattern about him,ï¿½
said Pearl Butler. ï¿½One of them was, he never talked to you. H
e always held you off at a distance. Heï¿½d never say hi.
Heï¿½d never smile at to you. He wouldnï¿½t even wave ï¿½
unless he had a use for you.ï¿½

Financing an empire

Most families left comfortable homes and well-paying
jobs behind when they came to Stairï¿½s community.
But prior to leaving their homes, many of them sent
Stair large amounts of money.
It was what he was saying, they say. He was so
compelling over the airwaves that they believed
everything he preached. In retrospect, Stairï¿½s former

followers say they are largely ashamed of themselves
for allowing themselves to be duped.

ï¿½He is a crook. He is a con artist,ï¿½ said Tim Butler.
ï¿½He is after peopleï¿½s money. He is after peopleï¿½s
daughters. He wants to rule over people. Itï¿½s all
about power with him and what he can get with that
power. He takes peopleï¿½s money, and people who send
money in good faith, he uses it for the radio ministry
so he can enlarge it to get it bigger so he can draw more people.

ï¿½One brother, he gave $2 million. Can you imagine that?
A young man ï¿½ 30 years old. He almost lost his life in an
accident, a construction job. There was a suit, and he
got $2 million out of it. He gave it all to Stair.
Thatï¿½s how he bought the station in St. George ï¿½ 810 AM.
Thatï¿½s how he pays for all his radio time. He normally
spends $150,000 a month on radio, but boy, he donï¿½t
hardly spend any money on the farm, for the people.ï¿½

The list of followers who have relinquished their entire
lifeï¿½s savings is extensive. Some of those include
Colletonian Larry Hartley (no longer a part of Stairï¿½s
community) who turned over $185,000 to Stair, the Butlers
who turned over $80,000 and the Duvals who turned
over $200,000. Of this cash, little, if any was returned, they say.
ï¿½After he got our money, we were not an asset,ï¿½ said Kathleen Duval.
Maureen Walker turned over $170,000 to the church, according
to Kathleen Duval. She was then accused of being a witch
and kicked off the farm with only $3,000 to take with
her, according to Kathleen Duval.

Ranging from open sewage to single electrical meters
serving multiple buildings, former community members
allege Stairï¿½s community is so antique that it appears
to fail to meet health regulations. ï¿½There are violations
up there,ï¿½ said Michael Duval. ï¿½When they put in part of
that place, it fell under the grandfather clause.
Some of those houses that fell under the grandfather
clause were replaced or added onto ï¿½ now they donï¿½t fall under that.
ï¿½There are septic systems that have been put under there
with no permit. Thereï¿½s electrical work thatï¿½s been done.
There are trailers that have been put on there that havenï¿½t
been inspected or anything like that.ï¿½

A S.C. Department of Health and Environmental Control
spokesperson confirmed that the agency must be notified
prior to putting in a septic tank.
Michael Duval says he did some research on the countyï¿½s
building inspection laws. ï¿½I went to Colleton County to
get a copy of the building requirements ï¿½ just to check
out,ï¿½ he said. ï¿½(One of the standards calls for) one

electrical meter for one trailer. Thatï¿½s not the case
up there. They have multiple trailers. Itï¿½s like a
drop cord city. They have multiple trailers on the
same electrical outlet.ï¿½

Confirming Michael Duvalï¿½s claim that only one electrical
pole can be used for a mobile home, Colleton County
Planning and Development Office Director Kevin Griffin
said various other steps must be taken before a
mobile home can be moved onto someoneï¿½s property.

The office has no record of any permits being issued under
the names Overcomer Ministry or Ralph Stair, within the
last three years, which is the time period required
by the state to keep such documents, Griffin said.

Longtime inspectorï¿½s office employee Teddy Reed remembered
the community applying for a mobile home permit and
inspection six or seven years ago, though he was not
certain on the exact date, Griffin said.
ï¿½He said it was quite a while back,ï¿½ said Griffin.
The problem with these violations is they endanger
those living on the farm, says Michael Duval.
ï¿½If something should ever happen up there, or something
should ever happen to one of those trailers, (like if)
they burn down, who do you think is going to be holding
the bag? The building inspector in Colleton County,ï¿½ he said.

Other allegations, made more sinister since the Sept. 11 terrorist
attacks, have arisen of illegal aliens residing than the building codes.
ï¿½Thereï¿½s two people there that arenï¿½t citizens of this country.
One has an expired visa and the other one has no permit to be
in this country,ï¿½ said Michael Duval.

One way Stair saves money is by registering vehicles out of state.
That way, the community does not have to pay vehicle taxes.
ï¿½He would license the vehicles out of Tennessee so he wouldnï¿½t
have to pay taxes,ï¿½ Michael Duval said. ï¿½He was very smart, because
he would have the individuals do it. He would say, ï¿½Well, itï¿½s
not mine.ï¿½ He always says he has nothing in his name.ï¿½

Absolute power corrupts absolutely

Stair was born on May 3, 1933, in Bethlehem, Pa. ï¿½ a fact he
proudly touts, as his birthplace shares the name of the city
in which Jesus Christ was born. He grew up in what family
members describe as being a good home environment.

As a young man, it was apparent Stair had an affinity for the opposite sex.
ï¿½Of course, he liked the girls,ï¿½ said Hart. ï¿½He was always the ladiesï¿½ man.ï¿½
Stair met his first wife at one of her fatherï¿½s camp revivals in 1950.
They dated about six months, and when he was 18, he married the
22-year-old woman on June 30, 1951. ï¿½If they had still been

together, they would have been married 51 years,ï¿½ said Hart.

The union, however, was anything but blessed, Hart recalls.
Stair was physically and mentally abusive to his wife
throughout their marriage, she said. ï¿½He (Stair) was always
verbally and physically abusive to her, especially when she
stopped travelling with him,ï¿½ Hart said.

Additionally, Stair had many extramarital affairs, one of
which resulted in a pregnancy, Hart said, but the child
was never born as the woman had an abortion.
ï¿½He had affairs that my mom knew about, but she was sure
there were some she didnï¿½t know about,ï¿½ Hart said.
On several occasions, the couple separated, but Hartï¿½s
mother always went back to him, because ï¿½he was a sweet talker.ï¿½

Stairï¿½s wife always believed he would change, as she prayed for him to do
so.
ï¿½He changed one time, but it didnï¿½t last long,ï¿½ Hart said.
After getting married, Stair began his ministry in Allentown, Pa.
a calling his family says was started with good intentions.

ï¿½He had a normal kind of church, but he didnï¿½t believe in medical care.
Even though my father and his personal life are nuts doesnï¿½t mean
God hasnï¿½t used him to do good,ï¿½ Hart said. ï¿½The Bible says
what it says for a reason. Sometimes God uses people in spite of
themselves.ï¿½

Stairï¿½s daughter described times when she witnessed people being
miraculously healed.
ï¿½I saw people get out of their chairs and walk,ï¿½ she said.
The family moved from Pennsylvania to Alabama in the late 1950ï¿½s.
In the early 1960ï¿½s, they moved back to Pennsylvania.
A few years later, the family migrated to Los Angeles,
finally ending up in Georgia in the mid-1960ï¿½s.
ï¿½When they traveled, they lived in old cars, trucks,
school buses and motels,ï¿½ she said. ï¿½They never had a
set place to live, because he moved them so much.ï¿½

Different from his beliefs today, Stair watched television
and had church services on Sunday rather than Saturday
in his early ministry. ï¿½Heï¿½s just gone totally
extreme now,ï¿½ Hart said.

After 27 years of marriage, Stair, who had been
legally separated from his wife for four years
and been living in New York, instructed her
to file for divorce in 1978. ï¿½He made her file, because
he wanted to be able to say it was her fault, not his,ï¿½
Hart said. Stairï¿½s first wife did as she was instructed
and filed for divorce, citing irreconcilable differences
as the cause. Stair paid all the costs, Hart said.

After marrying his current wife Teresa, who was an opera
singer from Boston and had converted from Roman
Catholicism, Stair moved to South Carolina.
The couple has one child, a 15-year-old daughter
who currently lives with them on the farm.

Hmmmm: because there is a club callsign in the name of BARF, you really
believe that alone makes it real?

Then go over to www.qrz.com and look up KF6FDQ, which is the
"club" callsign for the "BUDDYS BONG HITS" ARC. I've heard its
"trustee" state on a certain "notorious" Los Angeles repeater that
"Buddy" is his dog... and I'm told that a "bong" is a funny-looking pipe
used to smoke marijuna. (Gasp!)

Callsign: KF6FDQ Class: Club
Name: BUDDYS BONG HITS
Addr1: PO BOX 302
Addr2: TUJUNGA, CA 91403
Country: USA
Effective: 01 Jul 1999 Expires: 17 Jul 2006
Trustee: KC6QXA, ALAN A SANCHEZ

535. Bill in Congress to Address CC&R Antenna Restrictions

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-20 07:55:40 UTC
From: Dwight Stewart <stewart@sc.rr.com>
Message-ID: <3D118AB7.93D7E9FC@sc.rr.com>
Source record: 76228
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.misc,rec.radio.amateur.policy

A bill, HR-4720, has been introduced in the House of Representatives to provide relief for Amateur Radio Operators faced with private deed covenants, conditions and restrictions (CC&Rs) in erecting antennas. The measure would require private land-use regulators, such as homeowners' associations, to "reasonably accommodate" Amateur Radio communication consistent with the PRB-1 limited federal preemption. PRB-1 now applies only to states and municipalities. You can find more info at ARRL's web site...

http://www.arrl.org/news/stories/2002/05/14/102/?nc=1

I'm asking all ham radio operators to support this bill. And the best way to do that, in addition to telling others about this bill, is to write your representative. Writing a Congressman is quick and easy. Near the bottom of the ARRL story, there is a link to a web page where you can find, and send a message to, your Congressman. In less than five minutes, you're done. If you don't know what to say, simply say you agree with HR-4720 and would like the Congressman to cosponsor and/or support it.

If you decide to write a letter to your Congressman instead, don't forget to include your name and address. Since they want to insure each letter comes from a different person, and from a person in their own political district, a letter without a name and address is often trashed.

Even if you don't have a restrictive CC&R now, one never knows what the future will bring. A year ago, I thought about this subject only in passing - a good topic to discuss in a newsgroup. However, we recently moved so my wife could attend another school, and only found apartments with restrictive CC&Rs at the new location. Needless to say, we've written our Congressman about this bill.

Dwight Stewart (W5NET)

It exists, but it's such a bad group that other similarly named groups
have published disclaimers in the past. Take, for example, the
following notice which was once repeatedly published by a ham
organization located in Cleveland:

===(begin quote)===

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 330
BID: $OPDX.330
November 10, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX
Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The
59(9) DXReport, K3ZO, N4GN, N6RT, K8YSE, K9LA, K9VV, AH0W/OH2LVG,
F6AJA, G3NOM, G3SXW, G4BUE & DX News Sheet, HB9HFN, HS0/G4UAV and
ON4VT for the following DX information.

IMPORTANT NOTICE FROM EDITOR! It is a shame I have to go through this
again, but BARF-80 BBS (Basic Amateur Radio Frequency) is NO (repeat
NO) way connected or associated with the B.A.R.F. (Better Amateur
Radio Federation). The same notice was issued several years back, but
due to the numerous messages appearing on the UseNet groups dealing
with B.A.R.F. and involving hatred towards individuals, this message
is important to circulate before confusion between BARF-80 BBS and
B.A.R.F. gets out of hand. PLEASE PASS THE WORD! There is NO
ASSOCIATION OR CONNECTION.

3.898 is NOTHING like the good ole days
up until the early 80's. I recall "Gator
Stakes". Remember that one? 75 Meter's most
infamous contest? It was great! Probably the
only time during which the collective
RF Power on the freq was equal to that of the HAARP....

> Some other frequncies to watch

Lib Net is DOA. Forget about 3.950
3.860 from 10 PM is an amusing read
with Tommy Toob and his pals..
3.853 still active with da-drunk
from TX sporadic from 1:00 AM on..

Pickins been slim since RH cleaned up 75 and now
is but a mere shell of it's former amusing self.
Alot of the SWL's are long gone as 75's now like
a ladies church picnic..

Oh well, there's always domestic shortwave radio
with the "magnetic water" and "Pay-triot" screwball broadcasts
to provide some comic relief, along with Art Bell's kooky guests
for the late-shift rubber-room watch..

Yopu are a sick pervert, Krapout, just like Fyre reported in his research:

Yes folks, seems that the good old canuk legal system has stemmed the
flow of absolute shite from Jamesy boy's fucked up applemac. As
reported in the Toronto Tribune (Pulled from Tribune's web site):

:===
Previous Next Search Today's news Back to top

Date: 09/19/97 Page 7

The long running mystery of clothing disappearing from washing lines
around Ontario was solved yesterday with the arrest of a Mr James
Koput of 55 Eglinton Ave. W., Toronto, ONT, M5N 3A8, Phone number
(416) 485 4683.

According to an officer at the scene, officers raided koput's
apartment, where he lives with his parents, at 7:00am, and found the
accused in posession of 563 pairs of old men's pants. One pair of
which Mr Koput, 40, was sniffing whilst "abusing himself" and wearing
what police describe as "feminine clothing". Also discovered at Mr
Koput's residence was a quantity of hardcore pornography, featuring
old ladies and handicapped children being sexually assaulted by
assailants wearing soiled diapers. As yet, rumours that these are home
videos are unconfirmed. There were also what police describe as "an
unusually large quantity of used condoms in a bowl under Mr koput's
bed. The accused apparently denied they were his, and he'd just "found
them lying around".

Police were tipped off by some of koput's neighbours who reported him
"skulking about" and "smelling bad" around the area. Several also
mentioned that he often wandered around the streets with bulging
trousers as though he was wearing a nappy for some kind of sexual
thrill.

Welcome back Dwight,

Congrats on the move and best of luck to your wife with her studies.
Great message and thanks for the heads up. Consider my letter sent.

Field Day is traditionally held on the last full weekend in June. This year, that would appear to be June 29-30. So, how come Field Day is being held on June 22/23?

Art Harris, N2AH

Not to forget WBCQ on 7415 from Maine. Saturday evenings around 6PM the Timtron (WA1 Henry eLaR) does a couple of shows including one on ham radio.

Someone said, Mrs. Stair is again several months pregnant.

Suppose we were to learn at some future point that Mrs. Roerig was anti-Christian and would gladly tear down ANY Christian church or community? I'm not saying that we will, but just "suppose"?

Islam believes all non-Islamics are "infidels" and deserve to be annihilated. The Jews hate Christ and think He was an impostor. There are probably other religions with similar views. The above paragraph is not out of the realm of possibilities. Just something to meditate on! Does anyone know what Mrs. Roerig's religious affiliation is?

How did you come to that conclusion? By using your receiver? I'm afraid thats not going to work. The apparent width you see is a function of your receiver, not the signals you are listening to. The reason being is the operation of the filtering in your receiver. Take the average SSB filter of 2.4 kc at 6 db down. At 60 db down it may be 4.8 kc or even wider. In other words, the apparent width you see will vary according to how strong the signal is. You could take a legal signal and listen to it at 40 miles away, "say with a ground wave" and it will "seem" to be quite narrow. Now, if you drive your car up next to his house, he will be 60 db over S9, and will seem to be so wide that he surely must be illegal. But this is just due to the limitations of your receiver. His signal has not changed. This also applies to people that run linear amps. They will seem wider, but they are NOT!!! If that was the case, they would be illegal. I get so sick of people claiming I'm too wide just because I'm beaning them with a 40 over 9 signal. The only way you will be too wide on a modern properly built radio with 2.4 kc filters is to splatter by overdriving the rig. And in that case, you will hear "buckshot" type noise totally away from the frequency that the dirty signal is on. It will be obvious they have a problem. MK

Hello-

I would like to connect an HF transceiver and also a Radio Shack PRO-2006 scanner into one outside, vertical antenna. Yes, the antenna is designed for HF Ham bands, and I simply want to improve my scanners performance over its metal whip by connecting it to the outdoor antenna.

Would I use a two-way switch to do this, or use a "T-Adapter" offered at Radio Shack (part number 278-198)?

Thanks!

billpritjr@REMOVETHISyahoo.com

Thanks, Bert. After a hassle with several news servers recently, and being off the newsgroups for several months before that due of other commitments, I'm very glad to finally be back.

> Congrats on the move and best of luck
> to your wife with her studies.

Well, the move was unexpected. The previous school dropped the major my wife was seeking, forcing a quick, between semester, move to another nearby school (and a move to a home closer to that school so she has less distance to travel each day).

> Great message and thanks for the heads up.
> Consider my letter sent. :-)

I don't write my Congressman very often, but this bill was enough to get me to sit down and actually type out a letter - printed on my best paper. :-)

Thank you Frank for passing on that piece of info. I went to qrz.com
and looked up the call. I am reposting some of the info from the site:

"KF4AGM is the Better Amateur Radio Federation's Michael C. Gallego
memorial club station. The mission of KF4AGM is to spread amateur
radio goodwill throughout the world and to keep alive the memory of
Captain Mike, KA4MUJ. Captain Mike has passed on but the example he
set for us will never die. There has never been another amateur radio
operator who loved our hobby as Mike did. He endured deliberate and
malicious QRM on a nightly basis from those who sought to silence him.
Net members with their hired thugs and lackeys could not defeat Mike.
He left this world undefeated and a credit to his family, friends and
amateur radio. When you hear KF4AGM on the air, think of Captain Mike
and his legacy. The Better Amateur Radio Federation will never forget
Captain Mike. We hope you won't either."

Rev: KF4AGM - Sun Jun 21 3:09:24 1998

Thank God for good people like Captian Mike!

God rest his soul.

That's generally correct, and operating with poor engineering
practices which might make your signal wide via distortion is
improper.

It is important to remember, though, that there are no specific
bandwidth restrictions on amateur 'phone transmission (except to
stay within the band), and attempts to impose such have been
vigorously fought by those who want to retain their right to
experiment.

If one's amateur signal is wide because one is using a wider audio
passband than that conventionally used, there is nothing at all
illegal about that -- nor should there be, despite the beliefs of
some that no one should ever exceed telephone quality bandwidth.

With all good wishes,

--

news:ZYqQ8.326$jf6.38106@e3500-atl2.usenetserver.com...
> He never quits!

Wrong again, Fuckles.

However, you have quite an arrest record, huh, according to the LewisLouis
Detective Agency.....

Police arrested Lloyd A. Davies, a 27 year old white male, resident of
Athens, Alabama in the Anderson Pumpkin patch at 11:38pm Friday. Davies
will be charged with lewd and lascivious behavior, public indecency,
and public intoxication at the Athens Municipal Courthouse Monday. The
suspect allegedly stated that as he was passing a pumpkin patch, he
decided to stop. "You know, a pumpkin is soft and squishy inside, and
there was no one around here for miles. At least I thought there
wasn't." he stated in a phone interview from the Athens Municipal
Courthouse Jail.
Davies went on to state that he pulled over to the side of the road,
picked out a pumpkin that he felt was appropriate to his purposes, cut
a hole in it, and proceeded to satisfy his alleged "need". "I guess I
was just really into it, you know?" he commented with evident
embarrassment. In the process, Torrance apparently failed to notice the
Athens Municipal police car approaching and was unaware of his audience
until officer Brenda Taylor approached him. "It was an unusual
situation, sure." said officer Taylor. "I walked up to (Davies) and
he's... just working away at this pumpkin."
Taylor went on to describe what happened when she approached Davies. "I
just went up and said, 'Excuse me sir, but do you realize that you are
screwing a pumpkin?' He got real surprised as you'd expect, and then
looked me straight in the face and said,
'A pumpkin? Damn... is it midnight already?"

I presume you are talking about U.S. regulations?
Other administrations very specifically state bandwidth restrictions
rather than modes.

For example: in Canada the 30 metre band is limited to 1kHz bandwidth,
20 metres 6kHz and 10 metres 20kHz etc. Modes are not specified in the
regulations.

Dave

Yes, forgive me for not making it clear that I was talking about US
regulations. Personally, I would like to see a combination of the
best of the US and Canadian approaches: no specific mode
designations (as in Canada) coupled with no bandwidth restrictions
except for those called for by good engineering practices (as in the
United States).

With every good wish,

Here is a good description of 2test.

1) He struggles, and finds it laborious getting through every day, and
cannot "fit in" to the average day to day mingling with the normal
populous.

2) A community mis/fit, at best he has a menial job (if any) taking
orders at a hamburger drive thru. Most likely, he is on some kind of
monetary assistance from the government, welfare, food stamps etc. His
dwelling is a pig sty, and he lacks personal grooming and good
hygiene.

3) He has never succeeded in any endeavor which he has pursued.
Always a failure.

4) He was picked on, ridiculed, laughed at, scorned, and bullied as a
youth, and was always at the bottom of the "pecking order" while around
others. To this day he shies away from others to avoid conversation, its
what's commonly known as being a conversation dropout, due to
intellectual shortcomings.

5) He probably abuses or has abused animals during his lifetime, as these
are the only creatures in life which he can dominate and convey
"authority" to.

75 has never been as amusing since the passing of Mike, W2OY. Now THERE was a class A operator. (CQ, CQ, calling CQ ... no lids, kids, space cadets or school bus riders ... only class a operators on this frequency ... from W2OY) He was a barrel of laughs back in the 60s and I'm sure some folks will remember others from earlier eras. Why 75 has always attracted the nut cases, I'll never know (although 14.313 has had a few as well).

Local amateurs in Marshall county said Roger left his mother's
memorial service after only a few minutes, saying he had urgent
business. It was noted that within 30 minutes of leaving the funeral,
obscene, filthy, & personal attacks were posted by Curtains Boy
on Usenet. His mental illness knows no limits. Get help Roger.
Get help now!

Actually, there is . But it's vague and easy to miss.
>
> If one's amateur signal is wide because one is using a wider audio
> passband than that conventionally used, there is nothing at all

> some that no one should ever exceed telephone quality bandwidth.
>
> With all good wishes,

The FCC doesn't specify a certain number per say, but they do specify
that the bandwidth used should not use more than needed for the mode in
use.

ï¿½ 97.307 Emission standards.
(a) No amateur station transmission
shall occupy more bandwidth than necessary
for the information rate and
emission type being transmitted, in accordance
with good amateur practice.

and in another part they specify that the bandwidth shall not exceed
that of a "communications quality" signal.
But they make it vague and hard to understand as it applies to phone
emissions. Note:

(2) No non-phone emission shall exceed
the bandwidth of a communications
quality phone emission of the
same modulation type.

This is talking about non-phone emissions. Now, they fail to mention
elsewhere that phone emissions should be limited to communications
quality audio, but being as they use a phone emission as a "standard" to
which non-phone emissions are held to, that makes it pretty clear to me
that phone emissions must also adhere to the "communications quality"
bandwidth.

In general, most assume a communications quality signal not to exceed 3 kc for a SSB signal. This would equal 6kc for an AM signal. They used to actually specify 3kc years ago I'm pretty sure, but have since changed the wording of part 97 to make it vague and hard to understand. But I still assume that 3 kc is the limit for a SSB signal on the HF bands below 29 mhz. The thing is, no commercially made tranceivers come with a standard filter that wide. In general, about the widest you will see will be appx 2.7 kc. If you use one wider than 3 kc, I consider it illegal. And I would bet money that after careful consideration of the rules, Riley Hollingsworth would agree with me. He should anyway I think. Actually, I should ask him about that, being this seems to come up about once a year. I think he needs to make a definitive ruling on that area of part 97, and change it to make it black and white. It's too vague as it is.
But the part (2) that I posted second, pretty much seals it up for "me". As far as I'm concerned, 3kc is the limit for a SSB signal in the HF bands. 6 kc is the limit for an AM signal. BTW, 3 kc is plenty wide enough to have excellent "phone" audio quality. Even 2.7 kc is very good and crisp. 2.4 kc is not bad at all either and is the usual "standard" filter. Some rigs use 2.1 kc as a stock filters, and still sound ok.

You can't use just a receiver to determine the bandwidth of a SSB signal. Even a fairly narrow signal will "look" wide, if it's strong enough. I don't talk on 3.898, but I'm aware of them, and know most run big amps, and have fairly loud signals in that neck of the woods. But I'm fairly certain all are legal as far as bandwidth, unless they have butchered into their radios. Most are in 4 land, and have been on there for years and years. I'm sure the FCC would have jumped their butts by now, if they were "really" too wide. MK

What a stoopid thing to say, Kimby. Everyone knows that Wiseman is hauling
everyone else's trash around for recycling. Roger has obviously been
mimicing my style of raunch for many moons. And just like all the other
posters he's plagiarised, he's never been able to get it right. I've always
gone straight for the jugular with the precision of a brain surgeon, Roger
on the other hand is like a clumsy retarded bull at Ashley's. It's obvious
that out of all the posters Roger has aspired to be, he has chosen me
because I'm an absolute powerhouse. I'm very happy to be the one to shatter
him.

Interesting article you pulled from google. I remember
<4ja9p5$esv@aahz.magic.mb.ca>
was how I really felt about FyRE's r/l stalking and how fed up I was with
his bs. After that article was posted, almost everyone from a.f. was sending
me email asking me to reconsider my retirement from usenet. Glad I listened
to them. I've posted many priceless masterpieces since. :)

Roger still hopes to convince someone out there to believe in him. That's
probably what keeps him going. However, that someone will have to be mighty
fucking stupid and I don't think anyone can be dumber than him. With that in
mind, his only hope is to keep up the tradition of inbreeding.

Sheeesh! All I ever heard Old Mikey do was kiss Herbie ass, it was
pretty sad. Between the accent he had and his sucking up to Herb, it was
pretty funny, again, in a pitiful sort of way. What kind of "Captain"
was Mikey anyway??

No...like father, like daughter. Roger is equally as kinky, tho he hides it
well.
Akin to his daughter, Roger is partial to those of the same sex. They both
prefer
purple Boas...and Roger can be SO resplendent in his violet tu-tu! Like his
daughter, he
prefers the short skirts at thigh level because this allows him the freedom
to splay his knees at will!

> wider.

Absolutely correct! You have to subtract the width of your filter from your measurement. Let's say you can hear a station from 3900 to 3907 kHz and your i.f. is 5 kHz wide at 60 dB down. If the signal is strong, it is probably around 2 kHz wide. This can be verified using a spectrum analyzer.

The best way to prove this is to tune through an unmodulated carrier. Such a signal has essentially zero bandwidth. Yet your receiver will hear the heterodyne over several kHz.

Art Harris, N2AH

In order to save time, I'll consider this a response to Mr. Martin and yourself, since you cover largely the same topics. If I've missed a subtle difference in your points of view, forgive me and I will attempt to correct it later.

Amateurs have, since the very early days of radiotelephone, and without break until today, experimented with voice modes of more than telephone quality audio bandwidth. They have experimented with pulse-duration modulation, outphasing modulation, DSRC, ISB, subcarrier transmission, and QUAM, among others, in addition to various implementations of conventional AM and SSB, sometimes using innovative multiband audio processing techniques, transmissions optimized for PLL or Costas loop detection, or other techniques which have had an effect on commercial practices. It's true that these amateurs have been in a minority, compared to the "hook up the mike and antenna to the commercial rig" crowd, but I daresay they're just as important.

This use of wider-bandwidth audio has been continuous since the 1930s at least, and the Commission has always been aware of it. It

has always been considered legal. There was tremendous controversy
when, in 1977 I believe, there was a proposed rulemaking that would
have enforced appliance operation by forcing specific bandwidth
limits on amateur operation. The proposed rulemaking was rejected.

> § 97.307 Emission standards.
> (a) No amateur station transmission
> shall occupy more bandwidth than necessary
> for the information rate and
> emission type being transmitted, in accordance
> with good amateur practice.

The information rate may be chosen by the amateur. This section
merely requires the amateur not to have distortion, overmodulation,
or other poor operating practices that increase the bandwidth
without intended purpose.

>
> and in another part they specify that the bandwidth shall not exceed

> that phone emissions must also adhere to the "communications quality"
> bandwidth.

Not at all. If they had wanted to limit 'phone bandwidth they would
have added two words to say so, and then the non-phone emissions
would have been limited simply to "the bandwidth of a phone
emission."

Seventy continuous years of perfectly legal high-quality 'phone
transmissions make it obvious that wider-bandwidth audio is now, and
has always been, allowed. Thank goodness! Without the
audio/unique-mode experimenters many of us would never have been
attracted to amateur radio. Telephonic communications is not an
ideal or even an interest for all of us, though it has its place.

>
> In general, most assume a communications quality signal not to exceed 3
> kc for a SSB signal. This would equal 6kc for an AM signal. They used to
> actually specify 3kc years ago I'm pretty sure, but have since changed
> the wording of part 97 to make it vague and hard to understand.

No, you are quite wrong there -- thankfully for the craft of amateur
radio, there has never been a regulation forcing all of us to use
one kind of modulation or one incarnation of that modulation scheme
(telephone-quality SSB, actually developed to save money without
sacrificing _too much_ intelligibility in long-lines multiplex
telephone circuits).

> But I
> still assume that 3 kc is the limit for a SSB signal on the HF bands
> below 29 mhz. The thing is, no commercially made tranceivers come with a
> standard filter that wide. In general, about the widest you will see
> will be appx 2.7 kc. If you use one wider than 3 kc, I consider it
> illegal.

Again, there is no such limit, though it is true that the
buy-it/plug-it-in/and-talk crowd generally doesn't understand that,
and a few of the dimmer bulbs actively resent anyone operating in a
different phone mode. They are the mirror image of the ignorant
AMers of the 1950s who raged against SSB because they didn't
understand it, it seemed to cause more interference, and it was just
"different."

[...]
> You can't use just a receiver to determine the bandwidth of a SSB

> now, if they were "really" too wide. MK
[...]

It's possible to get a good approximation, if you know the
characteristics of your filters, attenuators and AGC meter, and you
scrupulously avoid overload. But, I agree, few know how to do this
and most subjective impressions are, exactly as you say, totally
spurious.

May I add that that the FCC would have "jumped" on the
broadcast-quality AMers too, who have been on the air continuously
since the 1930s, had they been violating any rules. To my knowledge,
they have never received a single citation on that account in more
than seven decades -- the entire history of the Commission.

With every good wish,

Kevin, WB4AIO.

Why is it that some hams from the "low-rent
disctict freqs" of 20 and 75 Meters just can't seem
to let the dead R.I.P. ? Even just last week a
group on 3.8-- was yackaty-yacking about some
SK having a stroke, and which one of them
was the cause of it. Downright disgusting
and a black-eye to this hobby of ham radio
should any non-hams been SW listening.

Yes, I remember hearing ka4muj. He was a curmudgeon
but now that he's SK, it's best to withdrawl in respect
and reflection - if such is possible, that is.

He wants someone to believe in him? Ha Ha Ha Ha Ha! I might post some
stupid shit once in a while but most of the time I'm sane. Not so with
roger.His posts are culled from his own little microcosm of incest,
bestiality, and pedophilia. It's like he's writing scripts for porn
movies. I don't know, maybe deep down inside that's what he wants to

do. But being stuck in West Virginia in a trailer park, all he has is Usenet.

I said that it was left up to the amateur to decide the information rate of his transmission, which is just as it should be.

It is the collective state of the radio art that determines what good practices are, naturally, and the FCC are our employees to make sure that all are able to experiment and communicate without interference due to malice or to incompetence. That is _all_ they are, of course, and the best Commission men realize that.

> I'll bet my inheritance that, once you start transmitting a signal of
> 15 to 30 KHz bandwidth, the FCC will find your claim that you need
> that kind of bandwith to be without merit, and will tell you to cease
> operations or to face penalties.

Since I personally know of amateurs who have been transmitting broadcast-quality AM for the last 34 years, virtually every day, and know for certain that it has been done for decades before that; and since I also know that _none_ of these amateurs has ever been cited for his audio bandwidth; and since I also know that their operations have been known to the FCC for these many decades and have even been the subject of groundless complaints by the ignorant; you must, if you are an honest man, consider your wager to be lost.

Your inheritance may be sent to my address of record in the QRZ database: my callsign is WB4AIO.

As a postscript I will note that proportionally _very little_
average energy is transmitted in a broadcast quality voice signal
above 4 kHz -- in fact, the preponderant increase in energy is
below 300 Hz -- but that tiny amount of energy does increase
articulation to say nothing of fidelity.

>
> The intent of part 97 is quite clear to me and to others: Use the
> minimum power and the minimum bandwidth necessary to maintain
> communications on HF, or be in violation of the law.
[...]

There is no minimum bandwidth requirement and there never has been.
Had there been, we should all have been required to use very slow
CW. Why should we be allowed to use _hundreds of times_ the
bandwidth (to say nothing of the power) necessary just because it
gives us selfish _pleasure_ to reproduce our voices and speak
instead of using a key or keyboard?

With every good wish,

Kevin, WB4AIO.

623. HELP with TS-711A Cables

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-22 20:09:15 UTC
From: windbrkr@Zerols.com
Message-ID: <MPG.177ea375cdf3a8a1989987@news.erols.com>
Source record: 76166

A blind Ham acquaintance of mine has a Kenwood TS-711A rig that he wants to install a VS-1 voice synthesizer and a TU-5 tone encoder board into.

Whoever had the 711A before him did not include the jumper cables for these two accessories with the rig. My understanding is that the cables come with the rig, and not with the accessory boards. Kenwood has not been able to help on this one.

Can anyone here describe the pin outs and connector types of the cables required to install the VS-1 and TU-5 into the 711A?

I haven't yet seen the rig or the accessory boards, but it sounds as though they both have male pins, requiring female sockets of some sort on both ends of the cables. It also sounds as though at least two cables, maybe more, are required to complete the hookup.

Any help will be much appreciated!

73, Bob K9CMR

Yeah, but it is a crying shame you are still alive. I can still
remember all the filth you spewed on 20 meters about KT4TR and K3QAM.

KT4TR, the drunken lying asshole is finally gone......

K3QAM = Quite A Moron.....a friggin' idiot.

I can still remember all about the "boom box" incident that TR talked
about.

Then, you ought to realize that it was a bs story.

And then, when I thought you can do no worse, you were sent a
retest letter from Mr. Hollingsworth. You used the excuse that your
mother was sick, and could not take the retest.

Wrong again, Peckerbreath, it was Jimmy's wife.

As far as I am
concerned, you should have your ham license revoked. No wonder people
in the B.A.R.F. called you the "Tampa Turd"

Lloyd Davies,
The Better Amateur Radio Federation

>>

Who in hell appointed you the head of barf??????

Not herb.

You are a self appointed dumb wannabe, lloyd da toid.

Whew whats that stench coming from your hud hovel apartment?

I have a Wagner PS-100C Power Supply and I'm looking for a schematic for the regulator & overload protection module (PS-100R).

Although I can trace the parts happily, a few components are rather crispy and I need the schematic so I can determine what part is what!

Any assistance would be greatly appreciated.

Cheers

Wiseman chapter and verse snipped.....

Speaking of Mule Humpers, how is your pathetic love life going, Rog? Still making it with your bevy of inflatable dolls? Know what I mean? Get yerself to the Auto Zone and patch up those other male "dolls" you abused...after all, that needle dick of yours could not have caused much damage to your inflatable buttt-buddy friends. Grab your purple mesh stockings and go dancing at the local Lavender Lads bar. You deserve the respite.
And while you are dancing with the Lavender Lads, be sure that you swallow all the evidence...you would not want the DNA remnants proving that you are a cork sucker.

My old dog is up to date on the likes of Roger...the dog sees a pile of shit and by nature my dog buries it. Roger is not up to snuff in that he does not realize he is a "pile".
If the two were to ever cross paths, I am sure my dog would grab Roger by the neck and bury him like the chunk of shit Roger is....

Not very Xtain, Llllardassssssssssssss Lllllllllllllllllloyd. But you only
hide behind your "religion" when it suits you, don't you?

> I can still
> remember all the filth you spewed on 20 meters about KT4TR and K3QAM.

I can still remember you transmitting unidentified with only a No-code
Technician license from that rusted out pickup truck, Lllardasssssssss. And
still doing it.

> I can still remember all about the "boom box" incident that TR talked

Tingly Rectum the alcoholic can't even remember what he was babbling on
about.

> about. And then, when I thought you can do no worse, you were sent a
> retest letter from Mr. Hollingsworth. You used the excuse that your
> mother was sick, and could not take the retest.

I bet if you had to retest even for Technician, Lllardasssssss, you'd fail
it.

> As far as I am
> concerned, you should have your ham license revoked. No wonder people
> in the B.A.R.F. called you the "Tampa Turd"

With your world-class stupidity, it's no wonder people still call you
"dumbass," Lllllllardasssssss Lllllllllllllllllllllloyd, you utterly useless
imbecile.

"Impotent" Turdeater a sniveling coward, noted.

> Speaking [IKYABWAI]

Speaking of inflatable dolls and love life, how's that hog wife? Oh, that's right you never got married after 50-some years of being a faggot, Turdeater. Nadless Ate White Gay Male whined and made the excuse that he never married on the air because he "let one get away". More like he is so repulsive looking (like a mutated chipmunk) and couldn't get laid if he went to a whore house(even where his mommy worked) and if he could secure a Platnium Visa card.
And Whorass Grimm, he just still goes down on his daughters.

status makes the story even less credible."

Translation: Faggot Lee uses the same "pssst!" when he tries to expose
himself to kids at city parks, wearing nothing under an old raincoat.

> I knew it wasn't lloyd da toid, spelling was too good.
>
> I'll bet I can narrow it down to two people though.....:-)

Anything Faggot Lee says has no credibility, since the post came from a
Bellsouth account, and Lllardasssssss Lllllllloyd has a Bellsouth
account.

Anonymous coward and all-around fuckwit "Stagger Lee"
<SLee@houston-hunks.com> revealed what a hypocrite he is and ironically
admits he has no credibility by his own definition in message
<3C36FDCC.76EC185D@houston-hunks.com> :

"Therefore, I find your story difficult to believe. Your own anonymous
status makes the story even less credible."

Lllardasssssss Lllllllllllloyd Davies ~has~ a Bellsouth account, fuckhead.
He's not in Atlanta. But you're the fuckwit who tried to claim that Kevin
Mitnick posted to alt.2600, so talking out of your ass is natural for you.
Not to mention how you're too chickenshit to post under your real name or
callsign, you big, dumbfucking brave thing you.

But could it be:
Stagger Lee
3103 Andora Trail
Marietta, Georgia 30064

[Space reserved for Faggot Lee to backpedal and make excuses why he doesn't
post his real name]

BTW, you'd better quit forging Rev. Fred again, you tried that already and
got caught, Stupidass Lee..

Poor Faggot Lee, aka "Whorass," has to hide from me. Too bad he can't afford
a decent calculator. Maybe he can follow the family tradition and just
shoplift one.

> Poor Wogie, kicked out of the Marshal county ARES meetings.

I was? that's news to me, but I bet I let Ray (The Marshall County EC) know
about how the only reason two overgrown adolecent neo-nazi goofballs with
cheap cologne to cover their offensive body odors, (perhaps they were making
love to each other before they arrived to the meeting) and their horribly
disheveled appearance (both had on clothes that looks like they've worn for
days, maybe it was the intense lovemaking they did befoire the meeting) that
looked like they'd never ironed or washed their clothes about how the only
reason they were there was to stalk me.

I would be interested if getting feedback from people local to these areas,
as to the extent -freq bandwidth, power, modes affected; ie GPS 2M, police
freqs, or just cellphones.
If the emergency / public services freqs are affected and the jamming
contributed to an "event", who would be sued by the affected parties?

You'll have to talk to your fellow Canadians, VE3TMT. Our main focus now is getting this bill passed while we still can. If we let this bill slip by, it could be many years before a bill like this is proposed in the Congress again. Obviously, this concern leaves us little time to worry about the laws in Canada. :-)

679. Help for a friend with an ICOM IC-751 Transceiver

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-24 05:20:58 UTC
From: John Boyle <john.boyle@erols.com>
Message-ID: <3D16AC3A.94AC4D7B@erols.com>
Source record: 76072
Cross-posted to: alt.ham-radio.packet,free.uk.amateur-radio,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.shortwave,uk.radio.amateur

A friend who doesn't have access to newsgroups asked me to post this message for him. Please forgive me if I've posted to this group in error.

Concerning the ICOM IC-751 Transceiver, my friend asks:

"...In that radio is a ram-board that contains the operating system for the radio and that's where memory channels are stored. I need the hex code for that radio. I believe the board has a total of 1024 bytes of memory. I think the first 256 bytes is for the operating system and the remainder is for user memory storage. I need the first 256 bytes.... maybe you can put this request on the news groups and some Ham out there might have the code and can send it to me at W2RB@JUNO.COM..... it would be greatly appreciated... tnx.."

If someone can help him, you can email him directly, or email me and I'll get it to him.

Thanks.

John

Stupid ass Polly, posting twice to the same article....BWHAHAHAHAHAHA!!!!

> Thats probably the only way Wussman,

Scared of me, are you?

>AKA Two test

The only way Polly aka Two warning letter Ashley could ever hope to pass the
General exam was to be grandfathered from his Conditional. According to the
letter below, you received a warning letter before this one, Polly. And did
you give Riley an inventory of all your equipment? Why haven't you been on
the air, Polly, identified, that is?

February 7, 2001

CERTIFIED MAIL-RETURN RECEIPT REQUESTED

Mr. George A. Ashley
1138 Collierville Arlington Road
Collierville, TN 38017

Subject: Warning Notice: Amateur Radio Station W4FQF

Dear Mr. Ashely:

Information before the Commission indicates that you have engaged in
deliberate interference on the 75 Meter Amateur Band (3.901 MHz) at various
times since October 2000. Some of the interference included tape recordings.
We note that on January 7, 1999 you were warned about such activities on the
20- Meter Amateur Band.

This constitutes a second warning that any further incidents of such
operation will result in enforcement action being taken against you,
including license revocation, monetary forfeiture, or both.

Section 308(b) of the Communications Act of 1934, as amended, 18 U.S.C.
Section 308(b), gives the Commission the authority to obtain information

from licensees about the operation of their station. Pursuant to Section 308(b), you are requested to respond to this letter within 20 days of the above date. You are also requested to furnish the following information.
1. Describe the radio transmitting equipment, including antennas, you have at the 1138 Collierville Arlington Road Address. State the manufacturer, model and serial number of each item. If any items were constructed or modified by you, describe the item in detail.
2. Describe any radio transmitting equipment, including antennas, you have at any other address in Tennessee. State the manufacturer, model and serial number of each item. If any items were constructed or modified by you, describe the item in detail.

Please be advised that Congress has made punishable a willfully false response to a letter of this type. See 18 U.S.C. Section 1001.

Sincerely,

W. Riley Hollingsworth

Special Counsel
Enforcement Bureau

> will ever own a

Scared?

> house..If in fact it was not rented.....
>Poor Two test.

Poor grandfathered Conditional Polly, he couldn't pass the test ONE time, much less twice.

>..Zitchey

I heard that until you married One Tooth Ruthie Polly, you couldn't afford a house. You lived in that slums next to the Chinese restaurant. BWHAHAHA. Then after Ruthie got fed up with the neigborhood, she made you move to Collierville and you became the "Land Baron of 1.598 acres", and has a tiny run-down farm near your dump.

But losers like you and Llllardasssssss Lllllllllllllloyd always had to rent flophouses and HUD public assistance housing. BTW, I had my own money, dumbfuck. But I never had to steal tents from Sears like you did, (and got fired from Sears over it) Polly.

You still have to live with the fact you caused your own daughter's suicide because you sexually molested her. Why don't you slit your wrists, too, Ashley?

How come I never hear any of these "wide bandwidth" signals? I've been
licensed for 25 years, and have listened longer than that. I've never
heard one yet on the HF ham bands. I've heard some fairly wide signals,
but none that were really broadcast quality.

I don't quite agree as it concerns phone on the HF amateur bands. Using more bandwidth than is needed , even if properly controlled is not really good amateur practice. But, thats my opinion. Take 75m as an example. There is not enough room for people to play broadcaster with 10k wide signals. And even a 10 kc wide AM signal is not really too hi-fi, being as the frequency response at the high end will only be 5000 hz. Do you really need that much high end response for voice? You can't play music. Whats the point?

Well, what frequencies are you using for this? How come I never hear any of this? I've not heard a single station running in this manner on the amateur HF bands. When all you can legally do on an amateur phone station is talk, with no music allowed, etc, using more than communications quality audio is a waste of spectrum, and fairly silly. And I feel it should be illegal, if it isn't already.

> telephone circuits).

Well, if I'm wrong, where are all these people? What frequencies do they use? Why do I never hear any of them. Why do I never see any information

on these types of stations, or emissions, as applied to the HF ham bands? Also, hi-fi audio is not anything new or experimental. Do you run wide AM transmissions on the HF ham bands? If so, I would consider you rude, and a spectrum hog. Nothing personal, but thats the way I feel about it. There is plenty of room in the much less used frequencies above 1.2 gigs for this type of "experimenting". There is no room for this on the HF ham bands. It's just too crowded. Having one qso per every 10 kc, is silly. It's hard enough to keep 3 kc away from other signals, much less 10 kc.
>
> > But I

> AMers of the 1950s who raged against SSB because they didn't
> understand it, it seemed to cause more interference, and it was just
> "different."

No , thats not really true. I could care less what anyone does. But when these wider emissions would cause interference to other stations on nearby frequencies, I could see how a few could get bent out of shape. If people want to play hi-fi broadcaster, they should do it on the bands that are barely used. IE: above 1.2 gigs.
I don't see anything new or experimental about this type of operation. It's old hat and has been for years. Running 8-10 kc wide AM phone signals on the HF bands doesn't "seem" to cause more interference, it DOES cause more interference. It's fairly black and white. You will be using the room needed for 3 SSB signals adhering to "communications quality" audio standards. The bands are too crowded for such behavior. Not to mention the content allowed can not really take advantage of this wider bandwidth. We can't play music. I'm all for hi-fi experimenting, but I confine mine to my music playing devices here in the house. I have no plans to be the next VOA on the ham bands.
>

>

> they have never received a single citation on that account in more
> than seven decades -- the entire history of the Commission.

Again, where are all these "broadcast-quality" AMers? I hear a few that seem fairly wide, but I assume they are using converted broadcast transmitters. Which to me, is, or should be illegal unless they are modified to adhere to normal amateur standards. "6kc" There is just not enough room on the HF bands for this type of operation. It's bad enough that they want to use 6 kc wide AM modulation. They are using twice the bandwidth to have the same frequency response of a 3 kc SSB signal. That makes a lot of sense, huh...They may be able to slide in under the rules, but in reality, they are hogging more than their fair share of a crowded area of radio spectrum. They should go above 1.2 gigs if they want to do that. Like I said, I want to hear what Riley or the fcc has to say about all this. Their opinion is the only one that "really" matters. I'll have to e-mail him on this subject when I get a chance. MK

I never found a RAM image there, and looking again today I still haven't.
If it is there somewhere, the exact location would be appreciated.
They do have a backup battery replacement procedure.

>> the remainder is for user memory storage. I need the first
>> 256 bytes....

A couple years back I replaced the backup battery in my 751A, so
my radio is still alive. At the time I saw a couple replacement
boards that were available but never saw the memory image posted.

With a search today, I found this site.
http://www.geocities.com/emailsrikanth/ham/icomram/RAM.html

It looks like this has the information you are looking for.
Specifically, the file 745_751.zip.

Now I am prepared for a future radio disaster too.

694. Trunk/Hatch lip antenna mount for Acura Integra?

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-24 21:00:34 UTC
From: "Ryan K. Brooks" <ryan@hack.net>
Message-ID: <af8199$5th$1@edina.hack.net>
Source record: 76087

Does anyone have a recommendation for a trunk-lid mount for use on the hatch of a 3-door Acura Integra? I've tried a couple, but none of them seem to work with the curvature of the metal on the trunk lid or can handle the small gap between the hatch and rear quarter.

Thanks for any pointers,

Ryan Brooks

I note now that their's is an 0870 number, which means
that if you call from 5 miles up the road, you still pay
the National Rate.

Who still believes that this wicked book publisher has
the interests of _ALL_ Radio Hams at heart?

How much money do they now make out of you, even
for simple telephone queries?

With such cynicism, how long before members of their
various (unelected) committees start passing themselves
off with older callsigns than they deserve?

Is the ARRL any better?

Yes, but the experimenting, which requires _individual choice_ of
audio and modulation characteristics, must be permitted by the rules
if it is even to _exist_. Thankfully, it is permitted in the United
States.

Amateur radio is _far more_ than just a "communications" service,
channelized and with bandwidth-limited conformity to facilitate that
channelization. That would be CB -- that would be business radio --
that would be, quite frankly, too much like the telephone.

No. Amateur radio offers something _far more valuable and appealing_
to the scientific and creative mind: free range for experimentation
and invention -- and even craftsmanship and art -- in the field of
electromagnetic transmission.

If that freedom conflicts with someone's myopic vision of "maximum
communications efficiency and minimum bandwidth," then it is the
freedom that must prevail and the "vision" (which is quite wrong
anyway) which must stand aside at times.

Without such freedom, radiotelephone itself probably wouldn't be
allowed!

> >

For one thing, you may not notice that the signals are as wide as they are: The human voice, particularly the male's, has relatively low energy above 4 kHz, though those small components can contribute quite a bit to intelligibility, articulation, and realism. Except when the signal in question is _much stronger_ than a nearby one, broadcast-quality transmission causes much less noticeable interference than its detractors claim. Part of the reason is because of the high-quality signal's much larger amount of energy in the sub-300 Hz bass region, concentrating much of the signal's power in a very narrow band near the carrier frequency, naturally leaving less power for other spectral components. Another part is that many of these signals are far cleaner, the operators striving for the lowest possible distortion, than many commercial ham rigs ALCed and clipped "to the max" as they often are. To understand the other reasons, you'd have to read J. P. Costas' (K2EN) "Poisson, Shannon, and the Radio Amateur," from the _Proceedings of the IRE_, now considered quite a classic text.

As to where the high-quality experimenters congregate, with AM it is around 3870 - 3890 kHz in many parts of the country, though the West Coast might have its own preferred spots that I don't know about, and there are popular frequencies on other bands too. Other modes have their own places, though I am not as familiar with them. I have heard some astonishingly good SSB around 1850 kHz some nights.

There is a page for one group of AMers:

http://www.amwindow.org/

> > > § 97.307 Emission standards.

> hz. Do you really need that much high end response for voice? You can't
> play music. Whats the point?

There are many. One is advancing the state of the radio art, which necessarily includes many modes besides telephone-quality SSB. An example: much of the early work with synchronous detectors was done on amateur radio DSB and AM. Another: the inventor of discriminate audio processing, which revolutionized the way AM and FM radio stations sound and the efficiency of their signals, and which is the basis for most audio processing devices in the radio, television and recording industries today, is a ham and a broadcast-quality AMer.

Another reason is the same reason that 'phone is popular: the real sound and personality of the operator comes through better when good audio is transmitted, just as it comes through better when voice is used instead of CW or RTTY. The principle is the same. This has to be experienced to be understood: many shortwave and amateur receivers and transceivers simply don't have the audio capabilities to make the best stations sound as they should on the receiving end. This often requires modifications and improved filters, amplifiers, speakers, et cetera.

And that brings us to craftsmanship and advancing one's own technical skills. Building one's own equipment, or modifying commercial gear to serve a new and far more demanding purpose, is something that the high-quality enthusiasts do to a far greater degree than the average operator. This obviously serves on of the fundamental purposes of our service.

Therefore, it obviously isn't a serious "interference" problem,
correct? Yet, you want to make it illegal.

> When all you can legally do on an amateur phone
> station is talk, with no music allowed, etc, using more than
> communications quality audio is a waste of spectrum, and fairly silly.
> And I feel it should be illegal, if it isn't already.

You clearly have a total misunderstanding of what amateur radio is
supposed to be. The purpose is not "bandwidth conservation." Nor is
it arranging things so that the maximum number of "ops" can "key up"
their rigs without hearing interference. If that were true, then we
should all be required to use CW and radiotelephone itself should be
illegal.

Please read the aforementioned "Poisson, Shannon, and the Radio
Amateur." Please pay special attention to the concept that in a
non-channelized service (like amateur radio) in a crowded band, the
likelihood of interference not as highly correlated to the bandwidth
of the modulation system as you might think. DSB (just one of many
wider-bandwidth modes that could be used as an example) is
essentially identical to _frequency diversity_ SSB. True, the DSB
users' signals touch at their extremes before the SSB users' signals
do as the band fills up. _But_ the intelligent use of the frequency
diversity characteristics of the wider system allows tremendous (and
dynamic) degrees of interference reduction in asymmetrical
interference situations (more interference on one sideband than the
other), more than making up for any increased overlap.

Even those who choose to run only SSB (I run mostly SSB myself)
should be able to see that such experimentation with audio and/or
modulation schemes is beneficial and should be allowed. It is _much_
more important than maximizing chit-chat channels.

Thinking that telephone-quality SSB is the only way to go, and that
all other voice modes should be banned from HF, is to fossilize
amateur radio at one point in time and space, effectively killing
it. The purpose of the regulations should be to facilitate the
maximum possible degree of freedom to experiment and test new
systems, while respecting the rights of established modes to

continue.

[...]
> I don't see anything new or experimental about this type of operation.

The regulations -- and the idea of experimentation, inherent to our
service -- disagree with you, and have always disagreed with you.

[...]
> They may be able to slide in under the

[...]

Riley is a fine fellow, and I have had friendly correspondence with
him for years. But you are quite wrong in your perception that his
opinion and the "FCC's opinion" are the only ones that matter. I
find that attitude astonishing, and even frightening. The FCC are
our employees, charged with arranging things so that _we_ can carry
on with what _we_ choose to do with the electromagnetic spectrum
without interference due to incompetence or malice.

With all good wishes,

Kevin, WB4AIO.

BT's Standard rate to 0870 is 7.91 pence per minute (ppm) whichever number you dial.

As an NTL indirect customer, if I use the 0870 number, I will be charged at 7.91 ppm - but if I dial the old number 01707 659015 (which still works) I will only be charged 3 ppm.

I wasn't aware of this huge difference, so thank you for pointing this out. Rest of your post which is the usual cynical rubbish, snipped.

73, Chris

Look ! Don't confuse the guy. His mental capacity is obviously severely
challenged. That's why he's only just managed to find this NG. The next
step is learning to spell his name in joined-up writing to get a full
amateur radio licence. Then we really will have cause to worry - unless he
stays here of course as opposed to actually going on the bands (shudders).

You will note that most of it is cross-posted to other groups. A number of ISPs have blocked them so it spills out here. The participants are losers who moved the fight from 75 and 20 meters after Riley nailed them, one of whom made it to the Supreme Court and may ultimately be responsible for more rules than Candy Cummings did for baseball. Basically a bunch of legends in their own mind.

It is dying off but it does get older than the proverbial hills, doesn't it?

Dick NBK

> A bill, HR-4720, has been introduced...

My news server has gone crazy. For weeks, many messages, and sometimes all messages, sent were not appearing in the newsgroups. In an effort to trace the problem, I sent this message several times - a few times trying to locate the problem myself and a few times at the request of the ISP's tech support.

Now, all those messages are starting to show up, some weeks after they were originally sent (note the dates). Luckily, it looks like all of them have now made it, so you shouldn't see anymore.

By the way, I never did figure out why the messages were not appearing. However, since the messages are now showing up, it appears the ISP's tech support has.

Again, I do sincerely apologize for this mess.

I sent my letter less than 2 weeks ago and received a personally signed letter from my Congressman (Ken Calvert - CA) yesterday. In the letter he stated his intentions to sign on as a co-sponsor of the bill and expressed his support of the amateur radio service.

Let's hope that all our representatives are this responsive to their constituents. :)

hi thanks for reading ,
i have just bought a new ts870, but try as i may i cant get the rig to
respond to the pc via the 232 con on the back of the radio.

i have wired the 232 up as described in the manual
and tried lots of software such as ts870 cfreq cntl
logger etc..

i have been told that some of these rigs didnt have the com conected at the
factory?

is this true,any help or advice on this subject would be a blessing ...

That may be true, but I really hate seeing a bunch of garbage messages (repeated messages) in the newsgroups. Nothing it more distracting than that. Let me defend myself by saying that this is not something I would normally do - this was an accident that I truly hope will never happen again. I had no idea that all those messages that had not shown up before would suddenly show up when the problem was fixed. Now that I know that, I'll be more careful where I send those types of messages (only to the "test" groups in the future). Again, sorry for all this. And, now, to avoid compounding the problem, I'll get off the subject of repeated messages too.

Tom,

Hey.. you got four prong 6V vibrators? I could use at least one, maybe two,
depending on cost. Please get back to me with cost/availability.

Thanks.

Take care, and stay well.

PS I sent an e-mail, and it got bounced.. :(

What make you such an expert. How do you know what band it was used on. HOW DO YOU KNOW THIS AMP has a lot of harmonic and spurious on the output. Just by looking at the pictures. Dam I wish I had a spectrum analyzer camera. At the time it was ON 10 Meters Driven from a Converted CB rig. Some HAMS have converted old rigs before, not like a bunch appliance operators. Do some research, Many of the so called HAM amps also used Sweep tubes in their Finals. The amp listed or shown was tested against one of the

Dentron Sweep tube amps and was just as clean or cleaner. People like you cause some of us problems before you ask. Just a bunch of know alls, that know nothing.
SO this amp is NOT ILLEGAL I use it on ten like many ham do with converted

or home brew amps.

That may be way too much to hope, Richard. However, make sure to write back and thank Ken Calvert. As already stated, I've written my Congressman. And, I'm going to call him next week while he is in town. I hope to answer any questions he might have and finally convince him to support the bill.

>Point conceded.

I know you'd like to think you can take quotes out of context and no one
will notice, you dishonest fuck, so let's take a look, shall we?:

<i66ehu8v2ttd4joksj0j5uevkmgkiga04q@4ax.com>

>Everyone knows that Wiseman is hauling
>everyone else's trash around for recycling.

Point conceded.

The only point that was conceded is that "Wiseman is hauling
everyone else's trash around for recycling." you fucking idiot.

Then again, perhaps this is more evidence of you comprehension problem?

You really should stop whining and mewling when I have to repeatedly beat
you about your flat head, while pointing out your reading comprehension
problems, Jimbo.

>> >> >> >Everyone knows that Wiseman is hauling
>> >> >> >everyone else's trash around for recycling.

> rigs before, not like a bunch appliance operators.

Uh, huh. What rig do you use to drive it on 15 and 20?

I don't recall any articles on amplifier construction in any ham radio
publication I'm aware of that use 6 tubes to drive 4 more tubes...to
get 400 watts out. That has CB written all over it.

Okay maybe you designed it yourself. Couldn't you have paid a little
attention to exterior aesthetics? Like it or not, people make
judgements about equipment based on appearance. Plate and Load
controls labelled "1" and "2"? What are all those other switches for?
Off, Next County, Next State, Next Country, All-the-way-on?

> Do some research, Many of the so called HAM amps also used Sweep
> tubes in their Finals.

10 of them? Name one.

> The amp listed or shown was tested against one of the
> Dentron Sweep tube amps and was just as clean or cleaner.

That's no testimonial. Dentrons were notoriously filthy.

> People like you cause some of us problems before you ask. Just a bunch of know alls, that

No one said it was illegal. But just out of curiosity, what callsign
do you use when you use it on 10 meters?

Amateur Radio Newsline Report 1297 - June 21 2002

==========

A NOTE TO THOSE WHO ONLY READ AMATEUR RADIO NEWSLINE(tm)

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would like to invite you to listen to the audio version. This Amateur Radio Newsline (tm) script is actually written for the spoken word. It is recorded each by professional broadcasters and is available for private listening or rebroadcast over your repeater. Two methods of delivery are available: FTP MP3 or dial-in telephone. Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to audio servers providing our voice newscast. On site free FTP Downloads are available at our site by clicking on the newscast number at the top of the page.

de
The Newsline Production Team

==========

Amateur Radio Newsline report number 1296 with a release date of Friday, June 21st 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams down-under face tough new human exposure to R-F regulations and the FCC creates a new Spectrum Policy Taskforce. These stories are first on Amateur Radio Newsline report number 1297 coming your way right now.

(Billboard Cart Here)

**

REGULATORY: VK HAMS FACE NEW MANDATORY RF EXPOSURE LIMITS

Hams in Australia are about to face some of the toughest electromagnetic exposure regulation found anywhere in the world. The idea is to protect people from R-F. Q-News Graham Kemp, VK4BB, has the details:

--
All Australian radio amateurs will be required to know about new Electromagnetic Radiation or EMR controls which are expected to be included in amateur station license conditions from 1 July, 2002. Compliance Level 1 applies to transmitters that are covered by either of these conditions:

(a) The total average power fed to all antennas at the site must not exceed 100 watts and antennas must be out of reach.

(b) The bottom of the lowest antenna must be at least 10 meters above ground and the average EIRP does not exceed 3200 watts.

Compliance Level 2 requires measurements and documented proof of compliance, applies to all other transmitters.

EMR in licence conditions It is proposed that the new regulatory framework, to be reflected in the Licence Condition Determinations -- LCDs -- for the Amateur Service and to all apparatus license will begin on 1 July, 2002. That means that amateur stations operated under new amateur license issued on or after that date, must comply with the framework.

From Q-News Australia, Im Graham Kemp. VK4BB, reporting for the Amateur Radio Newsline.

--

And what about current Australian licensees? They will have until October 1st to bring their stations into compliance with the new R-F exposure rules. (Q-News)

**

REGULATORY: FCC INVITES COMMENTS ON NEW HAM BAND PROPOSAL

Back on this side of the Pacific our FCC is seeking public comments on a proposal to create two new amateur bands and to upgrade the Amateur Service to that of primary user in the vicinity of 2.4 GHz. An ARRL Bulletin says that if the proposal is approved, amateurs would gain a new, secondary, US-only High Frequency allocation at 5.25 to 5.40 MHz and a new Low Frequency spectral parcel from 135.7 to 137.8 kHz.

The 5 MHz band would be the first new HF allocation since the early 1980s, when amateurs got 30, 17 and 12 meters. The Low Frequency band would be the first ever for US hams. And most important for the long-term future of ham radio U-H-F exploration, the proposal will also elevate Amateur Radio from secondary to primary status in the 2400 to 2402 MHz band.

All of this is contained in a Notice of Proposed Rule Making titled ET Docket 02-98 adopted May 2nd by the FCC. Comments are due July 29, and reply comments are due no later than August 12th. Interested parties can file using the FCC's Electronic Comment Filing System. That U-R-L is http://www.fcc.gov/e-file/ecfs.html . Click on ''Search for Filed Comments'' and enter ''02-98'' in the ''Proceeding'' field. (ARRL)

**

REGULATORY: FCC CREATES SPECTRUM POLICY TASK FORCE

Ham radio is not the only area where the FCC has been active in looking at spectrum usage. In fact the agency has announced the creation of a Spectrum Policy Task Force or S.P.T.F. to tackle the problems arising from an increasing demand for spectrum.

The task force is headed by Dr. Paul Kolodzy. Dr. Kolodzy is the Senior Spectrum Policy Advisor for the FCCs Office of Engineering and Technology.

The rest of the committee will be made up of attorneys, economists and even engineers. Its not known whether or not a representative of Amateur Radio or any other personal radio service such as FRS, CB or the new Multi-Use Radio Service will be invited on.

You can find out the complete at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-223142A1.doc (FCC)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Catalina Amateur Radio Association repeater serving the Pacific coastline of Southern California.

(5 sec pause here)

**

REGULATORY: WRC 2003 IS ON AGAIN

The on again and off again 2003 World Radiocommunications conference appears to be on again. According to news reports, the conference which was canceled by Venezuelas telecommunications bureau has been moved to Geneva Switzerland. The dates are the same -- July and August of 2003. The future of mandatory Morse code testing in the Amateur Radio Service is one of the items on the agenda for that meeting. (Published reports)

**

REGULATORY: FCC SAYS NO TO MANDATORY EMP STANDARDS

The FCC has dismissed a petition for rule making that would have required all electronic equipment under its jurisdiction to be shielded against electromagnetic pulse or E-M-P damage. Amateur Radio Newslines Henry Feinberg, K2SSQ, has more:

--

The petition, filed last fall by Don Schellhardt and Nickolas Leggett, N3NL was put on public notice in December and designated as RM-10330. According to the ARRL Letter the proposals would have applied to both new and existing equipment falling within the FCCs purview. And yes: It would have included some Amateur Radio equipment.

Schellhardt is a Connecticut attorney. Leggett is a Washington, D.C. technical consultant. In 1986 the two filed a similar petition with the FCC seeking a Notice of Inquiry on possible shielding of electronics against EMP. They say the September 11th terrorist attacks motivated them to approach the FCC on the topic once again. Once again, the FCC did not agree.

For the Amateur Radio Newsline, Im Henry Feinberg, K2SSQ.
--

The ARRL did not comment on the proposal but fourteen others did. And they were almost unanimous in asking that the petition be dismissed. (ARRL)

**

REGULATORY: FCC-NCVEC MEETING AGENDA ANNOUNCED

The National Conference of Volunteer Examination Coordinators has released the agenda for its annual meeting with the FCC. Among the topics to be discussed are the effect of restructuring on Amateur Radio testing, a report on the status of testing in sparsely populated areas and the status of regulatory and enforcement matters. The gathering is slated for Friday, July 26th in Gettysburg Pennsylvania. (NCVEC)

**

ENFORCEMENT: FINE ISSUED TO BROADCASTER FOR ALLEGED LANGUAGE VIOLATION

The FCC has issued a notice of forfeiture to Infinity Broadcasting Incorporated in the amount of $21,000. The agency says that it is imposing the fine after it concluded that Infinity is apparently liable for the penalty for willfully and repeatedly broadcasting indecent language on three occasions. Infinity is expected to appeal the forfeiture order. (FCC)

**

ENFORCEMENT: FLIPPO IS TRIED IN WEST PALM BEACH

A non-ham who allegedly jammed ham radio communications has been convicted in West Palm Beach Florida on charges of operating a radio transmitter without a license. We have this report.

--
A federal jury in Florida took less than two hours to convict a Jupiter Farms man of broadcasting without a license and maliciously jamming ham radio operations in northern Palm Beach County. According to the Palm Beach Post, 60 year old William Flippo sat with head bowed and eyes closed as court deputy James Caldwell read out eight counts of "guilty."

But getting to this verdict took years of investigation by local hams and the FCC along with a trial that lasted 6 1/2 days. It was described by the newspaper as an often bizarre trial that included testimony about mysterious jamming devices found in trees, strange events going back to Hurricane Andrew and a forged letter that surfaced at the last minute.

Flippos conviction caps years of conflict between him and the Jupiter-Tequesta Repeater Group. This is a 70-member Amateur Radio club whose members claimed that Flippo had jammed their transmissions and had made threats against them.

So club members complained to the Federal Communications Commission. An FCC Engineer involved in the investigation testified that he had tracked the interference to Flippo's home and two of his vehicles. Club members said that the interference stopped when Flippo was arrested in July 2000.

By way of defense, Flippo maintained that most of the radio equipment found in his home, in three of his vehicles and filling a 24-by-24-foot building behind

his house belonged to other people. He also asserted that some of it was given to him by Palm Beach County for emergency use after Hurricane Andrew in 1992 and other gear was part of a vintage radio collection.

Flippo also claimed to have a letter, written in 1994 by the emergency coordinator for amateur radio operators in Palm Beach County, authorizing him to test his emergency equipment daily. But the alleged author of the letter, Charles Mulligan, testified that it was a forgery. Mulligan believed it was created from a 1992 letter to Flippo dealing with events surrounding Hurricane Andrew.

And this is where it got even stranger. Halfway through the trial, U.S. District Judge Daniel Hurley took the extraordinary step of revoking Flippos bail. This, even though the charges were all misdemeanors. Hurley ordered Flippo into custody, saying that the defendant was trying to sabotage the trial by feigning illness. Flippo had checked into a hospital, claiming symptoms of a stroke, which delayed the trial for two days.

After the verdict, Judge Hurley ordered Flippo to remain in custody until sentencing and to undergo psychological testing. The judge said he was deeply concerned about the escalating cycle of violence in the case. He singled out an incident in which Flippo rammed into a vehicle owned by club member Ed Petzolt, K1LNC. The judge also questioned whether Flippo had perjured himself by repeatedly denying he ever used amateur radio frequencies.

When he is sentenced, Flippo faces a maximum of 8 years in a Federal prison and an $80,000 fine. This is in addition to an earlier 20,000 fine levied against him back in 1999 for unlicensed operation and other violations of the FCCs rules.

For the Amateur Radio Newsline, Im Don Wilbanks, KC5MFA. Norm.

--

More on the Flippo case in future amateur Radio Newsline reports. (Palm Beach Post, Miami Sun, numerous others.)

**

HAM RADIO POLITICS: I LINK VS. ECHOLINK ROUND 1

Politics appears to be starting to play a part Internet based radio linking. According to Lee Williams, N3APP, a ham considered as being the father of i-Link named Graeme Barnes, M0SCH, has locked out all users running the EchoLink software from his servers. Also, i-Link users have had to download new software to stay on-line.

To counter the eviction, EchoLink proponent Jonathan Taylor, K1RFD, has set up new servers to allow users of that software to have connectivity. At least for those who want it.

Williams says that Barnes and Taylor are cooperating on the connectivity issue but caught in the middle are thousands of hams who do not care which program is in their computer. All they want to do is to talk to one another and they

really do not care whose server system their signal is routed through. (N3APP)

**

HAM RADIO POLITICS: ELECTION TIME AT THE NFCC-NFCB

Its election time at the National Frequency Coordinators Council or NFCC. Nominations to fill the seats of expiring National Frequency Coordinators Board Directors opened on June 15th. The closing date for candidate nomination is June 30th., with voting beginning on July 28th. and the election results announced on July 31st. The directors elected this time shall take office effective on the 1st. of September and will serve for two years. The incumbent directors whose terms expire on August 31st are Dave Baughn, KX4I, Dick Isely, W9GIG and Owen Wormser, K6LEW. (ARNewsline)

**

CONVENTIONS AND HAMFESTS: 2003 ARRL NATIONAL IN DALLAS

The 2003 ARRL National Convention is now slated for June 20th through the 23rd at the Arlington Convention Center in the Dallas suburb of Arlington Texas. The national will be a part of Ham Com which is the very popular West Gulf Division convention held every year. More information is on the web at www.hamcom.org. (ARRL)

**

CONVENTIONS AND HAMFESTS: JSAR SHOREFEST AUGUST 11

The Jersey Shore Amateur Radio Society is pleased to announce its 4th Annual ham radio Shorefest . The event is slated for Sunday, August 11th at the Bayville Fire House on Route 9 in Bayville, New Jersey. The hamfest is all indoors in 4,000 square feet of air-conditioned pleasure. More information is in cyberspace at www.jsars.org. For advanced table reservations or tickets contact Bob Reed, W2CE, by e-mail to w2ce@arrl.net. (W2CE)

BREAK 2

This is ham radio news for todays radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

SPACE TECHNOLOGY: SEEING THE SOLAR ECLIPSE WITH MICROWAVE EYES

The June 10th partial solar eclipse attracted quite a bit of attention because the event could easily be seen. However, the sun is also a powerful source of microwave signals, so the eclipse should have been visible in the radio spectrum as well. And thanks to the efforts of Dr. Brian L. Dougherty of Caltech we now have graphs of the solar microwave eclipse.

Dr. Dougherty operates a microwave dish in Californias Owens Valley. That antenna is tied to receivers that records the radio spectrum of the sun every 9.6 seconds, covering roughly 100 frequencies between 1 and 18 GHz. With a bit of data processing, we are all able to see the eclipse in the microwave region your own eyes at http://srbl.caltech.edu/020610.html

There is also a real time Solar Radio Burst Locator during the day to see the sun's microwave events as they take place. Its in cyberspace at http://srbl.caltech.edu. (CGC Communicator)

**

EMERGING TECHNOLOGY: DIGITAL TV ANTI-PIRACY DEADLINE

July 15th. is the deadline set by Representative Billy Tauzin for the Hollywood studios, the computer industry and consumer electronics manufacturers to develop a method to protect digital TV from being pirated onto the Internet. The chairman of the influential House Commerce Committee is growing impatient over the stalled transition to digital TV. He also knows that the switch won't happen until movies and popular TV series can be protected from exposure to cyberspace piracy. If private negotiations fail, Tauzin says that he is prepared to step in and mandate government intervention. (Published news reports)

**

INTERNATIONAL - CONTESTS: CHANGE IN THE ITALIAN WRTC2002 TEAM

The 2002 World Radiosport Team Championship committee has announced a change to the team being sent by Italy. According to Ari Korhonen, OH1EH, Fabio Schettino I4UFH, has replaced Maurizio Panicara, I4JMY on Team Italy. Schettino will operate with Stefano Brioschi, IK2QEI, in next summers games. (WRC 2003 Release)

**

DX

D-X, a Y-L mini DX-pedition to Nauru planned for October has been dealt a major blow by officials. VK4SJ tells Q-NEWS they are not going to C21 because the Australian Government has commandeered all rooms in the only two hotels on the island. Without accommodations they can not get a Visa to stay on the island.

But thats not all! The group has been put to an additional expense as well as suffering cancellation fees for something completely beyond their control. It seems that their travel Insurance has an out in the contract. It come under the clause of government intervention. The government says no and that lets the insurance company off the hook. (Q-News)

Also, a reminder that as of the end of June the cost of mailing a postcard or Q-S-L card domestically will go from 21 cents to 23 cents. Also, a domestic first class letter of up to one ounce will cost 37 cents. The increased rates will also affect your credits at incoming QSL bureaus, plus the cost of mailing magazines such as CQ, Worldradio, 73 and QST -- to name only a few. (CQ)

**

THAT FINAL ITEM: THE FUTURE OF DIGITAL TV: PART 1

And finally this week, while the entertainment industry is concerned about digital piracy of its products, the public is wondering where digital television is today and where it is really going. One of those asking is a listener to the D-X Audio Service named Victor Schmidt. He wrote to Editor and host Fred Vobbe, W8HDU, for some answers. Here is part one of W8HDUs reply as it originally aired on the May 2002 edition of the DX Audio Service magazine:

--
THIS IS AN AUDIO ONLY REPORT. To hear it, go to www.arnewsline.org and download the MP3 audio version.
--

Fred will be back next week with a look at the kinds of television receivers now in stores, those that go into your personal computer and what the future has in store. Be sure to tune in. (NRCDXAS)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Norm Seeley, KI7UP, saying 73, and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2002. All rights reserved.

I still think we as individuals need to contact our elected officials, be it with a form letter or personally written, on a more often basis. I am of the belief that they will take it even more serious, especially when it comes to votes they may get in the future!

"Stagger Lee" <SLee@houston-hunks.com> whinedand slurped Shitball's (the guy
who exposed himself to underage kids)ass :
>
> He's got \ /

Anonymous coward and all-around fuckwit "Stagger Lee"
<SLee@houston-hunks.com> revealed what a hypocrite he is and ironically
admits he has no credibility by his own definition in message
<3C36FDCC.76EC185D@houston-hunks.com> :

"Therefore, I find your story difficult to believe. Your own anonymous
status makes the story even less credible."

Why do you want to suck my dick so much? Are you queer, Stupidass Lee,
or just so fucking stupid you can't tell men from women?
And did you forge Fred again? You are the one who did those recent
forgeries...
And keep slurping Joanie Shitball, who was arrested fo exposing himself to
Starwyn's underage daughter.
--
<3A1DFD9E.CD06F4CC@home.com>
"Are you talking about the actual charges filed on him after the
Starwyn trailer thing? He sent me a copy of what was filed in court
on him after that night. He wanted to set the record straight about
what happened that night. Kelly was claiming that he exposed himself
to her teenage daughter. The only charges that were filed that night
was (if my memory serves me right) breaking and entering and
assault.

I noted the same oddness. Was looking for knowledge on who fixes
freeplay wind-up radios. The reply below made sense that it's a bunch
of legends in their own mind looking for a place to play.

You're not the only one. But I'm having a hard time imagining the
circuit topology to use with a 4-prong vibrator. Maybe I've just led
a sheltered life.

Hi folks -

I recently acquired a rackmount WWV Rx unit with no power cable (proprietary), no manual, and no idea how to get it up and running :-) Does anyone have any info on this unit (model 6011)? Just trying to find out what kind of power requirements it has and info on some of the more cryptic controls and inputs/outputs. Please reply in group, or mail me without the -zerospam- bit.
Thanks!

-Matt in SF, CA

Look at the NC Total Electronics paint selection

Mike Shelton has a number of paint colors

http://www.nctotalelectronics.com/

HALLICRAFTERS PAINTS
#301(*) Do not touch up. Paint entire top of panel. Due to age, quality
control and silver paints previously used.
#302 HT Gray (*) This is the lighter gray. Some HT-32&'S, 37'S have a darker
gray. While ours is the correct gray, it may not match your particular
model.
Hallicrafters had quite a variation of this gray over the years. As compared
from
the field, we took the best of the best and matched it. Ours matches the
majority.

Unlike alt.cockscuker.roger-wiseman, the news group named alt.fan.ab8mq contains almost no posts, and isn't carried by more than a handful of servers.

Still, I'm wondering who sent out the (forged) control messages to create the group? Could it have been a secret admirer of Woger's?

You will note that most of it is cross-posted to other groups. A number
of ISPs have blocked them so it spills out here. The participants are
losers who moved the fight from 75 and 20 meters after Riley nailed them,
one of whom made it to the Supreme Court and may ultimately be responsible
for more rules than Candy Cummings did for baseball. Basically a bunch of
legends in their own mind.

It is dying off but it does get older than the proverbial hills, doesn't
it?

If you take the top to the local Home Depot
they may be able to scan the color and mix you
a can of near-matching paint. They have a new
machine that scans the color of an original
then computes what mix of pigments to use
to duplicate the same. One other caution, it is
very possible that the paint used on your
Hallicrafters is lead based. You may want to
take precautions if you were to remove the
old paint from breathing in the dust etc...

Roger was never a part of the group you mention.

He came along much later, soon showed his colors, and was written off by everyone concerned.

BUT....Roger still has his Ham license, right? Where is yours, Dan? Is Riley keeping you off 20 Meters?
80 Meters? Are you still the malcontent? The never-ending grouch?

Amateur Radio Newslineï¿½ Report 1298 - June 28 2002

==========
===
A NOTE TO THOSE WHO ONLY "READ" AMATEUR RADIO NEWSLINE(tm)

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would like to invite you to listen to the audio version. This Amateur Radio Newsline (tm) script is actually written for the "spoken word." It is recorded each by professional broadcasters and is available for private listening or rebroadcast over your repeater. Two methods of delivery are available: FTP MP3 or dial-in telephone. Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to audio servers providing our voice newscast. On site free FTP Downloads are available at our site by clicking on the newscast number at the top of the page.

==========
===

Amateur Radio Newsline report number 1298 with a release date of Friday, June 28st 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams are on the scene of the worst wildfire in years, Australian researchers say they have discovered how to teleport light and an old friend in Earth orbit surprises hams on the ground. Theses stories are first on Amateur Radio Newsline report number 1298 coming your way right now.

(Billboard Cart Here)

**
RESCUE RADIO: HAM RADIO AIDS AT ARIZONA WILDFIRE

It's hams to the rescue, again! This time it is the RODEO/CHEDESKI fire in Eastern Arizona.

Over 350-thousand-acres -- more than half the size of Rhode Island and far from containment!

The FCC reserved emergency frequencies for fire related communications only.... during daylight hours, 7.265 MHz on 40 Meters and after dark, 3.990 MHz in the 75 Meter band.

W7TSA -- a club station operated by the Salvation Army set up at one of the evacuation centers. It operated as primary net control ... with other Arizona stations picking up the duty in shifts -- making sure the frequencies were monitored 24-hours a day.

--
OFF AIR AUDIO HERE
--

One of the priorities, was setting up a VHF repeater, to enable reliable, short-distance communications for mobiles and portables:

--
OFF AIR AUDIO HERE
--

The Forest Service has set up firefighting headquarters in the town of Show Low, and one of the operators at W7TSA, located in the town's high school, gave other monitoring stations a rundown of activity, Tuesday night, June 25th.

--
OFF AIR AUDIO HERE
--

Those two frequencies -- 7.265 and 3.990, plus or minus 3-kHz -- are reserved for fire only duties -- for up to 14-days. Watch for the FCC announcement when things return to normal.

For some interesting short-wave listening, tune in -- but please don't transmit on those frequencies unless you're actively involved in the emergency response. (Story written by Alan Kaul, W6RCL)

**

AMAZING TECHNOLOGY: LIGHT BEAM TELEPORTATION CLAIMED

Some are calling it brand new era in telecommunications. Others say its like the famed Star Trek Transporter coming true. Others simply don't believe that the first successful experiment in teleportation has actually taken place. But it appears to have happened in Australia. Q-News Graham Kemp, VK4BB, is there with the details:

--
Scientists at Australian National University have succeeded in teleportation.

That is, the disembodiment of a thing in one location and its reconstruction in another.

In this case, a beam of light allegedly disappeared in one place and reappeared in another, a short distance away, via the mechanism of quantum entanglement. Data imbedded in the beam were also recovered.

Reporting from Q-News Australia, I'm Graham Kemp, VK4BB, for the Amateur Radio Newsline.
--

Scientists say that if this finding is duplicated and verified, this experiment would certainly be regarded as one of the most remarkable steps forward in telecommunications technology so far this century. (Q-News)

**

HAM RADIO IN SPACE: LONG DORMANT AO-7 SPRINGS TO LIFE

AMSAT OSCAR 7 has returned from the dead and is shipping telemetry data on 145.9738 MHz. This, some two decades after it went silent in 1981 after its batteries failed. Amateur Radio Newsline's Don Wilbanks, KC5MFA, has the details:

--
AMSAT OSCAR 7 was launched in November of 1974. It was one of the first of the more advanced ham satellite designs with uplink on 70 centimeters and a downlink in the 2 meter band. And, working with it's predecessor A-Oh-6, it was the first ham satellite used for space to space relay. And in 1981 it went Q-R-T.

It's unexpected return came on June 21st when Pat Gowan, G3IOR, in the U-K happened across the slow speed Morse telemetry. It was then monitored by a number of other satellite enthusiasts around the world.

Why is the long dormant bird suddenly returning to life? According to the old HR Report newsletter, the battery failure in 1981 was probably a short circuit. Now, two decades and numerous charge cycles of sunlight later, the short circuit is clearing.

That theory is born out to a great extent by former AO-7 Project Manager Jan King, W3GEY. According to a quote from King on the AMSAT website, the power management levels shown in the telemetry indicate an anomaly. He says that the battery voltage telemetry shows a voltage of 13.9 volts. Normal is 13.6 to 15.1 volts. So that would suggest the battery was normal but, the half battery voltage is measuring only 5.8 volts. In other words, a dead but open circuit battery pack. This leads to speculation that the satellite is operating directly off of its solar battery array and is active only when in sunlight.

But before you decide to try operating on the old bird, AMSAT has this warning. AO-7 listens on 432.1MHz. Due to changes in Amateur Service and Amateur Satellite Service there are questions as to legality of Amateurs transmitting to the bird. This is because the uplink frequency predates the WARC '79 allocation of 435 to 438 MHz by the International Telecommunications Union for the Amateur Satellite Service.

For the Amateur Radio Newsline, I'm Don Wilbanks, KC5MFA, in New Orleans. Roy.

--

To elaborate a bit more on why it might be a bad idea to try and use AO-7. The uplink frequency falls in the current 70 centimeter weak signal segment in all three I-T-U Regions. Because of this, it would appear that anyone trying to access the uplink is operating outside the Amateur Satellite Service rules and regulations. (AMSAT-NA)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Twin City Amateur Radio Club Net serving Champaign and Urbana Illinois.

(5 sec pause here)

**

ON THE AIR: FIELD DAY WAS KIDS DAY

Field Day 2002 may also have been the third Kids Day operating event of 2002. This as youngsters across the North America took to the airwaves using the new GOTA or Get On The Air stations. Amateur Radio Newsline visited the Santa Clarita Amateur Radio Club as it put a bunch of visiting youngsters on the air: Take a listen:

--
Contact Audio
--

The new Get On The Air stations have replaced the old Novice stations at most Field Day sites. And, if this year is an indication of the future the Get On The Air is here to stay. (ARNewslineï¿½)

**

ENFORCEMENT: MINNESOTA SUSPENSION FOR REPEATER INTERFERENCE

A Minnesota ham will be off the air for a while. This based on allegations of interference to a two meter repeater. The FCC's Riley Hollingsworth, K4ZDH, explains why:

--
We issued a warning letter regarding repeater interference to Michael Priest, KB0KMJ, of Deluth Minnesota. The interference was to the Arrowhead Amateur Radio Club repeater on 146.94 MHz. Priest has responded to our letter and has accepted a three year suspension of all Amateur Radio privileges.
--

The interference Hollingsworth referred to occurred on numerous occasions between January 2 and April 4 of this year. Priest's license suspension remains in effect until midnight on May 15th, 2005. (FCC, RAIN)

**

ENFORCEMENT:

The FCC is also looking at a V-E testing session in Tennessee where a pair of Volunteer Examiners allegedly administered Amateur Radio exams to close relatives. FCC Part 97 rules prohibits a V-E from administering an examination to a spouse or other specified relative. The purpose of the rule is to help insure the integrity of the volunteer testing process. Again the

FCC's Riley Hollingsworth, K4ZDH:

--
Hollingsworth: "We sent inquiries to two VE's regarding apparent testing irregularities. We need information as to why Bobby A. Raymer, N2BR, administered an Amateur Radio exam to his wife and signed-off as a VE.

And we want to know why Steven G. Hunter, KF4FAV, administered a radio exam to his brother Gary E. Hunter."
--

Both of these incidents occurred at a December 1999 ARRL sponsored V-E session in Cookville, Tennessee. Hollingsworth says that Raymer has replied and that response is under review. (FCC, RAIN)

**

ENFORCEMENT: DON'T OPERATE ON CB

Five hams have been accused of operating Amateur radio-transmitting equipment without a license on 27.585 MHz and other frequencies near the 11 meter Class D Citizens band allocation. The agency says that operating radio transmitting equipment without a license for a specific service is a violation of Section 301 of the Communications Act.

The FCC says that it is important for hams to understand that violations on frequencies other than the ones they use as Amateurs can jeopardize their licenses and could subject them to other penalties. In this case, the five were warned that they could face fines or imprisonment, as well as seizure of radio transmitting equipment. Fines normally range from $7,500 to $10,000. (FCC)

**

CONFERENCES AND CONVENTIONS: CHANGES FOR HAMVENTION 2003

Jim Trangenstein, KB8OUO has been named as the General Chairman for the 2003 Dayton Hamvention. Trangenstein, who has already served at Assistant General Chairman replaces Jim Graver, KB8PSO, who held the top post for the past three years.

Also departing from the Hamvention team is longtime Forums Chairman Jim Ebner, N8JE. Ebner and his wife plan to leave the Dayton area and relocate to North Carolina. In his parting e-mail, N8JE told his many friends that he has truly enjoyed working with them for the past fourteen years.

And two final items before we move on. According to a note from outgoing General Chairman Jim Graver, the official attendance figure for Hamvention 2002 is 24,832. Also, Hamvention 2003 is slated for next May 16th, 17th and 18th. More information is in cyberspace at www.hamvention.org. (KB8PSO, N8JE, DARA)

**

CONFERENCES AND CONVENTIONS: AMSAT IN TEXAS IN NOVEMBER

The 20th Space Symposium and AMSAT-NA annual conference is scheduled for November 7th to the 11th in Fort Worth, Texas. The event will chronicle recent and future Amateur Radio satellite technology developments. AMSAT Members are welcome to attend the AMSAT Board of Directors Meeting on November 10th and 11th. The Chair for the 2002 event is Keith Pugh W5IU. (ANS)

**

HAM RADIO POLITICS: NFCC ELECTION CORRECTION

Dick Isley, W9GIG advises that we have an error in last weeks report regarding the election at the National Frequency Coordinators Council. Dick says that the election for the three National Frequency Coordination Board positions starts on July 9th and ends on July 28th. We typoed the election as starting on 28 and the announcement of whose elected made on the 31st. As Isley pointed out, it would be very hard to get all the ballots in and tallied in only three days. (W9GIG)

SUPPORT FUND REPORT WITH ANDY JAREMA N6TCQ

Ladies and gentlemen, with a report on the financial condition of Amateur Radio Newsline, here is its Treasurer and Support Fund administrator, Andy Jarema, N6TCQ:

--
Most of the time, I try to keep these reports as light hearted as I can. This time I have to be very serious. The reason: There is no money in our account to pay outstanding bills.

Here are the numbers. In the account is about $250. In my hand -- right here -- are bills for the months of April and May totaling close to $1600.

Do the math yourself. That's a $1350 deficit, and this does not take into account the month of June that is quickly coming to an end. You can add another $800 to $1000 there. And, put in another $900 to cover Amateur Radio Newsline's part of the upcoming Young Ham of the Year Award in August.

As you know, I am the guy who writes the checks. I am also the one with the power to pull the plug. To take Amateur Radio Newsline off the phones, off the Internet and off of your radio. I don't want to do that, and I am trying not to. But if the dollars run out and none come in to replace them, I will have no other alternative. And right now, there are no dollars coming in.

As the song in the Broadway show Cabaret says. it is money that makes the world go around. In the case of Amateur Radio Newsline, it takes about $1000 a month on average to keep it going. And we need your help right now -- today

-- to keep it from disappearing from the airwaves.

Remember, the Amateur Radio Newsline is a federal 501 C 3 tax exempt corporation. Your donations to it are tax deductible. The address to send your assistance is the Newsline Support Fund, Post Office Box 660937, Arcadia California. Our Zipcode is 91066.

As always, we thank you in advance for your support.

I'm Andy Jarema, N6TCQ

--

If you missed the address for the Newsline Support Fund it will be repeated at the end of this weeks report.

**

EMERGING TECHNOLOGY: LEARNING LONG DISTANCE

The United States House of Representatives has voted to make it easier for students to take classes over the Internet. This, by relaxing restrictions on correspondence courses.

Supporters of the bill, which passed 354-70, said it would expand educational opportunities for people who cannot take courses in traditional classroom settings. The bill allows some schools to offer more than half their classes by telecommunication. It also cuts the number of instructional hours nontraditional programs must offer each week to be in line with the requirement for traditional classes. Nontraditional programs - such as distance learning courses - must offer at least 12 hours of instruction each week, while traditional programs have to provide one day of instruction.

A companion bill introduced by Wyoming's Mike Enzi is pending in the Senate. (Published news reports)

**

SPACE AND SCIENCE: NEW ANS CO-EDITORS

AMSAT North America has announced the appointment of Joanne Maenpaa, WB9JEJ and Harrison Faust WW4HF are the new co-editors of the weekly Amsat News Service. Both have extensive experience as Editors of Technical publications.

And with the change in Editors the AMSAT News Service will begin a metamorphosis of its own. Beginning with the June 16th issue, the e-letter was split the actual news section from the satellite report for a trial period. Both sections will be made available to subscribers but as separate e-mail delivered bulletins. (ANS)

**

SPECTRUM REALLOCATION: AMATEUR BANDS RETURNED TO HAMS IN PANAMA

Some good news for ham radio operators in Panama. They are getting some spectrum that was reallocated away returned for their use once again.

Two years ago the Panamanian government issued a revised frequency allocation plan which removed. It 30 meters and several UHF and microwave bands from the amateur service there.

Now, the ARRL Letter reports that an effort to reverse the changes spearheaded by the Radio Club of Panama has been successful. The Panamanian government has now reportedly agreed to restore all previous amateur allocations except for those in the 902 to 928 MHz band. (ARRL)

**

INTERNATIONAL - NETHERLANDS: DIGITAL RADIO ON SHORTWAVE

Media Network reports that Netherlands Digital Radio Mondiale is now testing from Bonaie at 21:30 to 23:25 UTC Bonaire is on 15.520 MHz in simulcast mode. That is analog and digital signals are on the same frequency at the same time.

The simulcast frequency as specified is the center frequency of the digital signal which actually ranges from 15.515 to 15.525 MHz. The analog is from 15.525 to 15.530 MHz with the analog carrier is located at 15.530 MHz, hence an analog tuner should be tuned to 15.530 MHz in order to receive the signal. You'll find the full updated schedule of DRM tests from Bonaire at http://www.rnw.nl/realradio/html/drm_latest.html. (Media Network)

**

INTERNATIONAL-CANADA: RAC DIRECTORS APPOINTED

Radio Amateurs of Canada's Board of Directors has approved the appointment of Bjarne Madsen, VE5FX and D. Howard Dickson, VE1DHD, as Directors for the Midwest and Atlantic Regions respectively. These appointments are effective immediately filling unexpired terms to December 31st of two directors who had previously resigned. (RAC)

**

DX

In DX, HB9DRD who is also G4KLX advises that there will be a Leichtenstein satellite expedition on July 13th and 14th. Jonathan and his partner Achim, DH2VA, will operate 50 KHz below the AO-40 beacon so as to stay out of the way of normal QSO's. Their Uplink will be on U-band and if signals get to weak they may change to CW operation. (VHF Reflector)

And Herb Spoonts, W3IWI, reports that the CY9 party is en-route to St. Paul Island. Operation will commence shortly and continue through July 7th. Look for them on several bands including 6 and 2 meter Meteor Scatter using standard sequenced WSJT. (W3IWI)

On HF, F6CTL is in French Polynesia and on the air until the 15th of July. He also plans to visit Rurutu and Tubuai in the Austral islands. These islands count as OC-050 and OC-152 respectively for the Islands on the Air Award program. (RSGB)

**

THAT FINAL ITEM: THE FUTURE OF DIGITAL TV: PART 2

And finally this week, we continue our look at digital digital television today and where it is going. This week, DX Audio Service Editor Fred Vobbe, W8HDU, teells you how you can receive digital television and the hardware thats available to do the job:

--
THIS IS AN AUDIO ONLY REPORT. To hear it, go to www.arnewsline.org and download the MP3 audio version.
--

Fred will be back next week with a look at the spectrum that digital television is supposed to use and how its actually using it. (NRCDXAS)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the D-X Audio Service, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Roy Neal, K6DUE, saying 73, and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2002. All rights reserved.

778. Dan The Man

Dear Old Dan...Gotta git in there, eh?
Dan the REMF has to make his comments...
Caint let a Hillard git by, eh?

This is what happens when one uses that
"Dinque-Dau" weed.

Go for it, Dan. Hop on the Armored Personnel Carrier of yesteryear, grab a shot of water from the old Lister Bag, wrinse off your mess kit in the old field stove, kiss the Mess Sergeant's ass for more Shit on a Shingle, and tout your in-country medals.
Poor Old Dan...still living in yesteryear. No life, no job, nothing going for him save for his memories of days gone by.
I bet Old Dan still looks out his front door expecting to see a few of the White Mice coming up his driveway...he never quite got "home" to the United States.

779. Roger In Emergency Room

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-29 09:01:03 UTC

Roger Wiseman was admitted to the Emergency Room late last night after suffering a near calamity.
It seems that Roger, upon returning from an outing with the Lavender Lads, had been so enthralled with pleasing his fellows that he began choking on a boner. The Lavender Lads, seeing Roger's dilemma, administered the Hind End maneuver in hopes of reviving Roger.
After several attempts of inserting "breathing devices" into Roger's mouth, he seemingly made a miraculous recovery, spat out the devices and swore to all that he was in good health.
The story goes that Wiseman has not a clue about his surroundings...

Cross-posted to: uk.radio.amateur,rec.radio.amateur.misc,rec.radio.amateur.policy

In my recent international QSO's, I've been
putting to my respondent that he ought to ignore calls
from M3's, because they are little more than CB
licences, and are going to bring the hobby into
disrepute.

When I have described the two "tests" it is necessary
to pass, a sympathetic response has been received.

Is it time, now, for all genuine Hams, whether in the UK, or
elsewhere, to show their contempt for the M3 by
refusing to QSO with them?

Sorry I cannot see the problem here with the M3's...Everyone I've heard or spoke to explicitly follows their radio procedure (possibly a little bit too far sometimes)...

Personally I think you lot could learn a thing or too from them..

Jon

An irrelevant point. For many years I was
quite open about my identity on Usenet. Then
the violence started. Vicious immature people
who would not tolerate open discussion of viewpoints
with which they did not agree. I received many
threatening phone calls. The crunch came when my wife,
who then was recovering from a recent cancer operation,
received a threatening letter which frightened her; a matter
in which I involved the local plods.

Since then, I have endeavoured to remain anonymous (although
there are some childish people around who do not respect
this wish) AND I RECOMMEND ALL CONTRIBUTORS
TO USENET TO PRESERVE THEIR ANONYMITY AS THE
RESULT OF THE VIOLENCE DIRECTED AGAINST ME.

An irrelevant point. The only technical
aptitude that an M3 has been examined on is
the ability to switch on a rig and conduct
a conversation. This is no greater an aptitude
than is required by the man-in-the-street to
operate a mobile phone. To call such people Radio
Hams is a travesty.

While W4NTI showeed himself to be a backstabber of Rich Whiten and everybody
else.

>and was written off by everyone concerned.
>
> Dan/W4NTI

A check of Google will show that W4NTI participated in the flames here and
was grateful for my assistance in his online battles. He must be back on the
booze heavily, or his diabetes has affected his memory. The only reason Dan
dropped me was over the 2000 election and our different political views.
He's really suck a backward, ill-educated gimpy dwarf, ihis mindset matches
his short stature.

Following Radio Procedure is what the CB licence is all about.

It's not what Ham Radio is about; which is a technical
pursuit for those suitably qualified.

So what if someone did not have to take a hard as a code as you had to?
Does that make him a less of a ham as you? Do you think that CW is filter
for our hobby? Listen to late night 75m and think again. It's time to put
the CW requirement behind us, and adopt a no-code HF.

Like it or lump it mate, that's all there is to operating
these days - HF in particular. Switch on, find a slot,
whistle up the swr and blaze away.

Anyone thinking it's more technical than that is guilty of
the most blatant self delusion.

Boycott the M3's ?

What a load of drivel.

More like it's time to boycott Wilt and his cronies.
Put them in you killfile and forget about them.
I did this after the first 24 hours of subscribing to this newsgroup.

Life has been so much better since :-)

As usual, you are talking from your very apt nick-name.

The truth about why you attempt to remain annonymous is that the vile abuse and call-sign apartheid that you preach are reason enough to have your amateur licence revoked.

One day, when someone who takes offence at you is bored enough, they will complain about you, and you will loose your licence.

I just hope that justice is served, and if you want to get back into AR, then you will be forced to start at the bottom with an M3.

You are a sick, twisted and sad little individual, and I hope that you are one of very few individuals who think this way.

813. Preservation of standards, before it's too late

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-29 15:59:42 UTC
From: "TX & RX News"
Message-ID: <3d1dd930$1_2@mk-nntp-1.news.uk.worldonline.com>
Source record: 76005
Cross-posted to: uk.radio.amateur,rec.radio.amateur.misc,rec.radio.amateur.policy

Is there any difference between Ham Radio and CB?

Yes - Ham Radio is for technically qualified persons; CB
is for those with the mental aptitude of a turnip.

Is it worth preserving this difference?

Yes - the technically qualified Ham has the right to
manufacture his own transmitting equipment.

Is there a danger of this right being lost?

Yes - the powers-that-be class CB and Ham radio
in the same boat together as Hobby Radio; and have recently
awarded CB-style Licences (The FL/CB/M3 grade) to
undeserving people. If this carries on, the powers-that-be
will lump all Hams together, and remove the right
to manufacture our own transmitters.

What can we do about it?

We can act to get the CB-style M3 licence abolished. USA
Hams have got their Novice category abolished. Until then,
we can help to preserve standards by refusing to QSO with
these M3-styled Cbers. If we don't, they'll get to think
that they are more than just turnip-brained CBers, and
will mislead themselves and others that they are, in fact,
Radio Hams.

Act now! Write to your MP. Preserve standards - have
nothing to do with the turnips.

Please pardon my ignorance; I am just coming into ham radio again after over a decade of doing other things. Just what is an M3? I assume from your post that it is something other than a call sign prefix.

Thanks,
Bill

818. Sleeve for cable through house siding?

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-29 16:52:17 UTC
From: Bill Lathan <ak5k@arrl.net>
Message-ID: <5BIT8.197433$nZ3.94292@rwcrnsc53>
Source record: 76010

When cable installers are too lazy to route cable through one's attic, they bring in the cable by punching a hole in the siding, then put a bushing (tube through the hole?) on the outside so that it doesn't look too bad. Well, I have the need to do the same thing as I wish to run an antenna cable in to the house (I'm too old for crawling through the attic). I've gone to Radio Shack, Lowe's, and Home Depot here in the states, and even to an electrical parts place. Although all the sales people say they know exactly what I mean, no one seems to have them. Does anyone have an idea about where one can find such? I suppose I could break down and ask a cable company, but I'm not certain I could afford the bill. A web company would be nice.

TIA,
Bill

Indeed a Code free HF licence has been assumed to be coming for years.
The FL M3 isn't it

I think most would agree that until recently the assumption was that a second
written test
like the US Advanced or Extra class exams would be introduced here
Entitling RAE passers, to advance to an HF licence

Instead we got an unconsulted insanity of a super CB licence test,
that 8 year olds can / have easily passed

What we desperately need in the UK is a docket proposal system like in the US
Giving us a taste of democracy Americans take so much for granted

From: Rev Turd Fredericks <turdfred@catholic.org>
Message-ID: <PM000391D524FF3746@dhcppc1.home.com>

"Stagger Lee is anti-free speech because he originally came in here
demanding that Steve Geilda, a regular in this group, cancel Roger
Wiseman's account on his server because he didn't like what Roger was
saying. That is anti-free speech."

From: Stephen K. Gielda <steve@cotseNOSPAM.com>
<MPG.14f8c0c6d9215288989a3b@news.supernews.com>
"Cotse does not care about flamewars, unless they violate our policies.
You are involved in a flamewar and you want to win it by terminating
your opponents account. <...> Sorry, we do not take sides in flamewars.
Radio operators are always feuding, both on and off the air.
You claim all this libel. Well, if that is true then you need to
subpoena our logs and sue the person for libel. We will turn over logs
upon subpoena after giving our user 14 days to quash if they desire.
That is under the law. Then you can properly address all this claimed
libel.

The only one who can judge libel is a judge in a court of law who has
fully heard both sides. We are not a judge. If you sue and win,
meaning it is shown by a court of law to be libel then we will terminate
the account for libel. We cannot play judge and investigate every shout
of libel. Libel is for a court to decide, not an ISP.

Also, you have it correct in your later post. If you do not wish to
read this posters posts then add @cotse.com to your kill file and you
won't see any more. Stop it by killfiling , ignoring, and not playing

the flame game. But, I don't believe that you want to stop the flamewar. This is evidenced by the crossposts to the nose and all kinds of other groups to fan the flames by you numerous times (not just this post)."

Anyone else see the disconnect here? The owner of this particular sock-puppet has, in the past, made statements, but has totally failed to discuss his position when challenged with the relevant facts. I did not agree with a particular statement and quoted researched evidence in rebuttal. His silence was deafening.

I did not agree with his viewpoint; I was happy to discuss the issue.

No discussion took place.

Note that this has occurred several times concerning this particular issue, and is an example of exactly that condition complained of above by the sock-puppet. I leave it to the reader to form a judgement of the sock-puppet owner's maturity.

So, how is that Woger? Don't you post through Altopia? Is every post
from Altopia by me?

You have no supporters anywhere, so you have to invent sock puppets for
that purpose. I have to admit that the forgeries which appeared to come
from cox.net were better than your usual efforts, but they were obvious
forgeries nonetheless.

And that's okay on one level. As "Turd" himself would say, he doesn't
exist, so he can't be forged. (That's a paraphrase of the following
archived post:)

>"Nice try shitstick. It is true, I do not exist, you can say what you

Don't worry about in "JJ". He not only didn't spell it right. He ain't even close. Perhaps he should send that comment to Rich and see what he has to say.

Woger is pretty stupid about attempting to cloak his forgeries. His socks make the same ignorant spelling mistakes as he does, not to mention that no one in their right mind is going to support that moron :)

--

"Uhhhhhh, yeah, I'm calling you about giving you a dick sucking and all that..." Woger Wiseman blows his heterosexual cover and admits his desire for the Jesus cock in afcbck$j0546@pita.alt.net

---

WOGER WISEMAN COCKROACH HUNTER premiers tonight on the Hillbilly Station!

Woger hunts dangerous cockroach in the trailer parks of West Vagina with his side kick Chason!

Tonight's episode Woger and Chason hunt the dangerous Bung Munch Roaches in Wiseman's own home (Bung Munch Roachs crawl up you butt and eat your innards out!)

Wiseman: Alrightie mate, be more very careful and be verrry vvverry quiet. Remember these roaches can smell your fear.

Chason: I ain't your mate, you mommie living fag!

Wiseman: Shhhhhhhhhhhhhhhhhhhhhhh I think they've already gotten mommie Marie! Blimey, I won't have to the bleeding trash out!

Chason: Why you talking like a 'Roo fucking aSStralian, you dick sucker? <Trip> <Fall> <SMASH!> You need to clean this place up you fucking pig!

Wiseman: Run like the wind mate, they know we're here!

Chason: Get your hand off my butt Wiseman! Arrrrrrrrrrgggggggggggggggg help something crawled up my ass, and it's to big for Wiseman!

Eeeeeeeeeeeeeeeeeeeeeeeeeee!!! Hellllllppppppppppppppp! The pain!

Roaches: MUNCH! MUNCH!

Billy Jack and Joe Bob give it up fists up the bun!

Rex Reid says: "That Wiseman is so BITCH!

--

Check out JSF's newest Webpage:

http://www.members.tripod.com/~jpac/control.html

WOGER
(Xemblinkosky/Davies)

He lives in a trailor park somewhere in West Vagina
Where he drinks down cum in the faggot bars and it tastes just like his
mommy's Vagina,
See-oh-el-aye stinky Vagina!
He walked up to a fag and asked him to dance
And he'll tell you his name in a real girlie voice
El-oh-el-aye Woger, Wo-wo-wo-Woger!

Now Wiseman's not the most physical guy
But when he sucks your cock he'll inhale your spine
Oh my Woger Wo-Wo-Wo-ger!
Wo-ger Wo-Wo-Wo-ger!
Well Woger's real dumb and he can't understand
Why he walk like a woman but gets butt fucked like a man
Oh my Wo-ger Wo-Wo-Woger!

Well he drank a lot of cum and pranced all night,
Under his terrible overbite
Woger found a black man and sat down on his knee,
He said pretty brother will you make me a G?
Well that guy was a bum and wino but really fell for his Wo-ger
Wo-Wo-Wo-ger!
He push him to the floor
Woger got down on his knees
He looked at his pecker
He inhaled till he sneezed!

Well that is the way Woger wants to stay
Wo-Wo-Wo Wo-ger
Woger is a boy but dresses like a girl
He lives in a muddled faggot world
Wo-Wo-Wo Wo-ger

Well Woger left home just a week before
He'd only had sex with his mommy before
Well Woger's not the most masculine of fags

But he knows he is in drag,
Oh Wo-ger
Wo-Wo-Woger! Wo-Wo-Wo-Wo-ger!

Do as thousands of Gay men have already done and view Woger's
home page, Woger's page contains contact numbers, you can sign
his guest book, send him e-mail or just look at his loser ass:

Woger Wiseman's Profile:
http://profiles.gay.com/scripts/viewprofile?for=rogerwiseman

Woger Wiseman Gallery of Shame:

"Don't bring a knife to a gun fights you illarate fuck!"
Woger explains his battle plan in ^^^^^^^
9ujg6hpa@dosa.alt.net

"Dr. Seuss is above your reading level you. You fucker illerate"
kc8jbo@alt.net Woger demonstrates his superior sentence ^^^^^^
structure and spelling ability.

"...I never went to high school..."
Woger laments his lack of education in (a129t$i578@pita.alt.net)

Mehehe... Well, "grammer" sic boy, you definately have no room
to talk... (9viq9f$2@dosa.alt.net) ^^^^^^^

HOW TO SPEAK HILLBILLY BY WOGER WISEMAN:

"Basios"...word Woger uses when he gets neeeerrrrvous.
"Behing"...a cross between being and behind?
"Feamle"...I think he meant female.
"Losser"...only loser Roger can do it better.
"Ignroant"...typical, considering the source.
"Sluprs"...only Rogie knows what this means.
"Travelled"...a Rogerism, replete with ignorance.
"Postss"...pssst...Roger..that should be Posts.
"Defgenerate"...well, it's Roger's word...
"Faity"...he meant to say Fairy, but you know Roger.
"Distribiution"...Roger likes using phonics.
"Biotch"...he meant Bitch, but his phonics took over again.
"Methjadone"...a West Virginia substitute for Heroin.
"Anoinymous"...a cross between anonymous and annoying?
"Sumbliminal"...one of Roger's favorites.
"Recepticle"...either of Roger's moist cavaties.
"Cociane"...a West Virginia drug of choice?
"Tiome"...Roger meant to say Time...but his fingers were numb.
"Beraking"...no definition. Could mean 'beraking' the leaves,
"Amny"...he meant 'any',
"Nlay"...a town in Maylaysia? Vermont?
"Al;ong"...only Wussman knows what this means.
"Becasu"...well, becasu Roger is not the brightest bulb on the tree.

"Seperation". Why? Because Roger cannot "seperate" from his mommie!

We had our Novice license for 50 or more years, and had
no real problems. Most higher licensed hams were happy to
have them get on and learn and have fun and upgrade.

Similar thing when Restructuring was done and all of us 5wpm
generals and extras got on HF. Sure, there were newbie errors,
but most everyone learned. No degradation was noticed by
the FCC after a year after the above 5wpm people got on HF.

i hate to hear when other "shacks" dont even want to bother to help you.

try catalog number 278-1644 (fits RG-6) or 278-1643 (RG-59)

just remembe to make a rain loop and use a coaxial cable nail or similiar
strain releif before entering into house and also use silicone

for any other radioshack q&a feel free to email me, im only one man, but
try to help the other hams demistify radioshacks stupidity of the products
they carry

employee in radioshack Long Island

So says the mule humping memphis moron W4FQF George Ashley one of the biggest
qrm'ers ever to key a microphone.

George aka: rileygotcha, hoodat, plaintruth etc., etc. stole tents from sears and took an "early retirement".

Received two (2) letters from the fcc regarding jamming and intentional interference on the amateur bands.

Hit the road you sorry asshole.

Polly, you will be the first stop on the stumphumper grave pissing tour, so hurry up and die!

Isn't it just amazing Firebottle? You know what I mean...after all this time Polly STILL believes his own lies. See what he doesn't seem to understand is I don't have to prove a dang thing to that liar. You know the guy, with his buddy the totom pole that jammed 3.901 every night for years. That is before Riley cleaned up his act.

You were listening then....remember how he and 'Claymore mine Billy Jerk' started on me. And why was that? Because he was jealous. All that loser ever did in his 'Korean war tour' was exactly what he accuses me of. Aint that just amazing how that works out?

Ever notice that the ones that call people child molesters, wife beaters, Rear Echolon Mother F*#(DCs, all fit the exact SAME MOLD? Amazing ain't it?

Well I have done my little duty for the month. I rattled the foul mouth West Virginia losers trap. (I'll save the part about how they threw him out of the A.F. for later). And Polly Parrot was a little extra plum. Course we all knew he couldn't keep out of it.

Well nice seeing you again Firebottle, keep the fires burning.

Well off to 20 meters....oh I forgot...I'm not allowed there, right 'jailbird'....another loser heard from.

Dan/W4NTI

857. Kenwood TH-27A Sound Problem

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-30 04:24:50 UTC
From: Edward Abrahim <eabrahim@REMOVETHISiname.com>
Message-ID: <mKvT8.15751$vr5.6978@nwrddc01.gnilink.net>
Source record: 75899

Any help on the following is appreciated. My Kenwood TH-27A has lost all ability to produce any sound, even if the MONI button is pressed. Everything else seems to be okay, except for transmission which I am not sure about.

Anybody have any ideas? Would shipping the product to Kenwood Service be an option?

Thanks,

Eddie

858. Kenwood TM-411A PL Switch settings

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-30 05:13:11 UTC

Can anyone enlighten me on the various switch settings for "PL" tones? I've lost my manual and it's *REAL* hard trying different combinations to set sub-audible tones!

Also, can you "save" different pl's in different memory locations, or must you change pl's with every freq. change?

Thanks in advance,
Brien

The Socialist Liberals should be able to ace this test!

The Hillary Quiz!
1. What was the name of the book Hillary wrote in 1996?
It Takes Time and Newsweek
Everything I Need to Know I Learned in Reeducation Camp
Chicken Soup for Your Bowl
It Takes a Village, and Other Lessons I'll Teach You

2. Hillary has:
Two sisters
Two brothers
Two brothers and two sisters
Sex about once a decade

3. Where did Hillary earn her undergraduate degree, anyway?
Wellesley College
Patrice Lumumba Peoples Friendship University
Smith College
The Suharto Financial Institute

4. Hillary has donated over a million dollars from her book "It Takes A Village" to which of the following childish causes?
Churches
Children's Hospitals
The Democratic Party
The Clinton Defense Fund

5. Which law distinction did Hillary receive?
Named one of the 100 most influential lawyers in America
Served as a staff attorney on the Watergate Committee
Graduated Yale Law School
First wife of President to be subpoened

6. Who did Hillary meet as a youth that profoundly influenced her life?
Eleanor Roosevelt
Queen Elizabeth I
Cleopatra
Joan of Arc

7. What are the names of Hillary's parents?
Ted and Alice
Gregory and Patricia
Hugh and Dorothy
Beelzebub and Lillith

8. Hillary published a book of children's letters to the First Family's two pets. What are the names of the First Cat and First Dog?
Phil and Jerry
Socks and Buddy
Monica and Vince
Rush and G. Gordon

9. For which of the following "Clinton for Governor" contributors did Hillary serve on the Board of Directors?
Wal-Mart
TCBY
Children's Television Workshop
All of the above

10. Which youth organization that Hillary was a member of as a young girl does she now serve as honorary chair?
The Girl Scouts
4H
The Five Satins
Six Degrees of Separation

11. What is the name of the program designed to help preserve American heritage that Hillary has been traveling around the country to support?
Save America's Baubles
Our Country Piss or Pee?
Preserving Our Precious Attic Junk
America, Land of Important Stuff

12. What kind of art has Hillary promoted by bringing shows to the White House?
American Crafts
Sculpture
Native American Art
Theater of the Absurd

13. When she was 15, Hillary dreamed of being...?
An Astronaut
A Teacher
An Architect
16

14. What was Hillary's favorite card game as a child?
War
BlackJack
Three-Card Monte
Strip Poker

15. What did Hillary's mom teach?
Obedience
Civics
Sunday School
Marxist economics

16. What is Hillary's favorite spicy food?
Salsa
Tabasco sauce
Chili
Liver with fava beans and a nice chianti

17. The name of the Children's foundation that Hillary has worked with for 20 years and served as President is...?
UNICEF
Band Aid
Children's Defense Fund
NAMBLA

18. On the first date Hillary and President Bill Clinton went on together, what did they do?
Go to a strip club
Study in the library
Visit the Yale museum exhibit on medieval torture
Reach third base

19. What did Hillary's father do for a living?
Lawyer
Small businessman who sold drapery fabrics
Self-employed hardware store owner
Advisor to Evita Peron

20. What did Hillary accomplish while at Wellesley College?
Finished 20 bong hits in one sitting
Delivered the first student graduation speech in Esperanto
Worked to increase minority enrollment
All of the above

21. What was the name of Hillary and Bill Clinton's first dog?
Paula
Gennifer
Juanita
Linda

22. Where did Hillary work while attending law school?
Yale Child Study Center
New Haven Day Care Center
Friendly's
Corner of Chapel and Ellsworth

23. What activities did Hillary enjoy as a young adult?
Taunting the children of migrant farmworkers
Playing softball
Badgering her betters
All of the above

They are newbies to CB Radio, and not to Ham Radio.

It's not a question of elitism - all are welcome to
learn and make the grade - it's a question of standards.

As to your childish remarks...

Stupid boy.

Grow up.

It's a misguided attempt to attract more
people into Ham Radio by lowering the standards
so ridiculously that untechnical people who have no
more acumen than to press a button can get a licence.
As an example, 8 year olds, whose mathematical
capabilities will not extend to calculations of resistances
in parallel are being licensed. The M3 is a travesty.

Oh...and one more thing....I want to thank Riley Hollingsworth. I have re-discovered the 'real ham radio'. Without his guidance and console I would never have taken my own advice and hung up the radio war gloves. As they say...I SAW THE LIGHT...YEAH I DID...I SAW THE LIGHT. And it didn't take a warning notice, or a letter, or anything. Not like SOME OF YOU GUYS,,,right Roger? right Polly???

I have re-discovered my roots. I am having a absolute ball on CW. Yes that antiquated mode of finger talking. The place where real hams reside. I am working DX...I'm playing with QRP...I'm building antenna's to work on the OSCAR satellites. I'm building transverters. Gads I'm actually doing ham radio stuff. Lots of stuff. And not having to listen to the likes of 'Aye yi yi the Porkbutt song'. And guess what Polly? I don't miss it one little bit.

So if your boored you can look for me on CW. I'm the guy chatting with real hams at about 40wpm. And if you jam me I'll just break out the bug. I know your 'readers' can't decode that. Or you can point ur rubber duckies at the 'birds' and jam me there.

What a bunch of losers.

By now...

--... ...--

I believe the proper response for someone in the UK is:

Who bloody well got your knickers bunched up in a knot?

With an attitude like yours the M3s won't want to talk
to you either, and rightly so. You make a fine
example for them to be like, a bloody snob that is!

If I were allowed to use the HF bands I would be more than
happy to have a QSO with an M3 because everyone needs a
friend, and you sure as hell won't be one to many of them!

So Booger Off!

> in the same boat together as Hobby Radio;

You mean that ham radio is NOT A HOBBY? Oh my! :O

> and have recently
> awarded CB-style Licences (The FL/CB/M3 grade) to
> undeserving people.

What have YOU done to be one of the deserving people?
Last I knew it was a PRIVILEGE to have a government
granted ham radio license not a RIGHT to be earned
by great deeds of a few select people.

> If this carries on, the powers-that-be
> will lump all Hams together, and remove the right
> to manufacture our own transmitters.
>

That would be a shame, I for one hope that NEVER happens!

> What can we do about it?
>
> We can act to get the CB-style M3 licence abolished. USA

> Hams have got their Novice category abolished.

No the FCC got tired of having so much paper work to do and
got rid of a headache while they could. At that same time they
eliminated the Advanced class also (next to the highest) with
a little luck the UK will get rid of YOUR license class also.

> Until then,
> we can help to preserve standards by refusing to QSO with
> these M3-styled Cbers.

Bloody snob!

> If we don't, they'll get to think
> that they are more than just turnip-brained CBers, and
> will mislead themselves and others that they are, in fact,
> Radio Hams.

God forbid that they would look a REAL ham in the face
as an equal! They tried that crap with the blacks here in
the U.S.A. and they didn't believe it either.

Have you EVER talked on a CB radio? If you have then your
a turnip-brained CBer also. I think you'll find that a
large number of hams got their first taste of radio in
the form of a CB.

THE WORLD HASN'T STOPPED TURNING YET FROM IT!

>
> Act now! Write to your MP. Preserve standards - have
> nothing to do with the turnips.

Bloody jerk! It's a shame I can't do real good drawings
with plain text! Or else I would draw a hand showing you
(TX & RX News) a "V" for victory sign with the palm of that
hand facing AWAY from you. Note, for those here in the U.S.A.
not familiar with UK customs, that sign is done here with
just ONE finger in the upright position not two!

So please go to this link and find a heart felt greeting
from all us Non-coded and M3 class amateurs.

What does it matter? In the famous 'Liberal Republic', these people
would be condemned because they weren't making modifications to their
transmitters, but - gasp - actually *self-training in communications*!

Isn't it just amazing Firebottle? You know what I mean...after all this time Polly STILL believes his own lies. See what he doesn't seem to understand is I don't have to prove a dang thing to that liar. You know the guy, with his buddy the totom pole that jammed 3.901 every night for years. That is before Riley cleaned up his act.

>>"That's right Polly". Billy Jack Moore W4LLI, who along with W4FQF George Ashley
AKA:, Polly, etc., etc. and so many more that aren't even worth mentioning, jammed 3.901, 3.965 and their own frequency 3894.5 so often one would have to have miles of tape to record all of it.

You were listening then....remember how he and 'Claymore mine Billy Jerk' started on me. And why was that? Because he was jealous. All that loser ever did in his 'Korean war tour' was exactly what he accuses me of. Aint that just amazing how that works out?

>> And, Polly has a "conditional" license, funny how he never mentions that. Him and Billy Jack are the two most reviled amateurs in the Memphis area. And, the fact that Polly conveniently forgets to mention the two letters from the fcc. Funny, after the second one, the jamming stopped. Polly claims that it was a "impersonator"..yeah right! We have ALL heard the impersonator "Polly" and know it wasn't him. Even Rich Little couldn't impersonate that falsetto the comes from Polly's ravaged voice box.

Ever notice that the ones that call people child molesters, wife beaters, Rear Echolon Mother F*#(DCs, all fit the exact SAME MOLD? Amazing ain't it?

>>Huh, imagine that!

Well I have done my little duty for the month. I rattled the foul mouth West Virginia losers trap. (I'll save the part about how they threw him out of the A.F. for later). And Polly Parrot was a little extra plum. Course we all knew he couldn't keep out of it.

>>That's because Polly is obsessed with you, Rich and others. Since he moved out of the Memphis ghetto aarea where he lived for many years and is now settled in at his infamous "Mule Barn" abode, he doesn't have an antenna that is worth mentioning, he is too old and decrepit to get it up and working. He asked someone I know in that area for assistance, they told him to get screwed! He hasn't made alot of friends for certain.

Well nice seeing you again Firebottle, keep the fires burning.

>>I'll always be here to tell the "TRUTH" when Polly and others try to spread their lies and filth.

Well off to 20 meters....oh I forgot...I'm not allowed there, right 'jailbird'....another loser heard from.

Dan/W4NTI

Repetitive message snipped.....

>>
Dan, you have more class in your little finger than Polly and the stumphumpers have in their entire organization.

Firebottle

I couldn't calculate parallel resistances when I was 14 years
old and passed the Novice exam in 1952. I learned how later
and even got a EE degree. What's wrong with that?

890. Pilot's license + dark-skin + electornics hobby = terrorist

Newsgroup: rec.radio.amateur.misc
Date: 2002-06-30 14:19:43 UTC
From: "Joe S." <joe@schlatter.org>
Message-ID: <afn46f031f0@enews1.newsguy.com>
Source record: 75789
Cross-posted to: rec.radio.amateur.misc,alt.politics

If you hold a pilot's license and are a computer hobbyist, and if a neighbor is pissed at you, you are a terrorist. At least that's the lesson learned by Dr. Mujammhat Bhatti, 65, of Marion VA. (Marion is a large town/small city in SW Virginia, adopted home and last resting place of author Sherwood Anderson.)

Dr. Bhatti immigrated to the States in the 1960's and became a US citizen in the 1970's. He served 20 years as a psychiatrist with the Veterans Administration; he is a retired officer from the Virginia Air National Guard. His hobbies include computers, electronics, and flying -- he has a private pilot's license.

In mid-June, he was arrested by federal officers and placed in the local jail. Charges against him were sealed -- no one knows what he has been charged with. His bail hearing was closed; he was granted bail but his trial is scheduled for late July; he spent six days in jail.

Local newspapers and his family have learned, however, that he is being charged as a material witness to terrorist actions. They have also learned that the ONLY "evidence" against him is: (1) his hobbies, (2) his pilot's license, and (3) comments by one or more neighbors that he made them "nervous."

So, let this be a warning to you, especially if you are dark-skinned and speak with an accent: don't pursue your interest in electronics (let's arrest all the foreign-born amateur radio operators); don't get a pilot's license; don't spend too much time on your computer; and, above all, don't make your neighbors nervous.

Did someone say "police state?"

Of course, the title of this post should be:
"Pilot's license + dark-skin + electronics hobby = terrorist" -- correcting
the spelling of "electronics."

I have no way of knowing about your military record, only by what you say. And I have no reason to doubt it. Your knowledge of AF Communications is extensive. Over the period of time you and I were friendly we discussed it a bit.

Another thing of note....anyone who has been in the military can easly recognize another member or ex member. We talk in a certain way, and phrase things in a certain way. Even some words will stand out.

Lllllooooyyyyyddd has none of the above.

Dan/W4NTI

Roger who has been cast out of every group he has tried to join continues to whine. Now he is striking out at dan w4nti. I have had words in the past with dan, but that is history. Roger needs to realize that the radio wars are over. Herbie is gone, ka4muj and many others are dead. Get over it roger!

Then find another hobby and grow up.

K3QAM McKeesport, Pa.

I could, when I was 14 years old, and then the
only exam in Brit was the RAE.

Standards are dropping.

Like Dan didn't QRM for years..... He just got mad because he couldn't
really do a number on his enemys in that 1/2 ton truck homemade topper
hogan he was living in at the time.. extension cords will only carry
so much amperage... Now,,ittle Dan and he is little Dan has moved to
CW, a good place for the twerp and lives in a duct tape
palace......Zitchey

Yep, I could do that, but parallel resistances were not on the
Novice exam so I had absolutely no knowledge of the parallel
resistance equation. I didn't learn the parallel resistance
equation until a year later while studying for my Conditional
exam.

Since when? I got my Novice in 1952 and didn't know how to calculate
parallel resistances. Maybe the standards dropped from the 1930's
to the 1950's?

What can I say? Sometimes I let people get under my
skin and I've got to speak up, no matter how STUPID
it comes out!

One Angry Man
President and only member
No Code Liberation Army (NCLA)

Answer to everyone's first question.
YES I AM LICENSED!

Answer to everyone's second question.
NO I DON'T WANT TO PUBLISH MY CALLSIGN HERE!!

Answer to everyone's third question.
YES I AM PROUD OF IT, I'M JUST NOT STUPID
ENOUGH TO USE IT ON THE INTERNET, DUH!!!

While Jedswald and Zitchey only brag about their fake war records over the air. Funny how you and Commander Jockstrap McBragg (ZZE) always have to talk about their so called war records. What's the matter Polly, you had to clean the latrines the whoile time you were in? You sure didn't do anything big after you got out, washing machine repariman.

Like Dan didn't QRM for years..... He just got mad because he couldn't
really do a number on his enemys in that 1/2 ton truck homemade topper
hogan he was living in at the time.. extension cords will only carry
so much amperage... Now,,ittle Dan and he is little Dan has moved to
CW, a good place for the twerp and lives in a duct tape
palace......Zitchey
> > > > >
Multiple repetitive bs snipped.......

Zitchey = W4FQF AKA: George Ashley, Polly, rileygotcha, plaintruth, realdeal,
hoodat etc., etc.

You aren't bs'ing anyone Polly, it's you!

That "duct tape palace" you refer to is far better than the ghetto you lived in for many years in memphis. Right in the heart of Coon Town!!!!! LOL!!!!!!

Do you still have those tents you stole from Sears? I didn't think so, you got rid of them real quick when they were investigating you. Of course, you opted to take an early retirement when you were confronted with the proof weren't you?

I don't about what "Polly" beleives. I do know Dan has made a very
good living off us tax payers for years with his so called "Injurys"
of the mind...He tried working in the Labor force, but just didn't
fit in somehow , (wonder why)? looks like a lazy bones to me, rather
stay home , eat off taxpayers and play God on radio....Your routine is
old stuff little man....CW is the place for a malcontent like you....
Zitchey

Multiple repetitive BS snipped......

>>

"I don't about what "Polly" beleives".
(nice spelling, lloyd must be your ghost writer).....Zitchey, you are Polly,
why continue this stupid masquerade?

Dan has earned his disability pay due to injuries in Vietnam asshole. Whatever
he gets isn't enough in my book.

But, you are probably living off some sort of disability somewhere judging from
your sorry state of health and appearance. You are one of the pug ugliest
assholes I have ever had the misfortune of laying my eyes upon!

Now, get outside and try to get an antenna up so you can qrm some more from the
"Mule Barn". Your other farm has a pretty good signal when you stayed there.

Do you want me to write more? Keep it up asshole!

excuse for a human being in the entire state of Tennessee.

Zitchey, aka: polly, w4fqf george ashley, also using the following screen names, hoodat, rileygotcha, realdeal, plaintruth and god knows how many others. has the unmitigated gall to ask Dan Jeswald W4NTI about his VA disability that he earned while in Vietnam. Polly is a nobody who qrm'ed 20 meters for over 4 years as "polly"...saying, "herbie baby number one"....also continued to qrm and jam 80 meters on 3.901, 3.965, 3.894.5 and other frequencies until he received a letter from the fcc. he then curtailed his jamming operations for a short time while he moved from his ghetto hovel in the coon town area of memphis. He then started up jamming once again at the farm.....no, not the present location of the infamous "mule barn" in Collierville, but another hovel with a garden planted north of Memphis which he once again jammed and continued his unlawful amateur practices for quite some time until he received yet another letter from the fcc. Guess what? he has quit jamming.....huh, imagine that!

The present location of the infamous "mule barn" has been the site of another controversy. It was raided awhile back when polly was caught performing another unatural act on a mare mule. His partner (that's right polly) Billy jack Moore W4LLI was steadying the stool while polly showed him how "Stumphumpers Do It"!

Polly who was forced to retire early from sears for stealing tents has been forced into selling hemostats from pakistan at hamfests, he gets them from hospital dumpsters and cleans them up and resells them for atrocious prices.

Want more Polly? just keep up your slimy bullshitm my archives are full of goodies on you.

> Get a life you * .- -. -.- . .-.
> It's about time some poeple on this newsgroup found something a little
more
> interesting to say instead of the same boring rubbish that Walt and his
> cronies go on and on about.

How true, I see exactly what you mean, both from your opening comment above and especially when I look back at your helpful and illuminating articles over the past month.

For example, on the 11th inst:

"Amateur Radio is supposed to be a hobby, thankfully at the club I attend every member is helpful and courteous to ANY class of new licencee. Personally I can't wait until the 3 tier system is implemented, that way the M3 licence holders will outnumber the stuck in the mud G4s"

So, you're helpful and courteous to any class of NEW licensee - but insulting and dismissive other amateurs. I begin to see the picture...

On the 14th you were back, after the rather gentlemanly Andy Cowley wrote to disassociate himself, as an M3 unwilling to be tarred by the same brush, from some of the recent vulgar and unpleasant posting by others:

" Learning Morse will not dis-associate you from cretins like
Davidson, only your attitudes & opinions will.
I dont think M3's are ignorant & ill-mannered, I think G3NYY and
his sycophants are, thus I choose to dog their steps."

Yes, no insulting boring rubbish here. The tone of the group is immediately improved by your fine contributions.

The 28th of June found you in sparkling form, with the interesting observation:

"Yawn.....
That's original....."

(Three dots are usually considered adequate to convey ellipsis by the way.)

On the 29th you reached new heights of helpful discussion, while simultaneously bring the interest you ask for back to the group, when you replied to Steve Terry:

"Change the record Fatboy..."

Succinct too.

But perhaps you were at your most nurturing, and contributing to the spirit of amateur radio on this group when, also in reply to Steve Terry, you offered the following helpful hints:

">Why don't you go and get a job Steve, and actually contribute to the country
>instead of sponging off it."

Unfortunately that's all that my quick deja search turned up. Otherwise I'm sure there would be many more fine examples of how to improve the standard of discussion and raise interesting topics on Usenet from you.

So thank you for setting such a splendid example.

I shall strive in future to modify my posting style to fit more closely your own inspiring contribution to uk.radio.amateur and to maintaining the image and spirit of our hobby.

And, if I manage to get the tone and content of my articles right in future, I hope you'll forgive me if I happen to inadvertently spell and punctuate my posts correctly sometimes. Or write in complete sentences.

Old habits die hard you know.

Oh, I know I'm not the only one. Four other persons, perhaps too chicken to say anything here, sent their comments by email. That's fine. As I told them, I was really too chicken to say more than what I actually did say, even though I obviously wanted to say more. ;)

And, yes, you may have lived a sheltered life. You see, one of the prongs is... Wait. You said circuit, didn't you? Never mind. ;)

Some of us would have had sufficient interest in the hobby to learn
how to calculate parallel resistances, whether they were in the exam
syllabus or not! In today's world of falling standards, nobody seems
to want to do anything more than the bare minimum.

Is English your native language? Do you read above the 4th grade level? He was in jail for six days until he was released on bail and is now awaiting trial on unspecified charges. He is facing god only knows how much time in jail on the groundless charge of being a material witness to terrorist acts. He is charged ONLY because one of his neighbors reported to the FBI that this man has a pilot's license and spends a lot of time on his computer. Thus, under the Bush junta, he is guilty.

The problem here is that were are now being incited to spy on our neighbors and report them to the authorities. This leads to people settling old scores by reporting their neighbors, who have done nothing wrong. The phrase "Salem witch trials" comes to mind.

Yep, I read English. Do you understand it?

The fact that HE, HIS ATTORNEY, prosecutors, and the judge know the charges,
and you don't must really irritate you?

If they had shown him and his attorney the charges PROMPTLY and let him post
bail, then I'd have NO PROBLEM at all.

There are many older receivers, transmitters, transceivers
on e-bay. I recently saw an SX-28. There was even a Signal-1
transceiver, I think, . the CX-7. There are are some old WW-2
ARC-5s and even old Navy TBYs. Luck

Does anyone have the info on a Drake UV-3 Tribander (Model # 1346)?

I need to find out the output power and current drain at low and high power.
I believe that the radio puts out 25w on 2m and 10w on 220/440.

As usual, Dicksucking Doug, you have your head up your ass and don't know what the fuck you are talking about. Dan hasn't been my "friend" as you put it, since we disagreed about the 2000 election. Dan backstabbed me then, and he also backstabbed Doc, AF2Y. Doc, AF2Y also quit the so-called "group" the Goodfellows. Don't believe me, read the alt.radio.scanner.flame_fest archive during the 2000 elections. No, dumbfuck I don't work at Burger King, again you don't know what the fuck you are talking about, bag boy at a grocery. That IS where you work, isn't it, Dicksucking Doug? Then you troll the public restrooms at the park offering up your herpes-ridden mouth to all your fellow drunken homeless and winos for extra money.

> then comes home and vents on Usenet. Can't wait till Dan tells

The UV-3 is rated at 25 watts output on 2 meters, however most of them did 30 to 35 output. The 220 and 440 bands are rated at 10 watts out. Low power is approx. 10% of high power and is adjustable by an internal resistor. Max current drain is around 6 amps on high power and 1.3 amps on low power. I use to do final test on those radios at Drake many years ago.....

Eugene Paskell Paris is the author of that website, stupidfuck.

> retired Ambassador David Heil.
^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^^

Wrong again, fuckwit.
From Heil's website:

"K8MN

My name is Dave Heil. I was born February 28, 1949 in Glen Dale, West
Virginia. I spent a decade-and-a-half overseas with the U.S. Dept. of State.
I had two different assignments in Helsinki, Finland and have had four African
assignments--Bissau, Guinea-Bissau; Freetown, Sierra Leone , Gaborone,
Botswana and Dar es Salaam, Tanzania.
My "ex-calls" through the years include OH2 and OH0/K8MN ('85-'87 and '95'-98),

J52US ('88-'89), 9L1US ('90-'91), A22MN ('92-'95) and 5H3US (1999-2000). I
was a member of the OH0MD/OJ0 Market Reef operation in July, 1986.

I've been on the air since 1963 and have held the call K8MN for twenty-three
years. It honors the gentleman who helped me become a ham--Andy Timberlake
W8MN (sk) of Hinton, West Virginia. I grew up in Lake Worth and
Miami, Florida, in Lexington, Kentucky and in the southern West Virginia
towns of Hinton and Oak Hill. Cincinnati, Ohio and nearby Fort Thomas,
Kentucky were home for nearly twenty years before I began work in the
Foreign Service. "

He mentions nothing about being an Ambassador. In fact, he was a courier.
And he doesn't get along with other very well:

BFD ... you said something here about "betting my employer keeps
me under wraps" ... so I sent you the paragraph where my boss spoke
about how valuable I was in customer presentations ... BFD ...
I thought it MIGHT shut your stupid yap ... but obviously you
don't have the class to admit when you're wrong, Dave.

> After my response, he sent another e-mail. I answered that one too.
> Carl saw fit to quote from it and respond to it here in the newsgroup

Gee, Dave ... since when is using a SINGLE PHRASE ("tenured foreign
service") "Quoting Private E-mail" ???

> (above). The text below is the total text of that e-mail with my
> response:

The HELL it's the "total text" ...

[snip for brevity ... since everyone saw it, no need to repeat it]

As the subject says, Dave ... you have no class. I took some of my
argument with you to e-mail ... you use the excuse that I "quoted"
A SINGLE PHRASE FROM ONE OF YOUR MESSAGES to post (selected parts of)
our e-mail exchange.

You are a bigger SCUMBAG that Clinton, Dave ... and I thought that
was IMPOSSIBLE.

I will be having my birthday again this year on Wedensday. I will be 28. I
think that if someone wanted to be real generous and send me something nice,
my address is good in QRZ.
It's tough living alone on days like your birthday. I mean, i am depressed
alot of the time. No one at the Church seems to care. So where do i have
to go? Listening to Prophet Stair and Hal Turner, they comfort me. All i
do is sit at the computer and read newsgroups and read Hal's webpages. I've
tried going to a couple of country dance places, but none of gals would have
a dance with me. It seems every time I try to do something that would be
break away from this life of lonlyness always fails.

Just wanted to speak my mind,

Lloyd

The UV-3 draws .9Amp on standby, 1.3 Amp on low power, 1.3 Amp on high power. These numbers are for a factory set UV-3. You can re-set your low power to anywhere up to 25 Watts on 2 Meters by changing a resistor value or installing a rheostat in it's place. 220/440 can be set for a low power up to 10 watts.

The high power setting is nominally 25 Watts for 2 Mtr, 10 Watts for 220/440.

I repair about a half dozen of these in any given year and 90 percent of the failures are on the Vcc collector voltages dying due to failed 10 ufd tantalum capacitors which are used throughout the radio for bypassing supply lines. The rest have failed RF amps (6 percent) and the other 4 percent are user lapses (dropping, user troubleshooting gone bad, bad mods, etc etc).

All in all it is still a great radio. I keep two in my shack here. One is the original I bought in the 70s and the other is a basket case I restored from a hamfest bargain.

Gareth,

In answer to your question - No. It'll never be the time.

Also, judging by your other postings using many different identities, I don't believe that you are in possession of all of the facts surrounding what is contained within the Foundation License course, and what is involved in taking the assessments and the exam.

Furthermore, I cannot see how inciting overseas radio amateurs to not communicate with entry level UK radio amateurs could possibly improve matters.

All it will achieve is to prevent those entry level UK radio amateurs who want to from progressing to higher levels.

Basically, it is pointless to even suggest taking this course of action, but then one can see that most of your postings are pointless and devisive.

...and I'm sure that if you do indeed reply to this posting, it will be just as pointless as all of the others.

You claim to be helping the hobby, but you are having just the opposite effect, and I believe that you are fully aware of it.

You seem to be constantly attention seeking for one reason or another...

So then after reading all these posts, I can assume that most of you Hams
are in favour of the M3 Persons. I really don't see what all the fuss is
about, I have tried to do the full licence but I failed (twice) My Brother
has been a ham since the age of 15 his callsign is GI8WAZ,
Yes I an from N.Ireland but does that give the so called snobs on this N.G
to call me and others Turnip Heads. I can name at least 10 hams in my area

of Leeds still using C.B . I do not use it as I do not like to listen to music and bad language all day.All I want is to take part in Ray Net.
So if any of you are in favour of the m3 please help us , we are not allways going to be m3. I want a full licence but I have to start further down the ladder and work my way up. As for you snobs

TUFF TITTIES OLD MAN What What

Regards

Michael Savage. G.C
P.S for someone who is meant to be a turnip head, the G.C is for George Cross, which was earned, so as for standards some of you have not got a clue.

Regards,
Michael.

No advance is required, merely the use of an antiquated code. Using
this code seems to have a detrimental effect on the mental faculties
of the victims, as witnessed by your drivellings.

Andy, M3ABC

Then perhaps you can understand why some of us are not keen to import
CBers and their filthy habits into amateur radio?

>All I want is to take part in Ray Net.

Very commendable, I'm sure. However, an M3 licence will not help you
there .... M3's are not allowed to carry traffic on behalf of user
services.

Why do you not try the Novice (Intermediate) Licence Course?

You should be ok. However I heard that M3's cannot pass third party traffic.
Don't know if this is true, subject to change or it was missed out in error.
Might be worth checking if this is your only reason for going for M3. Guess
there are ways around the problem if it is one (club call perhaps)

Since Roger is 50 years old, customers at the McDonalds
where he works are always asking Roger if he is the
manager. Roger gets very angry when he has to admit he
is only a hamburger flipper and then even angrier when he
has to point to a 21 year old kid and inform the customers
that the kid is the manager. Today, Roger nearly blew a
blood vessel when yet another customer asked if he was the
manager but before Roger could point once again to the kid,
one of the teenage employees answered, "No, that's
Gramps Wogie, our senior citizen burger flipper."

As we seem to be all agreed on the undesirability
of the M3/CB licence (even the disparagers show their
lack of good discussion by their resorting to abusive
comments), what is the minimum syllabus for a Radio Ham?

And, in the long term interests of Ham Radio, should
we dissociate from all licensees who have not met this
minimum standard, even refusing to QSO with them?
Ham Radio _IS_ different to CB Radio.

Proposed Minimum Syllabus.....
Ohm's Law
Resistances in series and in parallel
Capacitive Reactance
Inductive Reactance
Impedance
Resonance
Filter networks
Semiconductor diodes
BJT's
FET's
Valves.
Microphones and loudspeakers
Oscillators (to include DDS and PLL)
Amplifiers
Mixers
Digital gates and flip-flops
Digital circuits
Antennae and feeders
Types of modulation
Types of RX, Regen, Super-Regen, Superhet
Types of TX CO, CO-PA, Mixing.
Instability in PA's
Test and Measuring equipment
Propagation
Causes of interferences and their cures
Licensing condx

Operating is excluded because it is so trivial
a matter as to be laughable as requiring examination.

Yes, I think that's quite a reasonable minimum syllabus. It
corresponds pretty closely to the existing Novice syllabus, which I
still think was perfectly adequate as an entry point into amateur

radio .... although I believe that the Novice Licence, too, should be time-limited.

I can think of nothing positive to say about the M3 CB/FL licence ... it was ill-conceived from the outset. Scrap it and start afresh.

A pot kettle black is the best you can manage to slobber out of your
slacked-jaw, chronic drunk and painkiller addict? At least I didn't get so mad
as to say "Fuck You" to somebody over the air, like I've heard you do. It was
funny to hear the QRMers get you so mad you were frothing at the mouth like a
rabid dog. You're such an uneducated little dwarf, Jizzswallowed.

That's because they ended the war in 1973, dumbfuck. I was in until mid-1977.
You can subtract 4 from 7 and figure out which year I enlisted, can't you,
doodlefuck?

> Unless you count the one between his ears.

Says the bragging so-called "front-liner", funny, how most people, the real
soldiers, DON'T talk about their Vietnam experience. Yet you go on and on
about, embellishing it every time, gimp. You may have been in the front lines
in the Air Force, but those Radio Operators didn't see much action, did they?
Or maybe you're just retelling the grunts' stroies that you overheard while
getting drunk in a Saigon Bar.
But you weren't on the front lines in the Army, were you, Radio operator?
You're an unmitigated blowhard, sort of like Jockstrap McBragg Varoom who from
what he says, he won WWII all by himself.

> And I was just pulling his chain about his discharge.

So you admit you're a LIAR?
My, my, how so easy to piss off you are. No wonder the QRMers have a field day
with you.

> I don't know and I don't care.

You're contradicting yourself, asswipe. But this is not new.

Gimpy Crippled Malingering Dwarf slobbered in:
<92vj7j$8ct$1@nnrp1.deja.com>
"I have no way of knowing about your military record, only by what you
say. And I have no reason to doubt it. Your knowledge of AF
Communications is extensive. Over the period of time you and I were
friendly we discussed it a bit.

Another thing of note....anyone who has been in the military can easly
recognize another member or ex member. We talk in a certain way, and
phrase things in a certain way. Even some words will stand out.
Llllloooooyyyyyddd has none of the above."

So you ~are~ a liar.

> Pull the trigger Roger.

You first, going to the Veteran's administration psycho doctors lilttle cripple. The loss of you wouldn't be of any consequence.

The only time I was in Saigon was during TET of 1968, Thats when the USAF and the VN AF trashed Cholon.

The time prior to that I was assigned to the 19TASS, Bien Hoa AB, RVN. Where I was a Forward Air Controller.

I never claimed to be a front line troop. I think you have me confused with your BARF buddies.

Contrary to popular opinion, Roger's favorite phrase does
not contain any obscenity. Wogie's favorite phrase, repeated
at least 200 times a day is, "Do you want fries with that sir"?

Do I detect hints of condescension in threads about the Foundation Licence?

Over the years I have met radio amateurs who were world class leaders in their professions. I have also met a few working in the electronics industry that were surprisingly unprofessional and low calibre. All had passed the old C&G RAE. It was never a particularly challenging exam and anybody considering it a serious qualification is overestimating its significance. I believe its purpose was to filter out folks with dangerously little knowledge, at a time when everybody had to build their own equipment from discrete components, simply because there was no alternative.

Times change. For remarkably little money, excellent second-hand, amateur bands only, transceivers can be bought. The skills needed to operate these sets safely and without interference are considerably less than using the home-made separates of yester-year. What is gained by making the qualification for setting up and operating a station artificially high?

Even when the RAE was the entry qualification, there were those that quickly lost interest in the hobby and let their licences lapse. I suggest that FL newcomers without a genuine spark of technical curiosity will soon lose interest and fall by the wayside.

In the fifties, when surplus military equipment was abundant, there were actually people transmitting on the amateur bands (and elsewhere) with no licence at all. Absolutely scandalous! Yet, many acquired licences and are now perceived as Establishment figures. Give the young enthusiasts time to grow.

Level3.net really doesn't like spammers like you, Polly.

> This one is a Gem,

Yeah, how about how George "Zitchey" Ashley didn't have a pot to piss in being
a washing machine repairman, a failed first marriage, causing his own daughter
to slit her wrists because he sexually abused her, and married "One-Tooth
Ruthie" just because she had some money put away. One-tooth Ruthie didn't like
Polly's slum dwelling hovel on
3550 Merritt , Memphis, TN 38128 , a house so filthy even Billy Jerk wouldn't
stay overnight, and she made him sell it and move to Collierville, TN.
All bought with ~her~money.
Then Polly/Zitchey was fired from Sears for padding customer bills and invoices
to put the extra money that he overcharged in his own pocket, and stealing
merchandise from stores.

What are all these critics of the foundation license doing to;

1) Promote the hobby

2) Help those interested, by running/helping with courses for the
various licence types

Am I right in assuming slightly less than nothing? Their attitude is
quite amazing. They need to come and live in the real world.

Fortunately, I am sure you are right. It's a craze ... just like CB
was in the eighties. I doubt that 50% of the M3's (brand new type)
around now will even have licences in two years' time. They will have
moved on to go-karting or paint-balling, or whatever the next flavour
of the month happens to be.

It still doesn't excuse the scatterbrained logic of allowing them to
use the amateur bands as a playground until they tire of their
expensive new toys.

Wait a sec. Wasn't Wesley Woo Woo always begging for funds for Herbie while lackey Dillinger or Dellinger controlled the bread while affording FZ free room and board each time he came to Washington to lie to the FCC? But Lauren Colby,Esq. dumped Herbie for non-payment, correct? So....was it a case of all those funds not being enough for Colby or wasn't there enough money actually collected or was the $ actually collected with little or none being paid to Colby? Although I don't believe WB1BWV, Herbie's lackey wrote the post, nonetheless it did provoke contemplation of my navel.

You didn't have to. You chose to.

You also chose the easy/lazy way out to get HF access ... i.e. the
babyish Morse assessment instead of the elementary 5 wpm Morse test.
Shame on you!

Hmm, let's see. We'll take someone who has shown enough interest in Ham Radio to go to the effort of getting licensed. Now, instead of Elmering them, encouraging them to upgrade, show them the ropes, no instead we'll totally ignore them, causing them to get discouraged and leave the hobby.

Oh yeah, that's a great way to preserve the hobby. Preserve it right out of existence.

Look at Roger's posting times. He sure has an easy schedule, does he not? This leads one to believe that Roger is living Pro Gratis in his deceased mommy's house. Her insurance policy paid off the balance of the loan and this leaves lazy Roger with no house payments to meet.
Roger has only to pay a few minor utility bills, if he is paying them at all, and this he can do with his part time job. (Roger works nights, second shift, sometimes). He must be on easy street, or as "easy" as one can be in West Virginia.
Meanwhile, Roger lives the life of leisure with nary a care in the world. Come to think of it, he is not much different than his idle (er, IDOL) W4AMP, is he? They are but two pees (sorry..peas) in a pod.
One thing, though. Roger is going to have to remove the curtains that cover his front window and have them laundered to remove the dried mucus. If that fails, poor little Curtain Boy will have to hang up another bed sheet to cover the window because he never knows when one of his "butties" will pull up out front in a pickup and invite the timid lad outside for a "consultation". (he won't go...he prefers hiding)
What say you, Roger? Gonna do some more of your infamous babblefish filth in response? So what else is new, eh?

WRONG! We're discussing people, already active on CB who want
SSB, more bands and Higher Power. We're also talking people
who have _SO LITTLE_ interest in what makes Ham Radio tick
that they cannot tell one end of a resistor from the other.

> Now, instead of Elmering
> them, encouraging them to upgrade, show them the ropes, no instead we'll

Their hobby is CB, for it consists of operating only, with no technical
acumen. There's no way I'm going to help them there.

I understand why you express that view. However, I recall the unhelpful comments, back in the fifties, when I appeared with 150W of AM made from surplus bits and pieces. The old school then thought that everyone should go through an apprenticeship using 10W CW, before being allowed to use phone. Young schoolboys using 150W were thought a new and disruptive phenomenon, particularly when they used PTT and occasionally listened to each other.

There were a few older amateurs who were supportive, but it was more fun talking to the other youngsters. Isn't today's equivalent of the post war radio surplus a second-hand Japanese box? Are things really so very different?

Yes, the difference is now that the disruptive people are not
fresh-faced youngsters but middle-aged - and even elderly - men who
have not the slightest inclination to progress further in the hobby.
To them, amateur radio is simply multi-band CB.

The RAE is a trivial low level exam to be compared to an 'O' level.
Why should anyone's self respect be improved by doing what I did
years ago, without any significant effort? I remember having to
read the BR68 but the rest was very simplistic. The RAE is a very
fundamental beginning to the process of self training in
communications. From that point any 'real radio ham' will
spend considerable time and effort in real discovery and learning
in any of the many areas of knowledge and skill which are relevant
to radio communication.

> Then you might also gain some from others ?

I certainly have no desire to respected by an ignorant snob
like yourself. Your inability to admit that the vast majority
of the M3 licences have been issued to amateurs with the same
qualifications as you is pathological.

Anyone who believes that operating is not a skill is obviously not a 'real radio ham', and probably a very poor operator to boot. The majority of M3 licence holders have passed the U.K. RAE, so they can tell one end of a diode from the other. Resistors don't care which end is which, BTW. Are you sure you understand electronics at all? Certainly not up to even the RAE, if you think resistors have two different ends!

Linear amplifier. PA in a good few of the cheaper and older
rigs. Understanding of the history and development of radio.
A simpler technology for home construction. Etc. etc. etc...

I'm using a valve to read your message so they haven't exactly
become obsolete, have they?

Just wondering if anyone out there believes a thing Roger says? Have you noticed how he twists and turns EVERTHING?

I think a call to the WV mental health clinic is in order here. This boy is an accident waiting to happen.

And considering all he has ever done is be a door stop for a dog kennel. It's really hard to believe.

Dan/W4NTI

In article <aftj9l$gtfpu$1@ID-139484.news.dfncis.de>, Steve Terry, please excuse any mis-understanding, but I think you said at least in part....

>You obviously have no real interest in HF,
>G1LVN when was that issued 1984 ?
>During the CBer boom
>
>So you've had 18 years to get onto HF, and if M3 FL hadn't come along ?
>I'm certain you still wouldn't of
>
Guilty as charged!! (was on the CB at age 11, also passed the RAE at School with a lot of help from a G3 who was also on CB)

One good thing, it got me off my bum and down to the local club. I just turned up on Spec. Lots of amateurs there, a very good bunch, very welcoming. They all said I should go for the full test (they clocked my sending at around 15wpm - it's the odd letter on receive that throws me).
Building a Howes topband 10watt CW DSP transmitter at the moment to go with my RA17. If I find I need more power, I'll have to go for Class A anyway.

Is the test still 12wpm with 5wpm spacing or is it pure 5wpm? (just so I start off on the right foot).

(replies to uk.radio.amateur please - in case your news reader isn't telling you to)

1040. The Future of Ham Radio - Run To Your Dictionary.

Newsgroup: rec.radio.amateur.misc
Date: 2002-07-03 12:06:34 UTC
From: Deus
Message-ID: <3d22e858$1_3@mk-nntp-1.news.uk.worldonline.com>

Much has been said in these posts about the
undesirability of reducing Ham Radio to a form
of glorified CB, and much regret has been expressed
that a book-publisher concerned for his subscription
income has been instrumental in this degeneration.

However, we are not governed by the inward-looking
commercial interests of a book-publisher, especially one which
gives a discount on any CB book published anywhere
in the World.

What can we do, as a body of Radio Hams, to improve the
situation? What can we do to improve the lot of intending
Radio Hams (in which term I specifically exclude the
glorified CBer, the M3 call-sign)?

I suggest that we act together to produce a range of designs
with standard and non-esoteric components to aid the
newcomer. Where the inevitable use of some special
component occurs (for example an audio IC) then we
future-proof the design by specifying an interface (e.g. 1mW
into 600Ohms).

A starting point is the construction of a multimeter. Yes - available
off-the-shelf, but an invaluable experience in gaining an
in-depth understanding of what Ohm's Law is all about.

What would we need? A Rheometer, some Rheostats, a couple
of Rheotomes, and a few inches of Rheophore. Simplicity itself,
but a prime introduction to electrical theory, metalwork
and soldering

You clearly don't understand electronics; it matters
very much which way round you read the colour code.

In even broader terms, the areas to be considered would be:

1) Operating Practices
2) Technical Proficiency
3) Morse Code

In many circles (unfortunately), Items 2 & 3 are considered unnecessary. I predict that the amateur exams will ultimately consist of a few questions on basic operating practices.

The argument is that if an operator stays within the amateur band, doesn't cause interference, etc., all is well. After all, they say, to get a driver's license, you don't have to know what a fuel pump is.

So if it bothers you so much, get them interested. Show them the benefits of learning the techincal end.

Besides, there are some people who get into the hobby strictly for the ragchewing. They could care less about building their own eqiupment, that's not what interests them. They are in the hobby strictly to meet new people and chat with them on the air.

And guess what? That's OK. The hobby is quite big enough to hold EVERYONE, from the I-just-want-to-talk to I-built-this-rig-myself to I-don't-own-a-mic-cw-is-great people.

>
> > Now, instead of Elmering

So? Who says they have to? You?? What makes your definition of a Ham the correct one?

>There's no way I'm going to help them there.

Sure, keep up that attitude. But don't be surprised when the number of hams dwindles so far down commercial interests snag our bandwidth.

Robert / N4IXT

I've got a EE degree, have been a ham for 51 years, and I didn't know that a resistor is polarized. Which end goes to plus? Is there a resistor anode and cathode or what?

Good idea Gareth. In fact I suggest you take a lead role.

Please go off into a quiet corner and design some projects for beginners-
and leave the rest of us in peace.

(By the way, your understanding of obsolence issues is seriously naive- take
that from some one who has really been involved in 'future-proof' design.)

If you're not aware of the resistor colour code, then
you're not as good as you think.

Ham Radio is not about operating. Ham Radio is a technical
pursuit for those suitably qualifying.

The radio hobby that is just about operating is CB.

There's little point in examining the ability to operate.
It's so trivial as to be laughable.

You forget, OM, that some M3's HAVE taken the RAE. How do you tell the G8's, G7's and M1's that they are so called CB'ers.

You all need to research your theories first. I am an M1 and therefore have taken the RAE.

Agreed that some will abuse the airwaves but there are some so called "hams" that do anyway. I also agree that the RAE should be taken first so undue interference can be avoided, then the foundation course for the M3 license.

If I like working on HF I may even take the M5 ticket.

If it is to buy in radios, computers, TNC's and software,
and then to just press buttons without any idea of what's
going on inside the equipment, without any capability to
mend it when it goes wrong, and to be totally reliant on
the goodwill of the dealers, then we might as well give up now,
and award everybody a super-CB licence (or in the case
of the UK, an M3 licence)

If however, there is something that sets Ham Radio apart
from CB, then we need to identify what it is, and emphasize
and amplify it before it is lost in the haze of indistinguishability.

Currently, there is a wealth of off-the-shelf gear, but will this continue?
If rigs become more and more reliable from the dealers, they will
have an increasing life-in-service, with the result that fewer sales
will result; and the number of dealers and manufacturers will decline.
This is happening already in the UK, and in Japan, Yaesu is now
just a trading name of a larger company.
Perhaps that decline will be to the point of non-existence? What
would we do then, if Ham Radio has become nothing but
a button-pusher's pastime?

What's going on down on 3.860 of late?
This past weekend it was LOADED with music
and noisemakers and general mayhem.
Some of it almost 40db over!
It's quiet now, but this freq of
3.860 LSB after 10:00 PM bears watchin
by Mr. R.H. fer sure..?

(I sure hope it ain't some of the neanderthal fools
who been posting debased crapola in alt.radio.scanner.flame_fest
that been behing all this QRM. You would have thought they
learned a lesson from the old days of the 14.313 and 3.901 vs
3.894.5 radio wars. I guess some people just can't get it out
of their system. Someone should really invent the equivelant
of a *RF FLEET ENEMA* for parts of ham radio - a radio freq
electronic bowel-cleansing agent, so to speak...)

What do I want from Ham Radio? Well, for one, the whining elitism to go away! This 'M3' bullshit just shows the elitist bastards for what they are. Scared that they'll be knocked off their self-proclaimed throne of being superior. They treat every license as a grant of absolute rights, as if each level defines who someone is, when each license should be treated as an 'entry', you get in by crossing the line, then you grow.

I see the same thing here in the state with the technocode and the current 'real extra' bullshit. Little minds... Little people...

Oh, and before I get blasted, it really doesn't matter what my license class is. Or it shouldn't. But for the record, the only HF stuff I currently
run I BUILT. And I have 2M, 220, and 2304 stuff I built too. Of my commercial gear, my old Swan 500c has NEVER EVER had a mic
plugged into it. Straight key only till it was retired about 1988. (I have to admit I'm probably going to get rid if it, if I find a good home for it. I'll make a deal to some technocode as a learner box and help him with it before I'd sell it top-dollar to one of the whining elitist types.) I don't
even HAVE a mic for it. Although I now run QRP SSB a lot. It's my favorite fun mode.

Mike

I'm color blind and only know the resistance by measuring the resistor
with a meter. So I ask again, how is a resistor polarized?

So you admit, then, that the Foundation Licence scheme has been a
signal failure in achievement of its original and prime purpose ...
i.e. to attract "new blood" into the hobby.

It was never conceived as a means of Class B's evading the Morse test
to gain access to the HF bands, but that is what it has principally
been used for.

>The radio hobby that is just about operating is CB.

Please point to the authoritative statement in BR68 that says so.

If you were capable of understanding the written word, you would
understand that there are a number of facets to amateur radio; one of
these is, in BR68, "self-training in communications".

Operating, in fact.

On the resistors that I use, reading them the wrong way round is
impossible. Gareth must be stuck in a time-warp.

Isn't it just amazing Firebottle? You know what I mean...after all this time Polly STILL believes his own lies. See what he doesn't seem to understand is I don't have to prove a dang thing to that liar. You know the guy, with his buddy the totom pole that jammed 3.901 every night for years. That is before Riley cleaned up his act.

You were listening then....remember how he and 'Claymore mine Billy Jerk' started on me. And why was that? Because he was jealous. All that loser ever did in his 'Korean war tour' was exactly what he accuses me of. Aint that just amazing how that works out?

Ever notice that the ones that call people child molesters, wife beaters, Rear Echolon Mother F*#(DCs, all fit the exact SAME MOLD? Amazing ain't it?

Well I have done my little duty for the month. I rattled the foul mouth West Virginia losers trap. (I'll save the part about how they threw him out of the A.F. for later). And Polly Parrot was a little extra plum. Course we all knew he couldn't keep out of it.

Well nice seeing you again Firebottle, keep the fires burning.

Well off to 20 meters....oh I forgot...I'm not allowed there, right
'jailbird'....another loser heard from.

Dan/W4NTI

Doesn't it suck to have your own hypocrisy shoved down your throat, drug
addicted drunk?

> What are you looking for Woger?

Aww, showing off your English skills, are you, dropout?

> Have you always been this way, or did a terrible tragedy cause this?

Says the guy who fights over the air more than anybody else. Or did you forget
you said "Fuck You!" to somebody down on 3.898? Not to mention how you
threatened to burn down W4JYZ's house. What's your excuse, dumbfuck?

> Did you have brain damage while pulling KP in the AF?
^^

Gimpy Crippled Malingering Dwarf slobbered in:
<92vj7j$8ct$1@nnrp1.deja.com>
"I have no way of knowing about your military record, only by what you
say. And I have no reason to doubt it. Your knowledge of AF
Communications is extensive. Over the period of time you and I were
friendly we discussed it a bit.

Gimp dwarf admitted he prevaricated in
<afs4ei$e8s$1@slb7.atl.mindspring.net>
"And I was just pulling his chain about his discharge."

Gimpy diabetic dwarf who'll die soon slobbered in
<afv0ar$32s$1@slb0.atl.mindspring.net>:
"Did you have brain damage while pulling KP in the AF?"

Looks like you lied again, Jizzswallowed, you malingering little fake.
The only time the Air Force gives "KP" is during basic training, you fraud.
Or are you thinking of the time you spent doing it in Germany and sniffed too
many ammonia vapors as you had to mop the floor?

> Or did it happen after you started jamming on 20 meters?

When did yours start, when you jammed Glen Baxter or back when you jammed Al
Abernathy? Not to mention how many times you ran down to disrupt the 3.898 net

that goes on there.

> You know all this self denial is going to cause you to have a nose bleed.

All your self-delusion about your "war record" is causing you to talk out of
your fat ass.
You're just mad at the world because you barely got through high school, and
was ordered to go into the military by a criminal court judge.

> Why don't you just pull the trigger Woger?

Been suckling that hog wife's teats on her stomach enough to get a lisp, you broken-down, useless drain on society?

> Do yourself and EVERYONE on USENET a big favor.

You first, you malformed, fake back-injury little gimp. You'd do the world a favor.

This is the "Motley Crew" formed by WB2CLN? Many have already been conversing with the great R.H. :)
Some of the Canadians appear to be musicians.
Roger has been looking for a "QRMing hole", maybe this will keep him occupied. Radiosigs might even be able to tune in the mischief on his transistor Sony shortwave, after all these are yanks, no your good ole southern boys.

Message-id: <20020630160104.07401.00001642@mb-fe.aol.com>

excuse for a human being in the entire state of Tennessee.

Zitchey, aka: polly, w4fqf george ashley, also using the following screen names, hoodat, rileygotcha, realdeal, plaintruth and god knows how many others. has the unmitigated gall to ask Dan Jeswald W4NTI about his VA disability that he earned while in Vietnam. Polly is a nobody who qrm'ed 20 meters for over 4 years as "polly"...saying, "herbie baby number one"....also continued to qrm and jam 80 meters on 3.901, 3.965, 3.894.5 and other frequencies until he received a letter from the fcc. he then curtailed his jamming operations for a short time while he moved from his ghetto hovel in the coon town area of memphis. He then started up jamming once again at the farm.....no, not the present location of the infamous "mule barn" in Collierville, but another hovel with a garden planted north of Memphis which he once again jammed and continued his unlawful amateur practices for quite some time until he received yet another letter from the fcc. Guess what? he has quit jamming.....huh, imagine that!

The present location of the infamous "mule barn" has been the site of another controversy. It was raided awhile back when polly was caught performing another unatural act on a mare mule. His partner (that's right polly) Billy jack Moore W4LLI was steadying the stool while polly showed him how "Stumphumpers Do It"!

Polly who was forced to retire early from sears for stealing tents has been forced into selling hemostats from pakistan at hamfests, he gets them from hospital dumpsters and cleans them up and resells them for atrocious prices.

Want more Polly? just keep up your slimy bullshitm my archives are full of goodies on you
Firebottle, that just a drop in the bucket about that sorry piece of human excrement. Tell everyone about his deceased daughter, One Tooth Ruth, his love affair with LLI and more. The SOB deserves to be outed. LOL

>>Are you talking of or to the voices in your head?
>>
>
>What are all these critics of the foundation license doing to;
>
>1) Promote the hobby

Why don't you ask them, rather than respond to a humorous remark about
something else?

>2) Help those interested, by running/helping with courses for the
>various licence types

You may not have grasped the point that the people of whom you speak
may not see the current arrangements as an advancement for the hobby,
but more as a retrograde step. Therefore asking them to 'help' in the
manner you suggest is a bit like asking a turkey to vote for the
winter solstice holiday.

>Am I right in assuming slightly less than nothing? Their attitude is
>quite amazing. They need to come and live in the real world.

I suspect they may say the same about you!

Please don't respond to this in order to discuss the new licences etc.

Top ten problems with being Roger Wiseman

10. Phone sex operators keep hanging up on you

9. FOX is starting a new show about you: "America's Least Wanted"

8. You get a heart-shaped box filled with angry hornets

7. The babes just don't seem to go for your home-made Spider Man uniform

6. You're taking private etiquette tutorials from Ambassador David Heil

5. You're being stalked by Riley Hollingsworth.

4. The last time you got laid was during the Carter administration

3. You spend your vacation lickin' windows

2. The Pope asks you for tips on celibacy

and the number one problem with being Roger Wiseman ...

1. At the local single's bar the girls nicknamed you "PeeWee."

>
>What nonsense. Anyone can just make up a callsign and use it on CB.
>
No. These days all (UK) CB licences are issued with a sequential call sign in the 2 range (bit like the novice calls except just two letters) Since about 1999 I think. There was a short window when you could apply direct to the RA for an out of sequence call.

I know it just gets worse doesn't it :-)

Now LRod, get a grip on it. You know better than to confuse these guys with facts. Alabama? West Virginia? Do you really think any of them can tell the difference?

But it was good of you to point out the difference.

1100. Shelby NC hamfest

I am thinking about going to the Shelby NC hamfest, Aug 31 - Sep 1 -- I need to unload several years' collection of boatanchors at the flea market. However, I just received an e-mail from one of the club members there who said that people start showing up TWO WEEKS ahead of time to stake out space.

What's the use of going and lining up Saturday morning before dawn if all the tailgate space is gone?

Anyone here attend Shelby who can give me some advice?

Thanks.

Axeually, Dick, I'm also color blind. That's why I was prevented from
following a career as an electronics technician or other comm jobs.

Instead I was merely a weatherman. Drawing clod fronts in purple never got
anyone killed. For my hobby I've had to use the VOM to measure resistors,
and have had to splice some really long test leads to use in continuity
tests.

Am I handicapped? Should I apply for a test waiver or go get Social
Security?

Renowned Cockroach Hunter Wiseman was trained in the
art of pathological lies by Herbie. Roger believes if he tells a lie
enough times, even he will begin to believe it.

Recent examples: "Roger posts to Usenet from work."
"He owned his mother's home and paid cash
for it."
"Roger has a Masters Degree"

Truth be known, the house Roger lives in was deeded in
Marshal county property records to his deceased mother only.
Roger even shared the same phone number with her. Perhaps Wogie
inherited the home now? It was valued at $38,000, a dump.
Curtains Boy does not post from "work." He holds down a 2nd
shift part time job in food service, minimum wage at a McDonald's.
Little Wogie got a GED while in the Air Force.

Everything Curtains Boy says is a lie, unless proved otherwise.
His latest whopper is he "posts from work." However, the truth
is that Cockroach Hunter Wogie works a part time shift in food
service at McDonald's and does not have time to even sit down.
Little Wogie's 21 year old boss keeps Wogie on the go and running.
Right Wogie? Shall I super size that Sir? Do you want fries
with that m'am? Poor Gramps Woger, a 50 year old working
part time at McDonald's!

You forgot to mention that Roger's hero is Richard Simmons. Roger's Great

Goal in his shallow little life is to one day get an autographed photo of his idol. His second greatest goal is to exchange bodily fluids with Richard, and he doesn't mean "trading spit" either, if you know what I mean. Betcha Richard could make Roger dance. And beg. And squeal.

There are plenty of no code technician class licensee's who could eat the lunch of many MANY Extra class licensees here in the states,
The class of license has nothing to do with the quality of the ham or what he may contribute to the hobby.

I find your suggestion arrogant, unwarranted. I started into the hobby as a Novice in 1978 and have since run about every mode, built dozens of hombrew radios, amps and tuners from scratch, and helped several others get licensed. I'm pretty sure at 16 years old I asked plenty of questions like how long a 40m dipole is and what does SWR mean.

The only thing I see that brings this wonderful hobby down are those who feel everyone else should be at thier level or must conform to what they're expectations of the hobby are. Perhaps if you spoke to a few M3's you might realize that they are as interested in learning more and advancing just like everyone else. I don't care if you went Novice to Extra in one day... nobody starts at the top.

On the other hand if you want to boycott hams who are rude, juvenile, and with little or no technical capability I will support you completly. Unfortunatly most of the hams on that list have either a General or Extra class license.

If you've been following these threads for some time, then
you've completely missed the point, which is the preservation
of technical standards.

There is not now, nor has there ever been, elitism. All comers
are welcome to study to reach and pass the technical standard
that represents Ham Radio. No-one is excluded.

The M3 licence does not, however, represent Ham Radio. It
is a CBer's licence.

A good point. What, in my neck of the woods, shows up
the CBer and the M3 and its supporters, is insulting behaviour.
Ham Radio has traditions of gentlemanliness.

Just for the fun of it, let us ask a few questions about Roger Wiseman and
get your answers. (no swearing, please).

1. What do you like the most about Roger Wiseman?

2. What do you like the least about Roger Wiseman?

3. Do you believe Roger's claims that he is straight?

4. Do you believe that Roger is gay?

5. Do you REALLY believe Roger's claim that he has a "female" friend?

6. Is Roger's "female" friend of the Dyke persuasion?

7. Does Roger suffer from mental disabilities?

8. Would you want Roger living next door to you?

9. Would you trust Roger to interact with YOUR kids?

10. If you saw Roger drowning in the local swimming pool, would you...
1. Go to MacDonald's.
2. Wash your car.

Oh my! They believe this nonsense in the USA too. :-(

Band occupancy will *never* save our bandwidth from commercial
interests. In the end, it will be sold to the highest bidder ... and
that will not be the amateur radio service.

So far I haven't come across any disruptive M3's, but maybe I listen in the wrong places. However, I do hear elderly men with longstanding callsigns, who are unlikely to progress further in the hobby - or anywhere else for that matter. They're happy talking to their chums about operations, problems and pills etc. It's one of the few pleasures left to them and probably good therapy. What do elderly M3's, meeting with your disapproval, talk about to make you cross?

I could say the same abou you. I was wrong there too, you're nothing but a
bigoted, drunken gimp with a jailbird son and always wanting to start fights on
the air.
Let's see you fought with Glen Baxter, jamming his braodcasts, you raised all
kinds of hell with 3.898 and 3.903 when you erroneously claimed they were wide.
In retaliation, you went wide yourself. In fact you went out of your way to jam
them back. Then there's the profanity-ridden argument on 3.901 with Whorass.
Looks like you need to clean your own act up first before you criticize others,
alchoholic.
You'd do better to just fuck off, gimp. You do nothing for amateur radio.

Hey super ham....you know the new Ektra light up there in W.V. What did you do for Field Day? Did you even participate? Did you help a youngster learn the ropes or did you just sit there and spew more filth on the USENET?

If anyone ever says to you that you are a useless piece of shit....Tell them ...hell no I'm very useful as a piece of shit.

Pull the trigger Woger...pull the trigger.

Dan/W4NTI

I would not be so presumtious as to dictate what one should, or should
not, talk about on the air. That is not the point. The point at
issue is that amateur radio is a technical pursuit for people who are
interested in experimenting with radio transmitting equipment. If all
people want ... regardless of their age ... is to talk to chums, then
amateur radio is not the place for them. They should be on CB, the
Internet, or PMR446.

The people you mention with longstanding callsigns have long ago
achieved far more than any M3. They have passed the RAE ... probably
the *real*. written RAE. An M3 has merely passed a test in
button-pushing.

Level 1 - A CB licence, 27MHz FM
Level 2 - An M3 licence - 28 MHz only , all modes, 10 W power
Level 3 - An RAE pass
Level 4 - A Novice pass.
Level 5 - (Most privileges) An electronics degree. To be given
a 1kW power level for experimental purposes, but only for
Morse exchanges.

I suggest that the Novice licence of today is
a better qualification than the RAE of today,
because of the enforced hands-on technical skills.

A further suggestion is that the FL be time limited, both
in respect of Morse competence and also technical
competence. This would have the effect that any Class
B licensees would lose _ALL_ privileges (including their
Class B licences) if they do not progress to the real 12 WPM
test within a year (12 WPM still needed for full international
licence deals), once they have opted for an FL.

Hello Gareth,

Well, as I get a 'level 5' I should be flattered.. Can I use my other (Maths) degree for something else as well?

The M3 should have been biased toward VHF/UHF and limited HF but certainly not 28MHz only. However, it wasn't and a reduction in scope is almost inconceiveable.

Also, I thought one of the mantras of the CW brigade was that is better in marginal conditions. So what is the logic in the 1kW rule and what are the likely experiments (other than maybe EME, already achieved below the 1kW level)? Why experiment with a mode that has been superceded several times over? The only likely additon to technical knowledge that springs tomind in this area would be on the recieve side (DSP etc.) to recover very week signals) so why 1kW?

> I suggest that the Novice licence of today is
> a better qualification than the RAE of today,
> because of the enforced hands-on technical skills.
>

That is a sensible point as regards the hands on side but not the pure theory.

> A further suggestion is that the FL be time limited, both
> in respect of Morse competence and also technical
> competence.

For over 18s I would agree with you.. But if Morse competence is thought to be time limited it should be retested for everyone- if nothing else those 8 year old FLers probably have better memories than most amateurs!

>This would have the effect that any Class
> B licensees would lose _ALL_ privileges (including their

> Class B licences) if they do not progress to the real 12 WPM
> test within a year (12 WPM still needed for full international
> licence deals), once they have opted for an FL.
>

I don't see the logic in this and 12 wpm has NEVER been a international regulation just an IARU recommendation. As the IARU are a bunch of amateurs (mostly like the RSGB gravy train passengers we both dislike) do you really what to enforce their rules? Either way, the recommendation is now 5wpm internationally regardless of what you say or think.

Also, you are always chanting the mantra of 'amateur radio is a technical hobby'. What exactly does being able to send Morse at any speed demonstrate about someone's TECHNICAL ability?

How is the leg, by the way? I didn't know you were in a wheel chair- must have been a bad break. Could they not pin or plate it?

If they have obtained a license without cheating, then
they have, by definition, reached the technical standard
which is set by the licensing entity.

You might just as well extend Level 1 to cover 27 to 30.

> Level 3 - An RAE pass

What does this get you then? 26 dBW on all bands above 30 MHz?
The right to construct and use? or just a bit of paper?

> Level 4 - A Novice pass.

> Level 5 - (Most privileges) An electronics degree. To be given
> a 1kW power level for experimental purposes, but only for
> Morse exchanges.

Class 'A's seem to use this already, for all modes and with no
sign of any sanctions from the ?competent? authorities. Most
modern electronics degrees have very little relevance to
amateur radio. Communications Engineering, maybe? Not really
amateur radio anymore though. PPR - pointless professional radio.

>
> I suggest that the Novice licence of today is
> a better qualification than the RAE of today,
> because of the enforced hands-on technical skills.

You are confusing amateur radio with simple electronics, OM.
Have you looked at what they actually do? Absolutely no
chance of their being able to build even a simple SSB rig.

>

Re-testing (RAE and code) of the 'A's at regular intervals (5 years?) would
weed out a large percentage of 'dead wood' in short order.

I think we could achieve what you want by banning factory made
transmitters of any kind for all 'A' and 'B' calls. That would

ensure that they really were technically competent. The fact
that they would also sound like Russians is beside the point.
The bands would be surprisingly quiet as well. Plenty of room on 40.
Hardly any SSB, mostly AM and spotty. Nice drifty VFO rigs sliding
their way toward the band edges. You could probably understand
how your radio worked again. And you'd belong to the elite group
of 200 hams left in the U.K. Now wouldn't that be heaven?

It's called cloud cuckoo land.

I was drawing a similarity to the senario in the states of lesser or easy
exams, I assume the posters concerns were that the
exam for an M3 class or call prefix were less than he thought appropriate.
If that is not the case then explain to me what point I missed.

Let's just be really radical and simple outlaw commercial
equipment. If you're technical enough to be an amateur then
you can operate any mode on any of the listed bands you are
capable of building equipment for.

Suddenly CW gets a huge boost...

For those who have never witnessed a classic Curtains Boy dodge
and back pedal, watch this.

For the last couple of days, Curtains Boy has stated he "posts from
work." Of course we all know this is a lie, as his 2nd shift job at
McDonalds allows time for no such thing. One of Wogie's favorite
phrases is "prove it." OK Wogie, PROVE IT! Prove you post
from "work."

Of course we all know what will happen. The President of the
Glendale Lavender Lads will curse, spit, fume, call names, spew
assorted obscenities, lie, back pedal, etc. etc. BUT, he will never
offer a shred of proof that he "posts from work." He can't, because
its a lie.

No, Woger's "work" today will be sitting in that filthy stinking roach
infested house staring at his Usenet monitors, his filthy 50 year old
fingers flying across that greasy filthy keyboard as fast as they will
type out obscenities, child porn, filth, and other sick material that flows
from that twisted fried brain of his.

Your turn loser, 50 year old burger flipper.

Did you ever comprehend what RMS voltage is?

I followed this from the beginning. And the very first post on the topic was ranting and raving about how people should ignore a certain class of operator.

That's not elitism?

Is the M3 considered a HAM license by the licensing authority in your country? Plain and simple, isn't it. Or do the 'ruling elite' really do have the authority to say who is in their club? Sounds to me to be EXACTLY like the same bullshit that was a tempest over here for a while when some 'existing' extras decided they were 'real extras' and they didn't want to talk to the new extras. There were even a few that CLAIMED to be trying to 'downgrade' their license to Advanced so as to be able to prove they did it the 'old way'. What idiots...

A better, simpler idea - make the Morse assessment the standard for all domestic licences, 5wpm licence for the tiny handful wanting CEPT privileges, stop issuing class B licences. Retain the Morse assessment regardless of WARC2003 outcome.

Want to be really radical? Everyone loses their licence and has to retest to the current standards to regain it.

Steve

So if the licensing authority decides to award Ham Radio
licences to all CBers who have held a licence for two years,
that'd be OK with you?

It wouldn't be OK with me, as the current situation isn't OK.

The M3 licence is a CB licence and has no place
on the Ham Bands.

Exactly.. and before M3's came about, it was the G7's that got it in the
neck from our friend Gareth.

No. Your opening sentence was about a no-code licence.

Of course, the people who own the frequencies make the rules.
Declaring that to be "not OK" and two bucks will get you a decent
cup of coffee.

I think most UK Radio Amateurs would be more than pleased to have the
FCCs licences and requirements here ?
I certainly would !

If the FCC were on drugs, bypassed their Docket system,
and introduced the UK FL licence in the US ?
Flooding the Amateur bands with CBers
You would have Extra class Hams going out shooting FCC officials and FL
licensees ;-)

In the UK we just whinge instead of taking action

Or saved by the US the docket system

I remember 20 years ago a consortium lead by Motorola put in a FCC docket
reallocating 220MHz to a new class "E" FM CB ;-((
Motorola reconed they could make a load of dosh from selling VHF CBs,
and especially components
Motorola released a series of application lists using Moto components
to would be manufacturers of these new rigs
Motorola stood to make millions

After a long docket struggle 220MHz was saved

Compare that with what happened in the UK about the same time
with Philips and "Mould"
Pye / Philips told the MOD that they could flog them a load of off the shelf
PMR for MOD police / security use
Putting them 12.5 KHz away from UK 70CM repeater outputs ! ;-(

I know 70Cms is shared band, but with a little thought
"Mould" could of been put away down the bottom or top of the band
Just as well "Mould" is now out dated and being replaced

It's just as well Phillips didn't want 70CMs for CB !

You still are a fuckup, and can't get the right fucking state, doodlefuck. Why
don't you go to the ARRL WVC section page and see which ARES organizations have
websites, dumbass?
No, you dumbfucking little gimp bastard, you use the old " I ment to do that"
canard. How pathetic, fuckhead.

Besides threaten others over the air?

What did I do? I've been pareticipating in ARES nets, administering tests as a VE, and not getting e-mails from Riley telling me to stay off of certain frequencies, unlike you, eh, psuedo-ham? It isn't my fault the FCC lowered the code requirements for Extra. At least I passed 13 WPM, dumbass. I'd rather be considered an "Extra Lite" then a narrow-minded fucking retard like you.

But you've sprewed your lying hypocrisy in the past,
in <7ohn7o$6na$1@nnrp1.deja.com>:

"It is time for us ALL to bury the hatchet. It is time for us all to
end this silly war. On the air and on the internet. It is your choice
to elect peace or continued unproductive warfare here on the internet.
I chose PEACE. AND I APOLOGIZE TO ALL AMATEUR OPERATORS, AND ANYONE WHO HEARD
SUCH, FOR MY ON THE AIR CONDUCT IN THE PAST."

in <7fdlimrgh1@nnrp1.dejanews.com>:

"I for one, want it to move on. My participation in this war is OVER. In
all honesty I can not say I can or will ever forgive what these people have
said to me, about me, and about my family. At this point I have NO DESIRE
to communicate with them ever again. However I have decided to END THIS WAR
from my perspective. I have decided NOT TO BE A PART OF THE PROBLEM. Can
the rest of you do the same?"

in <7qf8ua$kl5$1@nnrp1.deja.com>:
"In closing, this is my FINAL POST in the WAR OF WORDS. I decided to be
a part of the solution on the air, and now I chose to be a part of the
solution here on this NG. I declare Polly and Billy et al, the
winner. The winner of what is the question. I reserve the privledge
to comment on issues. The idiotic comments back and forth are over from
this poster."

In other words, W4 No Trace of Intelligence is a lying hypocrite.

Let me ask again about Kimball's 127.0.0.1 address that you tried to
trace. You ran from that question, along with the one about the IP
address quoted above.

That hook is still hanging prominently out of your mouth, if based upon
nothing other than your utter cluelessness in trying to traceroute two
reserved IP addresses which were fed to you on purpose.

And you call yourself a technical person?

As Jabba the Hut would say "Ho, ho, ho, ho. He be Extra! He be Extra!"

==========
In message <ag1j7r$m9m$s@pita.alt.net>, AB8MQ showed his technical cluelessness about IP addresses when he ominously asked: "Still using: NNTP-Posting-Host: 172.16.133.151?"

Hook. Line. Sinker. Fishing pole.

RFC1918:

"The Internet Assigned Numbers Authority (IANA) has reserved the
following three blocks of the IP address space for private internets:"

[first block skipped. may want to use it on Wiseman]

" 172.16.0.0 - 172.31.255.255 (172.16/12 prefix) ..."

So trace all you want, trollee. The "posting host" address above is
non-routeable.

[Boy, that was fun.]

Hmmm, W.V. home of abandoned mine shafts and secret
government installations. Good place to 'get away from
it all' I would say.

Lots of strangeness in W.V. over the years. Having read the Mothman
chronicles years ago, I rented the DVD and saw the "Hollywood version" of
this strange story a few days ago. It was creepy but with a completely
gratiutous love story thrown in to give it more 'box office' I suppose.
That's too bad because the real story is good enough. They should have done
it in a documentary style and focused on the true stories of a few of the
people really involved instead of fictionalizing it and putting in movie
stars.

For those interested in this sort of thing :

So - what, or who, is the Mothman? For a thirteen month period from November
1966 until December 1967, the town of Point Pleasant, West Virginia, USA was
seemingly tipped into a state of chaos (or, if you like, a 'state o'
chassis!'[1]), overrun by UFOs, poltergeists, Men in Black in
beyond-fashion-clothing driving impeccable old cars and fake service
workers -- both groups had dark, sharp features, and wearing thick soled
rubber shoes. If that wasn't bad enough, a surrealist abbatoirist left
cattle cadavers strewn about the fields of Point Pleasant.

The appearance of all these phenomena appeared to revolve around regular
sightings of the more fearsome visitor of all - a winged humanoid that
quickly became known as the 'Mothman'. Mothman tended to hang about the
disused North Power Plant, which was part of the dormant West Virginia
Ordnance Works complex. The area was used as a shooting range and 'lovers
lane', and kind of unofficial common.

There were hundreds of alleged witnesses to these phenomena -- some members
of the population claimed 'contact' with various extraterrestrial -- or, as
Keel posits *ultra-terrestrial -- entities.

It seemed that anyone even peripherally involved was affected, and Keel, who
had arrived from New York to investigate the reports, was no exception.

Before long, he was experienced disconcerting sychronicities, such as many
of his 'contactee' friends knowing of his future actions *before* he had
himself decided on them. His phone line became almost unusable with
untraceable interference, tapping, line cutting, crossed lines, harassments,
hoax phone calls and dark photographers trailing him round Manhattan. . .
"Between the IRS, the phone company. . . and flying saucers I was fast
becoming a candidate for the funny farm".

Keel received constant precise predictions throughout the 13 months, presumably 'channelled' by various contactees. These 'Mothman prophesies' had a nasty habit of being *almost* right - but not right enough. The predicted assassination attempt on the pope -- followed by "days of darkness" didn't happen, instead the pontiff escaped eradication in the Philippines three years later.

Things finally came to a head during rush hour on Point Pleasant's Silver Bridge, which spanned the Ohio River. Keel's contactees warned of a nation-wide power outage for December 15th. Instead, the Silver Bridge crumpled into the river, taking 31 vehicles and 67 people with it. There were 46 deaths.

The 13 months of strange visitations reported by scores of sober, sane people including policemen and other professionals stopped abrubtly after the bridge collapsed. There is plenty on the net for those who want to know more about this. Merely search for the key words above.

The rest of you click on this

I was wondering, do people who suffer from colour-blindness have trouble
reading the colour code on resistors? :)

This is true - all vegetables such as turnips, potatoes, carrots, parsnips, spinnach and Gareth are composed of tiny wee charged particles. :o)
Turnips are especially tasty when stewed slowly along with carrots, mushrooms and a good piece of steak then served with a liberal helping of protons (add salt and pepper to taste.)

Yes and if youre smart enough to have TWO DEGREES then you must spend a
year on MORSE ONLY on (20m and 40m) ONLY for each DEGREE that you have.

After all anyone with TWO DEGREES shouldnt find it hard to learn FIVE
words a minute MORSE! Would they ?

I can't tell the difference between brown, red, and orange. When I
am dealing with resistors, I have to have an ohm-meter (or a technician
like Dick) around.

Errr, say Curtains Boy, McDonalds does not pay holiday pay, except
to salaried managers, which, for your education, does NOT include 2nd
shift part time burger flippers like you! AND, what is "beforfe"
??????
Is that a word which you are using in your "Masters Degree" thesis Wogie?
Your faculty mentor must be from the coal mines of WVA.

Zitchey

Pity poor Thevie Turdeater, Nadless Ate White Gay Males, Jeswald's buddy, who had to drop out of that tenth-rate community college after 1 1/2 semesters.....over 50 years old and never married...said over the air in July, 2001 he let one "get away," except he left ou thte fact is was a farm animal...hangs out with older men, operates his Field Day position underneathe the operating table.......isn't allowed to follow other hams into the port-a-potties during Field day anymore.
Nadless Ate White Gay Males is a self-centered coward, a gutless flab, an insolent,
dull, stupid, clown whoise penchant for photography takes him into his seedy business of making kiddie porn. He learned it from his drunken bastard father, who used to rape him after he finished beating up Thevie's hunchbacked mommy. Thevie got his parent's house in Richland, OH right after his parents had that unfortunate murder-suicide pact. How they ever got that much shit into a shower stall with both of them and in turn suffocated to death, is one for "Unsolved Mysteries."
A note was left at the crime scene and it seems the elder Turdeater scrawled on a note: "Looking back over the years That we've been together,
I can't help but wonder: What the **** was I thinking?"
Indeed, apparently, the elder Turdeater strayed quite a bit, but the Ohio Child Protective Service authorites weren't amused by his "activities" at the children's playgrounds. He must've passed that genetic trait onto his IDIOT son, because
if he was any more stupid, he would photosynthesize in sunlight.

As usual, you reveal much about yourself Roger. I would say with some accuracy that what you wrote below reflects your life very closely, if not with complete accuracy. It also explains your sociopathic behavior on the air and on Usenet, most likely in your everyday dealing with people too. Sad, help is available, you need it, but you will probably never voluntarily seek it out.

My, my another buttflux! But no surprise this time - you've been a buttflux all along. So repost where I ever suggested much less said I had any problem reading any color code in any position. Didn't happen, and its no surprise you missed the boat yet again. But some newbies who just learned the color code and have no experience might just read it backwards.

Dick, reading the color code backwards doesn't change the value of the
resistance. You, as an Extra, should know that.

I am not color-blind (colour-blind?), but I never trust the markings
on resistors. I always check each resistor with an ohm-meter before
using it!

OK, we're worried that a newbie that just learned the color code might read
a resistor backwards, but we're not worried that a newbie who is just
learning the code will know which exam to ask for and possibly be denied
access to the amateur radio service because the Regulations specify Morse
code at 5WPM, but the Examiners are testing Farnsworth code at 13-15WPM.

Now I get it. You're an idiot.

<Wiseman filth snipped>

And then there is the story of Wiseman's failed marriage. Curtain Boy's wife left him for numerous reasons, but mainly because she met a REAL man who had a REAL job and she left Rogie Dear in the proverbial dust. Roger, ever undaunted by this turn of events, returned home to his mommy. He had finally returned to the only woman in the world who would let him enter her home and he has remained there ever since.
So, if Roger pokes fun at you or others for marriages gone wrong, ask him about his failure. And if Roger alludes to having a "female friend" do not believe it. He is dating nobody and his "female friend" has biceps the size of most mens legs...she is the bull dyke bouncer at the gay bar Roger and his sissy Lavender Lads frequent. She has a mustache, can pee in a urinal from three feet away, and the Lavender Lads call her "sir".

Wiseman takes great pleasure in calling others losers when, in fact, he is a loser big time. This is called 'transferrence of guilt'. Roger and Dimmy are two peas in a pod...they accuse others of being that which they are. These two misfits are well aware of their low social standing so the only way they can feel equal is to try to lower those around them to their scummy standards. Like everything else in their lives, their weak attempts are yet another failure.
Roger is just another bottom-feeder. Pay him no heed.

Dan. Dont let Roger get to you. Any way you cut it Roger is Trailer Trash.
47 years old, divorcee, absentee father, all around chump. Child Protective
Services will not let Roger see his kids to this day.
The story is that his ex wife had the kids by another guy anyway.
Milquetoast Rogie wasn't man enough to reach her ovaries.
No wonder he feels inadequate. He is.

the operating table.......isn't allowed to follow other hams into the
port-a-potties during Field day anymore.
Nadless Ate White Gay Males is a self-centered coward, a gutless flab, an
insolent,
dull, stupid, clown whoise penchant for photography takes him into his seedy
business of making kiddie porn. He learned it from his drunken bastard father,
who used to rape him after he finished beating up Thevie's hunchbacked mommy.
Thevie got his parent's house in Richland, OH right after his parents had that
unfortunate murder-suicide pact. How they ever got that much shit into a
shower stall with both of them and in turn suffocated to death, is one for
"Unsolved Mysteries."

A note was left at the crime scene and it seems the elder Turdeater scrawled on a note: "Looking back over the years That we've been together,
I can't help but wonder: What the **** was I thinking?"
Indeed, apparently, the elder Turdeater strayed quite a bit, but the Ohio Child Protective Service authorites weren't amused by his "activities" at the children's playgrounds. He must've passed that genetic trait onto his IDIOT son, because if he was any more stupid, he would photosynthesize in sunlight.

[end restore of cowardly anonymous fuck's deletion]

> > <Wiseman filth snipped>

Translation:" Whaaaaaaaaaaaaaaaaaaaaaaahhhhhhhhhhhhh!!!!!!!!"

And let's not forget the overgrown babey huey that went to the local ARES meeting with wrinkled clothes that look like they'd been worn for a week and so much cheap cologne to cover up his body odor that even his hoglike suckboy sitting next to his was gidy with after meeting excitement in the back seat.

Then there's the story about a certain Missouri inbred who's father was one of the livestock when Mrs. Ray Davies ' husband was out in the fields. No wonder they had to move to Kansas and later to Iowa.

Poor baby, jealous that he was a lowly washing machine repairman...."Ol' Lonely
Polly" they called him.

Err, Polly, what's "frys"? Watch out for those shard of glass from your glass
house.

Grade school dropout George "Polly" Ashley displays his ironic choice of
words, even though he doesn't know what ironic means in
<45b0a4c9.0207041625.2156c7a4@posting.google.com>:
"...would you like frys with that sir?" flipper, such Morons."

>Is that a word which you are using in your "Masters Degree" thesis Wogie?

Your fucked up sentence should've read:

"Is that a word in which you are using in your "Master's Degree" thesis,
Wogie?"

>Your faculty mentor must be from the coal mines of WVA.

Your 'faculty mentor' must've been "Forrest Gump."

And you still haven't posted proof I work for Mickey D's......That make at
least two or three places you hazarded a guess to where I work.
You fuckwits said I worked:

GMAC of Wheeling
American Heuristics
Auto Zone
and now McDonalds.
Poor babies.........

Poor useless fuck Polly, even Viagra couldn't help the old dying diabetic now.
Hopefully, you'll go into shock and can't get to your insulin, Ashley.

[Space for Fuckup Lee to try and weasel his way out of it]

Bob Dylan's "Idiot Wind" was tailor-made to be about you, fuckhead.

"Idiot wind, blowing every time you move your mouth
Blowing down the backroads heading south." --Bob Dylan
--
Faggot Stagger Lee, who fails to "grasp" the concept that "slander" is
spoken and "libel" is written, would be better served if he just stuck
to grasping nutsacks, incoherently babbled
in <3C4AE592.6A0CDA7E@houston-hunks.com>:

"COTSE seemed to have the laughable notion that what Wiseman was doing
was exercising freedom of speech. Slander is of course not protected
speech in the US, but the concept that even free speech has its limits
seemed to be impossible for Steve Gielda -- COTSE's owner -- to grasp."

The person making the mistake suffers the consequences whether he knows
the color code or not. Reality doesn't care if you know the color code.
Reality only cares if you make a mistake. You may know the color code
perfectly, reach for the correct resistor, and pick up the wrong one.

Exactly what in my statement above is incorrect, Dick? Seems you are the
one who lives in a different universe from the rest of us where knowing
the resistor color code protects you from every making a mistake for
the rest of your life.

> University of Life" when the topic of University is mentioned. Have you any
> idea how bloody petty that sounds and even those of us graduates who really
> aren't degree snobs have a chuckle at it.
Eh no... I wont but what I did do was when I wanted something like HF I
found out what the requirements were and when I had achieved the required
standard I asked for what I was ENTITLED for.
These days many people couldnt even be BOTHERED and just MOAN MOAN MOAN

Some people sit in their shack and wait until the wall that theyre afraid
to climb comes down and then rush in and claim as much of what they longed
for all those years but during their previous years can do not one but TWO
degrees and then come on here blabbering on about how they can PUT THE
EFFORT into ACHIEVING a very ADMIRABLE AWARD not once but TWICE and then
APPEAR not to want to tackle an EASY 5wpm exam.

And for those who have some sort of objection to learning MORSE, I fully
expect that during anyones career as a student (mature or otherwise) that
there was a subject that DID NOT even remotely appear linked to the
subject of the degree course that ONE might be studying.

12wpm needs a bit of work but no-where as much effort as doing a degree.
5wpm is easy in comparison.

it is my opinion that someone who even has ''only'' one degree has enough
'gumption'/courage/ABILITY to attempt a 5wpm exam.

it is my opinion that anyone who runs away from a 5wpm and has a degree is
lacking in 'that thing' that PUT THE G IN GBR

have a nice day.

someone out in the Atlantic who had the courage to TRY AGAIN.

(the Atlantic - thats the big blue bit on the left)

1283. Are the Radio Wars coming to an end?

With Mr. Hollingsworth making his actions, I re-post a excerpt from the 14.313 webpage:

http://members.aol.com/jcunham/

Letter from Riley:
Thanks Jon. I'd just like to say that I know there have been a lot of problems on 14.313 for many years. Some of this is our fault for being missing in action so long. But the big picture consists of two facets: 1) we're being heard all over the world. For Amateur Radio to live a long live, it has to be supported internationally. Lots of countries bring up to the U.S. what they hear on 14.313, so to the extent stupidity and insanity reign, they endanger Amateur Radio altogether; 2) 14.313 problems suck up enforcement time that could be used to go after truck stop chains selling 10 meter gear to anyone who walks in, and after power companies that don't care, or don't have a clue, as to the RFI problems caused by their crappy hardware. For example, in the next few weeks you'll see a letter going to Commonwealth Edison about it's RFI problems and about 6 Amateurs who have an S9 line noise constantly. At any rate, the point is that enforcement needs to be used to protecting Ham Radio as a whole, instead of devoting the limited time to frequency wars and jamming, etc. Thanks!

Lloyd, the ``Radio Wars" of 3.894.5 and 3.901 ended years ago...There isn't
much activity on 14.313 to speak of...As far as I'm concerned, they're over.

Resistors aren't the broblem. Its the cable assemblies with 60+ wires and
they run out of colors so they start striping the insulation. My tests
leads for a continuity check don't reach the other end as often as they
should.

Seeking SWF 60-65 years old. Mother recently passed away & I need female badly to keep house for me, cook for me, do laundry, wash my junk car, & cut the weeds. I am someone who appreciates older women; my age is 50. Could lead to matrimony. Serious inquiries only. My blow up doll is wearing out. Oh, you must also hold a job outside the home to support me, as mom's estate money is running low. All she left me was the dam house & a few bucks, but I really need a wet nurse bad! I spend a lot of time on the computer making fun of people, especially their wives & children, as I am incapable of raising a family of my own and having a normal relationship with a woman my age or younger. Again, serious inquiries only. Write Woger Wussman @ Glendale Lavender Lads. Thanks. Woger

Over the years Roger has posted much material to Usenet, which in turn
tells us much about Roger, particulary his attacks on women & children.
Roger had an unhappy, probably violent childhood. Roger has never been
able to form normal relationships with members of the opposite sex. His
one
relationship with a woman ended in disaster, caused by Roger. She then
cleaned his clock, and Roger ran home to mommy without a dime in his
pockets. Basically, Roger is a bitter person, bitter on life, bitter on
women,
bitter on children, bitter on just about anything he comes in contact with.
He's also an agry man, with many unresolved conflicts in his tortured brain.
Geeeeeze, actually, he's funny as shit! The more you poke at him, the more
he makes you laugh! He's so fuckin' stupid he just makes ya laugh!
Dance Roger Dance!!!!!!!

Thats it Frank straighten them out. Oh one more minor detail....WA9KJI
was NOT in the radio wars of 313, etc. He is a late bloomer. After he got
popped by Riley, then he and his Okie suck buddy sent bald faced lies to him
and got out of a hefty fine and or suspension....well he then starts showing
up on 313. Just another Johny come lately. And now seeking fame and
fortune. What a goof.

I guess its never going to end till they do.

Dan/W4NTI

Yes folks, it's Saturday. Later tonight or tomorrow morning,
when Wogie starts his daily torrent of filth and attacks on woman
and children, he will somewhere in the torrent make the comment
he was "out with his female friend." Suuuuurrrrrrrrrre Wog
surrrrrre Wogie and were you sure to comment to this imaginary
female friend how just minutes earlier your were attacking retired
Ambassador Heil's wife, calling her a whore? And, my, were you
sure to tell her how you repeatedly attack Oris's pre-teen girls,
describing how they engage in sick sexual acts with their father?
We are sure your "female friend" would enjoy hearing this and more,
just how much you respect woman and small children that is.

Get help, you frickin' sicko!

I have 3 Clegg FM-76 radios that I have picked up through the years at hamfest. All seem to incorporate a similar mod to remote mount the radio. Does anyone have a copy of the article or know where the article was published that first talked about remoting this rig?

I would like to get a copy of this modification if possible.

Does anyone remember seeing an article of this nature?

Thanks for taking the time to read this post

Not to mention there is a wax paper cap between the hot chassis and
the outer steel cabinet. It may not have been a serious problem back
then, but after 50 years most paper caps have developed serious
leakage and should be replaced, especially those that can place a
user in harm's way.

I'm color blind. Well, not 'blind', I have what's called a 'red-green'
deficiency. I think it's the most common form of what people refer to
as 'color blindness'.

On the Ishihara color test, I can't see some numbers, and on other plates
I see DIFFERENT numbers.

It turns out that additive colors (light) are not near as much a problem as
subtractive (paints as on an object) colors.

It's not too bad, really. Although it's enough to bar me from any
electronics work in the Air Force.

Yes, resistor codes are a pain, although if I look under a magnifying glass
with a bright light I can usually figure it out. I mean, there ARE certain
common combinations.

You can imagine what building my K2 was like! Actually, not too bad,
as for MOST of the kit the resistors were on a sequential tape for the
construction order. And I checked EVERY ONE with my digital meter
before I soldered it in.

>and award everybody a super-CB licence (or in the case
>of the UK, an M3 licence).

A bunch of radio operators with their own lingo. Thats exactly what Ham radio is, despite the hype. They just want to operate a radio, and do contesting. Its just silly to form a club if all you are going to do is operate a radio to meet with others that just want to operate a radio. It is meaningless to hold meetings about it.

Nothing wrong with reliable radios. Thats what we want and expect. However, there are those that want to design and build amateur radio gear or accessories, do antenna setups,radio direction finding, or some of the other things that take more skill than operating a radio.

>If however, there is something that sets Ham Radio apart
>from CB, then we need to identify what it is, and emphasize
>and amplify it before it is lost in the haze of indistinguishability.

The difference between Ham radio and CB is: more toys to play with. Otherwise Ham Radio is the same as CB.

Many Hams set up their own antennas (following the directions), but thats about all their involvement in electronics. This is a one-time activity to get their radio set up. The rest of the time they search bands trying to contact other Hams. Most Hams are not interested in electronics.

>What
>would we do then, if Ham Radio has become nothing but
>a button-pusher's pastime?

As, you can see from the responses to your post, most Hams do not care that they are button pushers. Most even want it that way. Some even resent you for bringing it up. Its too bad they had to show resentment instead of responding to your point of view..

>
>Good idea Gareth. In fact I suggest you take a lead role.
>
>Please go off into a quiet corner and design some projects for beginners-
>and leave the rest of us in peace.

Why the resenment? Amateur radio is a group of activities. Some are interested in one aspect, others in another. Why resent someone because they are interested in designing circuits and want to find others that are also interested in designing?

>> A starting point is the construction of a multimeter. Yes - available
>> off-the-shelf, but an invaluable experience in gaining an
>> in-depth understanding of what Ohm's Law is all about.

Well intentioned idea. However, a much greater usefulness can be achieved if we use test equipment to design something we would like to use, rather than designing the equipment itself. One useful thing to learn would be how to use a grid dip meter.

I would suggest some coil winding projects, making torroids, baluns, transformer matching networks. They are not too expensive, have few parts, and you may be able to do something useful with them right away.

These are projects with few parts, but challenging electronics theory. Once you build and understand these types of circuits, you can gain some very good insight into how radio electronics works.

You have a first-rate burr in your saddle, apparently because things are not 100% your way. Get used to it. Amateur radio is not one hobby but about 489 under one master heading and over a 40 year career one is going to get in and out of various aspects of it as the mood swings.
They also serve who provide a market.

And the truth is the people you want to meet are out doing the things you want to do; one is not likely to meet them on Usenet.

Don't ask me to defend contesting because I can't but it is a valid use of the spectrum and one which does subject gear to a test of stamina. The 500 mile race at Indianapolis (the last Indy 500 was 1994) is completely ridiculous from even a racing viewpoint but it served as a test bed for a lot of things, some of which are equally ridiculous.

Join the Magical Mystery Tour or don't; your choice. But will you quit asking the Tour to join you.

Dick N&#65533;BK

I would not have a problem with using my dual-band HT with MURS . It's
been modded for out-of-band. Same goes for a 440Ht to use on FRS too.
All you need to do is get the shortest antenna possible and use the lowest
power, and noone will even notice.

FAG LAME WIZARD
Lyrics by Lee Jackson Beauregard
(Apologies to The Who)

Ever since I was a young boy, I've roamed these halls of fire.
I've flamed and I've cascaded, I've kindled lots of ire.
But I ain't seen nothin' like him in all of alt dot flame --
That Roger Wiseman sure slings a mean fag lame!

He sniped at Rosenfield with a cry of "Fuck you, kike!"
But the flamers came down on him, and he had to take a hike.
Now he's back on Usenet under yet another name --
The former RaveOn sure slings a mean fag lame!

He's a Fag Lame Wizard, he has to be insane.
A Fag Lame Wizard has such a tiny brain.
Why do you think he does it? (I don't know!)
What makes him so stupid?

He lies and plagiarizes to escape his sordid past.
Then everyone comes over and kicks his fetid ass.
Goes RL on people, doesn't know it's just a game --
That paranoid stalker sure slings a mean fag lame!

He thought he was the alt-dot-flame king,
But he got spanked and and pitched a fit for weeks.

He checks himself for crab lice and fleas and other pests,
Then reaches for his nubbin and Rosie does the rest.
The most pathetic wanker in all of alt dot flame --
That Masturberian sure slings a mean fag lame!

If you're only switching your antennas "several" times per second, you will not get any measurable phase shift. The switching needs to occur at a rate near enough to the actual RF frequency being received, so that it will produce a nearly audible phase shift difference which can then be measured and used to display direction. This will require far more sophisticated circuitry than you are currently attempting to use. You should go to: http://members.aol.com/homingin/newdopant.html for further information.

The FCC does NOT issue Technician Plus licenses; they only list
"Technician" operating privileges for both regular Tech and Tech plus
licenses. e.g. there is no way to differentiate between the two. An
operator with a Tech Plus license better hold on to that CSCE for ever, or
until the license is upgraded to General.

Not correct in this case. My wife is living proof. The CSCE is the only
proof of Technician Plus operating privileges, which are NOT listed on the
FCC license. VECs can, and do honor this CSCE beyond the 365 day period
when a Technician Plus is upgrading to General, or higher class license.

I just recently looked into this for someone.

CSCEs are good for 1 year for UPGRADE purposes. However, they
are good indefinitely for the purpose of showing an upgrade for a privilege.

But, even though in some cases they can show that you added an upgrade
to HF by passing CW for example, they are NOT good for upgrade to
general if over 1 year old. BUT... They ARE valid to show that you
upgraded to Tech Plus IF you upgraded when the Tech Plus was still a
valid license class, even though it is no longer distinguished as a separate
class. That means that IF you have an OLDER CSCE that would show
your Tech License was in fact a Tech Plus at ANY time, then it is still
good as an INDIRECT indication that you can upgrade to General. But
if you have a NEWER but older than 365 day CSCE that was ONLY
for adding HF privileges, then it is NOT good for upgrade, and any VE
that accepts that is in error.

Yeah, I thought it screwy and unfair. But if you go to the ARRL web
page there is a copy of a document from the FCC there that specifically
addresses this issue.

Then just what was that that those Technicians who had passed the code element (or renewed a pre-1991 license in the period) got from 1994-2000? Toilet paper?

The FCC DID issue "Technician Plus" licenses from about June 1994 to April 14, 2000, many of which haven't been superseded and at a minimum, will be valid for at least two more years (July 2004 expirations) and some for just shy of 8 years (April 2010 expirations). The database will still show these licenses until one of three events happens: 1) The holder upgrades. 2) The holder renews. 3) The entry is purged due to either the 2 year beyond grace period expiration or upon voluntary surrender (including that of a decedent's estate notifying the FCC of death).

All I can say is that the Internet can still astonish me as to how many people there are who are just simply CLUELESS as to the things around them.

> Ed WB6SAT

Not true. The 'time of arrival' doppler systems generally switch antennas
at about 2000 times per second. The reason is the distortion generated
by the switching can be passed through the IF of the radio and be detected
on the audio output. When the two antennas being switched between
interact with the radio wave front at the same time, switching between
them produces an output that is identical to either one, and no 'doppler
tone' is generate. As the antennas change in space so that one of them
is 'closer' to the RF source, it introduces a phase modulation at the
switching frequency with an amplitude dependant on the difference of the
wave fronts, leading the radio to think it's a phase modulated signal.

The end result is at the speaker is a tone that matches your switching
rate (hardly RF!) with an amplitude proportional to the degree of phase
distortion from shifting the time of arrival to the antennas (Ie, but
turning
the two antennas).

Just realize, a simple Time of Arrival system can only tell you the AXIS
of the signal, not an absolute direction. You can take a bearing, but it

could be at that heading or 180 degrees on that heading.

>when a Technician Plus is upgrading to General, or higher class license.

Wrong. If they did and it is a CSCE issued April 15, 2000 or later, they made an error. Your wife is operating with privileges that she did not properly earn within the period set forth in the rules and needs to have her general or extra class license downgraded back to technician - and the VE team in question needs to have the FCC audit their records.

The restructuring rules made it clear that there is different treatment of element 1 CSCE's issued before April 15, 2000 and after April 14, 2000 in considering the transition to today's license structure.

According to the people I talked to at the ARRL, if you can show ANY
proof that you had a Tech+ license, even if you renewed and it's NOW
listed as 'Tech', that proof is all you need for showing CW skills for a
potential upgrade to General.

What's even more unfair now, in my opinion, is the way the rules are worded, it could be argued that someone that HAD an old novice license and let it expire, and came back and is now a tech, could produce his old novice license. BUT, a tech that took the 5wpm test over a year ago to get HF is NOT allowed to use an expired CSCE as proof, unless the CSCE was used to upgrade to tech+ before the tech+ went away.

I would suggest that is a good practice to follow anyway, on a
complex piece of equipment. Think about a 4 band 1% resistor.
Brown, Red, Black, Brown. If you weren't paying attention it
could be 1k or 12 ohm. A digital meter will confirm which it is.

By the way, the site you recommended is excellent for info on this, and they quite clearly specify 'audio' switching.

They are a bit unclear on antenna spacing though. Idealy, the best would be 1/4 wavelength or slightly less for best performance at the highest frequency you wish to track. Also, it helps to have resonant antennas. The antennas should definitely be matched, but if you just stick 10" pieces of wire out there, it will still work, just at a much lower sensitivity.

Ditto. During my military physical, after all the really fun stuff, they
sat me in front of the little flip chart and said to name the number I saw
on each card. After the 3rd card, I asked what I was supposed to do again.
After the 5th card I asked if this was some kind of psychology test.

I built the Heath vswr meter and audio filter, a repeater controller, and a
Ten-Tec regen SW. I measured every resistor.

Roger's female "friend" will not care. That is because she engages in some rather strange sexual behavior herself. Besides, she's not like his "date" or anything. She's the bouncer at the local Gay club and Roger hired her to protect him from those Ham Radio guys that show up in front of his house every once in a while.

Wow! Very well done, Mr. Chason! Now Roger has not only his own newsgroup,
his own web page, but he now has his very own theme song!
You don't mind if I change the title just a tad, do you?
I'd like to title it "Rim Job Wizard".

Mike, I believe you are mixing the specs on two different kinds of antenna together, a true doppler system, and a phase detection system. The phase detections system (which you seem to describe below) uses only two antennas and is fairly simple. A doppler system uses 4 or more antennas, and I still believe it is switched at an RF rate, not an audio rate. I will have to check my old documentation on Monday. If I'm wrong, I'll post here, but I don't believe I am.

I stand corrected. I couldn't find any specific reference to the switching rates anywhere on the web, and won't have access to my doppler unit until Mon. July 8, so resorted to the good ole ARRL handbook. Year 2000, page 23.67 clearly indicated a switching rate around 500Hz in their example, so I was clearly in error.

Uh...shouldn't that have been written, "the difference between "AN" ARES
organization? Is your sought after Master's Degree like your Extra Lite
license?
Face it, Wussman. Your endeavor to obtain a Masters degree is just so much
smoke. Yet another of your many lies.

Neither. Tell him his friend Stagger Lee was there and watch Wogie's
reaction! Most likely, Roger would sputter, gasp, and his lame
fingers would start trembling, as if Roger was trying to type out a lame
reply on Usenet.

1354. Email from Marshal County

Newsgroup: rec.radio.amateur.misc

Email from Marshal County WVA tells a story about Wittle Wogie.
he is shunned in the entire community, as some sort of nut case.

Tell us Wogie, how do you maintain your enemies lists? By geographic
location? By name? By age? Incident? Do you keep your list on
your hard drive, on paper, or in your twisted little brain?

where did i mention employment ?

if someone has the ABILITY to get through any amount of degrees then that
person has the ability to apply itself to learning enough 'tunes' to pass
an EASY 5wpm exam.

if thats too hard for anyone to understand then HOW ON EARTH did that
person get a degree ?

(i am now reminded of the ''hey you - yes you .... stand still will ye''
on a pink floyd album and i seem to remember the voice mentioning MILK !)
